

## SECURITY SERVICES MONTHLY JANUARY 2019

### Theft Education

In our September issue of Security Services Monthly, we focused on protecting your mobile devices from theft. These thefts are crimes of opportunity and happen all too often at the University of Manitoba. Security Services takes multiple reports of stolen laptops, cell phones and other mobile devices every month - each time it is because the device has been left unattended.

**Security Services continues to be diligent with our theft education program in order to educate the university community before they become a victim of a mobile device theft.**

Security Services continues to leave Theft Education cards on any unattended belongings that are found during their regular patrols. These cards are intended as a reminder that your expensive mobile devices are not always safe when they are left unattended.

If your mobile device does get stolen, be sure to report it to Security Services. When dealing with lost/found/stolen mobile devices, Security Services collaborates with the IT Security Team from Information Services & Technology. The IT Security Team possesses unique tools and a skillset that facilitates the recovery of lost/stolen mobile devices.

### RECOMMENDATIONS IF YOU ARE VICTIM OF MOBILE DEVICE THEFT

- Contact your cellular provider and report it lost or stolen immediately
- If the device is a U of M owned phone, contact the IST Service Desk (204-474-8600)
- Assume the device is compromised, and change passwords: University accounts, personal email, banking, Dropbox, iTunes, Netflix, etc.
- Try to track its location with Find My Phone or similar tracking application. Report any activity with Wpg Police, Security Services or IT Security
- Notify your Credit Card companies and Banks if you used the device for shopping or banking. They can monitor your accounts for abnormal activity
- Try to remote wipe the device if sensitive data or passwords were stored. IST can help wipe the device, or the user can wipe the device themselves, if the device is linked to your Outlook Web Access account and is ONLINE. If the device is not ONLINE it will be wiped at next connection to the Exchange Email system
