Complexity and other system measures and analysis, system architectures and architectural elements for embedded systems, hardware and software, incremental design elaboration. Coding, testing, debugging, verification and validation. Project planning, cost analysis and management. Real-time systems, graphical user interfaces and computational models. Prerequisite: COMP 2140.

ECE 3750 Systems Engineering Principles 2 Cr. Hrs. 4
Reliability measures and analysis, software system architectures, system metrics, system verification for embedded systems. Coding practices for large scale embedded system development. Real-time systems, graphical user interfaces, and computational models. Prerequisite: ECE 3740.

ECE 3760 Digital Systems Design 1 Cr. Hrs. 4
Design methodologies for the development of digital hardware, including system specification, component allocation, functional partitioning, specification refinement, implementation, verification, and testing. Hardware-software co-design. Prerequisite: ECE 4240.

ECE 3770 Digital Systems Design 2 Cr. Hrs. 4
Executable system specification and a methodology for system partitioning and refinement into system-level components. Models and architectures, specification languages, translation to an HDL, system partitioning, design quality estimation, specification refinement into synthesizable models. Prerequisite: ECE 4240 and MATH 3120.

ECE 3780 Signal Processing 1 Cr. Hrs. 4
Introduction to signals and systems; spectral analysis (Fourier Series) of continuous-time periodic signals; spectral analysis of aperiodic signals (Fourier Transform); the impulse response and convolution operator; frequency analysis of linear time-invariant systems; applications to filtering, communications systems, and biological systems; A/D conversion; sampling. Laboratory periods will be used to give students hands-on experience in programming many of the techniques covered in the theoretical parts of the course. Prerequisites: ECE 2262 or ECE 2260 and MATH 3132 or MATH 3100.

ECE 3790 Engineering Algorithms Cr. Hrs. 4
Numerical algorithms, optimization, statistical description of data random number generation, string processing, geometric algorithms, algorithm machines, dynamic programming and NP complete problems. Pre- or Corequisite: Comp 2140 and Math 3132 (or the former Math 3100).

4.9.2 Electrical and Computer Engineering Course Descriptions-4000 Level

ECE 4100 Introduction to Microelectronic Fabrication Cr. Hrs. 4
Introduction to the fabrication of integrated circuits (ICs). Emphasis is on silicon based devices. Topics include water preparation, oxidation, thin film deposition, diffusion and ion implantation, lithography, wet and dry etching and mettallization. An introduction to MEMS and micromachining technology is given. Prerequisite: ECE 3670.

ECE 4140 Power Transmission Lines; Field Effects and Insulation Coordination Cr. Hrs. 4
AC and DC transmission line corona and its environmental effects. Electric field calculations; design methods to reduce electric field. Electrostatic and electromagnetic effects. Insulation design for power frequency, switching and lightning induced surges. Insulation coordination - conventional and probabilistic methods. Power apparatus testing - criteria and significance. Prerequisite: ECE 3720.

ECE 4150 Control Systems Cr. Hrs. 4
Principal methods of analysis and design for feedback control systems. Prerequisite: ECE 2160 and ECE 3780.

ECE 4160 Control Engineering Cr. Hrs. 4
Design of control systems by frequency domain and root locus method; state equations; introduction to nonlinear analysis. Prerequisite: ECE 4150.

ECE 4180 Introduction to Robotics Cr. Hrs. 4
This course provides fundamental concepts of robotics, including robot classification and applications, robot kinematics, sensor and actuators, sensor interfacing, motor control, trajectory planning, and robot programming. Prerequisites: ECE 4150 and (ECE 4240 or ECE 3730).

ECE 4200 Electric Filter Design Cr. Hrs. 4
Realizability theory, approximation of filtering characteristics, ladder networks and transmission zeros, active RC filter design with regard to sensitivity minimization, phase-shifting and time-delay filters, impulse response of filters, rudiments of digital filters. Prerequisite: ECE 3540 (or ECE 3530).

ECE 4240 Microprocessor Interfacing Cr. Hrs. 4
Interfacing of microcomputers to the external world: interfacing of I/O devices with minimum hardware and software; data acquisition with and without microprocessors; data communication, transmission and logging with small computers. Prerequisite: ECE 2160 and ECE 3610.

ECE 4250 Digital Communications Cr. Hrs. 4
Transmission of digital data; error rates, interference. Information measures, information rate and channel capacity. Coding. Prerequisite: ECE 4260 and ECE 3780.

ECE 4260 Communications Systems Cr. Hrs. 4
Development and applications of random processes. Analysis and comparison of modulation schemes: AM, FM, PM, PCM. Prerequisites: ECE 3780 and STAT 2220.

ECE 4270 Antennas Cr. Hrs. 4
Radiation fundamentals, linear antennas, point source arrays, aperture antennas, antenna impedance, antenna systems. Prerequisite: ECE 3590.

ECE 4280 Engineering Electromagnetics Cr. Hrs. 4

Plane, cylindrical and spherical waves, introduction to scattering and diffraction, waveguides, transmission line applications. Prerequisite: ECE 3590.

**ECE 4290 Microwave Engineering**  Cr. Hrs. 4
Microwave circuit analysis; passive and active devices; communication system power budget and signal-to-noise ratio calculations. Prerequisite: ECE 3590.

**ECE 4300 Electrical Energy Systems 1**  Cr. Hrs. 4
(Formerly 024.430) Power system component modelling and computational methods for system problems such as load flow, faults, and stability. Prerequisite: ECE 3650 (or 024.365).

**ECE 4310 Electrical Energy Systems 2**  Cr. Hrs. 4
(Lab required) Generating stations. Power system stability and optimal operation. EHV-ac and HVDC power transmission. Power system protective relaying and reliability evaluation. Prerequisites: ECE 4150 and ECE 4300.

**ECE 4360 High Voltage Engineering**  Cr. Hrs. 4
The course serves as an introduction to high voltage engineering, including basics of electrical breakdown, high voltage generation, high voltage test systems, measurement and analysis techniques as applied to power system apparatus, such as cables, insulators, transformers, and generators. Prerequisite: ECE 3580, ECE 3720.

**ECE 4370 Power Electronics**  Cr. Hrs. 4
Thyristor device theory and operation, controlled rectifiers and line-commutated inverters, and forced commutation as applied to d/c choppers and a/c variable frequency and voltage inverters. Prerequisites: ECE 3720 and ECE 2160.

**ECE 4390 Engineering Computations 4E**  Cr. Hrs. 4

**ECE 4420 Digital Control**  Cr. Hrs. 4
(Formerly 024.442) Mathematical modelling of sampling switches. Z-transforms. Response and stability of systems involving sampling. Design of digital compensators. Prerequisites: ECE 4830 (or 024.483) or 024.373 and ECE 4150 (or 024.415).

**ECE 4440 Computer Vision**  Cr. Hrs. 4
Image formation and sensing, image compression, degradation and restoration, geometrical and topological properties, pattern classification, segmentation procedures, line-drawing images, texture analysis, 3-D image processing. Prerequisite: ECE 3780.

**ECE 4520 Simulation and Modelling**  Cr. Hrs. 4
Monte Carlo Methods, random processes, simulation of complex systems in the design of computer systems. Use of statistical interference and measures of performance in hardware and software systems. Prerequisites: STAT 2220 and COMP 2140.

**ECE 4530 Parallel Processing**  Cr. Hrs. 4
Classification of parallel processors, SIMD vs. MIMD, multiprocessing Vs parallel processing, interconnection topology, communications, and node complexity, pipelining and vector processors, array processors, connection machines, multiprocessors, data flow and VLSI algorithmic machines. Prerequisites: COMP 2140 and ECE 3760.

**ECE 4540 Optoelectronics**  Cr. Hrs. 4
Basic theory of quantum mechanics; solution of Schrodinger equations; interaction of radiation with matter; masers and lasers; propagation, modulation, excitation and detection in optical waveguides; introduction to fiber and integrated optics. Prerequisite: ECE 3600.

**ECE 4600 Group Design Project**  Cr. Hrs. 6
The engineering curriculum must culminate in a significant design experience which is based on the knowledge and skills acquired in earlier course work and which gives students an exposure to the concepts of team work and project management. Prerequisites: [ENG 2030 or ENG 2040 or the former ENG 2010] and ECE 3780 and (ECE 3580 (or the former ECE 2130), ECE 3720, ECE 3670 and ECE 3610) or (ECE 3700, ECE 3760 and ECE 3740]).

**ECE 4610 Biomedical Instrumentation and Signal Processing**  Cr. Hrs. 4
Introduction to biological systems and the application of engineering principles to medical problems. Students design systems to acquire and analyze biological signals in the laboratory. Content includes introduction to relevant physiology and anatomy of cells, skeletal muscles, heart and cardiovascular systems, human balance and biomechanics, recording and analyzing biological signals (ECG, EMG, respiratory sounds), design of instrumentation amplifiers for signal conditioning, medical instrumentation safety and health hazards. Prerequisites: ECE 2160 and ECE 3780.

**ECE 4740 Digital Systems Implementation**  Cr. Hrs. 4
Implementation methodologies and technologies for digital systems, including VLSI implementations, PCB implementations, and rapid prototyping (FPGA). Prerequisite: ECE 4240. Not to be held with ECE 4500.

**ECE 4830 Signal Processing 2**  Cr. Hrs. 4
Representation of discrete-time signals and systems in the time and frequency domains; the z-transform; application to various discrete-time linear time-invariant systems; design of digital filters. Laboratory periods will be used to give students hands-on experience in programming many of the techniques covered in the theoretical parts of the course. Prerequisite: ECE 3780.

**ECE 4850 Topics in Electrical and Computer Engineering 1**  Cr. Hrs. 4
This course will cover contemporary topics in Electrical and Computer Engineering via lectures and laboratory sessions. The specific topics and a detailed course outline will be available at the time of registration. Prerequisite: Permission of the Department.

**ECE 4860 Topics in Electrical and Computer Engineering 2**  Cr. Hrs. 4
This course will cover contemporary topics in Electrical and Computer Engineering via lectures and laboratory sessions. The specific topics and a detailed course outline will be available at the time of registration. Prerequisite: Permission of the Department.

**ECE 4870 Topics in Electrical and Computer Engineering 3**  Cr. Hrs. 3
This lecture based course will cover contemporary topics in Electrical and Computer Engineering. The specific topics and a detailed course outline...
will be available at the time of registration. Prerequisite: Permission of the Department.

**ECE 4880 Topics in Electrical and Computer Engineering 4**

This lecture based course will cover contemporary topics in Electrical and Computer Engineering. The specific topics and a detailed course outline will be available at the time of registration. Prerequisite: Permission of the Department.

### 4.10 Mechanical Engineering

**Head:** Dr. David Kuhn, P.Eng., Head

**Associate Head(s):** Dr. Paul Labossiere, P.Eng. (Undergraduate Programs)
Dr. M. Tachie, P.Eng. (Graduate Programs)

**Campus Address/General Office:** E2-327 EITC

**Telephone:** 204 474 7358/6630

**Fax:** 204 275 7507

**Website:** [http://umanitoba.ca/faculties/engineering/departments/mechanical](http://umanitoba.ca/faculties/engineering/departments/mechanical)

The Department of Mechanical Engineering offers a fully accredited degree program. Students entering the Mechanical Engineering program may specialize in an option in Aerospace, or a stream in Aerospace, Materials, Solid Mechanics, or Thermofluids. Students are urged to consult appropriate program requirements shown for each option/stream.

The Mechanical Engineering program provides the education required by those who wish to practice in Mechanical Engineering that embraces, among other subdivisions, the design of mechanical devices and systems, manufacturing engineering and management, computer-aided design and computer-aided manufacturing, power generation and utilization, air conditioning, the material sciences, and the aeronautical sciences.

The Mechanical Engineering Program offers basic training in the sciences, mathematics and fundamental engineering subjects followed by more specialized discipline-related subjects. Students are allowed to choose technical electives to suit their career objectives and are also required to take complementary studies electives related to social issues.

**Co-operative Education Programs**

Please refer to SECTION 5: Co-operative Education and Industrial Internship Programs.

### 4.10.1 Mechanical Engineering Program

**Preliminary Engineering Program** - Common to all Engineering Programs. (See Section 4.2 for details.)

**NOTES:**

1. A student’s selection and timetabling of electives are subject to the following conditions:
   a. Only one complementary elective (CE) is required upon completion of Critical Thinking (PHIL 1290), which is recommended but not required; students may choose an alternate course from the Faculties of Arts or Management at the 1000 level or above, and one course from the approved list of Written English Courses for Engineering Students in the Preliminary Engineering Program (see Section 4.2).
   b. The complementary elective (CE) can be any course at the 1000-level or above from the faculties of Arts or Management. However, ARTS 1110 Introduction to University may not be used for credit in the Faculty of Engineering.

2. For courses continuing through both terms, credit is given on completion of course.

3. A minimum of 20 credit hours of technical electives is required with 18 hours required if completing MECH 4162 the Mechanical Engineering
Thesis Course (5 courses at 4 credit hours each or 3 courses at 4 credit hours each plus MECH 4162 at 6 credit hours).

### 4.10.2 Aerospace Option

Complete all 3 TEs in LIST A. Choose the remaining two TEs from LIST B. Some courses in LIST B will be offered in alternating years.

MECH 4900 Mechatronics System Design 4

NOTES:
1. The Department of Mechanical Engineering may not be able to offer all technical electives listed above. Students are urged to consult the Mechanical Engineering office for a current list of technical electives.
2. Students must be in their graduating year to register for MECH 4162 Thesis.

4.10.8 Mechanical Engineering Course Descriptions-2000 Level

MECH 2112 Fundamentals of Mechanical and Computer Aided Design 4

(1ab required) Provide instruction on the application of computer aided design software packages. The students will work in groups in the design and development of a product using CAD packages and digital fabrication technologies. May not be held for credit with CIVL 2830, the former ENG 2020, ENG 2022, MECH 2010, or MECH 2012. Prerequisite: ENG 1430.

MECH 2150 Mechanical Engineering Modelling and Numerical Methods 4

A case-study-based introduction to modelling and numerical methods with mechanical engineering applications. Selected problems, primarily from second and third year mechanical engineering course material, will be used to teach modelling. Derivation and application of appropriate numerical methods will be performed to solve the case study problems using a hands-on approach. A high level computer language and accompanying toolkit/built-in functions will be introduced for solution of the cases. May not be held for credit with MATH 2120. Prerequisites: COMP 1012 or COMP 1013. Pre- or Corequisites: MATH 2132 and (MECH 2262 or BIOE 2790 or CIVL 2790).

MECH 2202 Thermodynamics 4

Cycles, transient flow processes, entropy, gas mixtures, psychrometry combustion. Prerequisites: ENG 1460, (MATH 1500 or MATH 1510 and MATH 1700 or MATH 1710). Not to be held for credit with MECH 2200.

MECH 2222 Mechanics of Materials 4

Topics covered in this course include: axial and torsional loading, stress-strain and deformation in statically determinate/indeterminate systems, thermally induced stress, and stresses in beams (including reinforced beams) under pure bending and bending with shear. The mechanical properties of materials under various loading modes will be addressed. Prerequisites: [PHYS 1050] and [ENG 1440 or ENG 1441 (ENG 1350)] and COMP 1012 and (MATH 1710 or MATH 1700).

MECH 2262 Fundamentals of Fluid Mechanics 4

Fundamental concepts used in the analysis of fluid behaviour, pressure in stationary fluids, forces on submerged surfaces, buoyancy, integral methods, Bernoulli equation, pipeline analysis. May not be held for credit with the former MECH 2260. Prerequisites: PHYS 1050 and ENG 1440 and ENG 1460 and MATH 2130 (or the former MATH 2110). Pre or Co requisite: MATH 2132 (or the former MATH 2100).

MECH 2272 Engineering Materials 1 4

Introduction to engineering materials; defects, strengthening mechanisms, and plasticity in engineering metals and alloys; fundamentals and application of heat treatment of metallic materials including topics such as diffusion, phase diagram, phase transformation, and thermal processing; mechanical properties of engineering metallic materials and their relationship to structure, defects, various strengthening mechanisms, and processing; structure of non-metallic polymers and ceramics. Prerequisites; [CHEM 2240 or CHEM 1310] and (MECH 2222 or MECH 2220). May not be held for credit with MECH 2270, MECH 2290 or MECH 3540.

4.10.9 Mechanical Engineering Course Descriptions-3000 Level

MECH 3170 Project Management 4

(1ab required) Topics covered include project planning, scheduling, resource allocation, process analysis, layout and control. The course will make use of industrial projects for developing a strong design and analytical approach pertinent to project management. May not be held with the former MECH 4170. Prerequisite: MECH 2112 (or the former MECH 2010 or the former MECH 2012) or CIVL 2830.

MECH 3420 Vibrations and Acoustics 4

Vibrations and computer simulations of single-degree-of-freedom systems, viscous and friction damping, MD of systems and modal analysis, measurement and sources of noise, noise control. Prerequisites: MECH 3482
MECH 3430 Measurements and Control Cr. Hrs. 4
Mathematical modelling of mechanical systems. Feedback systems and stability. Digital control; analog to digital and digital to analog control systems. Prerequisites: MATH 3132 (or MATH 3100) and ENG 1450 (or 130.118).

MECH 3460 Heat Transfer Cr. Hrs. 4
(Lab required) This is the first course in heat transfer. Topics covered include fundamental concepts relevant to heat transfer analysis, steady-state and transient conduction, forced and free convection, external and internal flows, heat exchangers and fundamentals of radiation. May not be held for credit with the former MECH 3470. Prerequisites: MECH 2150, MATH 3132 (or the former MATH 3100) and ENG 1460. Pre- or corequisite: MECH 3492 (or the former MECH 3490).

MECH 3492 Fluid Mechanics and Applications Cr. Hrs. 4
(Lab required) The angular momentum principle, introduction to differential analysis of fluid motion, internal and external incompressible viscous flow, fluid machinery and multiple-path systems, fluid coupling and torque couplings and torque converters. May not be held with the former MECH 3490. Prerequisite: MECH 2262 (or the former MECH 2260). Pre- or Corequisite: MECH 2150 or CIVL 3590 or MATH 2120.

MECH 3502 Stress Analysis and Design Cr. Hrs. 4
Strength and stability of columns, torsion of thin-walled members, unsymmetric loading and shear centers, beam deflection and energy methods. Prerequisites: MECH 2222 (formerly MECH 2220), and MATH 2130 (formerly MATH 2110). May not be held for credit with MECH 2220 or MECH 3500.

MECH 3520 Aerodynamics Cr. Hrs. 4
Aeronautical definitions, compressible flow, plane normal shock waves, Mach no. and shock waves in two-dimensional flow, potential flow theory in two-dimensional and axisymmetric flows. Two-dimensional wing theory, finite wing theory panel methods, elements of boundary layer theory. Compressibility and wings, wing design, flow control. Prerequisite: MECH 3492 (MECH 3490).

MECH 3542 Engineering Materials 2 Cr. Hrs. 4
Mechanical properties of engineering non-metallic materials such as polymers, ceramics and composites, and their relationship to structure and processing; introduction to various shaping and joining processes used in manufacturing, their advantages and limitations; selection and application of engineering materials. Prerequisites: MECH 2272 (formerly MECH 2270). May not be held for credit with MECH 2270, MECH 2290 or MECH 3540.

MECH 3550 Robotics and Computer Numerical Control Cr. Hrs. 4
(Lab required) This course builds up a foundation in the area of Computer Aided Manufacturing (CAM) such as computer numerically controlled machine tools and robotics. Intense hands on experience is provided in the laboratory sessions on part programming using Computer Aided Design (CAD) packages and robots to demonstrate application in the area of CAM. Several case studies and manufacturing applications will be discussed.

MECH 3562 Introduction to Optimization Cr. Hrs.
(Lab required) The objective of this course is to develop the ability to formulate and analyze problems that will be encountered in a manufacturing system. The skills acquired will allow the students to approach problems from an optimization perspective. The students will be provided experience in related software packages. May not be held for credit with the former MECH 3560. Prerequisites: MECH 2112 or the former MECH 2010 or the former MECH 2012 or CIVL 2830 and STAT 2220.

MECH 3570 Manufacturing Automation Cr. Hrs. 4
This course builds upon the foundation developed in a previous course: namely Robotics and Computer Numerical Control. The course covers a wide variety of topics in the area of computer controlled automation. The students are provided with hands on experience in design for automation. It will synthesize several aspects associated with integrated operation of computer controlled automated devices. Prerequisite: MECH 3550.

MECH 3582 Manufacturing Planning and Quality Control Cr. Hrs. 4
(Lab required) The course covers topics such as: group technology, just-in-time, computer aided process planning, statistical process control and manufacturing planning and control. Issues related to the integration of several areas that fall within CIM are emphasized. Systems approach is introduced. May not be held with the former MECH 3580. Prerequisite: MECH 2112 (or the former MECH 2010 or the former MECH 2012) or CIVL 2830.

MECH 3592 Simulation Modeling and Facility Planning Cr. Hrs. 4
(Lab required) The objective of this course is to introduce simulation for manufacturing operations and the concepts of facilities location and layout. The students will learn how to program WITNESS, a simulation language, and through simulation, explore the effects of facility planning; resource availability e.g. machines and quality related problems on manufacturing productivity and timing. May not be held with MECH 3590. Prerequisite: MECH 2112 (or the former MECH 2010 or the former MECH 2012) or CIVL 2830.

MECH 3602 Manufacturing Process Fundamentals Cr. Hrs. 4
(Lab required) This course will give students hands on experience with numerous manufacturing processes, machines and systems. Using CNC mills, lathes, conventional machine shop equipment and hand tools, the students will manufacture mechanical components, assemble them and troubleshoot any problems. The object is to provide students with hands-on exposure to the application of basic manufacturing process tools. May not be held for credit with MECH 3600. Prerequisite: MECH 2112 (or the former MECH 2010 or the former MECH 2012) or CIVL 2830.

MECH 3652 Machine Design Cr. Hrs. 4
(Lab required) Stress and failure analysis and the design of machine elements: shafts and couplings, threaded fasteners and power screws, clutches and power transmission components; spur, bevel, worm and helical gears; lubrication, journal and roller bearings May not be held for credit with MECH 4650. Prerequisites: (MECH 3482 or the former MECH 2120) and (MECH 3502 or the former MECH 3500).

MECH 3982 Mechanical Laboratories in Solid Mechanics Cr. Hrs. 2
(Lab required) Laboratory course on topics that compliment and reinforce concepts developed in second and third year mechanical engineering courses in mechanics of solids and structures, and vibrations. May not be held for credit with the former MECH 3980, MECH 4980, or MECH 4990. Prerequisites: (ENG 2030 or ENG 2040 or the former ENG 2010) and (MECH 3482 or the former MECH 3480) and (MATH 2130 or the former MATH 3100).
### 4.10.10 Mechanical Engineering Course Descriptions - 4000 Level

<td>Systems Engineering</td>
<td>4</td>
<td></td>
<td>(Lab required) The engineering support process as applied to the entire product life cycle from requirements definition to disposal. Focus on the system as a whole; from the outside, its interaction with its environment and other systems; and from the inside, its design requirements and implementation. May not be held with MECH 4342 when titled “Systems Engineering.” Restricted to students in third year or above.</td>
</tr>
<tr>
<td>MECH 4452</td>
<td>Aircraft Performance, Dynamics and Design</td>
<td>4</td>
<td></td>
<td>A study of the morphology of aerospace vehicles; basic components and their functions, Aircraft performance; drag, thrust, lift, basics of orbital mechanics. Prerequisites: MECH 3520. May not be held for credit with MECH 4450.</td>
</tr>
<tr>
<td>MECH 4472</td>
<td>Mechanical Vibration</td>
<td>4</td>
<td></td>
<td>Nonlinear Vibrations: mathematical theory for lumped vibratory systems; response of systems to nonharmonic excitation; solutions by Laplace transforms and Fourier analysis; introduction to the matrix formulation of vibration problems and vibration of distributed systems. Prerequisite: MECH 3420.</td>
</tr>
<tr>
<td>MECH 4482</td>
<td>Applied Aerospace Instrumentation</td>
<td>4</td>
<td></td>
<td>(Lab required) Principles and practices of test and measurement system design and analysis for aerospace applications. Topics include transducers, signal conditioning, data acquisition and analysis, uncertainty analysis,</td>
</tr>
</tbody>
</table>
calibration and correlation, system design and maintenance, and piping and instrumentation diagrams, and an introduction to LabVIEW software. This course may include a field trip component. May not be held for credit with MECH 4322 when titled “Applied Instrumentation”. Prerequisites: MECH 3430 and ([MECH 3982 and MECH 3992] or the former MECH 3980 or (the former MECH 3980 and the former MECH 3990)).

**MECH 4510 Fundamentals of Finite Element Analysis**  
**Cr. Hrs. 4**  
(Lab required) Fundamentals of the Finite Element Method, basic components in a Finite Element procedure, application of FEM to solve engineering problems and use of commercial software. Prerequisites: (MECH 2150 or MATH 2120) and (MATH 3132 or MATH 3100) and MECH 2222 (or the former MECH 2220).

**MECH 4532 Advanced Strength of Materials**  
**Cr. Hrs. 4**  
Stress and strain in three dimensions; thick walled cylinders, beams of elastic foundations, unsymmetrical bending and sheet-stringer construction, curved beams. Additional topics such as the analysis of fibre-composite material, techniques in experimental stress analysis and studies in metals fatigue may be presented prerequisite: MECH 3502 (formerly MECH 3500). May not be held for credit with MECH 4530.

