### 2007 WASTE DISPOSAL CALENDAR
**BANNATYNE CAMPUS**

The Environmental Health & Safety Office will accept radioactive and hazardous waste on the second and fourth Thursday of every month.

**Radioactive waste** from the Bannatyne Campus and MICB will be accepted between 9:00 and 10:00 AM at Room T041 Basic Science Building (the “old” Basic Science Building).

Bring radioactive waste packaged and labelled as outlined in the Radiation Safety Manual.

**Effective January 1, 2003** no radioactive liquid waste disposal by drain is permitted.

**Do not put old or empty radioactive stock vials in solid waste.** Stock vials must be packaged separately in a small box with a corresponding Radioisotope Inventory Form(s). Please attach the Radioactive Waste tags to the sides of boxes and containers, as they are stacked or placed on shelves and this would allow easier identification. **Please attach the tags to bottles of liquid with string or twine.** Do not use tape or elastics as they dry out and the tags fall off.

**Hazardous waste** will be accepted between 11:00 and 12:00 in room T152 Basic Science Building. (Alternate arrangements may be possible. Contact the **Assistant Hazardous Waste Co-ordinator at 474-6970**.) Chemical waste should be packaged in a sturdy box. **Only compatible chemicals (as outlined in the Controlled Products Standard) should be packaged together. Potentially unstable chemicals must only be transported if deemed safe by the hazardous waste program.** Please contact the Assistant Hazardous Waste Coordinator at 474-6970 for assistance.

**ALL WASTES SHOULD BE TRANSPORTED in secondary container, which is spill proof, and of suitable capacity. Transport wastes with an appropriate cart.** Use the service elevator instead of passenger elevators when available.

Thank you for your co-operation.
