“Dual anti-platelet therapy after ACS—what combination and duration of therapy?”

Section of Cardiology

OBJECTIVES:

- discuss rationale for DAPT and key clinical trial evidence supporting its use after ACS
- review new clinical trial evidence for the management of ACS patients undergoing PCI who also have atrial fibrillation
- address how best to integrate evidence into practice and individualize the potency and duration of DAPT in ACS patients

Dr. Michael P. Love MB ChB MRCP MD
Professor of Medicine, University of Manitoba
Interventional Cardiologist, St. Boniface Hospital