**MECH 4542 Principles of Turbomachinery**  
**Cr. Hrs. 4**  
(Lab required) Principles and design of turbomachinery, including fluid dynamics, thermodynamics and engineering applications. A variety of turbomachines are introduced, including hydraulic pumps and turbines, centrifugal compressors and fans, and axial flow compressors and fans. May not be held for credit with MECH 4310 when titled “Turbomachinery.” Prerequisites: MECH 2202 (or the former MECH 2200) and MECH 3492 (or the former MECH 3490).

**MECH 4550 Noise Control**  
**Cr. Hrs. 4**  
An elective course open to all branches of Engineering; a recommended course for students taking Air Conditioning. Wave propagation, transducers and measurement techniques, psycho-acoustic criteria, legislation, techniques of noise and vibration control.

**MECH 4560 Selected Topics in Fluid Mechanics 4M**  
**Cr. Hrs. 4**  
(Lab required) Topics may include: wind tunnel design; experimental techniques; some exact solutions of the conservation equations; fundamentals of turbulence; secondary flows; fluidization; elementary meteorology; fluids; other topics of current interest. Prerequisites: [MATH 3132 or the former MATH 3100] and [MECH 3492 or the former MECH 3490].

**MECH 4582 Vehicle Testing, Condition Monitoring, and Fault Analysis**  
**Cr. Hrs. 4**  
(Lab required) General testing and fault diagnostic techniques for ground vehicles including common signal analysis techniques, vibration testing and fault analysis methods. Basic knowledge of vibration based condition monitoring including the basic theory and applications of engineering tools, damage analysis and detection, and modal analysis. May not be held with MECH 4322 when titled “Ground Vehicle Testing Technology.” Prerequisite: MECH 3420.

**MECH 4620 Corrosion of Metals and Alloys**  
**Cr. Hrs. 4**  
Electrochemical basis of corrosion, corrosion prevention by cathodic protection, inhibitors, alloying and heat treatment, passivation, stress corrosion cracking, corrosion fatigue; ionic and electronic conduction; oxidation of metals and alloys. Prerequisite: MECH 3542 (or MECH 3540).

**MECH 4672 Advanced Mechanism Design**  
**Cr. Hrs. 4**  
Graphical, analytical and computer techniques for the analysis and design of mechanisms to produce a desired set of motion characteristics; design of linkages, double lever, slider and dwell mechanism; cognate linkages.

Kinetic synthesis tasks function generation, path generation and motion generation. Prerequisite: MECH 3482 (formerly MECH 2120). May not be held for credit with MECH 4670.

**MECH 4680 Energy Conservation and Utilization**  
**Cr. Hrs. 4**  
Energy supply and demand, advanced thermodynamic cycles, conventional energy sources, alternative energy, conservation of energy, environmental considerations. Prerequisite: MECH 2202 (formerly MECH 2200).

**MECH 4690 Topics in Heat Transfer and Energy**  
**Cr. Hrs. 3**  
Some combination of the following advanced topics; conduction heat transfer, radiation, heat-exchanger design, two-phase phenomena, fluidization, alternative energy, energy conservation. Other topics of current interest may also be included. Prerequisite: MECH 3460 (or MECH 3470).

**MECH 4692 Renewable Energy**  
**Cr. Hrs. 4**  
Introduction to renewable energy systems, current and future global energy issues and the need for renewable energy applications, and distributed renewable energy generation. Renewable energy systems that will be considered are: solar heat, solar PV, biomass heat and power, hydro power, and wind power. Students will develop simple numerical models of renewable energy systems. Prerequisites MECH 2202 (formerly MECH 2200) and MECH 2262 (formerly MECH 2260). Pre- or Co requisite; MECH 3460 (formerly MECH 3470).

**MECH 4694 Advanced Topics in Heat Transfer**  
**Cr. Hrs. 4**  
Some combination of the following advanced topics; conduction heat transfer radiation, heat-exchanger design, two-phase phenomena, fluidization, alternative energy, energy conservation. Other topics of current interest may also be included. Prerequisite: MECH 3460 (or MECH 3470). May not be held for credit with MECH 4690.

**MECH 4702 Design of Thermal Systems**  
**Cr. Hrs. 4**  
Modeling of thermal systems; system simulation; design applications of optimization methods: Lagrange multipliers, search methods, and dynamic geometric and linear programming. Prerequisite: MECH 2202 (or MECH 2200). May not be held for credit with MECH 4700.

**MECH 4812 Automotive Engineering**  
**Cr. Hrs. 4**  
Introduction to vehicle dynamics; power trains; braking systems; road loads, aerodynamics and fuel efficiency; ride and suspension systems; steering systems; tire properties and dynamics; structural analysis and crash safety; performance vehicle design. Prerequisite: MECH 3502 (or the former MECH 3500). Pre- or Corequisite: MECH 3420. May not be held for credit with former MECH 4810.

**MECH 4822 Numerical Heat Transfer in Fluid Flow**  
**Cr. Hrs. 4**  
(Lab required) General conservation equations; specific forms of the conservation equations and energy equations; finite difference methods: one dimensional steady problems, one dimensional unsteady problems, two dimensional steady problems; two dimensional unsteady problems; convection, solution for the flow fluid. May not be held for credit with former MECH 4820. Prerequisites: (MATH 3132 or the former MATH 3100), (MECH 2150 or MATH 2120), MATH 3460 (or the former MECH 3470) and MECH 3492 (or the former MECH 3490).

**MECH 4832 Biomaterials in Biomedical Engineering**  
**Cr. Hrs. 4**  
(Lab required) Biomechanics and design of hard biomaterials and soft biomaterials and their applications in orthopedics, cardiovascular and neural systems. Course includes fundamental biological concepts, materials science fundamentals and medical/clinical concerns. Prerequisites: MECH 3542 (or the former MECH 3540) or (BIOE and BIOE 3590).
MECH 4860 Engineering Design Cr. Hrs. 5
(Lab required) Design projects; teams of students prepare written and oral
design reports on solutions to specific problems from Manitoba industries;
series of seminars by invited speakers. Prerequisite: eligibility for graduation
in the current academic year or registered in third year Industrial
Cooperative Education Program. Prerequisites: (ENG 2030 or ENG 2040 or
the former ENG 2010) and (MECH 3652 or the former MECH 4650).

MECH 4870 Fracture and Failure of Engineering Materials Cr. Hrs. 4
Criteria for crack initiation and propagation leading to structural failure.
Fracture mechanics and fracture toughness phenomena. Effects of
structure geometry, loading rate, environment, temperature, composition
and microstructure on material integrity. Prerequisite: MECH 3542 (or MECH
3540).

MECH 4900 Mechatronics System Design Cr. Hrs. 4
The course covers topics in the analysis of control systems and components
with the goal to provide students with tools and an understanding of issues
related to integrating mechanical, electronic and software components
towards building mechatronic devices. Hands-on-experience is provided in
the laboratory sessions on simulation and actual computer control of
various devices. Problems considered would include application to fluid
power systems, systems integration and validation. The focus is placed on
learning to work with real hardware. Prerequisite: MECH 3430.

MECH 4930 Mechanical Engineering Industry Internship (IIP) Cr. Hrs. 0
Supervised work experience normally of 12-16 months duration, concluded
by a work report. (Pass/Fail grade only.)

4.11 Internationally Educated Engineers Qualification Program (IEEQ) – Post-Baccalaureate Diploma in Engineering

Campus Address/General Office: E3-573 EITC
Email Address: ieeq@umanitoba.ca
Telephone: 204 474 8961
Fax: 204 474 7312
Website: http://umanitoba.ca/engineering/ieeq

4.11.1 Introduction
The Faculty of Engineering offers the IEEQ Program, designed for
international engineering graduates (IEGs) pursuing foreign credentials
recognition with Engineers Geoscientists Manitoba (EGM,
www.apegm.mb.ca), the regulatory body for engineering in Manitoba.
Through the IEEQ Program, IEGs:
Meet requirements for academic qualification with EGM and, upon
successful completion of IEEQ Program requirements, become registered
with EGM as Engineering Intern (formerly known as Engineer-in-training);
and,
May earn a Post-Baccalaureate Diploma in Engineering from the University
of Manitoba.
The provisions of Section 3: Academic Regulations apply to all students. In
addition, the IEEQ Program has regulations and requirements that apply
specifically to its students that may differ from the academic regulations in
Section 3. Details on regulations and requirements not included below are
provided to students upon their admission into the IEEQ Program, and can
be found on-line at www.umanitoba.ca/engineering/ieeq

4.11.2 Admission Requirements and Application Procedures
The IEEQ Program can accept applicants whose Confirmatory Exam
assignments by Engineers Geoscientists Manitoba correspond to one of the
five accredited undergraduate engineering programs offered in the Faculty of
Engineering.

Program entrance is normally in September of any given year. In order to
be admitted to the IEEQ Program, the student must:
Be an IEG with an earned undergraduate engineering degree obtained
from a university outside of Canada;
Have obtained the results of an Assessment of Academic Credentials from
Engineers Geoscientists Manitoba, with a result of five or fewer
Confirmatory Exams assigned by Engineers Geoscientists Manitoba in order
to be considered academically qualified;
Be a Permanent Resident or Canadian Citizen; and,
Demonstrate proficiency in the English language by meeting the minimum
standard in one of the University of Manitoba approved proficiency tests or
achieve Canadian Language Benchmark (CLB) Placement Test scores of
level eight (8) and no more than one seven (7) in the four language areas
(for example, 8/8/8/7 or similar combination).

4.11.3 Program Requirements
The Post-Baccalaureate Diploma in Engineering consists of a minimum of
24 hours of coursework, subject to the following regulations:
ENG 3000 Engineering Economics; and
ENG 4020 Professional Engineering Practice in Manitoba; and
ENG 4800 Co-operative Work- IEEQ; and
Technical courses are taken from the 3000 and 4000 levels of the student’s
engineering discipline, corresponding to the topic areas of Confirmatory
Exams assigned by EGM.
The total number of courses required in the IEEQ Program is generally as
shown in the table below:

<table>
<thead>
<tr>
<th>Number of Technical Confirmatory Exams1 Assigned by EGM</th>
<th>Number of courses in IEEQ²</th>
</tr>
</thead>
<tbody>
<tr>
<td>One (1) or two (2)</td>
<td>5</td>
</tr>
<tr>
<td>Three (3)</td>
<td>7</td>
</tr>
<tr>
<td>Four (4)</td>
<td>9</td>
</tr>
<tr>
<td>Five (5)</td>
<td>11</td>
</tr>
</tbody>
</table>

Notes:
1. Technical exams refer to exams assigned from Group A or Group B of
the Discipline Examinations (see https://engineerscanada.ca/become-an-
engineer/examination-syllabus). Technical Exams do not include exams
assigned from the Basic Studies (BS) or Complementary Studies (CS) syllabi,
such as 11-CS-1 Engineering Economics
2. Including ENG 3000 Engineering Economics, ENG 4020 Professional
Engineering Practice in Manitoba, and ENG 4800 Co-operative Work- IEEQ.
If the courses required in IEEQ total less than 24 credit hours, the student
may apply for a transfer of credit from the original earned undergraduate
engineering degree (obtained outside of Canada).
All courses must be completed with a grade of C or better. Failed courses
may only be repeated once, and are subject to the limits outlined in the
IEEQ Student Handbook and on the IEEQ website.

4.11.4 Maximum Time Limits
Students can choose a full-time or part-time option in the IEEQ Program. Students will be asked to declare their status upon their acceptance to the IEEQ Program.

<table>
<thead>
<tr>
<th>Number of courses in IEEQ</th>
<th>Full-time</th>
<th>Part-time</th>

<td>3 yrs</td>
</tr>
</tbody>
</table>

### 4.11.5 Course Descriptions for IEEQ

**ENG 3000 Engineering Economics**

**ENG 4020 Professional Engineering Practice in Manitoba**

An introduction to the practice of professional engineering in Manitoba. Professional culture, organization and regulation; industry topics; engineering ethics and law. Emphasis on professional communication development. Restricted to students enrolled in the IEEQ Program. May not be held with ENG 4010.

**ENG 4800 Co-operative Work 1**

Work assignment in business, industry, or government for the Faculty of Engineering co-operative education stream students. Requires submission of a written report covering the work completed during the four-month professional assignment. It is assumed that courses ENG 4800, ENG 4810, ENG 4820, ENG 4830, ENG 4840 will be taken in order. Those registering for this course must have applied for and been accepted into the Faculty of Engineering co-operative stream. Not to be held with BIOE 2000, CIVL 2900, ECE 4720, MECH 2050 or ENG 4012. This course is graded on a pass/fail basis.

### 4.12 Approved Program Variations

While it is the expectation that students will complete their individual programs as set-out in the preceding sections 4.1-4.11 it is recognized that, in certain limited circumstances, course substitutions approved by the Faculty of Engineering may be made where the content of alternative course(s) have been deemed to be equivalent.

Students are required to consult with their corresponding program advisors and declare their intention of taking the alternate course(s). The calculations of TGPAs must include the alternate course(s), and they cannot be excluded from the calculation of the TGPAs.

The following is a list of approved substitutions:

- The combination of STAT 1000 and STAT 2000 is considered equivalent to STAT 2220

### SECTION 5: Co-operative Education and Industrial Internship Programs

**Contact and Program Information**

Director: Carolyn Geddert, P.Eng., Engineer-in-Residence
Tel. 204 474 8948
Fax. 204 474 7676

Email carolyn.geddert@umanitoba.ca
Program Administrator: Megan Johnson
Office: E3-393 EITC
Tel. 204 480 1069
Fax. 204 474 7676
Email megan.johnson@umanitoba.ca

The Faculty of Engineering offers a Co-operative education and Industry Internship Program (Co-op/IIP) designed to complement and enrich the academic program with work experience. The work terms provide students with practical experience, assistance in financing their education, and guidance for future career specialization.

A student in good academic standing, who will have successfully completed 58 credit hours of their academic program of study by the end of the session, may apply to participate in the Co-operative and Industry Internship Program. Applicants will be interviewed and approved by the Co-op/IIP staff. Final acceptance into the program will be confirmed in writing by the Co-op/IIP office.

In addition to students following regular departmental programs, Internationally Educated Engineers Qualification (IEEQ) Program participants may also be approved for participation in Co-op/IIP upon written approval of the IEEQ Director.

Progress of all students through Co-op/IIP the program is dependent upon the student obtaining a job placement confirmed as appropriate by the Co-op/IIP office.

Upon securing a job placement, Engineering students enrol in the course ENG 4800, Engineering Cooperative Education Work Term 1 (and subsequently, ENG 4810, ENG 4820, ENG 4830, ENG 4840) for the specific work term of employment.

Students who are unable to maintain the standards of the Co-op/IIP will be transferred back into the regular program.

The course and grade requirements for completion of the Co-op/IIP are the same as those required for the regular program. However, in order to satisfy course prerequisite requirements, timetables may differ from the regular program. Co-op/IIP students are evaluated in the same manner as regular students and all rules and regulations of the Faculty of Engineering apply.

Students who are placed on Academic Warning or Academic Probation will either be removed from Co-op/IIP or have their acceptance deferred until they have completed two consecutive terms with an Academic Standing of “Satisfactory”.

Students who are Required to Withdraw will immediately become ineligible for Co-op/IIP and will remain ineligible after re-instatement to the Faculty of Engineering.

Written reports must be completed at the end of each work term. Each successfully completed work term and its corresponding work term report receives a Pass/Fail grade and is rated at one credit hour. Graduates who successfully complete at least three work terms and the required work term reports will have the Co-operative Education Option acknowledged on their B.Sc. graduation parchment.

For more information regarding the Co-op/IIP requirements, please see the Co-op/IIP office.

SECTION 1: Degree Programs Offered

1.1 Programs (Majors and Minors)
1.2 Available Focus Areas and Streams

SECTION 2: Admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources

2.1 Admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources
2.2 Direct Entry from High School
2.3 Admission from University 1
2.4 Admission as a Transfer Student
2.5 Admission as a Visiting Student
2.6 Admission as a Second Degree Student
2.7 Admission as a Special Student (After Degree Students)
2.8 Auditing Students

SECTION 3: Degree Regulations and Services

3.1 Courses Offered in Other Faculties and Schools Acceptable for Credit in the Clayton H. Riddell Faculty of Environment, Earth, and Resources
3.2 Available Minors in Departments and Faculties
3.3 University Written English and Mathematics Requirements
3.4 Science and Faculty of Arts Course Requirements
3.5 Changes in Program Requirements
3.6 Prerequisite and Corequisite Courses
3.7 Course Availability
3.8 Repeated Courses and Attempted Credit Hours
3.9 Voluntary Withdrawals
3.10 Authorized Withdrawals
3.11 Residence Requirement
3.12 Letter of Permission to Take Courses at Another University
3.13 Dean’s Honour List
3.14 Academic Warning, Probation, Academic Suspension and Special Students (Academic Standing)
3.15 Academic Misconduct
3.16 Termwork and Debarment
3.17 Deferred Examinations
3.18 Challenge for Credit
3.19 Appeals Involving Academic Regulations

8.8 Geological Sciences Course Descriptions - 3000 level
8.8 Geological Sciences Course Descriptions - 4000 level

SECTION 1: Degree Programs Offered
The Clayton H. Riddell Faculty of Environment, Earth, and Resources offers degree programs in Environmental Science, Environmental Studies, Geography, Physical Geography, Geological Sciences, Geology and Geophysics. All students are advised to examine their interests and future goals carefully to make appropriate program choices. Consultation with
Riddell Faculty student advisors and/or department representatives is strongly encouraged.

**Footnotes:**
¹ There is an eight-year time limit to complete the degree.
² There is no time limit to complete the degree.

**Available Majors:** Environmental Science, Environmental Studies, Geography, Geological Sciences, Geology, Geophysics, and Physical Geography

**Available Minors:** Environmental Science, Environmental Studies, Geography, Geological Sciences and Physical Geography

**Streams** (Physical Geography): Atmosphere and Hydrological Sciences, General Physical Geography, and Geomatics

**Option:** Option in Aging

### 1.2 Available Focus Areas and Streams

**Streams** (Physical Geography): Atmosphere and Hydrological Sciences, General Physical Geography, and Geomatics.

### SECTION 2: Admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources

#### 2.1 Admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources

Admission information, rules, regulations and requirements are subject to change from year to year; those found in this publication are specific to the academic year for which it was written.

The following is a summary of the admission requirements. All admission requirements, as well as application deadline dates and forms, are included in the Clayton H. Riddell Faculty of Environment, Earth, and Resources Applicant Information Bulletin that is available from the Admissions Office, Enrolment Services, 424 University Centre; this information is also posted on the University of Manitoba website.

Other than Direct Entry students, completion of a minimum of 24 credit hours of university level courses is required (see sections 2.3 to 2.7).

Faculty admission is determined on the basis of a 2.00 Cumulative Grade Point Average on a minimum of 24 credit hours of course work from a recognized institution. Note: For students completing the Bachelor of Arts in Geography, entry is based on a Degree Standards Table.

Degree programs may define additional entrance requirements and students are referred to the appropriate section of this Chapter for further details as follows:

**Section 5:** Bachelor of Arts in Geography Degree Regulations and Program Descriptions.
Section 6: Bachelor of Science in Physical Geography Degree Regulations and Program Descriptions.

Section 7: Bachelor of Environmental Science and Bachelor of Environmental Studies Degree Regulations and Program Descriptions.

Section 8: Department of Geological Sciences: Bachelor of Science in Geological Sciences - Geology, Geophysics, and General Degree Regulations and Program Descriptions.

The University of Manitoba assesses transfer credit as a part of the Transfer of Credit Students on academic suspension as a result of work completed at another post-secondary institution or another Faculty will not normally be considered for admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources until the suspension has been served.

Section 7:

2.2 Direct Entry from High school

Eligible students may apply to enter the Clayton H. Riddell Faculty of Environment, Earth, and Resources upon completion of a high school diploma. Eligible students must meet the criteria listed in the Direct Entry Programs Bulletin.

For the most current admission requirements, refer to the Direct Entry Programs Bulletin: http://umanitoba.ca/admissions/media/direct_entry_bulletin.pdf

Admission requirements specific to an academic year (for years 2015-2016 and forward) are found in the PDF version of the Undergraduate Academic Calendar for that academic year: http://umanitoba.ca/calendar

2.3 Admission from University 1

University 1 students are encouraged to apply for admission to a degree program in the Clayton H. Riddell Faculty of Environment, Earth, and Resources once they have completed 24 credit hours of course work and have met the minimum entrance requirements of their intended degree program.

2.4 Admission as a Transfer Student

Students applying for admission from other recognized universities or colleges are called ‘transfer students’. For the University of Manitoba’s general policy on transfer of credit and advanced standing, refer to the Admissions website: umanitoba.ca/admissions.

To be eligible for admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources, transfer students must have completed no fewer than 24 credit hours of university level course work and satisfied the minimum performance requirements of the intended degree program. Transfer students who have completed less than 24 credit hours must register in University 1 or Extended Education to complete the required credit hours of course work. Students with more than 24 credit hours who are not admissible to the Riddell Faculty should consider applying to Extended Education as their alternative choice.

Students on academic suspension as a result of work completed at another post-secondary institution or another Faculty will not normally be considered for admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources until the suspension has been served.

Transfer of Credit

The University of Manitoba assesses transfer credit as a part of the application process. Assessment of prior course work for admissions or transfer credit will only take place after an application has been submitted. The University of Manitoba transfer credit equivalencies database is now available as a reference tool to look up current course assessments. Please take note of the guidelines outlined on the database access page as these course assessments are subject to change.

See the Admissions section of this Calendar. Courses completed at an external institution ten years prior to registration in the Clayton H. Riddell Faculty of Environment, Earth, and Resources are not considered for transfer of credit. Students should contact a Riddell Faculty student advisor regarding transfer credit.

University College of the North and the University of Manitoba Articulation Agreement NRM Technology Diploma (UCN)/ Bachelor of Environmental Science (U of M)

Graduates of the 2 Year Natural Resource Management Technology Diploma from University College of the North may apply for admission into the Bachelor of Environmental Science program in the Clayton H. Riddell Faculty of Environment, Earth, and Resources at the University of Manitoba. Successful applicants will be granted 60 credit hours on admission towards the completion of the 120 credit hour Bachelor of Environmental Science degree.

Students should contact a Riddell Faculty student advisor regarding more information.

2.5 Admission as a Visiting Student

Visiting students may apply for admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources on the basis of a Letter of Permission from the Registrar or appropriate Dean of her/his home institution. Certain restrictions may be placed on the kind and number of courses in which a student will be allowed to register. Visiting students may wish to contact a Riddell Faculty student advisor in the Faculty Dean’s Office for further information.

2.6 Admission as a Second Degree Student

Students possessing a first degree from a recognized university program with a minimum Cumulative Grade Point Average of 2.00 on their first degree may be eligible for admission as a Second Degree student provided they have completed the minimum coursework entrance requirements for their intended degree program.

Second Degree requirements may be shortened by up to 60 credit hours and, once admitted, students will be expected to satisfy all continuation and graduation requirements in the degree program. Second Degree students are not required to satisfy the University Written English and Mathematics requirement. See a Riddell Faculty student advisor for specific information on degree requirements following completion of the first degree.

2.7 Admission as a Special Student (After Degree Students)

After Degree Special Student

Students who have successfully completed a first degree from a recognized university program with a cumulative Grade Point Average of 2.00 or better are eligible for admission as Special Students.

Prospective applicants who hold a previously completed degree may enroll in degree credit courses in the Faculty as a Special Student provided that they are not at the time interested in pursuing a degree. As noted in the university admission requirements (http://umanitoba.ca/student/admissions/requirements/special-students.html), such courses may subsequently be accepted as credit...
towards a degree, diploma or certificate at the discretion of program deans or directors.

### 2.8 Auditing Students

Students who wish to audit courses must have written permission from the instructor of the desired course before they can register. Auditing students must register in-person in their Faculty of registration. The Clayton H. Riddell Faculty of Environment, Earth, and Resources prohibits auditors from registering in courses until after the initial access period.

### SECTION 3: Degree Regulations and Services Applicable to all Programs in the Clayton H. Riddell Faculty of Environment, Earth, and Resources

#### 3.1 Courses Offered in Other Faculties and Schools Acceptable for Credit in the Clayton H. Riddell Faculty of Environment, Earth, and Resources

Students who are registered in the Clayton H. Riddell Faculty of Environment, Earth, and Resources may take any course offered by another faculty or school for credit towards their degree, subject to permission from the department head (or designate) and/or a Riddell Faculty student advisor.

#### 3.2 Available Minors in Departments and Faculties

Students in the Bachelor of Environmental Science, Bachelor of Environmental Studies, Bachelor of Science in Geological Sciences (Geology and Geophysics) and Bachelor of Science in Physical Geography degree programs may, if they wish, declare and complete a Minor from departments and interdisciplinary programs in which a Minor is offered. Students registered in the B.A. Geography (General; Advanced) and B.Sc. Geological Sciences (General) are required to complete a Minor prior to graduation. Students may not, however, declare both their Major and Minor from the same subject area. For example: a student in B.A. Geography program may not declare a minor in physical geography; a student in Environmental Science program may not declare a minor in Environmental Studies, etc.. Students can declare only one Minor. For specific requirements to complete a Minor, please refer to the relevant Faculty/School’s chapter in the Academic Calendar & Catalog.

