Case Study Name:	Community-based and co-management institutions for sustainable coastal fisheries management in Southeast Asia		
Author:	Robert S. Pomeroy		
Document Type:	Paper in Scientific journal		
Year:	1995		
Language:	English		
Document Location:	http://www.sciencedirect.com/science/article/pii/0964569195000429		
Full Citation:	Pomeroy, R.S.(1995) Community-based and co-management institutions for sustainable coastal fisheries management in Southeast, Ocean & Coastal Management Volume 27, Issue 3, 1995, Pages 143-162		
Region:	Southeast Asia		
Country:	Philippines		
Ecosystem Type:	Aquatic		
Social Characteristics:	Coastal communities		
Scale of Study:	Global		
Resource Type:	Fisheries		

Type of Initiative:	Research driven project
Community Based Work:	Co-management
Keywords:	Co-management, Community-based resources management, Fisheries
Summary:	Fisheries experts now recognize that resource conflicts can be diminished and resources better managed when fishers and other resource stakeholders are more involved in management, and access rights are distributed more effectively and equitably. There is an increasing commitment by governments in Southeast Asia to policies and programs of decentralization and community-based management and co-management. The planning and implementation of these management systems will require the development of new legal administrative and institutional arrangements at both national and community levels to complement contemporary political, economic, social and cultural structures.
