

Upcoming Fall 2015 Grant Deadlines

(as of July 29, 2015)

This listing is limited to the more common grants to which FCRM faculty tend to apply and is not meant to be exhaustive or replace the information distributed by the Office of Research Services. It is the responsibility of the researcher to determine eligibility and follow the guidelines for each application. We recommend attending sessions related to each funding agency's funding opportunities. Please see the ORS website for more information: <http://umanitoba.ca/research/ors/index.html>

All applications require signatures. Please refer to the "FCRM Internal Grant Application Approval Process" document for more information. As a general "rule of thumb," applications are due to FCRM two weeks (10 business days) prior to the ORS deadline. If you require any special approval for your research such as requests for space, changes in teaching, applying for a teaching buy-out, etc. please have this done no less than 2 weeks prior to the FCRM deadline. Please see Todd Duhamel, Associate Dean (Research & Graduate Studies) to obtain information on approvals. Please see the table below.

Frequently Asked Questions (FAQ):

Q: The grant I'm applying to isn't listed in the table. Do I still need to do an FCRM Internal Review?

A: Yes! All research grants should go through the same internal review process. The table only lists a few common grants but is not comprehensive.

Q: What do you need for an FCRM internal review?

A: Please submit all materials you would submit for the grant plus the **Funding Application Approval Form (FAAF):** http://umanitoba.ca/research/ors/media/Funding_Application_Approval_Form.pdf (not required for internal grants). This usually includes the application form, proposal, budget, budget justification, letters of support (if applicable), attachments, and CV. If any of these pieces are missing, it will hold up the process. The more information you provide, the more thorough the review.

Q: Why do we have to submit our research grants one-two week(s) before the ORS deadline?

A: This gives us enough time to provide a review of your grant and obtain all the required signatures. Sometimes it can take a few days just to get one signature! If your complete grant application is late, the review will be less thorough; however a review will still be done.

Q: I'm a Co-Investigator/Investigator on a grant with researchers from another department/university. Do I still need to do a FAAF through FCRM?

A: No, not anymore. However, we want to keep track of your grant success. Please provide us with a copy of all of your successful grant applications on which you are a Co-Investigator/Investigator.

Q: How can I get a pre-review of my application from my peers?

A: If you would like your application for external funding to undergo an extensive peer review, please contact Nicole 2 to 3 months prior to the FCRM deadline to make arrangements. This may be particularly helpful for researchers who are re-submitting an application. Grant facilitators and Officers are also helpful in providing pre-reviews (this would not necessarily be the same as a peer review).