It should be noted that for Honours students any consideration of completing a Minor should be made early due to restricted opportunities in later years in their programs. Students in the B.A. Geography (Honours) may not declare a Minor.

A Minor will normally consist of at least 18 credit hours, with a minimum of 12 credit hours being at the 2000-, 3000-, and 4000-levels (although there are some exceptions). Courses required in a student’s specific degree program are acceptable for use in a chosen Minor, subject to the Riddell Faculty regulation stating that students may not declare both their Major and Minor from the same department or interdisciplinary program.

Students planning to enrol in the I.H. Asper School of Business (Management Minor) must consult a Riddell Faculty student advisor as enrolment in this minor program is limited. The Management minor consists of any 18 credit hours in courses offered by the Asper School of Business.

#### 3.3 University Written English and Mathematics Requirement

Students are required to complete the University Written English and Mathematics requirement within their first 60 credit hours as outlined in the General Academic Regulations, Residence and Written English and Mathematics Requirements in this Calendar.

A list of all courses that satisfy the Written English and Mathematics requirements can be found in Approved English and Mathematics Courses of this Calendar. Course numbers of designated written English courses are marked with a ‘W’ and designated Mathematics courses are marked with an ‘M’.

Students may wish to consider GEOG 2900W Geography of Canadian Prairie Landscapes (3), ENVR 2810W Environmental Critical Thinking and Scientific Research (3), GEOL 3130W Communication Methods in the Geological Sciences (3), and/or GEOG 3810M Quantitative Research Methods in Geography (3) to satisfy these requirements. In addition, the Department of Environment and Geography offers several courses annually through Distance Education that satisfy the ‘W’ requirement.

#### 3.4 Science and Faculty of Arts Course Requirements

Students are required to take 6 credit hours from the Faculty of Arts and 6 credit hours of science coursework.

For course subjects taught by the Faculty of Arts refer to the Chapter Faculty of Arts for a complete listing.

Students may complete any combination of the courses listed below adding up to six credit hours to satisfy the 6 credit hours science requirement.

For course titles and descriptions see the relevant faculty entries in this Calendar.

#### 3.5 Changes in Program Requirements

Once students have successfully completed any portion of a degree program, they will not be required to meet new course requirements subsequently stipulated for that portion of the program, whether the requirements be for the Faculty or for an individual degree program. Students are required to complete their program in its entirety as outlined in the Calendar effective upon the point of admission to the Faculty and program.

#### 3.6 Prerequisite and Corequisite Courses

...
Prerequisite: Minimum grades of “C” are required in all courses listed as prerequisites, except as otherwise noted in the course descriptions published in each department and program section of this chapter. If a course is a prerequisite for a second course, the prerequisite must be met in order to continue in the second course.

Some course descriptions will indicate that a specific course is a pre- or corequisite for the course in which you wish to register. If you have not previously taken the specific course, you may register for it in the same term.

Corequisite: Where a course identifies another course as a corequisite, both courses must be taken at the same time.

3.7 Course Availability

All courses listed in this Calendar are not offered every year. Students are referred to the Class Schedule for current information.

The Department of Environment and Geography offers numerous courses under the following course numbers: GEOG 3770 Special Topics in Geography (3), GEOG 4670 Selected Issues (3), GEOG 3740 Field Studies in Geography (6), GEOG 3750 Field Studies in Geography (3), GEOG 3760 Special Topics in Geography (6), ENV 2010 Field Topics in Environment (1.5), ENV 2020 Extended Field Topics in Environment (3), ENV 3000 Multidisciplinary Topics in Environmental Science (3), ENV 3010 Field Topics in Environmental Science 1 (1.5), ENV 3020 Extended Field Topics in Environmental Science 1 (3), ENV 4000 Multidisciplinary Topics in Environmental Science (3), ENV 4010 Field Topics in Environmental Science 2 (1.5), and ENV 4020 Extended Field Topics in Environmental Science 2 (3).

The Department of Geological Sciences offers a course under the following course number: GEOL 4270 Advanced Studies in Earth Sciences (3). Students are referred to the Class Schedule for current information.

3.8 Repeated Courses and Attempted Credit Hours

Clayton H. Riddell Faculty of Environment, Earth, and Resources students are subject to the University of Manitoba regulations (see General Academic Regulations, Academic Evaluation, Repeating a Course as described in this Calendar) and the Riddell Faculty degree regulations regarding eligibility to repeat a course. Repeating a course will not result in the removal of the first attempt and grade in that course from the student’s record. The course will appear on the transcript as many times as it has been repeated. When a course has been repeated or an equivalent course is taken, only the attempt in which the highest grade was achieved shall be counted towards a student’s degree. Grades from all course completions will be used in the calculation of the DGPA, TGPA and CGPA.

There is no limit to the number of credit hours permitted in the degree programs in the Faculty provided a student does not exceed the credit hour limit of failed courses stated for specific programs.

Limited Access

Effective 2018 Winter Term - Limited Access in Effect

Limited Access is a registration rule that allows students who have never before completed, or voluntarily withdrawn, from a course (or its equivalent) the opportunity to register for the course before students who are repeating or have previously withdrawn from the course.

If a student has previously taken a course and received a final grade, or voluntarily withdrawn from the course (VW)*, any future attempt to take that course or its equivalent is considered a repeated course.

*A previous VW is only considered a repeat if the student voluntarily withdrew in Winter 2017 or later.

Effective Winter 2018, Limited Access will prevent a student from registering or placing themselves on the waitlist for a course (or equivalent) being repeated until the “Limited Access Term Expiry Date” has passed.

Limited Access applies for three consecutive terms following the term that the course in question was last completed or voluntarily withdrawn (VW).

During these three terms of Limited Access, a student may register to repeat a course, without permission, only when the Limited Access Term Expiry Date has passed.

Once the three terms of Limited Access has expired, any student wishing to repeat a course must request permission to do so from the Riddell Faculty Dean’s Office prior to registration in order to register or place themselves on the waitlist for a course prior to the “Limited Access Term Expiry Date”.

3.9 Voluntary Withdrawals

The responsibility for initiating withdrawals rests solely with the student. When eligible to do so, Voluntary Withdrawals must be done through Aurora Student. No withdrawals will be permitted after the deadlines posted in the Academic Schedule.

There is currently no limit on the number of Voluntary Withdrawal hours a student can accumulate.

3.10 Authorized Withdrawals

Students who have valid and documented reasons for withdrawal, such as medical illness or compassionate circumstances, may be authorized to withdraw without penalty. Requests for authorized withdrawals must be submitted in writing to a Riddell Faculty Student Advisor. The Office of Student Advocacy located at 520 University Centre (474-7423, student_advocacy@umanitoba.ca) is available to provide information and assistance.

3.11 Residence Requirement

Students are required to complete a minimum number of credit hours at the University of Manitoba. Students should refer to their degree program in the appropriate section for further information:

5: Bachelor of Arts in Geography Degree Regulations and Program Description and Courses Offered by

6: Bachelor of Science in Physical Geography Degree Regulations and Program Description and Courses Offered by

7: Bachelor of Environmental Science and Bachelor of Environmental Studies Degree Regulations and Program Descriptions and Courses Offered by

8: Department of Geological Sciences: Bachelor of Science in Geological Sciences - Geology, Geophysics, and General Degree Regulations and Program Descriptions and Courses Offered by

The courses used to satisfy the residence requirement must be acceptable for credit by the degree program in the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Residence requirements apply to both first and second degree students.

3.12 Letter of Permission to Take Courses at Another University

Clayton H. Riddell Faculty of Environment, Earth, and Resources
Students wishing to complete courses at another institution for credit at this university must obtain written permission (Letter of Permission) from the Registrar’s Office prior to registering at the other institution or no credit will be permitted. Any earned grades are transferred and form part of the degree Grade Point Average, when applicable. Students who register for courses elsewhere without a Letter of Permission must reapply to the Faculty.

Students who are on academic suspension may not elect courses at another institution for credit toward an Environment, Earth, and Resources degree at this university.

**Attendance at Other Institutions**

Students who attend other post-secondary institutions without a Letter of Permission must reapply for admission to the Faculty before the application deadline and be academically competitive for admission. Similarly, students registered in the Clayton H. Riddell Faculty of Environment, Earth, and Resources may not be registered at another academic institution at the same time unless they are registered elsewhere on a Letter of Permission. The penalty for unauthorized or undisclosed attendance may be disciplinary withdrawal or academic suspension.

**3.13 Dean’s Honour List**

A student’s eligibility for the Dean’s Honour List designation is evaluated after each term. Students enrolled in a minimum of 12 credit hours of course work during a term and who achieve a term Grade Point Average of 3.50 or higher will be placed on the Dean’s Honour List. The Dean’s Honour List designation will appear on the student’s transcript.

**3.14 Academic Warning, Probation, Academic Suspension and Special Students (Academic Standing)**

Students shall be evaluated after each academic term in which they receive a final grade in a minimum of 4 credit hours, with the assessment being based on the resulting Degree Grade Point Average (DGPA). This assessment will determine a student’s academic standing to be: faculty minimum met, academic warning, on probation, suspension warning, or academic suspension.

**Degree Grade Point Average (DGPA)**

The Degree Grade Point Average (DGPA) is computed from the final grades obtained in all courses attempted that are part of the degree requirements, including applicable courses transferred from other faculties and institutions. Where a course has been repeated or replaced by an approved substitution or equivalent course, all attempts shall be included in the computation.

**Faculty Minimum Met**

To be in good standing, a student must achieve a 2.00 Degree Grade Point Average at each point of assessment and the notation ‘Faculty Minimum Met’ will be recorded on the student’s transcript. Note: For students completing the Bachelor of Arts in Geography, Faculty Minimum Met is based on a Degree Standards Table found in section 5.2.2.

Degree programs may define additional performance requirements for continuation and graduation. Students are referred to the appropriate section of this Chapter for further details as follows:

- Section 5.3: Bachelor of Arts in Geography.
- Section 6.3: Bachelor of Science in Physical Geography.
- Section 7.3: Bachelor of Environmental Science and Bachelor of Environmental Studies.
- Section 8.3.1: Bachelor of Science in Geological Sciences - Major.
- Section 8.3.2: Bachelor of Science in Geological Sciences - Honours.
- Section 8.3.3: Bachelor of Science in Geological Sciences - General.

**Academic Warning**

Students will receive an academic warning if, at the point of assessment following a term, s/he fails to achieve the required minimum performance level. The notation ‘Academic Warning’ will be recorded on the student’s transcript.

**On Probation**

Those who fail to meet the required minimum performance level following an Academic Warning assessment will be placed on probation. The notation ‘On Probation’ will be recorded on the student’s transcript.

**Suspension Warning**

Those who fail to meet the required minimum performance level following an On Probation assessment will be placed on Suspension Warning. The notation, ‘Suspension Warning’ will be recorded on the student’s transcript.

**Academic Suspension**

Those who fail to meet the required minimum performance level following a Suspension Warning assessment will be placed on Academic Suspension for One Year. The notation, ‘Academic Suspension for One Year’ will be recorded on the student’s transcript. A student placed on academic suspension is not allowed to register in the Clayton H. Riddell Faculty of Environment, Earth, and Resources during the duration of the suspension.

A student will be placed on academic suspension for two years under the following circumstances:

- Upon return from one year suspension, the student fails to attain a 2.00 degree grade point average in the following two terms after the probationary assessment (see a Riddell Faculty student advisor for information).
- The Faculty calculates that it is mathematically impossible for the student to clear his/her probationary standing by the following assessment period.
- The student exceeds the maximum number of credit hours of failed courses.

The notation, ‘Academic Suspension for Two Years’, will be recorded on the student’s transcript of marks. Those serving two-year suspensions are required to start the degree afresh should they choose to return to the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Students may appeal for transfer of credit up to 30 credit hours in courses in which a minimum grade of ‘C’ was achieved.

Students should consult with a Riddell Faculty student advisor for further assistance in clearing their academic warning, on probation, suspension warning, or academic suspension academic standing.

**Special Students**

Special students that have successfully completed at least 15 credit hours of course work in the Riddell Faculty will be notified by mail/email that given the extent of their studies to date, they are strongly encouraged to consider application to a degree, diploma or certificate program, perhaps through Extended Education or as a Second Degree Student.

- If 6 or more credit hours of coursework in the first 15 are failed course attempts (grades of F or D) students will receive notice by mail/email encouraging them to seek guidance from the Academic Learning Centre and/or from Riddell Faculty student advisors.

Special students that have earned (includes earning F grades) 30 credit hours of course work in the Riddell Faculty will be notified by mail/email that given the extent of their studies that they must either transfer into a
degree, diploma or certificate program, or should they wish to continue their studies as non-degree students, to enroll with Extended Education. Special Student status will not be granted by the Riddell Faculty past the 30 credit hour level.

3.15 Academic Misconduct

Academic misconduct is intentional cheating, fabrication, impersonation, or plagiarism. It is also knowingly helping or attempting to help others to be dishonest. Academic dishonesty lowers scholastic quality and defrauds others who will eventually depend on their own knowledge and integrity.

Plagiarism or any other form of cheating on examinations, term tests, or assignments is subject to academic penalty as serious as suspension or expulsion from the Faculty or University.

Students who are unsure of what constitutes academic misconduct should refer to the regulations in the Chapter General Academic Regulations, Academic Integrity: Plagiarism and Cheating in this Calendar and consult with your professor or instructor.

3.16 Termwork and Debarment

A student is responsible for the completion of laboratory work, assignments, tests and other class work as prescribed by the course syllabus. A student who does not meet termwork requirements to the satisfaction of the Associate Dean (Academic) will receive a warning to this effect. If this warning is ignored, a student may be debarred from the course. Any student debarred from a course receives an automatic grade of 'F' in that course.

3.17 Deferred (missed) Examinations

A student who is unable to write a final examination because of illness or other incapacity or compassionate reasons should contact a student advisor in the Clayton H. Riddell Faculty of Environment, Earth, and Resources. The appropriate documentation (i.e. a medical certificate or otherwise appropriate documentation certifying the reason for the missed exam) will be required. Students are reminded to contact their home faculty (and not the faculty through which the course is offered). Please see the missing exam information on the faculty website. For information on Incomplete Coursework, Deferred Examinations, Debarment, Academic Dishonesty, etc., refer to the Chapter General Academic Regulations this Calendar.

A complete copy of the Deferred and Supplemental Examinations Procedures is available at http://umanitoba.ca/admin/governance/governing_documents/academic/1299.html

It should in particular be noted that there are no Supplemental Examinations in the Clayton H Riddell Faculty of Environment, Earth, and Resources.

3.18 Challenge for Credit

Some departments at the University of Manitoba offer courses by means of challenge of credit. Since the courses offered in this manner may vary from year to year, any student wishing to challenge a course for credit should contact a Riddell Faculty student advisor in the Clayton H. Riddell Faculty of Environment, Earth, and Resources general office. The Academic Schedule of this Calendar contains the relevant registration deadlines dates appropriate to challenge for credit.

3.19 Appeals Involving Academic Regulations

The Student Appeals and Discipline Committee in the Faculty considers appeals from students who request special consideration with respect to the rules and regulations governing their degree program and qualifications for graduation.

Appeals should be addressed to: Student Advisor, Secretary Student Appeals and Discipline Committee, General Office, Clayton H. Riddell Faculty of Environment, Earth, and Resources, 440 Wallace Building.

3.20 Riddell Faculty Student Advisor Office Hours

Monday through Friday: 9:00 a.m. to 4:00 p.m.
Email: Riddell.Faculty@umanitoba.ca
Students may schedule an appointment with an Academic Advisor here: https://riddellappointments.setmore.com.

3.21 Student Responsibility & Application to Graduate

It is your responsibility to be familiar with the regulations, courses, and graduation requirements of your degree program. You are advised to review the appropriate sections of this Calendar carefully when selecting your courses to ensure compliance with degree program requirements. If you are not sure of how regulations and requirements apply to your case, please consult a Riddell Faculty student advisor. Since a complete graduation check is not done until you have declared your intention to graduate, you are encouraged to make an appointment with a Riddell Faculty student advisor prior to your initial registration access date to confirm you are meeting the degree requirements. Ultimately you are responsible to ensure compliance with degree program requirements.

Every candidate for a degree must make a formal application at the beginning of the term in which they expect to complete graduation requirements, before the last date of the registration revision period.

Undergraduate students need to declare their intent to graduate. This can be done on-line through Aurora. (Log into Aurora, select "Enrolment and Academic Records", select "declarations", and follow the instructions. If the date you wish to graduate does not appear, you will need to contact a Student Advisor in the Dean's Office, 440 Wallace, for assistance; you may have missed the online application deadline)

Note: While we welcome the opportunity to assist you, it is important for you to realize that it is your responsibility to be familiar with university and Riddell Faculty academic regulations and registration procedures as they are described in this calendar.

3.22 Maximum Number of Courses During a Term

You may attempt a maximum of 15 credit hours in any one term unless otherwise stipulated by your program. If you wish to exceed the normal load you may apply in-person at the Faculty Dean's Office, or complete the Application to Exceed Credit Hours form available on the Riddell Faculty web page (umanitoba.ca/environment/undergraduate).

3.23 Time Away from the Clayton H. Riddell Faculty of Environment, Earth, and Resources

Have you been away for a While?

Have you attended any other post-secondary institution or another Faculty at the U of M since your last registration in the Riddell Faculty?

If your answer to the above question is no, then you follow these procedures:
Former Riddell Faculty students that have not registered in courses for more than one calendar year and have not attended any other post-secondary institution or faculty at the University of Manitoba will contact a Riddell Faculty student advisor to complete and submit the Request for Permission to Re-Register form to have their record reactivated.

Former Riddell Faculty students previously placed on academic suspension may not re-register until they have served their term of suspension. Upon completion of their suspension, students must contact a Riddell Faculty student advisor in order to have their records updated and activated.

If you answered yes to the above question and you have attended another post-secondary institution or another Faculty at the U of M since your last registration in the Riddell Faculty, you follow these procedures:

Students who have registered in another Faculty or School at the University of Manitoba since their last registration in the Riddell Faculty must apply through the Admissions Office in accordance with the application deadlines and be readmitted before they are eligible to register in the Riddell Faculty again.

Students who have attended another university or institution since their last registration in the Riddell Faculty must apply through the Admissions Office in accordance with the application deadlines and be readmitted before they are eligible to register in the Riddell Faculty again.

• This does not apply to Riddell students who have taken courses at another university or college on the basis of a Letter of Permission granted by this university.

Admitted to the Riddell Faculty - but Never Registered

Students previously admitted to the Riddell Faculty that did not register in the Riddell Faculty in the term of admission must re-apply to the Riddell Faculty if they wish to register as a student in the Riddell Faculty.

SECTION 4: Department of Environment and Geography

Head: Mark Hanson (Acting)
Campus Address/General Office: 220 Sinnott Building
Email Address: environment_geography@umanitoba.ca
Telephone: (204) 474-9667
Fax: (204) 261-0038
Website: umanitoba.ca/environment/departments/geography

4.1 Academic Staff

Please refer to the Clayton H. Riddell Faculty of Environment, Earth, and Resources Academic Staff website.

4.2 Undergraduate Programming in the Department of Environment and Geography

The fields of study in this department can be divided into four overlapping areas: environmental sciences, environmental studies, human geography and physical geography. These areas are built on a diverse range of academic frameworks or foundations, including: natural, physical and social sciences, education, law, agriculture, management, medicine, humanities and architecture.

Environmental Science applies scientific knowledge from many disciplines to issues and questions relating to an increasing human population, the sustainability of resource use, degradation caused by pollution and disturbance, and the endangerment and extinction of species and natural systems. Environmental Studies applies the theory and practice of group and organizational communication, understanding public policies and programs that underscore environmental concerns, and the need to integrate diverse social, institutional, political and legal considerations inherent in attaining environmental objectives. (Students have the opportunity to focus advanced studies in one of several areas, defined through consultation with a Riddell Faculty student advisor.)

“Human Geography examines how people have been influenced by the environment and how, in turn, they have left their mark on the environment,” Dr. Daniel Todd, Human Geographer. Students may choose to focus their studies into one of several areas including Human-Environment Relations, Urban and Rural Development, Social Cultural Geography, Population, Resources and Development, and Area Studies.

Areas of physical geography include the study of the environment through aspects of atmospheric science, geomatics, biogeography, and hydrology. Streams are currently available in Atmospheric and Hydrological Sciences, Geomatics (an emerging subfield, referring to the techniques of spatial data acquisition, handling and analysis) and Physical Geography.

Potential careers for graduates of these programs include a diverse array of possibilities in the natural sciences, social sciences, or a combination of both. Graduates are poised to assume positions where they identify and analyze the local, regional, national, and global patterns that shape our lives. As well, technical skills such as geographic information systems and remote sensing are demanded in several of the environmental sectors. Graduates of these programs can expect to enter the workforce in private, government, research, or not-for-profit sectors.

4.3 Cooperative Education Option

A Cooperative Education Option is available to students registered in either the Major or Honours degree programs in Environmental Science, Environmental Studies, or Physical Geography. Coop is an arrangement whereby students spend alternating periods in university and employment. There are several advantages to a cooperative education program for students. One benefit is that students are able to acquire both theoretical knowledge and practical experience. This experience assists them in selecting areas of specialization for their senior courses in their chosen Focus Area or Stream. As well, Coop assists students in their professional development by enhancing networking opportunities, participation in conferences and workshops and provides the foundation of skills and strategies required in searching and acquiring employment after graduation. Students can also defray some of the costs of their university education through these work term placements. Further information about Cooperative Education and student eligibility is available from the Coop Placement Coordinator available in the Faculty general office.

Students electing to participate in the Cooperative Education Option will be assessed a program fee with their formal admission into the program. Once a student has accepted a position with a Coop employer, no portion of the program fee will normally be refunded.

The Cooperative Education Option consists of two employment work terms, each over a minimum period of four months, and contributes 6 credit hours towards the four year degree program. Students complete ENVR 2900 Professional Development 1 (1.5), ENVR 3900 Professional Development 2 (1.5), work term placements ENVR 3980 Work Term 1 (0), ENVR 3990 Work Term 2 (0), and the work term report courses ENVR 3910 Work Term Report 1 (1.5) and ENVR 3920 Work Term Report 2 (1.5). Additional work terms are available to interested students. Each academic term and each employment term commence in January, May or September. While on an employment term, a Cooperative Education Option student is not permitted to take more than three additional credit hours of academic work outside of the requirements of the Coop placement without permission of a Riddell Faculty student advisor.
SECTION 5: Bachelor of Arts in Geography Degree Regulations, Program Description and Courses Offered by

Head: Mark Hanson (Acting)
Campus Address/General Office: 220 Sinnott Building
Website: environment_geography@umanitoba.ca
Telephone: (204) 474-9667
Fax: (204) 261-0038
Website: umanitoba.ca/environment/departments/geography

5.1 Program Information

There are four broad categories of courses in the Geography discipline: physical geography is concerned with physical features on and over the globe; human geography examines the products of human activity; regional geography attempts to achieve a synthesis of physical and human geography of a particular place; and techniques in geography focus on analytical methods.

The attraction of Geography as a discipline lies in its diverse interests and approaches to knowledge building while being centred on the fundamental concepts of human-environment relations, location/place and space/distance. Geographers see the world and want to know how physical processes and systems shape the land, air, water, flora and fauna around them and how these are influenced by human activity. We want to know how human societies, cultures, and economies work and how these human systems are interdependent with each other and with natural systems. We work at a variety of geographic scales, from the micro-scale of local communities and regions, through the macro-scale of global human and physical systems. Geography embraces the study of topics as wide-ranging as: weather and climate, population distribution, agricultural systems, globalization, landforms and geomorphology, environmental perceptions, health and healthcare, and biogeography. Therefore, by selecting courses from within the department, as well as complementary courses from other academic units of the University, students can develop fascinating, focused and challenging degree programs that will prepare them for careers in a variety of areas.

The General degree in Geography provides students with a basic level of understanding of the discipline and its inter-relationships. This degree is also a useful consideration for students planning to complete the After-Degree Bachelor of Education program (see the Faculty of Education chapter of this Calendar). The General degree program may be completed entirely by Distance Education. The Advanced degree program in Geography provides opportunities for students who desire a broad geographical education along with a reasonable degree of specialization in a particular field of Geography. Students planning a professional career or a high degree of specialization in Geography are strongly advised to enter the Honours degree program. The Honours degree demands the highest scholastic performance of all programs available. Students are strongly advised to enter an Honours degree program with their admission to the Bachelor of Arts in Geography. Consultation with the department head is also advised.

Structure of the B.A. Geography Degree Program

The structure of the B.A. Geography degree is summarized as follows:

A Geography (Major) component that varies in credit hour requirement depending on the degree program; 30 credit hours in the General; 51 credit hours in the Advanced; and 69 credit hours in the Honours. Students are not permitted to declare a second major.

Advanced and General degree students must complete a Minor in a subject field that is different than that of the declared major, and may be chosen from one of the other programs in the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Students in the B.A. Geography are not permitted to complete a Minor in Physical Geography. The Minor requirements are described in section 3.2 of this Chapter. Contact a Riddell Faculty student advisor in the Faculty Dean’s Office for further information about eligible Minors.

Students must complete 5 subject fields with 6 credit hours in each (30 credit hours). For example: 6 credit hours in Geography, plus 6 credit hours in Mathematics, plus 6 credit hours in Geological Sciences, plus 6 credit hours in Anthropology, plus 6 credit hours in Native Studies.

