Case Study Name:	Community-based and co-management institutions for sustainable coastal fisheries management in Southeast Asia		
Author:	Robert S. Pomeroy		
Document Type:	Paper in a scientific journal		
Year:	1995		
Language:	English		
Document Location:	Ocean & Coastal Management, doi:10.1016/0964-5691(95)00042-9		
Full Citation:	Pomeroy, R.S. 1995. Community-based and co-management institutions for sustainable coastal fisheries management in southeast Asia. Ocean & Coastal Management, Vol 27. No. 3, pp. 143-162.		
Region:	Southeast Asia		
Country:	/		
Ecosystem Type:	Aquatic, coastal fisheries		
Social Characteristics:	Coastal community		
Scale of Study:	National, community		
Resource Type:	fisheries		
Type of Initiative:	Government driven		
Community Based Work:	Fisheries management, environmental management, sustainable governance		

Keywords:	Fisheries, environmental, governance, social, cultural, sustainable
Summary:	Fisheries experts now recognize that resource conflicts can be diminished and resources better managed when fishers and other resource stakeholders are more involved in management, and access rights are distributed more effectively and equitably. There is an increasing commitment by governments in Southeast Asia to policies and programs of decentralization and community-based management and co-management. The planning and implementation of these management systems will require the development of new legal, administrative and institutional arrangements at both national and community levels to complement contemporary political, economic, social and cultural structures.
