The following is a list of recommended reading to prepare for the Radiation Safety Workshop at The University of Manitoba. Please let me know if you found this list useful – and especially if there are topics covered at the workshop that you would like to see added for future students!

Sincerely, Leona Page, Radiation Safety Coordinator, 789-3613 Fax 789-3906

A. In the Radiation Safety Manual, University of Manitoba, 1997
1. Waste Disposal, Radioisotope Standard Operating Procedure #30 found in the Addendum 12/02 (tan colored paper at the front on the yellow Radiation Safety Manual, University of Manitoba binder
2. Radiation Emergency Response, on the salmon (light orange) color page
3. Introduction to Radioactivity, pages 1-6
4. Health Effects Associated with Radiation Exposure, pages 7-9
5. Radiation Safety Records Binder and Required Documentation, page 23
6. Radioisotope Inventory, page 25-28
7. Contamination Monitoring, page 29-34
8. Handling Procedures, page 40-44
9. Dosimetry, pages 45-46

10. UofM Radiation Procedures Checklist, page 60 ← This is the most recommended! I suggest you start here and if you have questions read the corresponding section as listed above.

B. Practicum handout (See EHSO Rad Web Page)