Students must also complete 6 credit hours from Humanities, and 6 credit hours offered by the Faculty of Arts, and 6 credit hours of science courses.

**Note:** Students can satisfy the requirement for a Humanity, and/or Arts, or science and at the same time satisfy the Written English or Mathematics requirement and one of the 5 subject fields required with the same 6 credit hours of courses.

**Humanities**

For course subjects taught by the Faculty of Arts that can be used towards the Humanities requirement, refer to the Chapter for the Faculty of Arts, Additional Faculty Regulations and Policies section. Music (i.e. all courses listed for Advanced Major and Minor programs except ensemble courses) and History of Art (i.e. all courses listed with course prefix FAAH) may also be eligible courses. Students should see a Riddell Faculty student advisor for further information.

**B.A. in Geography (General): Academic Regulations**

To qualify for the degree Bachelor of Arts in Geography (General), students must complete 90 credit hours including: all course requirements; a chosen minor field; the requirements in the five subject fields; and areas of Humanities, Arts, and sciences. As well, students must satisfy the Riddell Faculty regulations outlined in section 3 of this Chapter. Minimum performance requirements include passing grades (‘D’ or better) in each course and a minimum degree Grade Point Average of 2.00 on Geography courses as well as the 90 credit hours that constitute the degree. Students cannot exceed 48 credit hours of failed courses.

**B.A. in Geography (Advanced): Academic Regulations**

To qualify for the Bachelor of Arts in Geography (Advanced) degree, students must complete 120 credit hours including: all course and performance requirements; a chosen minor field; the requirements in the five subject fields; and areas of Humanities, Arts, and sciences. As well, students must satisfy the Riddell Faculty regulations outlined in section 3 of this Chapter. Minimum performance requirements include passing grades (‘D’ or better) in each course and a minimum degree Grade Point Average of 2.00 on Geography courses and the 120 credit hours which constitute the degree. Students cannot exceed 18 credit hours of failed courses.

**B.A. in Geography (Honours): Academic Regulations**

To qualify for the Bachelor of Arts in Geography (Honours) degree, students must complete 120 credit hours including: all course and performance requirements; the requirements in the five subject fields, and the areas of Humanities, Arts and sciences. As well, students must satisfy the Riddell Faculty regulations outlined in section 3 of this Chapter. Minimum
performance requirements include passing grades ('D' or better) in each course and a minimum degree Grade Point Average of 3.00 on Geography courses and the 120 credit hours which constitute the degree. Students cannot exceed 18 credit hours of failed courses.

5.2 Advanced Entry Requirements

Students are required to attain a minimum degree Grade Point Average of 2.00 based on the Degree Standards Table in Section 5.2.2 to be eligible for admission to the B.A. in Geography. Students who are admitted will be placed in the General degree program. Students may be eligible for transfer to either the Advanced or Honours degree program provided they satisfy the entrance requirements defined below in 5.2.1. To enter the Advanced or Honours degree program, a student must consult with a Riddell Faculty student advisor in the Faculty Dean’s Office.

5.2.1 Advanced Entry Requirements

<table>
<thead>
<tr>
<th>Degree Program in B.A. Geography</th>
<th>Minimum Number of Credit Hours</th>
<th>Minimum Degree Grade Point Average</th>
<th>Maximum Credit Hours of Failed courses</th>
<th>Additional Entrance Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Honours</td>
<td>24</td>
<td>3.00</td>
<td>18</td>
<td>grade of ‘B’ from GEOG 1280, GEOG 1290(^2) and/or GEOG/GPE 1700 or a GPA of 3.00 or better in all Geography courses</td>
</tr>
<tr>
<td>Advanced</td>
<td>24</td>
<td>2.00</td>
<td>18</td>
<td>grade of ‘C’ from GEOG 1280, GEOG 1290(^2) and/or GEOG/GPE 1700</td>
</tr>
<tr>
<td>General</td>
<td>24</td>
<td>2.00(^1)</td>
<td>48</td>
<td>grade of ‘C’ from GEOG 1280, GEOG 1290(^2) and/or GEOG/GPE 1700</td>
</tr>
</tbody>
</table>

Minimum Grade Point Average for entrance into the General degree program is determined using the Degree Standards Table in 5.2.2.

\(^1\) GEOG 1281 and GEOG 1291 may be used in lieu of GEOG 1280 and GEOG 1290, respectively.

5.2.2 Grade Point Average Calculation for Entrance and Continuation

General degree students in the B.A. Geography must attain a minimum 2.00 Grade Point Average at each point of assessment. The Degree Standards Table listed below is used to determine a student’s eligibility for admission to the Riddell Faculty as well as evaluate a student’s performance after each term.

<table>
<thead>
<tr>
<th>Credit hours</th>
<th>Minimum Degree GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>24-30</td>
<td>1.80</td>
</tr>
<tr>
<td>33-45</td>
<td>1.85</td>
</tr>
<tr>
<td>48-60</td>
<td>1.90</td>
</tr>
</tbody>
</table>

5.3 Minimum Performance Requirements

A student’s academic performance is assessed first with his/her application for admission to the Riddell Faculty and then following each term in which the student is registered in more than 4.0 credit hours. To be in good standing and permitted to continue in a degree program, a student must achieve the minimum standards outlined for his/her degree program at each point of assessment. For General degree students, this includes the Degree Standards Table outlined in 5.2.2, as well as the requirements outlined in 5.3.1. Students in the Advanced and Honours degrees are required to satisfy the requirements listed in 5.3.1. Minimum academic performance is based on the degree Grade Point Average and number of failed courses. Prior to each registration, Advanced and Honours degree students must have their course selections approved by a Riddell Faculty student advisor. Students may not make any subsequent changes without receiving prior written permission.

To graduate with a B.A. Geography with the intended degree designation, a student must achieve the minimum performance standards and graduation requirements outlined in 5.3.1. following their last term of registration and satisfy all faculty and degree requirements in Geography as defined in sections 5.3.1. and 5.5 of this Chapter.

Students in the Honours and Advanced degree programs who do not meet these minimum performance requirements will be withdrawn from their existing program and placed in the Advanced and General degrees respectively. Students who do not meet the minimum performance requirements for the General degree program will receive an academic warning, be placed on probation or academic suspension as defined in section 3.14 Academic Warning, Probation, Academic Suspension and Special Students (Academic Standing) in this Chapter. Students withdrawn from the Honours degree program may be eligible to enter the Advanced program and are required to obtain permission from a Riddell Faculty student advisor.

Students withdrawn from the Honours degree program will have the notation, ‘Required to Withdraw from the Honours Program’, recorded on their transcript. Similarly, students withdrawn from the Advanced program will have the notation, ‘Required to Withdraw from the Advanced Program’, recorded on their transcript.

5.3.1 Minimum Performance Requirements for Continuation and Graduation

<table>
<thead>

</table>

\(^1\) GEOG 1281 and GEOG 1291 may be used in lieu of GEOG 1280 and GEOG 1290, respectively.
**5.4 Graduating with Distinction or First Class Honours**

**With Distinction**

Students graduating with a B.A. Geography (General) degree will have their degree granted ‘With Distinction’ if they have a minimum Grade Point Average of 3.80 and provided a minimum of 90 credit hours of acceptable course work is completed at the University of Manitoba.

Students graduating with a B.A. Geography (Advanced) degree will have their degree granted ‘With Distinction’ if they have a minimum Grade Point Average of 3.80 and provided a minimum of 90 credit hours of acceptable course work is completed at the University of Manitoba.

**First Class Honours**

Students in the Honours program will have their degree granted ‘First Class Honours’ if they have a minimum degree Grade Point Average of 3.80 and provided a minimum of 90 credit hours of acceptable course work is completed at the University of Manitoba.

</tr>
</tbody>
</table>

**6 credit hours from GEOG 1280, GEOG 1290 and/or GEOG 1700**

**Plus 6 credit hours of Humanities \(^6\)**

**Notes:**

1. The courses required in this program will satisfy the university mathematics requirement and the science course requirement.
2. Within the first 60 credit hours of courses, students must have completed 6 credit hours in each of 5 subject fields (totalling 30 credit hours). See section 5.1 for details.
3. General and Advanced degree students are required to maintain a Degree Grade Point Average of 2.00 on the courses defining their Geography program.
4. Among the 2000- and 3000-level courses, at least 6 credit hours must be systematic and at least 6 must be area studies. Systematic courses and area studies courses are listed in Section 5.6.
5. Students should review the current course topics available through GEOG 3740 (6), GEOG 3750 (3), GEOG 3760 (6), GEOG 3770 (3) and GEOG 4670 (3). Also, all courses are not offered every year or every term. The course schedule for the current academic term is available from the Class Schedule.
5.6 Systematic (HS, PS, TS) and Area Studies (A) Courses

Courses numbered at the 2000- and 3000-level are arranged into Systematics (PS, HS and TS) and Area Studies (A). B.A. Geography students may specialize in the Physical Geography (PS); Human Geography (HS); Techniques (TS); Area Studies (A) but it is not compulsory for them to do so. B.A. Geography students wishing to specialize in Physical Geography should select at least 18 credit hours from optional courses designated as 'PS'. B.A. Geography students wishing to specialize in Human Geography should select at least 18 credit hours from optional courses designated as 'HS'. Students should discuss these options with a Riddell Faculty student advisor.

B.A. Geography students wishing to specialize in Applied Geography should include 2000-level courses from GEOG 2200, GEOG 2310, GEOG 2510, GEOG 2520, and ENVR 2810W; and 3000-level courses from GEOG 3200, GEOG 3320, GEOG 3460, GEOG 3730, GEOG 3810M, GEOG 3710, and GEOG 3720.

Courses offered for the current academic term are published in the Class Schedule and can be searched by Attribute Type. To find Systematics (HS, PS, TS) courses search: ‘Geography: Human’, ‘Geography: Physical’ or ‘Geography: Techniques’. To find Area Studies (A) courses search: ‘Geography: Area Studies’.

5.7 Environment, Earth, and Resources Course Description

EER 1000 Earth: A User’s Guide Cr. Hrs. 3

This course will present a multi-disciplinary introduction to the Planet Earth as both the source of essential resources and as the site of resulting negative impacts. Focus in the course will be provided by addressing important and current topics, case studies, and concepts that the well-educated citizen of the Earth should understand and will include natural and human-induced processes within a broad range of spatial and temporal scales.

5.8 Geography Course Descriptions 1000 Level

GEOG 1280 Introduction to Human Geography Cr. Hrs. 3

This course studies aspects of the human world: population, settlement and resources. Not to be held with GEOG 1200 or GEOG 1201, or GEOG 1281.

GEOG 1290 Introduction to Physical Geography Cr. Hrs. 3

This course studies aspects of our physical environment: climate, landforms, soils and vegetation. Not to be held with GEOG 1291 or GEOG 1200 or GEOG 1201.

GEOG 1700 Social Justice in the 21st Century: Global Political Economy and Environmental Change Cr. Hrs. 3

Introduces students to political economy and cultural geography through the close analysis of contemporary world events, including but not limited to instances of violent conflict, environmental change, international negotiations, political processes and events, social movements, and policy developments. A multimedia approach will advance students’ understanding of geopolitical events from political economy and spatial perspectives. Specific content of the course will change year-by-year in response to developments in national and world politics. Also offered by the Faculty of Arts as GPE 1700. Students may not hold credit for both GPE 1700 and GEOG 1700.

5.8 Geography Course Descriptions 2000 Level

GEOG 2200 Introduction to Thematic Cartography (TS) Cr. Hrs. 3

(Original Required) An introduction to the principles of map compilation and reproduction, including analysis and cartographic display of spatially referenced data. Emphasis will be placed on cartographic data manipulation, generalization, and symbolization, map design, visualization and communication. Not to be held with GEOG 2221. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2272 Natural Hazards (PS) Cr. Hrs. 3

Environmental hazards to human settlement and economy are examined with particular attention to meteorological, soil erosion, mass wasting, earthquake and volcanic phenomena. Not to be held with GEOG 2440. Prerequisite: a grade of C or better in one of GEOG 1290, GEOL 1340, or GEOL 1410, GEOG 1291, GEOG 1200, GEOG 1201, GEOL 1360 or permission of department head.

GEOG 2300 Atmospheric Thermodynamics, Clouds and Precipitation (PS) Cr. Hrs. 3

Critical thermodynamic processes are discussed that are associated with the Earth’s atmosphere including dry and moist processes, phases of water, stability, cloud development and precipitation processes. Prerequisites: (GEOG 1290 or GEOG 1291 (C), or (GEOG 1200) or GEOG 1201 (C)), and (MATH 1500 or MATH 1501 (C), or MATH 1510 (C), or MATH 1520 (C), or MATH 1530 (C)).

GEOG 2310 Introduction to Process Hydrology (PS) Cr. Hrs. 3

This course introduces students to the near-surface components of the hydrological cycle, including the processes of precipitation, evaporation, water-biosphere interactions, infiltration, overland and stream flow. Prerequisites: (GEOG 1290 or GEOG 1291 (C), or (GEOG 1200) or GEOG 1201 (C)), and (PHYS 1020 or PHYS 1021 (C), or PHYS 1050 or PHYS 1051 (C), or MATH 1500 or MATH 1501 (C), or MATH 1510 (C), or MATH 1520 (C), or MATH 1530 (C)), or permission of department head.

GEOG 2330 Place, Populations and Mobility: Geographic Perspectives (HS) Cr. Hrs. 3

An examination of the factors controlling the number and distribution of human population. Variations in fertility, mortality and mobility will be analyzed and the causes and consequences reviewed. Not to be held with GEOG 2480. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2372 Geography of Tourism (HS) Cr. Hrs. 3

This course examines the social, economic and environmental dimensions of tourism and recreation. Historical and contemporary experiences from around the world will be studied. Not to be held with GEOG 2410. Prerequisite: a grade of C or better in (GEOG 1200) or GEOG 1280, or permission of department head.

GEOG 2520 Geography of Natural Resources (HS) Cr. Hrs. 3

An introduction to the basic concepts of the subject and the distribution of resources. Stress will be placed on Canadian resources and resource requirements but examples from other resource systems will also be used. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.
GEOG 2540 Weather and Climate (PS)  Cr. Hrs. 3
This half-course examines the nature, controls, and observations of weather and the variation of climate in time and space. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2550 Geomorphology (PS)  Cr. Hrs. 3
This half-course surveys a broad array of landforms in the world and the geomorphic processes responsible for their creation. Attention is strongly focused on those landforms processes originating at the earth's surface. Prerequisite: (GEOG 1200) or GEOG 1201 (C), or GEOG 1290 or GEOG 1291 (C), or permission of department head.

GEOG 2570 Geography of Canada (A)  Cr. Hrs. 3
A regional study of Canada in which the major regions of Canada are studied with respect to geographical patterns of their physical environment, settlement, culture, economic activity, and land use. Not to be held with GEOG 2560, GEOG 2561 or GEOG 3431. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2580 Geography of the United States (A)  Cr. Hrs. 3
A regional study of the United States in which the major regions of the United States are studied with respect to geographical patterns of their physical environment, settlement, culture, economic activity, and land use. Not to be held with GEOG 2560, GEOG 2561. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2630 Geography of Culture and Environment (HS)  Cr. Hrs. 3
An introduction to the cultural geographic study of environment, focusing on the evolution of landscape, the creation of regions, and human relationships with nature. Prerequisite: (GEOG 1200) or GEOG 1201 (C), or GEOG 1280 or GEOG 1281 (C), or permission of department head.

GEOG 2640 Geography of Culture and Inequality (HS)  Cr. Hrs. 3
An introduction to the cultural geographic study of human and place inequalities, focusing on behaviour in landscape, group differences, and human identities. Prerequisite: (GEOG 1200) or GEOG 1201 (C), or GEOG 1280 or GEOG 1281 (C), or permission of department head.

GEOG 2700 Introduction to Arctic System Science  Cr. Hrs. 3
This course introduces students to the various components of the Arctic system, including the terrestrial and marine environments, polar atmosphere, biological and chemical oceanography. Prerequisite: GEOG 1290 or (GEOG 1291)(C), or GEOG 1200 or (GEOG 1201)(C) or ENVR 1000 (C) or GEOL 1340 (C).

GEOG 2900 Geography of Canadian Prairie Landscapes (A)  Cr. Hrs. 3
This course introduces students to the various geographical themes, concepts and processes within the context of the natural and anthropogenic development of the Canadian prairie region. It traces the evolution of the prairie landscape. It will focus on academic writing in the discipline. Not to be held with GEOG 2450. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2930 Introduction to Oceanography  Cr. Hrs. 3
This course provides an introduction to the physical, chemical, biological and geological processes in the world oceans and their interactions with the overall Earth system. This course is interdisciplinary, applying geological, chemical and biological processes to the study of the world's oceans. Prerequisite: A minimum grade of "C" in GEOG 1290 (or GEOG 1291) or GEOG 1200 (or GEOG 1201) or ENVR 1000 or GEOL 1340.

5.8 Geography Course Descriptions-3000 Level

GEOG 3200 Introduction to Remote Sensing (TS)  Cr. Hrs. 3
(1ab Required) The course is an introduction to the principles of optical, active and passive microwave remote sensing. A review of satellite and sensors and their geographic applications will be presented, along with digital image analysis techniques. Laboratory assignments will provide hands-on experience in dealing with remote sensing data. Prerequisites: [(GEOG 1200) or GEOG 1201 (C), or GEOG 1290 or GEOG 1291 (C)], and (PHYS 1020 or PHYS 1021 (C), or PHYS 1050 or PHYS 1051 (C), or MATH 1300 or MATH 1301 (C), or MATH 1500 or MATH 1501 (C)], or permission of department head.

GEOG 3310 Atmospheric Dynamics, Storms and Radar (PS)  Cr. Hrs. 3
The course covers the critical dynamic processes that are associated with the Earth's atmosphere including forces that control wind, the kinematics of the wind field, general circulation, hodographs, thermal wind, laws of motion, mid-latitude circulations, convective storms and the utility of weather radar. Prerequisite: GEOG 2300 (C), or permission of department head.

GEOG 3320 Introduction to Microclimates and Micrometeorology (PS)  Cr. Hrs. 3
This course introduces the concept of energy balance climatology and examines relationships among climate, microclimate, and environments of the Earth's surface and human-made environments. Studies include bioclimates and hydroclimates. Prerequisites: (GEOG 2310 (C)), and (GEOG 2300 (C)), or permission of department head.

GEOG 3340 Migration and Mobility in a Globalized World  Cr. Hrs. 3
This course surveys the geographic dimensions of migration and mobility of populations, with emphasis of contemporary events. Prerequisites: a grade of C or better in GEOG 2330 or (GEOG 2480), or permission of department head.

GEOG 3390 Introduction to Climate Change and Its Causes (PS)  Cr. Hrs. 3
The primary objective of this course is to provide students with a general understanding of the physical and astronomical factors that drive global climate change. Focus will be given to current and future climate change in the context of observations and modeling. Not to be held with GEOG 3610. Prerequisite: a minimum of three credit hours from Geography or Environment courses, or permission of department head.

GEOG 3460 Urban Geography (HS)  Cr. Hrs. 6
The course studies the processes and trends of urbanization; the classification of cities; central-place theory; cities as systems; land-use patterns; social forces and factorial ecology; and urban transport problems. Prerequisite: (GEOG 1200) or GEOG 1201 (C), or GEOG 1280 or GEOG 1281 (C), or permission of department head.

GEOG 3640 Social Geography of the Environment (HS)  Cr. Hrs. 3
This course provides an intermediate-level assessment of current geographical approaches to society and environment. Students are exposed to critical realist, social constructionist, Marxist, feminist and post-Colonial traditions as they are applied to environmental and social justice, globalization and public health. It includes discussion and a community-based learning project. Prerequisite: a grade of C or better in (GEOG 1200 or
GEOG 1201) or GEOG 1280 or GEOG 1281, or permission of department head.

**GEOG 3730 Geographic Information Systems (TS)**  Cr. Hrs. 3
(Private Required) Weekly two-hour lab. The course introduces students to the evolving science, technology and applications of Geographic Information Systems (GIS). Related geospatial technologies such as Global Navigation Satellite Systems and Remote Sensing, as well as the field of Geomatics will be introduced. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography, Geology or Environment courses numbered at the 1000 and/or 2000 level, or permission of instructor or department head. Not to be held with GEOG 2250.

**GEOG 3740 Field Studies in Geography (A,TS)**  Cr. Hrs. 6
A field course designed to introduce students to either a detailed area study or to field techniques employed for specific geographic enquiry. Prerequisite: Permission of department head.

**GEOG 3750 Field Studies in Geography (A,TS)**  Cr. Hrs. 3
A field course designed to introduce students to either a detailed area study or to field techniques employed for specific geographic enquiry. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

**GEOG 3760 Special Topics in Geography**  Cr. Hrs. 6
This course will vary from year to year depending on the needs of students and the interests of instructors. Prerequisite: Permission of department head.

**GEOG 3770 Special Topics in Geography**  Cr. Hrs. 3
This course will vary from year to year depending on the needs of students and the interests of instructors. Prerequisite: Permission of department head.

**GEOG 3810 Quantitative Research Methods in Geography (TS)**  Cr. Hrs. 3
This course focuses on the quantitative analytical methods available for the interpretation on physical and human geography applications. May not be held with GEOG 3680. Prerequisite: ENVR 2810 or the former GEOG 2530 or STAT 1000 or STAT 1001, or permission of department head.

**GEOG 3850 Sustainable Manitoba (A)**  Cr. Hrs. 3
This course approaches local sustainability issues from an interdisciplinary perspective. By looking at the ecological, social and economic aspects from a variety of discipline perspectives, a fuller understanding of sustainability is achieved. The broad range of perspectives is achieved through participation of guest speakers from other faculties and outside of the university as well as excursion outside the classroom. Not to be held with ENVR 3850. Prerequisite: 60 credit hours of course work, or permission of department head.

**GEOG 3860 Animal Geographies (HS)**  Cr. Hrs. 3
This course presents a variety of topics concerning the interactions between humans and animals, how humans influence and use animals, and the many roles animals play in human lives and environments. Animal Geographies lies at a meeting point between physical and human geography, where we must consider the blurring boundaries between what it means to be animal/human, and the implications of how animals are used and represented. A wide variety of perspectives, beliefs, and points of view will be explored. Prerequisite: Permission of department head.

**GEOG 3870 Food Geographies**  Cr. Hrs. 3
This course provides a critical examination of the geographies of food at a variety of scales, from the body to the global. The course focuses on themes in three interconnected areas: 1) food production and the global food system from farm to plate including agribusiness and alternative food production and distribution models; 2) food consumption habits and beliefs and foodways as geographically contingent material culture; and 3) food (in)security and its relationship to health and wellbeing. This course is cross-listed as HNSC 3870. May not be held with HNSC 3870. Prerequisite: a grade of C or better in GEOG 1280 or GEOG 1281 or HNSC 1200 or GEOG 1200, or permission of department head.

**GEOG 3920 Biological Oceanography 1: Lower Trophic Levels**  Cr. Hrs. 3
In this course, students will gain a background on the study of biological oceanography. Biological oceanography is a very active and important field of study worldwide due to the spatial coverage and biological activity of the world's oceans. This course examines the interaction of marine organisms with other biological life, as well as with the physical environment. Prerequisite: A minimum grade of "C" in both GEOG 2930 and BIOL 1030.

### 5.8 Geography Course Descriptions-4000 Level

**GEOG 4050 Ecosystem Management**  Cr. Hrs. 3
This course will provide students with an understanding of the practical applications of ecological science, environmental policy, and resource management approaches in the large-scale planning of landscapes. The course will review ecological principles and trace the historical development of the ecosystem concept. Comparisons are made to other possible environmental management approaches. The synthesis of major elements and concepts will be reinforced through case studies on the Manitoba landscape, with an emphasis on practical learning by students through field seminars and group discussions. Not to be held with ENVR 4050. Prerequisite: Permission of department head.

**GEOG 4060 Biogeography**  Cr. Hrs. 3
This course will provide students with a general understanding of the historical, ecological, analytical, and conservation aspects of biogeography. The course will also have a dual focus on the principles and concepts of reasons for the distribution of plants and animals worldwide, as well as incorporating discussion on as many local (Manitoba, Canada, North America) examples as possible. Not to be held with ENVR 4060. Prerequisite: Permission of department head.

**GEOG 4200 Advanced Methods in Remote Sensing**  Cr. Hrs. 3
(Private Required) Provides instruction in the current theory and application of remote sensing technology to Earth system Science. Emphasis will be placed on the processing and interpretation of remote sensing imagery and the integration of remote sensing data with other spatial data. Prerequisite: GEOG 3200 (C), or permission of department head.

**GEOG 4260 Sacred Lands**  Cr. Hrs. 3
This upper-level seminar course will develop in students a depth and breadth of understanding appropriate to the honours undergraduate/graduate level in the area of gender geography scholarship. From critical social science theoretical positions, this course asks students to examine what we can learn about how humans live on the earth if we
see them as gendered. Just as we may also understand humans and their interactions in and with spaces, places and environments through the lenses of race, ethnicity, class, age and/or combinations of these categories with gender. Prerequisite: a grade of C or better in a minimum of six credit hours in Geography, or permission of department head.

**GEOG 4290 Geographies of Health and Health Care**  
Cr. Hrs. 3  
This course provides an introduction to and critical examination of the geographies of health and healthcare. Topics include perceptions and determinations of health and health care; health care delivery, focusing on spatial patterns and inequities; and the relationship between environment and health, particularly impacts of environmental contamination. Prerequisite: Permission of department head.

