Case Study Name:	Engaging Simplifications: Community-Based Resource Management, Market Processes and State Agendas in Upland Southeast Asia		
Author:	Tania Murray Li		
Document Type:	Paper in scientific journal		
Year:	2002		
Language:	English		
Document Location:	http://www.sciencedirect.com/science/article/pii/S0305750X01001036		
Full Citation:	Li, T.M. (2002) Engaging Simplifications: Community-Based Resource Management, Market Processes and State Agendas in Upland Southeast Asia, <i>World Development</i> Volume 30, Issue 2, February 2002, Pages 265-283		
Region:	Southeast Asia		
Country:	Indonesia; Philippines		
Ecosystem Type:	Tropical		
Social Characteristics:	Upland communities		
Scale of Study:	Regional		
Resource Type:	Biodiversity, forestry		
Type of Initiative:	Research driven		

Community Based Work:	Resources management
Keywords:	community; agricultural intensification; state power; citizenship; conservation; Indonesia; Philippines
Summary:	<p>the struggle to secure resource rights for rural populations who gain their livelihoods from state-claimed lands, advocacy agendas highlight community interest in, and capacity for, sustainable resource management. In the uplands of Southeast Asia, the strategic simplifications of community-based natural resource management (CBNRM) advocacy are being translated into legal frameworks and program initiatives which make rights conditional upon particular forms of social organization and livelihood, as well as conservation outcomes. When set in the context of agricultural intensification among both indigenous and migrant populations, and the desire of many upland dwellers to claim the benefits of a fuller citizenship, CBNRM offers a problematic basis for justice</p>