**GEOG 4300 Synoptic Meteorology and Weather Analysis**  
Cr. Hrs. 3  
Applied aspects of meteorology are described in terms of weather analysis and forecasting techniques for synoptic-scales and meso-scales using various meteorological tools. An introduction to severe weather forecasting techniques will also be described. Prerequisite: GEOG 3310 (C), or permission of department head.

**GEOG 4310 Boundary-Layer Climatology and Micrometeorology**  
Cr. Hrs. 3  
A seminar course on advanced topics in microclimatology and micrometeorology. Prerequisite: GEOG 3320 (C), or permission of department head.

**GEOG 4330 Concepts in Atmospheric Modeling**  
Cr. Hrs. 3  
This course will primarily focus on numerical modeling applications and techniques of the Earth's atmosphere with an emphasis on weather prediction. This includes understanding basic modeling terminology, numerical schemes, structure of models, types of models, what is required to run a model, and an introduction to data assimilation and ensemble techniques to weather prediction. Not to be held with GEOG 4320. Prerequisite: GEOG 3310 (C) or GEOG 3320 (C), or permission of department head.

**GEOG 4350 Parks and Protected Areas Planning and Management: Field Studies**  
Cr. Hrs. 6  
The course is taught in two segments, an on-campus component and field study component taking place in Banff National Park. The on-campus component examines the historical development of the concept of parks and protected areas, the role of interpretation, management and research in the parks and emerging issues in the management of parks and protected areas. In addition, during the on-campus component planning for the field will take place. The field segment will focus on a wide variety of management issues with particular attention to Banff National Park. Emerging issues and trends will be examined and past management responses evaluated. There will be opportunities for students to investigate specific management issues of interest to them and to participate in current research being conducted in the park. This course is also offered in the Faculty of Kinesiology and Recreation Management as REC 4350. Prerequisite: Permission of department head.

**GEOG 4390 Global Climate Change**  
Cr. Hrs. 3  
Students will be introduced to the complexities of climate changes through a series of introductory lectures and reading assignments that focus on recent scientific publications and review articles (mathematical skills are not required). Both sides of the climate change debate will be addressed in weekly assignments, and students will defend their conclusions in classroom discussion. Each student will take on a project in some aspect of climate change – glaciers, sea ice, temperature trends, precipitation, agriculture, animal migration, aerosols, or a regional impact. Prerequisite: a grade of C or better in GEOG 3390 (or GEOG 3610), or permission of department head.

**GEOG 4560 Techniques in Climatology**  
Cr. Hrs. 3  
Instrumentation, the sources of climatic data, and the use of satellite photography, as well as methods of analysis and presentation are discussed. Prerequisite: GEOG 3320 (C), or permission of department head.

**GEOG 4650 Models in Regional Analysis**  
Cr. Hrs. 3  
Emphasis is placed on the use of regression techniques in regional analysis including the classical ordinary least squares methods and two-stage least squares. Migration and industrial location models are developed and calibrated using these techniques. Prerequisite: Permission of department head.

**GEOG 4660 Honours Thesis**  
Cr. Hrs. 6  
This course involves the production of a thesis under the supervision of a department faculty member. Prerequisite: Permission of department head.

**GEOG 4670 Selected Issues**  
Cr. Hrs. 3  
Intensive study of selected geographic issues. Prerequisite: Prearranged written consent of an individual instructor and permission of department head.

**GEOG 4780 Storms-Mesoscale**  
Cr. Hrs. 3  
This course focuses on a range of storms and mesoscale phenomena in the summer or winter. These include thunderstorms, tornadoes, squall lines, lightning, low level jets, gust fronts, blizzards, freezing rain, orographic storm, and polar lows. The emphasis is on the physical mechanisms leading to these events and it also examines how they may change in our changing climate. Not to be held for credit with GEOG 7780. Prerequisite: A grade of "C" or better in GEOG 3310 or permission of department head.

**GEOG 4872 Advanced Methods in Geomatics**  
Cr. Hrs. 3  
This course focuses on the theory and application of geomatics in spatial problem solving in geography and the environment. The use of geomatics' technologies including GIS, Earth observation and spatial numerical methods will be covered. Students will learn the theoretical underpinning of spatial statistical concepts and will experiment with data exploration, inference and hypothesis testing. Lab assignments will provide practical experience with GIS and other geomatics software as well as CRAN-R. Not to be held with ENVR 4872, GEOG 4590 or GEOG 4720. Prerequisite: GEOG 3730 or permission of Instructor.

**GEOG 4930 Oceanography: Chemical**  
Cr. Hrs. 3  
This course deals with the sources, distribution, and transformation of chemical constituents of the oceans, and the processes that control them. The emphasis will be given to biologically or climatically significant elements such as carbon, nitrogen, phosphorus, iron and mercury in the Arctic Ocean. Prerequisite: ENVR 2550 and GOEG 2930 or permission by department head.

**GEOG 4940 Arctic Sea Ice**  
Cr. Hrs. 3  
This course aims to (i) provide students with a strong background on the importance and current knowledge of Arctic sea ice and (ii) train students on current field techniques used in research pertaining to sea ice-related investigations. To attain these goals, the course will combine field safety training, classroom lectures and assignments, and direct field experience through a field trip pertaining to physical and biogeochemical processes of the snow-covered sea-ice environment. Prerequisite: permission of the instructor.

**GEOG 4960 Oceanography: Biological II Higher Trophic Levels**  
Cr. Hrs. 3
This course will examine the oceanographic-biological coupling occurring in the Arctic region, focusing on environmental conditions related to higher trophic levels and impacts of climate change. This course will extend the learning of the 3000-level course that examines biological oceanography, which focuses on the environmental factors that control primary production and lower trophic levels in the world’s oceans. Prerequisite: A minimum grade of “C” in both GEOG 3920 and a 2000-level BIOL course or permission of instructor.

SECTION 6: Bachelor of Science in Physical Geography Degree Regulations, Program Description and Courses Offered by

Head: Mark Hanson (Acting)
Campus Address/General Office: 220 Sinnott Building

6.1 Program Information

Physical Geography includes the study of the environment through aspects of atmospheric science, geomorphology, biogeography, and hydrology, all of which draw upon the natural and applied sciences to understand the natural environment. Atmospheric sciences examine the physical and biophysical processes at and near the earth’s surface shaping climate and determining the weather. These processes are examined over cascading scales, local to global. Hydrology studies the flow of water between the Earth’s surface and the atmosphere, including the quantity and quality of water resources as well as the spatial variability in the hydrologic cycle. The examination of processes at the earth’s surface and the associated landforms is called geomorphology. Various sub-disciplines in geomorphology include weathering and erosional processes, volcanoes, glacial and river systems. Biogeography studies the interrelationships between the biospheric environment and the physical environment. Formation of soils, ecosystem and biome cycles and components, as well as human interaction with the physical environment are all topical areas in biogeography.

Geomatics is an emerging field referring to the techniques of spatial data acquisition, handling, and analysis. Included within this field have been geographic applications of computer analysis and spatial modeling, spatial statistics, remote sensing technology, and geographic information systems. Many of these techniques have their origins in the applied sciences, but both physical and human geographers have contributed greatly to their development and application. The application of such methodologies in geographic fields, such as resource management, urban geography, climate change, and applied geography has also provided closer cooperation between human and physical geography, as well as promoting considerable interdisciplinary research with other University disciplines.

The Major and Honours B.Sc. degree programs in Physical Geography serve students who desire advanced study in the academic subject matter of various themes contained within Physical Geography. The Honours program in particular is intended for students interested in the opportunity for exposure to advanced geographic research. As such, the Honours program demands higher academic performance. Students who are ineligible to enter Honours in their second year may establish this in the following year on the basis of their improved scholastic performance. The degree programs may be pursued on a full or part-time basis.

Minor in Another Department

Students in the B.Sc. Physical Geography have the opportunity to complete a Minor in a subject field that is different than that of the declared Major, and which normally consist of 18 credit hours from a department offering this option at the University of Manitoba. Students in the B.Sc. Physical Geography are not permitted to complete a Minor in Geography. Students can declare only one Minor. The Minor requirements are described in section 3.2 of this Chapter. Contact a Riddell Faculty student advisor in the Faculty Dean’s Office for further information about eligible Minors.

Streams

Students are required to complete a stream approved by a Riddell Faculty student advisor. Students in the Major or Major (Coop) programs are required to complete a minimum of 30 credit hours of 2000- (or higher) level courses, of which at least 18 credit hours must be at or above the 3000-level. The B.Sc. Honours and Honours (Coop) programs require students to complete 39 credit hours in a Stream, of which at least 24 credit hours are defined at or above the 3000-level and must include GEOG 4660 Honours Thesis (6). Streams are currently available in Atmospheric and Hydrological Sciences, Geomatics and Physical Geography. See a Riddell Faculty student advisor for current information about these Streams.

Major

To qualify for the degree, Bachelor of Science in Physical Geography (Major), a student must complete 120 credit hours with passing grades (‘D’ or better) and a minimum degree grade point average of 2.00. Major (Coop) students must attain a minimum degree Grade Point Average of 2.50. Students must complete all faculty requirements. There is no limit to the number of credit hours a student completes provided he/she does not exceed 18 credit hours of failed courses.

Honours

To qualify for the degree Bachelor of Science in Physical Geography (Honours and Honours Coop), a student must complete 120 credit hours with passing grades (’D’ or better) and a minimum degree grade point average of 3.00 in the courses that constitute the degree. Students must complete all faculty requirements. There is no limit to the number of credit hours a student completes provided he/she does not exceed 18 credit hours of failed courses.

6.2 Advanced Entry Requirements

Advanced Entry students are placed in the Major degree program until they have completed a minimum of 48 credit hours after which they may transfer to the Honours program or remain in the Major. To make a program transfer, students must consult a Riddell Faculty student advisor.

6.2.1 Advanced Entry Requirements

A student's academic performance will be assessed with his/her application for admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources. The student must achieve the minimum standards at each point of assessment. This assessment is based on the student's minimum degree Grade Point Average; the grades received in each of GEOG 1290 (or GEOG 1291), GEOG 2200, GEOG 2310, GEOG 2550, GEOG 3730, GEOG 3810; and the number of failed courses after admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources.

### 6.3 Minimum Performance Requirements for Continuation and Graduation

A student's academic performance will be assessed with his/her application for admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources and following each term thereafter. A Riddell Faculty student advisor must approve a student's registration each Fall/Winter term. Any revisions in this schedule should also be approved prior to the end of the registration revision period.

To be in good standing and permitted to continue in a degree program, a student must achieve the minimum standards at each point of assessment. This assessment is based on the student's minimum degree Grade Point Average; the grades received in each of GEOG 1290 (or GEOG 1291), GEOG 2200, GEOG 2310, GEOG 2550, GEOG 3730, GEOG 3810; and the number of failed courses after admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources.

### Honours Requirement

- 39 credit hours of which at least 24 credit hours must be at the 3000-level or higher; completion of GEOG 4660; minimum 'C+' grade in each course.

### Major Coop Requirement

- 30 credit hours of which at least 18 credit hours must be at the 3000-level or higher; minimum Degree GPA of 2.00.
Students in the Honours program who do not meet these minimum performance requirements of the Major will be placed on academic warning, probation or academic suspension as defined in section 3.14 Academic Warning, Probation, Academic Suspension and Special Students (Academic Standing) in this Chapter.

Students withdrawn from the Honours program as a result of their inability to meet minimum performance requirements will have the notation, ‘Required to Withdraw from the Honours Program,’ recorded on their transcript. Similarly, students withdrawn from the Major program will have the notation, ‘Required to Withdraw from the Major Program,’ recorded on their transcript.

6.4 Graduating with Distinction or First Class Honours

With Distinction

Students graduating with a B.Sc. Physical Geography (Major) degree will have their degree granted ‘With Distinction’ if they have a minimum Degree Grade Point Average of 3.50 on all course work.

The term ‘Degree with Distinction’ will appear both on the parchment and on the student’s transcript.

First Class Honours

Students in the Honours program will have their degree granted ‘First Class Honours’ if they have a minimum Degree Grade Point Average of 3.50 based on all acceptable course work. The term First Class Honours will appear both on the parchment and on the student’s transcript.

18 CREDIT HOURS

GEOG 1290

15 credit hours selected from 2000-, 3000-, or 4000-level courses designated as Physical Geography (PS) or Techniques (TS) courses in the Geography course descriptions defined in sections 5.6 in this Chapter.

NOTES:

Entrance into the degree programs is summarized in 6.2.1 in this Chapter.

The courses required in this program will satisfy the University Mathematics requirement.

PHYS 1050 and PHYS 1070 may be used in lieu of PHYS 1020 and PHYS 1030, respectively.

MATH 1230, MATH 1510 or MATH 1520 may be used in lieu of MATH 1500; or MATH 1690 may be used in place of MATH 1500 (or equivalent) and MATH 1700; or MATH 1310 may be used in lieu of MATH 1300; or MATH 1232 or MATH 1710 may be used in lieu of MATH 1700.

GEOG 1290 Introduction to Human Geography

Cr. Hrs. 3

This course studies aspects of the human world: population, settlement and resources. Not to be held with GEOG 1200 or GEOG 1201, or GEOG 1281.

GEOG 1290 Introduction to Physical Geography

Cr. Hrs. 3

This course studies aspects of our physical environment: climate, landforms, soils and vegetation. Not to be held with GEOG 1291 or GEOG 1200 or GEOG 1201.

GEOG 1700 Social Justice in the 21st Century: Global Political Economy and Environmental Change

Cr. Hrs. 3

Introduces students to political economy and cultural geography through the close analysis of contemporary world events, including but not limited to instances of violent conflict, environmental change, international negotiations, political processes and events, social movements, and policy developments. A multimedia approach will advance students understanding of geopolitical events from political economy and spatial perspectives. Specific content of the course will change year-by-year in response to developments in national and world politics. Also offered by the Faculty of Arts as GPE 1700. Students may not hold credit for both GPE 1700 and GEOG 1700.

GEOG 2200 Introduction to Thematic Cartography (TS)

Cr. Hrs. 3

Lab Required) An introduction to the principles of map compilation and reproduction, including analysis and cartographic display of spatially referenced data. Emphasis will be placed on cartographic data manipulation, generalization, and symbolization, map design, visualization and communication. Not to be held with GEOG 2221. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2272 Natural Hazards (PS)

Cr. Hrs. 3

Environmental hazards to human settlement and economy are examined with particular attention to meteorological, soil erosion, mass wasting, earthquake and volcanic phenomena. Not to be held with GEOG 2440. Prerequisite: a grade of C or better in one of GEOG 1290, GEOG 1340, or GEOG 2270.
GEOG 2300 Atmospheric Thermodynamics, Clouds and Precipitation (PS)  
Critical thermodynamic processes are discussed that are associated with the Earth's atmosphere including dry and moist processes, phases of water, stability, cloud development and precipitation processes. Prerequisites: (GEOG 1290 or GEOG 1291 (C), or (GEOG 1200) or GEOG 1201 (C)), and (MATH 1500 or MATH 1501 (C), or MATH 1510 (C), or MATH 1520 (C), or MATH 1530 (C)).

GEOG 2310 Introduction to Process Hydrology (PS)  
This course introduces students to the near-surface components of the hydrological cycle, including the processes of precipitation, evaporation, water-biosphere interactions, infiltration, overland and stream flow. Prerequisites: (GEOG 1290 or GEOG 1291 (C), or (GEOG 1200) or GEOG 1201 (C)), and (PHYS 1020 or PHYS 1021 (C), or PHYS 1050 or PHYS 1051 (C), or MATH 1500 or MATH 1501 (C), or MATH 1510 (C), or MATH 1520 (C), or MATH 1530 (C), or permission of department head.

GEOG 2320 Place, Populations and Mobility: Geographic Perspectives (HS)  
An examination of the factors controlling the number and distribution of human population. Variations in fertility, mortality and mobility will be analyzed and the causes and consequences reviewed. Not to be held with GEOG 2480. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2372 Geography of Tourism (HS)  
This course examines the social, economic and environmental dimensions of tourism and recreation. Historical and contemporary experiences from around the world will be studied. Not to be held with GEOG 2410. Prerequisite: a grade of C or better in (GEOG 1200) or GEOG 1280, or permission of department head.

GEOG 2520 Geography of Natural Resources (HS)  
An introduction to the basic concepts of the subject and the distribution of resources. Stress will be placed on Canadian resources and resource requirements but examples from other resource systems will also be used. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2540 Weather and Climate (PS)  
This half-course examines the nature, controls, and observations of weather and the variation of climate in time and space. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2550 Geomorphology (PS)  
This half-course surveys a broad array of landforms in the world and the geomorphic processes responsible for their creation. Attention is strongly focused on those landform processes originating at the earth's surface. Prerequisite: (GEOG 1200) or GEOG 1201 (C), or GEOG 1290 or GEOG 1291 (C), or permission of department head.

GEOG 2570 Geography of Canada (A)  
A regional study of Canada in which the major regions of Canada are studied with respect to geographical patterns of their physical environment, settlement, culture, economic activity, and land use. Not to be held with GEOG 2560, GEOG 2561 or GEOG 3431. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2580 Geography of the United States (A)  
A regional study of the United States in which the major regions of the United States are studied with respect to geographical patterns of their physical environment, settlement, culture, economic activity, and land use. Not to be held with GEOG 2560, GEOG 2561. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2630 Geography of Culture and Environment (HS)  
An introduction to the cultural geographic study of environment, focusing on the evolution of landscape, the creation of regions, and human relationships with nature. Prerequisite: (GEOG 1200) or GEOG 1201 (C), or GEOG 1280 or GEOG 1281 (C), or permission of department head.

GEOG 2640 Geography of Culture and Inequality (HS)  
An introduction to the cultural geographic study of human and place inequalities, focusing on behaviour in landscape, group differences, and human identities. Prerequisite: (GEOG 1200) or GEOG 1201 (C), or GEOG 1280 or GEOG 1281 (C), or permission of department head.

GEOG 2700 Introduction to Arctic System Science  
This course introduces students to the various components of the Arctic system, including the terrestrial and marine environments, polar atmosphere, biological and chemical oceanography. Prerequisite: GEOG 1290 or (GEOG 1291)(C), or GEOG 1200 or (GEOG 1201)(C) or ENVR 1000 or GEOG 1340(C).

GEOG 2900 Geography of Canadian Prairie Landscapes (A)  
This course introduces students to the various geographical themes, concepts and processes within the context of the natural and anthropogenic development of the Canadian prairie region. It traces the evolution of the prairie landscape. It will focus on academic writing in the discipline. Not to be held with GEOG 2450. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography courses numbered at the 1000 level, or permission of department head.

GEOG 2930 Introduction to Oceanography  
This course provides an introduction to the physical, chemical, biological and geological processes in the world oceans and their interactions with the overall Earth system. This course is interdisciplinary, applying geological, chemical and biological processes to the study of the world's oceans. Prerequisite: A minimum grade of "C" in GEOG 1290 (or GEOG 1291) or GEOG 1200 (or GEOG 1201) or ENVR 1000 or GEO 1340.

6.7 Geography Course Descriptions-3000 Level

GEOG 3200 Introduction to Remote Sensing (TS)  
(Lab Required) The course is an introduction to the principles of optical, active and passive microwave remote sensing. A review of satellite and sensors and their geographic applications will be presented, along with digital image analysis techniques. Laboratory assignments will provide hands-on experience in dealing with remote sensing data. Prerequisites: (GEOG 1200) or GEOG 1201 (C), or GEOG 1290 or GEOG 1291 (C), and (PHYS 1020 or PHYS 1021 (C), or PHYS 1050 or PHYS 1051 (C), or MATH 1300 or MATH 1301 (C), or MATH 1500 or MATH 1501 (C), or permission of department head.

GEOG 3310 Atmospheric Dynamics, Storms and Radar (PS)  

Academic Calendar 2018-2019
The course covers the critical dynamic processes that are associated with the Earth’s atmosphere including forces that control wind, the kinematics of the wind field, general circulation, hodographs, thermal wind, laws of motion, mid-latitude circulations, convective storms and the utility of weather radar. Prerequisite: GEOG 2300 (C), or permission of department head.

GEOG 3320 Introduction to Microclimates and Micrometeorology (PS) Cr. Hrs. 3
This course introduces the concept of energy balance climatology and examines relationships among climate, microclimate, and environments of the Earth’s surface and human-made environments. Studies include bioclimates and hydroclimates. Prerequisites: (GEOG 2310 (C)), and (GEOG 2300 (C)), or permission of department head.

GEOG 3340 Migration and Mobility in a Globalized World Cr. Hrs. 3
This course surveys the geographic dimensions of migration and mobility of populations, with emphasis of contemporary events. Prerequisites: a grade of C or better in GEOG 2330 or (GEOG 2480), or permission of department head.

GEOG 3390 Introduction to Climate Change and Its Causes (PS) Cr. Hrs. 3
The primary objective of this course is to provide students with a general understanding of the physical and astronomical factors that drive global climate change. Focus will be given to current and future climate change in the context of observations and modeling. Not to be held with GEOG 3610. Prerequisite: a minimum of three credit hours from Geography or Environment courses, or permission of department head.

GEOG 3460 Urban Geography (HS) Cr. Hrs. 6
The course studies the processes and trends of urbanization; the classification of cities; central-place theory; cities as systems; land-use patterns; social forces and factorial ecology; and urban transport problems. Prerequisite: (GEOG 1200) or GEOG 1201 (C), or GEOG 1280 or GEOG 1281 (C), or permission of department head.

GEOG 3640 Social Geography of the Environment (HS) Cr. Hrs. 3
This course provides an intermediate-level assessment of current geographical approaches to society and environment. Students are exposed to critical realist, social constructionist, Marxist, feminist and post-Colonial traditions as they are applied to environmental and social justice, globalization and public health. It includes discussion and a community-based learning project. Prerequisite: a grade of C or better in (GEOG 1200 or GEOG 1201) or GEOG 1280 or GEOG 1281, or permission of department head.

GEOG 3730 Geographic Information Systems (TS) Cr. Hrs. 3
(Lab Required) Weekly two-hour lab. The course introduces students to the evolving science, technology and applications of Geographic Information Systems (GIS). Related geospatial technologies such as Global Navigation Satellite Systems and Remote Sensing, as well as the field of Geomatics will be introduced. Prerequisite: a grade of C or better in a minimum of three credit hours from Geography, Geology or Environment courses numbered at the 1000 level, or permission of instructor or department head. Not to be held with GEOG 2250.

GEOG 3740 Field Studies in Geography (A,TS) Cr. Hrs. 6
A field course designed to introduce students to either a detailed area study or to field techniques employed for specific geographic enquiry. Prerequisite: Permission of department head.

GEOG 3750 Field Studies in Geography (A,TS) Cr. Hrs. 3
A field course designed to introduce students to either a detailed area study or to field techniques employed for specific geographic enquiry. Prerequisite: Permission of department head.

GEOG 3760 Special Topics in Geography Cr. Hrs. 6
This course will cover from year to year depending on the needs of students and the interests of instructors. Prerequisite: Permission of department head.

GEOG 3770 Special Topics in Geography Cr. Hrs. 3
This course will cover from year to year depending on the needs of students and the interests of instructors. Prerequisite: Permission of department head.

GEOG 3810 Quantitative Research Methods in Geography (TS) Cr. Hrs. 3
This course focuses on the quantitative analytical methods available for the interpretation on physical and human geography applications. May not be held with GEOG 3680. Prerequisite: ENVR 2810 or the former GEOG 2530 or STAT 1000 or STAT 1001, or permission of department head.

GEOG 3850 Sustainable Manitoba (A) Cr. Hrs. 3
This course approaches local sustainability issues from an interdisciplinary perspective. By looking at the ecological, social and economic aspects from a variety of discipline perspectives, a fuller understanding of sustainability is achieved. The broad range of perspectives is achieved through participation of guest speakers from other faculties and outside of the university as well as excursion outside the classroom. Not to be held with ENVR 3850. Prerequisite: 60 credit hours of course work, or permission of department head.

GEOG 3860 Animal Geographies (HS) Cr. Hrs. 3
This course presents a variety of topics concerning the interactions between humans and animals, how humans influence and use animals, and the many roles animals play in human lives and environments. Animal Geographies lies at a meeting point between physical and human geography, where we must consider the blurring boundaries between what it means to be animal/human, and the implications of how animals are used and represented. A wide variety of perspectives, beliefs, and points of view will be explored. Prerequisite: Permission of department head.

GEOG 3870 Food Geographies Cr. Hrs. 3
This course provides a critical examination of the geographies of food at a variety of scales, from the body to the global. The course focuses on themes in three interconnected areas: 1) food production and the global food system from farm to plate including agribusiness and alternative food production and distribution models; 2) food consumption habits and beliefs and foodways as geographically contingent material culture; and 3) food (in) security and its relationship to health and wellbeing. This course is cross-listed as HNSC 3870. May not be held with HNSC 3870. Prerequisite: a grade of C or better in GEOG 1280 or GEOG 1281 or HNSC 1200 or GEOG 1200, or permission of department head.

GEOG 3920 Biological Oceanography 1: Lower Trophic Levels Cr. Hrs. 3
In this course, students will gain a background on the study of biological oceanography. Biological oceanography is a very active and important field of study worldwide due to the spatial coverage and biological activity of the world’s oceans. This course examines the interaction of marine organisms with other biological life, as well as with the physical environment. Prerequisite: A minimum grade of “C” in both GEOG 2930 and BIOL 1030.
6.7 Geography Course Descriptions-4000 Level

GEOG 4050 Ecosystem Management  Cr. Hrs. 3
This course will provide students with an understanding of the practical applications of ecological science, environmental policy, and resource management approaches in the large-scale planning of landscapes. The course will review ecological principles and trace the historical development of the ecosystem concept. Comparisons are made to other possible environmental management approaches. The synthesis of major elements and concepts will be reinforced through case studies on the Manitoba landscape, with an emphasis on practical learning by students through field seminars and group discussions. Not to be held with ENV 4050. Prerequisite: Permission of department head.

GEOG 4060 Biogeography  Cr. Hrs. 3
This course will provide students with a general understanding of the historical, ecological, analytical, and conservation aspects of biogeography. The course will also have a dual focus on the principles and concepts of reasons for the distribution of plants and animals worldwide, as well as incorporating discussion on as many local (Manitoba, Canada, North America) examples as possible. Not to be held with NATV 4060. Prerequisite: Permission of department head.

GEOG 4200 Advanced Methods in Remote Sensing  Cr. Hrs. 3
(Adv. Required) Provides instruction in the current theory and application of remote sensing technology to Earth system Science. Emphasis will be placed on the processing and interpretation of remote sensing imagery and the integration of remote sensing data with other spatial data. Prerequisite: GEOG 3200 (C), or permission of department head.

GEOG 4260 Sacred Lands  Cr. Hrs. 3
Students will increase their understanding of the importance and significance of Sacred Lands and Sacred Spaces to International Indigenous Peoples. Experiential learning, seminars, and a field component may be included. Not to be held with NATV 4260. Prerequisite: Permission of department head.

GEOG 4280 Gender and the Human Environment  Cr. Hrs. 3
This upper-level seminar course will develop in students a depth and breadth of understanding appropriate to the honours undergraduate/graduate level in the area of gender geography scholarship. From critical social science theoretical positions, this course asks students to examine what we can learn about how humans live on the earth if we see them as gendered. Just as we may also understand humans and their interactions in and with spaces, places and environments through the lenses of race, ethnicity, class, age and/or combinations of these categories with gender. Prerequisite: a grade of C or better in a minimum of six credit hours in Geography, or permission of department head.

GEOG 4290 Geographies of Health and Health Care  Cr. Hrs. 3
This course provides an introduction to and critical examination of the geographies of health and healthcare. Topics include perceptions and determinations of health and health care; health care delivery, focusing on spatial patterns and inequities; and the relationship between environment and health, particularly impacts of environmental contamination. Prerequisite: Permission of department head.

GEOG 4300 Synoptic Meteorology and Weather Analysis  Cr. Hrs. 3
Applied aspects of meteorology are described in terms of weather analysis and forecasting techniques for synoptic-scales and meso-scales using various meteorological tools. An introduction to severe weather forecasting techniques will also be described. Prerequisite: GEOG 3310 (C), or permission of department head.

GEOG 4310 Boundary-Layer Climatology and Micrometeorology  Cr. Hrs. 3
A seminar course on advanced topics in microclimatology and micrometeorology. Prerequisite: GEOG 3320 (C), or permission of department head.

GEOG 4330 Concepts in Atmospheric Modeling  Cr. Hrs. 3
This course will primarily focus on numerical modeling applications and techniques of the Earth’s atmosphere with an emphasis on weather prediction. This includes understanding basic modeling terminology, numerical schemes, structure of models, types of models, what is required to run a model, and an introduction to data assimilation and ensemble techniques to weather prediction. Not to be held with GEOG 4320. Prerequisite: GEOG 3310 (C) or GEOG 3320 (C), or permission of department head.

GEOG 4350 Parks and Protected Areas Planning and Management: Field Studies  Cr. Hrs. 6
The course is taught in two segments, an on-campus component and field study component taking place in Banff National Park. The on-campus component examines the historical development of the concept of parks and protected areas, the role of interpretation, management and research in the parks and emerging issues in the management of parks and protected areas. In addition, during the on-campus component planning for the field will take place. The field segment will focus on a wide variety of management issues with particular attention to Banff National Park. Emerging issues and trends will be examined and past management responses evaluated. There will be opportunities for students to investigate specific management issues of interest to them and to participate in current research being conducted in the park. This course is also offered in the Faculty of Kinesiology and Recreation Management as REC 4350. Prerequisite: Permission of department head.

GEOG 4390 Global Climate Change  Cr. Hrs. 3
Students will be introduced to the complexities of climate changes through a series of introductory lectures and reading assignments that focus on recent scientific publications and review articles (mathematical skills are not required). Both sides of the climate change debate will be addressed in weekly assignments, and students will defend their conclusions in classroom discussion. Each student will take on a project in some aspect of climate change -- glaciers, sea ice, temperature trends, precipitation, agriculture, animal migration, aerosols, or a regional impact. Prerequisite: a grade of C or better in GEOG 3390 (or GEOG 3610), or permission of department head.

GEOG 4560 Techniques in Climatology  Cr. Hrs. 3
Instrumentation, the sources of climatic data, and the use of satellite photography, as well as methods of analysis and presentation are discussed. Prerequisite: GEOG 3320 (C), or permission of department head.

GEOG 4650 Models in Regional Analysis  Cr. Hrs. 3
Emphasis is placed on the use of regression techniques in regional analysis including the classical ordinary least squares methods and two-stage least squares. Migration and industrial location models are developed and calibrated using these techniques. Prerequisite: Permission of department head.

GEOG 4660 Honours Thesis  Cr. Hrs. 6
This course involves the production of a thesis under the supervision of a department faculty member. Prerequisite: Permission of department head.

GEOG 4670 Selected Issues  Cr. Hrs. 3
Intensive study of selected geographic issues. Prerequisite: Prearranged written consent of an individual instructor and permission of department head.

**GEOG 4780 Storms-Mesoscale**  Cr. Hrs. 3
This course focuses on a range of storms and mesoscale phenomena in the summer or winter. These include thunderstorms, tornadoes, squall lines, lightning, low level jets, gust fronts, blizzards, freezing rain, orographic storm, and polar lows. The emphasis is on the physical mechanisms leading to these events and it also examines how they may change in our changing climate. Not to be held for credit with GEOG 7780. Prerequisite: A grade of "C" or better in GEOG 3310 or permission of department head.

**GEOG 4872 Advanced Methods in Geomatics**  Cr. Hrs. 3
This course focuses on the theory and application of geomatics in spatial problem solving in geography and the environment. The use of geomatics' technologies including GIS, Earth observation and spatial numerical methods will be covered. Students will learn the theoretical underpinning of spatial statistical concepts and will experiment with data exploration, inference and hypothesis testing. Lab assignments will provide practical experience with GIS and other geomatics software as well as CRAN-R. Not to be held with ENVR 4872, GEOG 4590 or GEOG 4720. Prerequisite: GEOG 3730 or permission of Instructor.

**GEOG 4930 Oceanography: Chemical**  Cr. Hrs. 3
This course deals with the sources, distribution, and transformation of chemical constituents of the oceans, and the processes that control them. The emphasis will be given to biologically or climatically significant elements such as carbon, nitrogen, phosphorus, iron and mercury in the Arctic Ocean. Prerequisite: ENVR 2550 and GOEG 2930 or permission by department head.

**GEOG 4940 Artic Sea Ice**  Cr. Hrs. 3
This course aims to (i) provide students with a strong background on the importance and current knowledge of Arctic sea ice and (ii) train students on current field techniques used in research pertaining to sea ice-related investigations. To attain these goals, the course will combine field safety training, classroom lectures and assignments, and direct field experience through a field trip pertaining to physical and biogeochemical processes of the snow-covered sea-ice environment. Prerequisite: permission of the instructor.

**GEOG 4960 Oceanography: Biological II Higher Trophic Levels**  Cr. Hrs. 3
This course will examine the oceanographic-biological coupling occurring in the Arctic region, focusing on environmental conditions related to higher trophic levels and impacts of climate change. This course will extend the learning of the 3000-level course that examines biological oceanography, which focuses on the environmental factors that control primary production and lower trophic levels in the world's oceans. Prerequisite: A minimum grade of "C" in both GEOG 3920 and a 2000-level BIOL course or permission of instructor.

### 7.1 Program Information

The Clayton H. Riddell Faculty of Environment, Earth, and Resources offers General, Major, and Honours degree programs leading to a Bachelor of Environmental Science (B.Env.Sc.) and Bachelor of Environmental Studies (B.Env.St.). Through an interdisciplinary approach, environmental issues relating to human populations, sustainable resource development, pollution and conservation, environmental health, and endangerment and preservation of species are explored in conjunction with alternative conditions that have the potential to reverse current trends and contribute to ecological sustainability. Students have access to undergraduate courses offered by the Clayton H. Riddell Faculty of Environment, Earth, and Resources as well as the Faculties of Agricultural and Food Sciences, Arts, Law, Engineering, Architecture, and Science in order to complete their education. They are expected to take many courses outside the Riddell Faculty enabling them to obtain a truly interdisciplinary education.

The Major and Honours degree programs serve students who desire advanced study in an environmental field. The programs are intended for students interested in professional training and the opportunity for advanced research. Honours degree programs demand higher academic performance and lead most directly to graduate studies. Students who are ineligible to enter the Honours degree program in their third year may establish this in the following year on the basis of their improved scholastic performance. See a Riddell Faculty student advisor in the Faculty general office for information. The degree programs may be pursued on a full- or part-time basis.

The B.Env.Sc. and B.Env.St. degree programs share a general structure that includes a foundation of either introductory Sciences or Social Sciences/ Humanities. Students complete an environmental core and a Focus Area that is defined through consultation with a Riddell Faculty student advisor in the Faculty general office. Students completing the General degree program are required to complete 9 credit hours in a Focus Area; Major, Major Coop, Honours and Honours Coop students complete 33 credit hours in a Focus Area. Other Focus Area requirements are defined in the graduation requirements in section 7.3.1 in this Chapter. You may also refer to the Focus Area Brochure for further information.

### General

To qualify for the degree Bachelor of Environmental Science (General) or Bachelor of Environmental Studies (General), students must complete 90 credit hours including all faculty and degree requirements (including the foundation, environmental core and 9 credit hours of minimum 2000-level courses in a Focus Area). Minimum performance requirements include passing grades ('D' or better) in each course and a minimum degree Grade Point Average of 2.00. There is no limit to the number of credit hours a student completes provided he/she does not exceed 48 credit hours of failed courses.

### Major

To qualify for the degree Bachelor of Environmental Science (Major) or Bachelor of Environmental Studies (Major), a student must complete 120 credit hours with a minimum degree grade point average of 2.00. Focus Area requirements are as follows: 33 credit hours of which 21 credit hours must be completed at the 3000- or 4000-level; 2.00 Grade Point Average. Major (Coop) students must attain a minimum degree Grade Point Average of 2.50. There is no limit to the number of credit hours a student completes provided he/she does not exceed 18 credit hours of failed courses.

### Honours

To qualify for the degree Bachelor of Environmental Science (Honours) or Bachelor of Environmental Studies (Honours), students must complete 90 credit hours with a minimum degree Grade Point Average of 3.50. Focus Area requirements are as follows: 33 credit hours of which 21 credit hours must be completed at the 3000- or 4000-level; 3.50 Grade Point Average. To qualify for the Honours degree students must have completed a minimum of 18 credit hours of 4000-level courses. There is no limit to the number of credit hours a student completes provided he/she does not exceed 48 credit hours of failed courses.
To qualify for the degree Bachelor of Environmental Science (Honours) or Bachelor of Environmental Studies (Honours), a student must complete 120 credit hours with a minimum degree grade point average of 3.25. Focus Area requirements are as follows: 33 credit hours of which 21 credit hours must be completed at the 3000- or 4000-level; 3.00 Grade Point Average and minimum 'C+' grades. There is no limit to the number of credit hours a student completes provided he/she does not exceed 18 credit hours of failed courses.

**Minor in Another Department**

Students in the B.Env.Sc. and B.Env.St. have the opportunity to complete a Minor in a subject field that is different than that of the declared major, and which normally consist of 18 credit hours from a department offering this option at the University of Manitoba. Students are not permitted to complete a Minor in Environmental Science or Environmental Studies. Contact a [Riddell Faculty student advisor](http://example.com) in the Faculty general office for further information about eligible Minors.

**Eco-Canada Accreditation**

The Environmental Science program is accredited to the [National Standard of Environmental Programs](http://example.com) in Canada by ECO Canada.

**7.2 Advanced Entry Requirements**

Advanced Entry students are placed in the Major degree program in either the Bachelor of Environmental Science or Bachelor of Environmental Studies until they have completed a minimum of 48 credit hours after which they can transfer to the General or Honours program or remain in the Major. To make a program transfer, students must consult with a [Riddell Faculty student advisor](http://example.com).

Transfer students, and Second Degree students may be eligible for direct entry into the General or Honours programs. These students should consult with a [Riddell Faculty student advisor](http://example.com) in the Faculty Dean’s Office.

7.2.1 and 7.2.2 define the Advanced Entry Entrance requirements for the degree programs in the Bachelor of Environmental Science and Bachelor of Environmental Studies, respectively.

**7.2.1 Bachelor of Environmental Science Advanced Entry Entrance Requirements**

1 Students may be permitted to enter the program without satisfying all requirements listed. Students should consult with a Student Advisor for further information.

2 Students may be permitted to enter the program without satisfying all requirements listed. Students should consult with the Cooperative Education Coordinator for further information.

3 Equivalent courses offered through Université de Saint-Boniface may be used in lieu of the specified course identified in the entrance requirements chart. Université de Saint-Boniface courses end in the number ‘1’ (e.g. CHEM 1301).
Students required to withdraw from the Honours Program will have the statement 'Required to Withdraw from the Honours Program' recorded on their transcript. Similarly, students required to withdraw out of the Major degree program will have the statement 'Required to Withdraw from the Major Program' recorded on their transcript.

<table>
<thead>
<tr>
<th>7.3 Minimum Performance Requirements for Continuation and Graduation</th>
</tr>
</thead>
</table>

A student’s academic performance will be assessed with his/her application for admission to the Clayton H. Riddell Faculty of Environment, Earth, and Resources and following each term thereafter. A Riddell Faculty student advisor must approve a student’s registration each Fall/Winter term. Any revisions to this schedule should also be approved prior to the end of the registration revision period.

To be in good standing and permitted to continue in a degree program, a student must achieve the minimum standards outlined in section 7.3.1 at each point of assessment. This assessment is based on the student’s minimum degree Grade Point Average and the number of failed courses after admission to the Riddell Faculty.

To graduate from either a Bachelor of Environmental Science or the Bachelor of Environmental Studies with the intended degree designation, a student must achieve the minimum standards and graduation requirements outlined in section 7.3.1 following the final term of registration and satisfy all degree course requirements in the foundation, environment core and Focus Area as defined in section 7.1 of this Chapter. In addition, students must satisfy the residence requirement by completing either a total of 48 credit hours or their last 24 credit hours at the University of Manitoba. These courses must be acceptable for credit in either the Bachelor of Environmental Science or the Bachelor of Environmental Studies.

Students who do not meet these minimum performance requirements for continuation or graduation will be required to transfer to the appropriate program based on their performance and eligibility as defined in 7.3.1. Students who do not meet the minimum performance requirements for the General degree program will be placed on probation or academic suspension as defined in section 3.14 Academic Warning, Probation, Academic Suspension and Special Students (Academic Standing) in this Chapter.

Students required to withdraw from the Honours degree program will have the statement 'Required to Withdraw from the Honours Program' recorded on their transcript. Similarly, students required to withdraw out of the Major degree program will have the statement 'Required to Withdraw from the Major Program' recorded on their transcript.

### 7.3.1 Minimum Performance Requirements

<tr>
<td>General (90)</td>
<td>2.00</td>
<td>39 credit hours</td>
</tr>
</tbody>
</table>

Students must satisfy the residence requirement for the degree program in order to be eligible for graduation. This is defined as either a total of 48 or the last 24 credit hours at the University of Manitoba.

### 7.4 Graduating with Distinction or First Class Honours

**With Distinction**
Students graduating with a Bachelor of Environmental Science (General) or Bachelor of Environmental Studies (General) degree will have their degree granted ‘With Distinction’ if they have a minimum Degree Grade Point Average of 3.50 on all course work.

Students graduating with a Bachelor of Environmental Science (Major) or Bachelor of Environmental Studies (Major) degree will have their degree granted ‘With Distinction’ if they have a minimum Degree Grade Point Average of 3.50 on all course work.

The term Degree with Distinction will appear both on the parchment and on the student’s transcript.

**First Class Honours**

Students in the Honours program will have their degree granted with ‘First Class Honours’ if they have a minimum Degree Grade Point Average of 3.50 on all course work. The term First Class Honours will appear on the student’s transcript.

**NOTES:**

1. Advanced Entry into the degree programs is summarized in section 7.2.1 of this Chapter.

2. The courses required in this program will satisfy the University Mathematics Requirements.

3. MATH 1510 or MATH 1520 may be taken in place of MATH 1500 (or equivalent).

4. It is recommended that students consider a selection from List A below when selecting courses from the Faculty of Arts.

5. PHYS 1050 and PHYS 1070 may be used in lieu of PHYS 1020 and PHYS 1030.
MATH 1310 and MATH 1710 may be taken in place of MATH 1300 and MATH 1700 (or equivalent).

Focus Area courses must include a minimum of 21 credit hours at the 3000- and/or 4000-level. Focus Area performance requirements are defined in section 7.3 of this Chapter. Information on Focus Areas is available in the Focus Area Brochure.

The former ENVR 2170 or the former ENVR 2270 may be used in lieu of ENVR 2350, ENVR 3160, ECON 2390, ABIZ 2390, BIOL 2390, ENVR 2900.

ANH 1520 Critical Cultural Anthropology (3)
NATV 1240 The Native Peoples of Canada, Part 2 (3)
PHIL 1320 Introductory Logic (6)
PHIL 1510* Historical Introduction to Philosophy (6)
RLGN 1420 Ethics in World Religions (3)

* In the list below indicates courses no longer offered.

Students registering in certain courses may be required to participate in field trips or field components and pay a portion of the associated expenses. For details, contact the Department of Environment and Geography general office.

Equivalent courses offered through Université de Saint-Boniface may be used in lieu of the specified course identified in the program requirements chart. Université de Saint-Boniface courses end in the number '1' (e.g. CHEM 1301).

### List A: Recommended List of Faculty of Arts Electives

Students may wish to consider courses from the following list when identifying appropriate selections from the Faculty of Arts.

**Recommended: Environmental Science and Related Disciplines**

- ANTH 1210 Human Origins and Antiquity (3)
- ANTH 1220 Cultural Anthropology (3)
- ANTH 1520 Critical Cultural Anthropology (3)
- ECON 1020 Introduction to Macroeconomic Principles (3)
- NATV 1200 The Native Peoples of Canada (6)
- NATV 1240 The Native Peoples of Canada, Part 2 (3)
- PHIL 1200 Introduction to Philosophy (6)
- PHIL 1290 Critical Thinking (3)
- PHIL 1320 Introductory Logic (6)
- PHIL 1510* Historical Introduction to Philosophy (6)
- RLGN 1420 Ethics in World Religions (3)
- RLGN 2180 Theory of Nature (3)

**NOTES:**

- Students are permitted to substitute NATV 1220 with another 3 credit hours from the department (not a language) or approved alternative course. See the Riddell Faculty student advisor for assistance.
- Students with an interest in the Conservation and Biodiversity Focus Area (or other Focus Areas including advanced Biology courses) are advised to complete the combination of BIOL 1020 and BIOL 1030 as well as BIOL 2300 (or AGEC 2370) instead of BIOL 1010 and BIOL 2390.
- Students must complete 3 credit hours of course work containing significant international content. Students are referred to List B for a list of available courses. Students may substitute with another course as approved by the student advisor.
- Focus Area courses must include a minimum of 21 credit hours at the 3000- and/or 4000-level. Focus Area performance requirements are defined in section 7.3 of this Chapter. Information on Focus Areas is available in the Focus Area Brochure.
- ENVR 2650 may be used in lieu of ENVR 3160.
- GEOG 3810 may be used in lieu of GEOG 3810.

**IMPORTANT:** The Honours and Major programs need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.

**NOTE:**

- To fulfill prerequisite requirements, a grade of ‘C’ must be achieved, unless otherwise stated, in any course stipulated as a prerequisite to a further course.
- Students should review the current course topics available through ENVR 2010 (1.5), ENVR 2020 (3), ENVR 3010 (1.5), ENVR 3020 (3), ENVR 4000 (3), ENVR 4010 (1.5), and ENVR 4020 (3) as well as those offered through GEOG 3740 (6), GEOG 3750 (3), GEOG 3760 (6), GEOG 3770 (3) and GEOG 4670 (3). Also, all courses are not offered every year or every term. The course schedule for the current academic term is available from the Class Schedule.
- Students registering in certain courses may be required to participate in field trips or field components and pay a portion of the associated expenses. For details, contact the Department of Environment and Geography office.
- Equivalent courses offered through Université de Saint-Boniface may be used in lieu of the specified course identified in the entrance requirements chart. Université de Saint-Boniface courses end in the number ‘1’ (e.g. GEOG 2181).

**List B: Courses containing significant international content:**

- ABIZ 1010 Economics of World Issues and Policies (3)
- ECON 2550 Political Economy 2: Economic Growth and Fluctuations in a Global Economic Environment (3)
- ECON 3670 International Trade (3)
- POLS 2040 Introduction to International Relations (6)
- POLS 3220 Globalization and the World Economy (3)
- POLS 3250 International Political Economy (3)

GEOG 4260 Sacred Lands (3)
or as approved by a Riddell Faculty student advisor

**7.7 Environment, Earth, and Resources Course Description**

**EER 1000 Earth: A User’s Guide**

This course will present a multi-disciplinary introduction to the Planet Earth as both the source of essential resources and as the site of resulting negative impacts. Focus in the course will be provided by addressing important and current topics, case studies, and concepts that the well-educated citizen of the Earth should understand and will include natural and human-induced processes within a broad range of spatial and temporal scales.

**7.8 Environmental Science and Environmental Studies Course Descriptions-1000 Level**

**ENVR 1000 Environmental Science 1 - Concepts**

This course will introduce students to the conceptual framework of the environment by examining its physical, biological, and social components. General topics to be considered will include ecological principles and the responses of natural and managed systems to disturbance; population growth; biodiversity and conservation; and environmental sustainability. Not to be held with BIOL 1340.

**ENVR 2000 Environmental Science 2 - Issues**

This course will briefly review the major features of the structure and function of natural systems along with the degree to which these have been compromised. The main component of the course, however, will concentrate on the identification of the issues that underlie environmental degradation, while exploring alternative conditions that have the potential to reverse current trends and ultimately contribute to ecological sustainability. Prerequisite: ENVR 1000 (C) or BIOL 1340 (C).

**ENVR 2010 Field Topics in Environment**

Field and practical experience in selected topics of current interest in the Environmental Science and Studies, with the content to vary depending on the needs of students and faculty. Prerequisite: Permission of department head.

**ENVR 2020 Extended Field Topics in Environment**

Field and practical experience in selected topics of current interest in the Environmental Science and Studies, with the content to vary depending on the needs of students and faculty. Prerequisite: Permission of department head.

**ENVR 2180 Introductory Toxicology**

A survey of general principles underlying the effects of toxic substances on biological systems, including consideration of the history, scope and applications of toxicology, the mechanisms of toxic action, and some major types of toxicants. Not to be held with ENVR 2190 or BIOL 2380 (BOTN 2180 or ZOOL 2180) or BIOL 2382 (BOTN 2190 or ZOOL 2190) or AGRI 2180 or AGRI 2190. Prerequisites: [BIOL 1030 or BIOL 1031 or (C)], and [(CHEM 1310 or CHEM 1311 (C), or CHEM 1311 (C), or CHEM 1320 (C)].

**ENVR 2190 Toxicological Principles**

A survey of general principles underlying the effects of toxic substances on biological systems, including consideration of the history, scope and applications of toxicology, and the mechanisms of toxic action. Not to be held with ENVR 2180 or BIOL 2380 (BOTN 2180 or ZOOL 2180), or BIOL 2382.
(BOTN 2190 or ZOOL 2190), or AGRI 2180, or AGRI 2190. Prerequisites: [BIOL 1030 or BIOL 1031 (C)], and [CHEM 1310 or CHEM 1311 (C), or CHEM 1320 (C)].

**ENVR 2350 Technical Communication in the Environmental Sectors**  
Cr. Hrs. 3  
(Lab Required) An introduction to technical communication skills required for environmental practitioners in research, government, and industry. The course covers technical writing and literature search techniques, business writing including reports, memos and e-mails, professional presentation skills, and fundamental internet skills. Practical experience is gained through assignments and laboratory exercises. Prerequisite: ENVR 1000 or BIOL 1340 (C), or permission of department head.

**ENVR 2550 Environmental Chemistry**  
Cr. Hrs. 3  
(Lab Required) An introduction to the chemistry of the environment. Emphasis will be on the composition of the natural environment and the processes of natural and human-introduced chemical species that take place within it. The course will provide students with the chemical basis for understanding the environment and environmental problems. Not to be held with CHEM 2550. Prerequisite: CHEM 1310 or CHEM 1311 (C).

**ENVR 2810 Environmental Critical Thinking and Scientific Research**  
Cr. Hrs. 3  
Course is designed to aid students in the development of a skeptical, scientific approach to thinking about environmental and geographical problems and issues, as well as applying that skepticism and critical thinking to develop well balanced research hypotheses and data collection methods. May not be held with the former ENVR 2270 or the former GEOG 2530. Prerequisites: ENVR 1000 (C) or GEOG 1280 (C) or GEOG 1290 (C); GEOG 1700 (C) or GPE 1700 (C); or consent of department.

**ENVR 2900 Professional Development in the Environmental Sectors 1**  
Cr. Hrs. 1.5  
Through self directed learning students are introduced to the environmental sectors and issues including workplace health and safety, the respectful workplace, managing workloads and expectation, and professionalism. The course is a mandatory requirement to Cooperative Education Option admission. Prerequisite: 30 credit hours of university credit.

### 7.8 Environmental Science and Environmental Studies Course Descriptions-3000 Level

**ENVR 3000 Multidisciplinary Topics in Environmental Science 1**  
Cr. Hrs. 3  
Selected topics of current interest in the Environmental Sciences and Studies. Course content to vary with each offering depending on the needs and interests of students and faculty. Prerequisites: Permission of department head, and 60 credit hours of university credit.

**ENVR 3010 Field Topics in Environmental Science 1**  
Cr. Hrs. 1.5  
Field and practical experience in selected topics of current interest in the Environmental Sciences and Studies, with the content to vary depending on the needs and interests of students and faculty. Prerequisite: Permission of department head.

**ENVR 3020 Extended Field Topics in Environmental Science 1**  
Cr. Hrs. 3  
Field and practical experience in selected topics of current interest in the Environmental Sciences and Studies, with the content to vary depending on the needs and interests of students and faculty. Prerequisite: Permission of department head.

**ENVR 3110 Environmental Conservation and Restoration**  
Cr. Hrs. 3  
(Lab Required) Environmental conservation and restoration are introduced and approaches based on science and traditional knowledge are contrasted. An emphasis is placed on systems thinking and both local and international case studies. Prerequisites: BIOL 2390 (BOTN 2280 or ZOOL 2290) (C), or BIOL 2300 (BOTN 2370 or BOTN 2371 or ZOOL 2370 or ZOOL 2371) (C), or AGEC 2370 (C), or permission of department head.

**ENVR 3160 Environmental Responsibilities and the Law**  
Cr. Hrs. 3  
Environmental responsibilities and their legal framework in terms of policies, legislation, standards and guidelines and the tools to manage responsibility are examined through lectures, case study review and discussion. Environmental liability and due diligence are reviewed in relation to responsibilities of organizations and individuals. Strategies to manage environmental liabilities, including environmental and risk assessment, are also discussed. Not to be held with (ENVR 3150 or ENVR 2650). Prerequisite: ENVR 2000 (C) or permission of department head.

**ENVR 3180 Methods in Ecotoxicology**  
Cr. Hrs. 3  
(Lab Required) This is a laboratory-based course exploring the development, conduction and application of bioassays, biomarkers, fioindicators and biomonitors in ecotoxicology. Through a laboratory setting, students learn how to perform standard bioassays for a variety of species (plants and invertebrates) as well as systems (aquatic and terrestrial) at different levels of biological organization, from the individual to the ecosystem. Not to be held with (ENVR 3300). Prerequisites: a minimum grade of C in each of ENVR 2180 or BIOL 2380 (BOTN 2180, ZOOL 2180) or AGRI 2180, and a second year course in the Faculty of Science or the Faculty of Agricultural and Food Sciences that has a laboratory component, or permission of department head.

**ENVR 3250 Environmental Assessment**  
Cr. Hrs. 3  
(Lab Required) The theory, principles and practices of environmental assessment as a planning and decision-making process to identify and mitigate adverse effects of development projects. Environmental assessment is defined in the context of federal and provincial legislation, and applicable standards and guidelines. Laboratory assignments involve practical experiences, case study review and basic report preparation. Prerequisites: A grade of “C” or better in [ABIZ 3550 or ENVR 3160 or the former ENVR 3150] and [BIOL 2300 or BIOL 2301 or the former BOTN 2380 or the former BOTN 2370 or the former ZOOL 2370 or the former ZOOL 2371 or AGEC 2370] or [BIOL 2390 or the former BOTN 2280 or the former ZOOL 2290] or permission of department head.

**ENVR 3340 Circumpolar Cultures and Lifestyles**  
Cr. Hrs. 3  
This course provides an introduction to the culture, lifestyles, belief systems, material culture, art, environmental issues, and politics of Aboriginal Peoples in northern Canada, Greenland, Alaska, Siberia and Scandinavia. Prerequisite: Permission of department head.

**ENVR 3350 Environmental Management Systems**  
Cr. Hrs. 3  
This course provides an introduction to environmental management systems and specific material on the ISO 14001 international EMS standard. Auditing principles and techniques are described with specific guidance on auditing an ISO 14001 EMS. Prerequisite: Permission of department head.

**ENVR 3400 Introduction to Environment and Health**  
Cr. Hrs. 3  
An overview of the linkages between human health and environmental issues. The course discusses the nature of environmental hazards, human exposure and health outcomes. Major environmental and human health issues such as air pollution, hazardous substances, endocrine disruptors and products in the home are covered. Prerequisite: 60 credit hours of university credit.
ENVR 3500 Project in Environmental Science Cr. Hrs. 3
A research project in any aspect of environmental science, chosen in consultation with the department head and an appropriate supervising faculty member. Written reports and oral presentation on the results of the project will be required. The course is normally available only to final year students in the Environmental Science or Studies Program. Prerequisite: Permission of department head.

ENVR 3550 Environmental Analysis Cr. Hrs. 3 (Lab Required) An introduction to classical and modern techniques for sampling, sample pre-treatment, and analysis of chemical substances in aquatic atmospheric and terrestrial environments and the interpretation of data obtained from such analyses. Not to be held with CHEM 3590. Prerequisite: ENVR 2550 (C), or CHEM 2550 (C), or CHEM 2470 (C), or permission of department head.

ENVR 3750 Green Building and Planning Cr. Hrs. 3
An overview of the concepts and tools of Green building design and Green Planning. The course covers the history and trends in Green Building and Planning, related policies, tools and techniques. There is a strong emphasis on learning from local case-studies through seminars and field trips. Prerequisite: ENVR 2000 and 57 credit hours, or permission of department head.

ENVR 3850 Sustainable Manitoba (A) Cr. Hrs. 3
This course approaches local sustainability issues from an interdisciplinary perspective. By looking at the ecological, social and economic aspects from a variety of discipline perspectives, a fuller understanding of sustainability is achieved. The broad range of perspectives is achieved through participation of guest speakers from other faculties and outside of the university as well as excursion outside the classroom. Not to be held with GEOG 3850. Prerequisite: 60 credit hours of course work, or permission of department head.

ENVR 3900 Professional Development in the Environmental Sectors 2 Cr. Hrs. 1.5
Attendance and participation in seminars, conferences and workshops to foster greater interaction between students and practitioners in the environmental sectors. Students improve professional skill sets through assignments and mock interviews. The normal sequence for participation is after completion of ENVR 3980. Prerequisites: ENVR 2900 (C), and 60 credit hours of university credit.

ENVR 3910 Coop Work Term Report 1 Cr. Hrs. 1.5
Work term report, completed in conjunction with the coop placement, designed to integrate professional experiences with the concepts and theories explored through academic study. Students must be admitted into the Coop program to be registered, and receive credit. Prerequisite: ENVR 2900 (P). Prerequisite or Concurrent Requirement: ENVR 3980.

ENVR 3920 Coop Work Term Report 2 Cr. Hrs. 1.5
Work term report, completed in conjunction with the coop placement, designed to integrate professional experiences with the concepts and theories explored through academic study. Students must be admitted into the Coop program to be registered, and receive credit. Prerequisite: ENVR 3980 (P). Prerequisites or Concurrent Requirements: ENVR 3900, and ENVR 3990.

ENVR 3980 Coop Work Term 1 Cr. Hrs. 0
Work assignments in business, industry, research or government for students registered in the Honours or Major Cooperative program. This course is graded pass/fail. Prerequisite: ENVR 2900 (C).

ENVR 3990 Coop Work Term 2 Cr. Hrs. 0
Work assignments in business, industry, research or government for students registered in the Honours or Major Cooperative program. This course is graded pass/fail. Prerequisite: ENVR 2900 (C). Work assignments in business, industry, research or government for students registered in the Honours or Major Cooperative program. This course is graded pass/fail. Prerequisite: ENVR 2900 (C). Work assignments in business, industry, research or government for students registered in the Honours or Major Cooperative program. This course is graded pass/fail. Prerequisite: ENVR 2900 (C).
**ENVR 4400 Advanced Issues in Environment and Health**  
Cr. Hrs. 3  
An evaluation of global and local environmental health issues and the assessment and management tools used to manage these risks. Case studies of environmental issues and their human health effects are covered. Students have the opportunity to work on a substantial interdisciplinary environmental health project. Prerequisite: ENVR 3400 (C).

**ENVR 4500 Thesis Project in Environmental Science and Studies**  
Cr. Hrs. 6  
A research thesis project in any aspect of environmental science or environmental studies, chosen in consultation with the course coordinator and an appropriate supervisor, typically a faculty member. Written reports and oral presentation on the results of the thesis project will be required. The course is normally available only to final year students in the Environmental Science Honours or Environmental Studies Honours Program. Prerequisites: Permission of course coordinator, and a GPA of 3.00 in the last 30 credit hours.

**ENVR 4550 Aquatic Chemistry**  
Cr. Hrs. 3  
An examination of biogeochemical processes affecting the distribution, speciation and bioavailability of chemical substances in the aquatic environment. The theoretical basis for the chemical behaviour of natural water systems is discussed, as well as the description of the processes involved in wastewater treatment. Not to be held with CHEM 4550. Prerequisite: ENVR 3550 (C), or CHEM 3590 (C), or permission of department head.

**ENVR 4650 Advanced Issues in Environmental Law and Policy**  
Cr. Hrs. 3  
This course provides an in-depth review of Canadian law and policy relating to environmental protection and management. In particular, the course describes the laws governing a variety of topics related to the environment, including constitutional responsibilities, federal and provincial environmental legislation, water law, parks and protected areas, wildlife and fisheries management, species at risk, and international law including climate change. Prerequisite: a minimum grade of C in ENVR 3160 (or the former ENVR 2650), or permission of department head.

**ENVR 4872 Advanced Methods in Geomatics**  
Cr. Hrs. 3  
(Lab required) This course focuses on the theory and application of geomatics in spatial problem solving in geography and the environment. The use of geomatics’ technologies including GIS, Earth observation and spatial numerical methods will be covered. Students will learn the theoretical underpinning of spatial statistical concepts and will experiment with data exploration, inference and hypothesis testing. Lab assignments will provide practical experience with GIS and other geomatics software as well as CRAN-R. Not to be held with GEOG 4590 or GEOG 4720 or GEOG 4872. Prerequisite: GEOG 3730 or permission of instructor.

**ENVR 4910 Coop Work Term Report 3**  
Cr. Hrs. 1.5  
Work term report, completed in conjunction with the coop placement, which is designed to integrate professional experiences with the concepts and theories explored through academic study. Students must be admitted into the Coop program to be registered, and receive credit. Prerequisite: ENVR 3990 (P).

**ENVR 4980 Work Term 3**  
Cr. Hrs. 0  
Work assignments in business, industry, research or government for students registered in the Honours or Major Cooperative program. This course is graded pass/fail. Prerequisite: ENVR 3990 (P).

**SECTION 8: Department of Geological Sciences**

Head: Mostafa Fayek

Campus Address/General Office: 240 Wallace Building  
Telephone: (204) 474-9371  
Fax: (204) 474-7623  
Website: umanitoba.ca/geoscience

**8.1 Academic Staff**

Please refer to the Clayton H. Riddell Faculty of Environment, Earth, and Resources website at: umanitoba.ca/environment/about/academic_staff.html

**8.2 Program Information**

The Geological Sciences deal with the history of the Earth and its life, especially that which is recorded in rocks. Different component parts of the Earth system, the lithosphere, biosphere, atmosphere and hydrosphere, operate at different length and time scales. During interactions between the spheres there is feedback between the component parts as energy and mass are exchanged, transferred and redistributed. In a geological context, the feedback can occur on a global scale, or on very small scales such as that which we see in minerals. More recently humans have become a major force in this Earth system because we have intervened in many of these exchanges.

Considering the Earth’s past, geoscientists typically work with long time scales (in the order of millions to billions of years). We also use Hutton’s original philosophy of uniformitarianism, stated as the present is the key to the past, to solve geological problems. However, as we see changes at the Earth’s surface (our environment) occurring on very short time scales we need to learn to extract the signal of human activity from the Earth’s pre-human past. Once we understand and quantify the nature and extent of the Earth’s natural evolution as well as our more recent environmental impact, geological sciences can help predict future changes to the Earth.

Geology and Geophysics are the sciences that provide the quantitative data on the physical and chemical behaviour and characteristics of Earth materials - rocks, minerals, fluids and gases. These data are needed to model the behaviour of minerals in natural as well as many industrial systems. The theoretical and instrumental expertise needed to tackle many resource extraction, mineral processing and environmental problems is resident in geological science departments. From a broad Earth, environmental and resource perspective our collective future will depend on sustainable use of our Earth’s resources and care of the environment.

The three-year General program (comprising of 90 credit hours) in Geological Sciences is designed to give students a basic understanding of the discipline in combination with a concentration of courses in a second subject area. The General Program is not intended for those students who seek a career in the geosciences. Rather, it is a useful consideration for students planning to enter the Bachelor of Education program (see the Faculty of Education in this calendar) or other programs that require an undergraduate degree for admission. Students intending to pursue a career in the geosciences or graduate study should hold an Honours or Major degree (comprising at least 120 credit hours) in Geology or Geophysics.

**Professional Registration**

The professional practice of geoscience in Canada is governed by provincial/territorial law and is regulated by professional geoscience associations. In Manitoba, Engineers Geoscientists Manitoba (EGM) regulates professional practice. The requirements for professional registration are acceptable academic preparation and a subsequent period of acceptable geoscience experience. Students considering professional registration should take the B.Sc. Geological Sciences Honours or Major degree and make appropriate course selections, particularly in the basic sciences. Graduates who do not meet the academic requirements may be required by the professional association to take additional courses or
examinations. Current registration information for EGM is available in the department or from the association's web site: www.apegm.mb.ca

**Geological Sciences Prerequisite Information**

To fulfil prerequisite requirements, a grade of 'C' must be achieved in any course stipulated as a prerequisite to a further course in Geological Sciences unless otherwise stated. Please note that some GEOL courses require a minimum grade of 'C+' in the prerequisite course.

**8.3 Degree Regulations**

**8.3.1 B.Sc. in Geological Sciences (Major) Geology or Geophysics**

To qualify for the degree, a student must complete a minimum of 120 credit hours with passing grades ('D' or better) in each course and with a minimum degree grade point average of 2.50 as indicated in the Graduation Requirements Table (see section 8.3.5). Students must complete all Faculty requirements as well as the University Written English and Mathematics requirement as described in the Chapter, General Academic Regulations, in this Calendar.

Students admitted to the Major program will normally have completed six credit hours of courses from the Faculty of Arts. Students who do not meet this requirement within their first 30 credit hours must do so within the Major program.

**Minor in Another Department**

Students in the B.Sc. Geological Sciences have the opportunity to complete a Minor in a subject field that is different than that of the declared major, and which normally consist of 18 credit hours from a department offering this option at the University of Manitoba. Students in the B.Sc. Geological Sciences are not permitted to complete a Minor in Geological Sciences. The Minor requirements are described in section 3.2 of this Chapter. Contact the department and/or a Riddell Faculty student advisor, in the Faculty Dean's Office for further information about eligible Minors.

**Entrance to the Major**

To enter a Major program in Geology or Geophysics, a student must have completed at least 24 credit hours with a minimum Degree Grade Point Average of 2.50 as stipulated in Entrance and Continuation Requirements Table (see section 8.3.4). In addition, the student must attain the minimum grade requirements specified for individual Year 1 courses according to the program tables for the Major in Geology (section 8.4) or the Major in Geophysics (see section 8.5).

**Continuation in the Major**

A student's academic performance is assessed first with his/her application for admission to the Riddell Faculty and then following each term in which the student is registered. To be in **good standing** and permitted to continue in the degree program, a student must maintain a minimum degree Grade Point Average of 2.50 as stipulated in the Entrance and Continuation Requirements Table (section 8.3.4). Students who do not meet the minimum performance requirement will be required to withdraw from the Major program and will be placed in the General program provided their Degree Grade Point Average is 2.00 or above. Students will have the notation 'Required to Withdraw from the Major Program', recorded on their transcript.

If below 2.00, students will be placed on academic warning, probation or academic suspension as outlined in section 3.14 Academic Warning, Probation, Academic Suspension and Special Students (Academic Standing) in this Chapter.

**Failed courses:** Students cannot exceed 18 credit hours of failed courses (F's) as calculated on courses applicable to the degree program (DGPA).

Repeating GEOL 4920 Technical Report: The course may be repeated only once after a grade of F.

**Program approval**

A Riddell Faculty student advisor in the Faculty Dean's Office must approve a student's Major program each term. Students must also obtain departmental approval for all revisions to their programs. The Advanced/Major/Honours Program Approval forms are available on the Riddell Faculty web page. (umanitoba.ca/environment/undergraduate)

**Graduation in the Major**

In order to graduate from the Geology or Geophysics Major, students must complete all degree program and faculty requirements as stipulated in section 3 and section 8 of this Chapter. Students must also achieve the minimum performance requirements as outlined in the Graduation Requirements Table (see section 8.3.5). This is defined as a minimum Degree Grade Point Average of 2.50 on 120 credit hours which constitute the degree.

**Residence Requirement for Major Students**

A student must successfully complete a minimum of 60 credit hours at the University of Manitoba. The courses used to satisfy the requirement must be acceptable for credit in the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Residence requirements apply both to first and second-degree students.

**Recognition of Academic Merit**

**Degree with Distinction**

To obtain a degree with distinction a student must achieve a minimum 3.50 Degree Grade Point Average on all courses constituting the Major degree. The term 'Degree with Distinction' will appear both on the parchment and on the student's transcript.

**8.3.2 B.Sc. in Geological Sciences (Honours) Geology or Geophysics**

The Honours programs are the most heavily concentrated programs offered and lead most directly to graduate studies. A student is required to achieve higher grade standards than in the Major degree program. The Honours degree may be pursued on a part-time basis, although it must be recognized that students will require additional terms to complete degree requirements. Students must complete the degree program within 8 years of gaining initial admission to the Honours program. Failure to complete the Honours degree within the 8-year time limit may require a student to transfer into the Major program.

Students admitted to the Honours program will normally have completed six credit hours of courses from the Faculty of Arts. Students who do not meet this requirement within their first 30 credit hours must do so within the Honours program.

A student will normally begin the Honours program in second year and must meet the entrance requirements set out below. Students in full-time study can expect to complete the prescribed courses in four years. Honours programs lead to either the B.Sc. Geological Sciences (Hons.) (Geology) or the B.Sc. Geological Sciences (Hons.) (Geophysics).

To be eligible for any award granted exclusively on the basis of academic performance, a student must normally be enrolled in a full-time program as defined by the department.
Students must complete the University Written English and Mathematics requirement as described in the chapter, General Academic Regulations, of this Calendar.

**Entrance to Honours**

To enter the Honours program in Geology or Geophysics, a student must have completed at least 24 credit hours with the minimum Degree Grade Point Average as stipulated in the Entrance and Continuation Requirements Table (section 8.3.4). In addition, the student must attain the minimum grade requirements specified for individual Year 1 courses according to the program tables for Honours Geology (section 8.4) or Honours Geophysics (section 8.5). Students who are ineligible to enter Honours with their admission to the Riddell Faculty may establish eligibility the following year on the basis of their second year of academic performance.

**Continuation in Honours**

A student’s academic performance is assessed first with his/her application for admission to the Riddell Faculty and then following each term in which the student is registered. To be in good standing and permitted to continue in the degree program, a student must maintain the performance requirement as stipulated in the Entrance and Continuation Requirements Table (section 8.3.4). Students who do not meet the minimum performance requirements will be placed on academic warning, probation or academic suspension as outlined in section 3.14 Academic Warning, Probation, Academic Suspension and Special Students (Academic Standing) in this Chapter. Students who do not maintain this minimum average to remain in the program will be required to withdraw from the Honours program and, if eligible, will be placed in the Major program. Students will have the notation ‘Required to Withdraw from the Honours Program’ recorded on their transcript.

- **Failed courses:** Students cannot exceed 18 credit hours of failed courses (F’s) as calculated on courses applicable to the degree program (DGPA).
- **Repeating GEOL 4870 Honours Thesis:** The course may be repeated only once after a grade of F.

**Program Approval**

A Riddell Faculty student advisor in the Faculty Dean’s Office must approve a student’s Major program each term. Students must also obtain departmental approval for all revisions to their programs. The Advanced/Major/Honours Program Approval forms are available on the Riddell Faculty web page. ([umanitoba.ca/environment/undergraduate](http://umanitoba.ca/environment/undergraduate))

**Residence Requirement for Honours Students**

A student must successfully complete a minimum of 60 credit hours at the University of Manitoba. The courses used to satisfy the requirement must be acceptable for credit in the Clayton H. Riddell Faculty of Environment, Earth, and Resources. Residence requirements apply both to first and second-degree students.

**Graduation from Honours**

In order to graduate from the Honours Geology and Geophysics programs, students must complete all degree program and faculty requirements as stipulated in section 3 and section 8 of this Chapter. Students must also achieve the minimum performance requirements as outlined in the Graduation Requirements Table (see section 8.3.5). This is defined for the Honours Geology program as a minimum Degree Grade Point Average of 3.00 on 120 credit hours which constitute the degree and for Honours Geophysics as a minimum Degree Grade Point Average of 2.80 on the 120 credit hours which constitute the degree.

**Recognition of Academic Merit**

**First Class Honours**

To graduate with First Class Honours, a student must achieve a Degree Grade Point Average of 3.50. The term ‘First Class Honours’ will appear both on the parchment and on the student’s transcript.

**Honours Program Notes:**

**Double Honours Programs**

Double Honours programs may be available. The program must be arranged in consultation with the departments concerned.

**Honours Requirements and Options**

Students who do not obtain the entrance requirements for the Honours program in their first year but who are interested in obtaining an Honours degree should consult with the department before registering for their second year.

**Honours Geology Options**

For students who wish to increase the focus of their knowledge, recommended electives are listed below:

- Environmental Geoscience: BIOL 2300 (or AGEC 2370), CIVL 4250, SOIL 4060, SOIL 4130, SOIL 4500, GEOL 4370, GEOG 3390, ENVR 2180 (BIOL 2380 or AGRI 2180), ENVR 3110, ENVR 3250, or others approved by the department. (Students are responsible for completion of prerequisites for these courses.)

**Honours Geophysics Option**

Students who wish to enter the Honours Geophysics Option and have not taken 6 credit hours of introductory Geological Sciences (e.g., GEOL 1340 and one of GEOL 1400, GEOL 1410, or GEOL 1420) may arrange with the department to make up this credit. Students must contact the department during the spring preceding entrance to the Honours program. All course choices in the Honours program should be made after consultation with the coordinator of the Geophysics program.

**8.3.3 B.Sc. in Geological Sciences (General)**

**Degree Program Structure**

- A Geological Sciences component consisting of a minimum of 30 credit hours.
- A Minor of 18 credit hours (minimum) in a different department or an interdisciplinary program. e.g. in the Clayton H. Riddell Faculty of Environment, Earth, and Resources, or the Faculty of Arts, or the Faculty of Science. The Minor requirements are described in section 3.2 of this Chapter. Contact the department and/or a Riddell Faculty student advisor in the Faculty Dean’s Office for further information about eligible Minors.
- Students will normally complete the Faculty of Arts courses requirement which include 6 credit hours from the Faculty of Arts. Students who have not met this requirement in their first year must meet the requirement prior to graduation.

**Entrance to the General**

To be admitted to the General program, a student must have completed at least 24 credit hours with a minimum Degree Grade Point Average of 2.00. In addition, a student must have completed GEOL 1340 with the grade of ‘C+’. Refer to Section 8.6 for further program requirements.

**Continuation in the General**

A student’s academic performance is assessed first with his/her application for admission to the Riddell Faculty and then following each term in which
the student is registered. To be in good standing and permitted to continue
in the degree program, a student must maintain a minimum Degree Grade
Point Average of 2.00 as stipulated in the Entrance and Continuation
Requirements Table (section 8.3.4). Students who do not meet the
minimum performance requirement will be placed on academic warning,
probation or academic suspension as outlined in section 3.14 Academic
Warning, Probation, Academic Suspension and Special Students (Academic
Standing) in this Chapter.

Failed courses: A student is required to repeat those failed courses that are
specified as required courses for the program. Students are subject to the
University of Manitoba regulations (see General Academic Regulations,
Academic Evaluations, 1.2 Repeating a Course as described in this Calendar)
and the Riddell Faculty degree regulations regarding eligibility to repeat a
course. Students who need to repeat a course more than once to fulfill
degree requirements must contact a Riddell Faculty student advisor for
approval prior to registration. Students cannot exceed 30 credit hours of
failed courses (F’s) as calculated on courses applicable to the degree
program (DGPA).

Graduation in the General

To qualify for the degree, students must complete 90 credit hours, inclusive
of Geological Sciences courses, a minor in a second department or
program, and any University 1 requirements. Minimum performance
requirements include passing grades ("D" or better) in each course, a
minimum degree grade point average of 2.00 in Geological Sciences
courses, and an overall degree grade point average of 2.00 on the 90 credit
hours which constitute the degree. Note: Where a Geological Sciences
course listed in the calendar has required prerequisites, a student must
hold a minimum grade of "C+" or "C" in each prerequisite course as
stipulated in the course description.

Residence Requirement for General Students

Students must complete a total of 48 credit hours at the University of
Manitoba, or they must complete their final 30 credit hours at the
University of Manitoba in order to satisfy the residency requirement. The
courses used to satisfy the requirement must be acceptable for credit in the
Clayton H. Riddell Faculty of Environment, Earth, and Resources.

Recognition of Academic Merit

Degree with Distinction

To obtain a degree with distinction, a student must achieve a minimum
3.50 Degree Grade Point Average on all courses constituting the General
degree. The term ‘Degree with Distinction’ will appear both on the
parchment and on the student's transcript.

Notes:
¹The courses required in this program will satisfy the University Mathematics
requirement and the University Written English requirement.
²PHYS 1050 may be used in lieu of PHYS 1020.
³MATH 1510 or MATH 1520 may be used in lieu of MATH 1500.
⁴Among the Geological Sciences Electives, Major students must complete 18
credit hours consisting of 3 credit hours from Group B with the remaining 15
credit hours from Group A or B.
⁵Students will register for GEOL 3910 and GEOL 4910 in Summer term.

NOTE:
Students should be aware that they are expected to contribute to
transportation and accommodation costs. See the department office at the
beginning of each year for information.

IMPORTANT:
The Honours and Major programs need not be completed in the manner

Academic Calendar 2018-2019

Clayton H. Riddell Faculty of Environment, Earth, and Resources 408
prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program. (Letters in brackets indicate the minimum prerequisite standing in a specific course required for entry to the program).

GEOL 1400 is highly recommended to be taken in Year 1, but will not be considered when assessing entrance requirements to the program. If this requirement is not fulfilled in Year 1, it must be completed by the end of Year 2.

**NOTE:**
To fulfill prerequisite requirements, a grade of 'C' must be achieved in any course stipulated as prerequisite to a further course in Geological Sciences, unless a higher prerequisite is stipulated in a course description.

All courses are not offered every year. The course schedule for the current academic term is available from the Class Schedule.

Students registering in certain courses may be required to pay a portion of the costs associated with field trips. For details, contact the Department general office.

Equivalent courses offered through Université de Saint Boniface may be used in lieu of the specified courses identified in the degree program chart, Université de Saint Boniface courses end in the number '1' (e.g. CHEM 1). Students are required to complete a minimum of 9 credit hours from the required courses and is meant to be a guide around which students plan their program. (Letters in brackets indicate the minimum prerequisite standing in a specific course required for entry to the program).

**NOTE:** With departmental approval, up to 6 credit hours of 2000-level or higher courses from Science departments may be substituted to satisfy professional registration (APEGM) requirements.
**NOTES:**

- The courses required in this program satisfy the University Mathematics Requirement and the University Written English Requirement.
- GEOL 1400 is highly recommended to be taken in Year 1, but GEOL 1410 or GEOL 1420 may be substituted.
- MATH 1690 may be taken in place of MATH 1500 (or MATH 1510) and MATH 1700 (or MATH 1710); MATH 1300 may be taken in place of MATH 1210. Selection of MATH 1300 or MATH 1210 will determine the prerequisite background for Mathematics courses required in years 2, 3, and 4.
- MATH 2720 may be taken in place of MATH 2130. PHYS 2490 may be taken in place of MATH 2160. MATH 3490 may be taken in place of PHYS 2190. Normally, students select MATH 2130, MATH 2132, COMP 2190, and MATH 3132 or (MATH 2720, PHYS 2490, MATH 2160, and PHYS 3490).
- GEOL 4740 will normally be taken immediately following the Winter term examinations and will continue for approximately three weeks. Registration will show as Summer Term. NOTE: Students are expected to contribute to the costs of transportation, lodging, and food. Contact the Department for further information.

**IMPORTANT:** The Honours and Major programs need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program. (Letters in brackets indicate the minimum prerequisite standing required for further study)

**NOTE:**

- To fulfill prerequisite requirements, a grade of 'C' must be achieved in any course stipulated as prerequisite to a further course in Geological Sciences, unless a higher prerequisite grade is stipulated in a course description.
- All courses are not offered every year. The course schedule for the current academic term is available from the Department general office.
- Students registering in certain courses may be required to pay a portion of the costs associated with field trips. For details, contact the Department general office. Equivalent courses offered through Université de Saint-Boniface may be used in lieu of the specified courses identified in the degree program chart. Université de Saint-Boniface courses end in the numbers '3' (e.g. PHYS 1051).

### Notes:

- GEOL 1400 is highly recommended to be taken in Year 1, but GEOL 1410 and GEOL 1420 may be substituted. If this requirement is not fulfilled in Year 1, it must be completed by the end of Year 2.

### NOTE:

To fulfill prerequisite requirements, a grade of 'C' must be achieved in any course stipulated as prerequisite to a further course in Geological Sciences.

All courses are not offered every year. The course schedule for the current academic term is available from the Class Schedule.

Students registering in certain courses may be required to pay a portion of the costs associated with field trips. For details, contact the Department general office.

Equivalent courses offered through Université de Saint-Boniface may be used in lieu of the specified courses identified in the degree program chart. Université de Saint-Boniface courses end in the number '1' (e.g. GEOG 1281).

8.7 Environment, Earth, and Resources Course Description

#### EER 1000 Earth: A User's Guide Cr. Hrs. 3

This course will present a multi-disciplinary introduction to the Planet Earth as both the source of essential resources and as the site of resulting negative impacts. Focus in the course will be provided by addressing important and current topics, case studies, and concepts that the well-educated citizen of the Earth should understand and will include natural and human-induced processes within a broad range of spatial and temporal scales.

8.8 Geological Sciences Course Descriptions-1000 Level

#### GEOL 1340 The Dynamic Earth Cr. Hrs. 3

(Required) An introduction to dynamics of the Earth’s interior and surface that created the environment in which life evolved and that continue to change the world in which people now live. Not to be held with the former GEOL 1440 or the former GEOL 2250. Required for students intending to proceed in further courses in the Geological Sciences.

#### GEOL 1400 Time-Trekker’s Travelog: Our Evolving Earth Cr. Hrs. 3

Take a trip across billions of years, as we explore awesome times in the evolution of our planet and its life -- from dust to us! Not to be held with GEOL 1350.

#### GEOL 1410 Natural Disasters and Global Change Cr. Hrs. 3

Discover how and when natural disasters occur, and how to identify and recognize them. Explore the Earth processes that lead to natural disasters and global change. Not to be held with the former GEOL 1360.

#### GEOL 1420 Exploring the Planets Cr. Hrs. 3

Discover the Solar System as we explore ancient ideas and modern concepts. Emphasis will be on recent space exploration and a comparison of the Earth and its neighbours. Not to be held with the former GEOL 1370.

8.8 Geological Sciences Course Descriptions-2000 Level

#### GEOL 2060 Introductory Geophysics Cr. Hrs. 3

(Required) An introduction to geophysical exploration, Earth physics, satellite geophysics and remote sensing. Emphasis will be on quantitative modeling and will include geophysical measurements and handling of data. Prerequisites: [GEOL 1340, or (GEOL 1440) (C)], and [MATH 1300, or MATH 1310, or MATH 1510, or MATH 1520, or MATH 1530 (C)], and [PHYS 1020, or PHYS 1050 (C)], or permission of department head.

#### GEOL 2390 Environmental Geology Cr. Hrs. 3

Examination of geological processes and material as they interact with human activities, environmental planning, and management. Also available by correspondence. Prerequisite: [Minimum 3 credit hours of university-level geology] or [GEOG 1290 or GEOG 1291], or [the former GEOG 1200 or GEOG 1201].

#### GEOL 2440 Structural Geology 1 Cr. Hrs. 3

(Required) Elementary mechanical principles of rock deformation, brittle and continuous deformation, geometry of faults, folds, joints, cleavage, lineations. Descriptive geometric and stereonet solution to structural geology problems, cross sections, structural contour maps. Prerequisite: GEOL 1340 (C+) and [MATH 1300, or MATH 1210, or MATH 1500, or MATH 1510, or MATH 1520].

#### GEOL 2500 Introduction to Mineralogy Cr. Hrs. 3

(Required) An introduction to the chemistry, physics and classification of minerals. Brief, systematic description of about 200 of the most important minerals. Laboratory: hand specimen identification. Not to be held with the former GEOL 2540. Prerequisites: GEOL 1340 (C+) and [40S Chemistry or CHEM 0900 (Pass)]. CHEM 1300 is highly recommended.

#### GEOL 2520 Igneous and Metamorphic Petrology Cr. Hrs. 3

(Required) The classification, occurrence and origin of igneous and metamorphic rocks. The study and identification of rocks using hand specimens and thin sections. Prerequisites: [GEOL 2500 and GEOL 2800] or [the former GEOL 2540].

#### GEOL 2530 Introductory Sedimentary Petrology and Stratigraphy Cr. Hrs. 3

(Required) An introduction to sedimentary deposits and principles of stratigraphic analysis. Occurrence, classification and origin of sedimentary deposits. Facies concept, stratigraphic classification and correlation. Prerequisites: [GEOL 2500 and GEOL 2800] or [the former GEOL 2540].

#### GEOL 2570 Energy and Mineral Resources Cr. Hrs. 3

An introduction to the geological factors and processes responsible for the origin, concentration and distribution of fuels, geothermal resources, metallic and nonmetallic minerals. Available by correspondence only. Not
Prerequisite: Any university-level Geology course.

**GEOL 2770 Principles of Inorganic Geochemistry**  Cr. Hrs. 3
(Lab Required) The cosmic abundance of the elements, nucleosynthesis, geological differentiation of the elements; chemical petrology of igneous, metamorphic and sedimentary rocks. An introduction to aqueous and low-temperature geochemistry. Prerequisite: (GEOL 2500 or the former GEOL 2540) and (MATH 1300, or MATH 1210, or MATH 1500, or MATH 1510, or MATH 1520). Pre- or Corequisite: CHEM 1300.

**GEOL 2800 Optics and Spectroscopy of Minerals**  Cr. Hrs. 3
(Lab Required) Use of the petrographic microscope; microscopic recognition of common rock-forming minerals; introduction to spectroscopic techniques in geosciences (including optical, vibrational and luminescence techniques). Pre- or Corequisite: GEOL 2500 or the former GEOL 2540.

### 8.8 Geological Sciences Course Descriptions-3000 Level

**GEOL 3110 Petrogenesis of Igneous Rocks**  Cr. Hrs. 3
(Lab Required) Crystallization processes in magma and resultant textures; physical, chemical, and kinetic processes of magmatic systems. Prerequisites: GEOL 2520 and GEOL 2770.

**GEOL 3130 Communication Methods in the Geological Sciences**  Cr. Hrs. 3
(Lab Required) Practice in oral and written description of geologic subjects; tools of library and database research; manuscript organization; abstract writing; computer-aided table, figure, and slide preparation. Prerequisites: GEOL 2440 and GEOL 2520 and GEOL 2530. This course is for students in the Honours and Major Geological Sciences programs only.

**GEOL 3140 Gemology**  Cr. Hrs. 3
(Lab Required) An introduction to the scientific study of natural and synthetic gem materials, methods of their identification and principles of gemstone appraisals. Laboratory: identification of gemstones using optical methods. Prerequisites: [GEOL 2500 and GEOL 2800] or [the former GEOL 2540].

**GEOL 3310 Paleontology**  Cr. Hrs. 3
(Lab Required) The study of fossils: invertebrate paleontology, with an introduction to paleontologic principles, vertebrate paleontology, and paleobotany. Prerequisite: GEOL 1340 (C+) or the former GEOL 1440 (C+) or permission of department head.

**GEOL 3420 Engineering Geology**  Cr. Hrs. 3
Engineering properties of rocks and soils, laboratory testing and site investigations in engineering geology. Engineering geology of tunnels, bridges, dams, reservoirs, shorelines, sanitary landfills, landslides, seismic risk areas, etc. Prerequisites: GEOL 2440 and GEOL 2520 and GEOL 2530.

**GEOL 3440 Structure and Metamorphism**  Cr. Hrs. 3
(Lab required) Structural and metamorphic geology, links between deformation and metamorphism, and the application of pressure-temperature and time paths to study metamorphic equilibria. Not to be held with the former GEOL 3290. Prerequisites: GEOL 2440 and GEOL 2520 and GEOL 3910.

**GEOL 3450 Hydrogeology**  Cr. Hrs. 3
(Lab required) The hydrologic cycle and basic hydrologic processes; properties of aquifers and principles of groundwater flow; well hydraulics and groundwater resource evaluation; regional groundwater flow and subsurface geology; and basic chemical hydrogeology. May not be held with CIVL 4250. Prerequisites: [MATH 1500 or MATH 1510 or MATH 1520 (C)] and [PHYS 1020 or PHYS 1021 or PHYS 1050 or PHYS 1051 (C)] and [CHEM 1300 or CHEM 1301 (C)] and [GEOL 2060 or GEOG 2310 (C)] and [GEOL 2530 (C)].

**GEOL 3490 Glacial Geology and Geomorphology**  Cr. Hrs. 3
(Lab required) Principles of landform development with emphasis on glacial deposition. Aerial photo and map interpretation in lab. Not to be held with the former GEOG 3580. Prerequisite: GEOL 2530.

**GEOL 3740 Exploration Seismology**  Cr. Hrs. 3
(Lab required) Collection of seismic data (land and sea); simple elastic wave theory; geometry of refraction and reflection seismology; rock velocity determination; seismic noise and signal; data corrections; data enhancement techniques; representation of data; survey procedures. Prerequisites: [GEOL 2060 (C)] and [MATH 1500 or MATH 1510 (C) or MATH 1510 (C) or MATH 1520 (C) or the former MATH 1530 (C) or MATH 1690 (C)].

**GEOL 3750 Geology and Geophysics of the Planets**  Cr. Hrs. 3
(Lab required) Physical and chemical nature of the inner and outer planets and their satellites, asteroids and meteorites. The application of geophysical, geochemical and petrological techniques to planetology; remote sensing study of geological features of planetary surfaces and atmospheres. Prerequisites: GEOL 2060, GEOL 2520, and GEOL 2530, or permission of department.

**GEOL 3810 Applied Geophysics**  Cr. Hrs. 3
(Lab required) The application of geophysical methods in exploration and environmental and engineering projects. Prerequisite: [GEOL 2060] and [GEOL 2500 or the former GEOL 2540].

**GEOL 3900 Sedimentology**  Cr. Hrs. 3
(Lab Required) The study of depositional environments of sedimentary rocks. Facies analysis and modeling of sedimentary deposits. Prerequisite: GEOL 2530.

**GEOL 3910 Introduction to Field Mapping**  Cr. Hrs. 3
Course introducing field mapping techniques including field navigation and basic geologic interpretations. Students are responsible for costs of room and board during the field course. Offered in the Summer Term. Prerequisites: GEOL 2440 and GEOL 2520 and GEOL 2530 and permission of department.

### 8.8 Geological Sciences Course Descriptions-4000 Level

**GEOL 4250 Theory and Application of Geophysical Inversion Methods**  Cr. Hrs. 3
(Lab required) Introduction to linear and non-linear geophysical inversion theory. Prerequisites: [GEOL 2060 (C)] and [MATH 1210 (C) or MATH 1300 (C) or MATH 1301 (C) or MATH 1310 (C)].

**GEOL 4260 Applied Geophysics Field Course**  Cr. Hrs. 3
Field instruction in the planning and execution of geophysical surveys and the use of geophysical equipment; analysis, interpretation and reporting of acquired geophysical data. Taught with the first half of GEOL 4740 in the summer term. Students are responsible for costs of room and board during the field course. Not to be held with GEOL 4740. Prerequisites: GEOL 3810, GEOL 2440, GEOL 2520, GEOL 2530, and permission of department.

**GEOL 4270 Advanced Studies in Earth Sciences**  Cr. Hrs. 3

Advanced study in a selected subject in Earth sciences. Prerequisite: Permission of department head. As the course content will vary from year to year, students may take this course more than once for credit.

**GEOL 4280 Instrumental Techniques in Geology**  
Cr. Hrs. 3  
(Lab required) Lecture and laboratory course introducing modern instrumental techniques for the characterization of materials. Includes coverage of diffraction, spectroscopy, mass spectrometry, electron and scanning probe techniques. Emphasis is placed on basic principles, instrument operation, data analysis and sample preparation. Prerequisites: GEOL 2520 and GEOL 2530 and GEOL 2770 and permission of department.

**GEOL 4300 Mineral Deposits**  
Cr. Hrs. 3  
(Lab required) The tectonic setting and deformational and structural nature of ore deposits. The physics and chemistry of ore deposition and ore bearing fluids. The mineralogical, textural and environmental constraints on resource exploitation. Prerequisites: GEOL 3110 and GEOL 3900.

**GEOL 4310 Paleontologic Principles**  
Cr. Hrs. 3  
(Lab required) Interpretation of Earth history using fossils: topics in taxonomy, functional morphology, paleoecology, evolution, biostratigraphy, and biogeography. Prerequisite: GEOL 3310 or permission of department.

**GEOL 4320 Physics of the Earth: Seismology and Heat Flow**  
Cr. Hrs. 3  
Seismology and the structure, physical properties and equations of state of the Earth’s interior; thermal constitution and the history of the Earth. Prerequisites: GEOL 2060 and [MATH 2130 or MATH 2720 or MATH 2721]. Pre- or corequisite: MATH 3132 or PHYS 2490.

**GEOL 4330 Physics of the Earth: Geomagnetism and Gravity**  
Cr. Hrs. 3  
Potential field theory; magnetic properties of Earth materials; figure and rotation of the Earth; theory and application of Earth’s gravity and magnetic fields. Prerequisites: [GEOL 2060 (C) and MATH 2130 or MATH 2720 or MATH 2721]. Corequisite: MATH 3132 or PHYS 2490.

**GEOL 4360 Mineral Exploration Techniques**  
Cr. Hrs. 3  
(Lab required) Methodologies used in exploration and evaluation of Canadian mineral deposits and case studies illustrating the application of these methods. Prerequisite: GEOL 3910 and GEOL 2770. Recommended pre- or corequisite: GEOL 4300.

**GEOL 4370 Global Change**  
Cr. Hrs. 3  
Examination of the major processes controlling global change through time. The causes, magnitude, and periodicity of changes in the geological record resulting from the variability and interaction of continents, oceans, atmospheres, climate, Earth-sun relationships, and ice sheets, with an emphasis on paleoclimate. Prerequisite: GEOL 3900. Pre- or corequisite: GEOL 3490.

**GEOL 4380 Mineral Resource Development**  
Cr. Hrs. 3  
Examination of economic, political, social, and environmental considerations that affect exploration and mining activity. Prerequisite: GEOL 3130 (C+). Pre- or corequisite: GEOL 4300 or GEOL 3810.

**GEOL 4520 Petroleum Geology**  
Cr. Hrs. 3  
(Lab required) A study of the physical properties, origins and maturation, migration, and accumulation of petroleum products. Prerequisites: GEOL 2060 and GEOL 3900 or GEOL 2530 and either (GEOL 3810 or GEOL 3740).

**GEOL 4670 Global Tectonics**  
Cr. Hrs. 3  
(Lab required) The structure and properties of, and physical processes taking place within, the Earth’s interior. Continental cratons and their margins, orogenic belts, structural and petrologic features of the ocean basins, modern diastrophism, global tectonic theories. Prerequisites: [GEOL 3110, GEOL 3440 (or the former GEOL 3290), GEOL 3900] or [GEOL 2440, GEOL 2520, GEOL 2530 and two of the following courses: GEOL 4250, GEOL 4320, GEOL 4330, GEOL 4810].

**GEOL 4740 Geophysics Field Course**  
Cr. Hrs. 6  
Field instruction in planning and execution of geophysical surveys and use of geophysical equipment; analysis, interpretation and reporting of acquired geophysical data. Students are responsible for costs of room and board during the field course. Taught in the summer term. Not to be held with GEOL 4260. Prerequisites: GEOL 2440, GEOL 2520, GEOL 2530, GEOL 3810, and permission of department.

**GEOL 4810 Geophysical Data Analysis**  
Cr. Hrs. 3  
The theory and application of spectral methods in geophysics. The use of Fourier Transforms, convolution, power spectra, coherence, transfer functions, covariance, correlation and filtering. Prerequisite: PHYS 2490 or MATH 2132 or permission of department.

**GEOL 4870 Honours Thesis**  
Cr. Hrs. 6  
A thesis based on a geoscience research project conducted by a fourth-year student in Geology or Geophysics. Selection of a project and supervisor to be arranged prior to registration, submitted in writing to and approved by the department head. This course is for Honours students only and is to be taken in the student’s final year before graduation. Not to be held with GEOL 4920. Prerequisite: GEOL 3130 and permission of department head.

**GEOL 4890 Basin Analysis**  
Cr. Hrs. 3  
(Lab required) The study of major sedimentary basins. Qualitative and quantitative aspects of basin origin, classification, evolution, fluid content and diagenesis, and sedimentary facies architecture. Prerequisites: [GEOL 3900 and GEOL 2060] or [GEOL 2530 and (GEOL 3740 or GEOL 3810)].

**GEOL 4910 Advanced Field Mapping**  
Cr. Hrs. 3  
Course developing field mapping techniques including independent mapping and interpretation and synthesis in complex geological terrains. Students are responsible for costs of room and board during the field course. Offered in the summer term. Prerequisites: GEOL 3440 or (the former GEOL 3290), GEOL 3110, GEOL 3900, GEOL 3910, and permission of department.

**GEOL 4920 Technical Report**  
Cr. Hrs. 3  
A technical report based on a geoscience research project conducted by a fourth year Major student in Geology or Geophysics. Selection of a project and supervisor to be arranged prior to registration, submitted in writing to and approved by the department head. This course is for students in the Major program only and is available during the student’s final year of study before graduation. Not to be held with GEOL 4870. Technical reports written for this course are not considered compliant with National Instrument 43-101. Prerequisite: GEOL 3130 and permission of department head.

Chapter Contents

SECTION 1: Extended Education

SECTION 2: Program Areas

2.1 Access and Aboriginal Focus Programs

2.2 Continuing and Professional Studies

2.3 Extended Degree Studies

2.4 Inter-Universities North Program

SECTION 1: Extended Education

Extended Education provides a central focus for adult, summer, and continuing education in the university and undertakes planning and general administration for these programs and services. In so far as possible, the university accepts the principle of parity of accessibility to its services in all areas of the province regardless of economic, geographic, physical, or social disadvantage.

Extended Education coordinates a wide range of programs through which degree and certificate courses are offered. Degree courses are drawn from the offerings of various faculties, colleges, and schools. Students must apply to, be admitted to, and register in a particular faculty, college, or school to receive credit towards a degree.

SECTION 2: Program Areas

2.1 Access/Aboriginal Focus Programs

Area Director: Dr. Diedre A. Desmarais
General Office: 221 Migizii Agamik, 114 Sidney Smith St.
Telephone: 204-474-8000
umanextended.ca/access/

Established in 1975, Access’ mandate is to support those students who have not had the opportunity to pursue post-secondary education due to social, economic and/or cultural barriers. The Aboriginal Focus Programs were established in 1998 with the mandate to create and provide community-based programs responding to the post-secondary and professional development needs of Aboriginal peoples. These two distinct areas were integrated on July 1, 2011 combining the unique program development skills of the Aboriginal Focus Programs with the expertise of delivering strong academic, personal and financial supports to students who have experienced barriers to post-secondary education. The amalgamation of these two areas strengthens our capacity to provide students with unique programs in tandem with the supports needed to enhance capacity for success. In 2014, in order to further enhance student success a new initiative was developed to provide academic supports and programming in math and science. This includes enhanced teaching capacity, supplemental academic supports for specific science courses and non-degree offers in math and science skills. In 2017, Access introduced a Common First Year (CFY) for new students. The CFY program will be taken by first year Access students utilizing a "cohort" type model. The components of the program including courses, learning labs, etc. are mandatory. It is anticipated that students will progress through the first year together thereby fostering “community” and “family” environment which will facilitate transition to university and thereby enhance success. The CFY is designed to nurture the connection between students and staff as well as within the student body. Additionally we provide intensive supports related to academic reading and writing. We take pride in our holistic approach to program development and student support and have progressively sought gifted educators to help us carry forward continued excellence in all our educational endeavors.

Access Programs

Established in 1975, Access’ mandate is to support those students who have not had the opportunity to pursue post-secondary education due to academic, social, economic and/or cultural barriers. The following are programs currently being offered:

University of Manitoba Access Program (UMAP)

In cooperation with the Province of Manitoba, the University of Manitoba Access Program (UMAP) facilitates university studies at the undergraduate degree level for persons who traditionally have not had the opportunity for such experience because of social, economic and cultural reasons, lack of formal education or residence in remote areas. Students in this program are provided with academic and personal supports. For information, call 474-8800 or, within Manitoba, 1-888-216-7011.

Health Careers Access Program (HCAP)

This program is designed to prepare Manitoban Indigenous persons (Status, Non-Status, Metis, Inuit) forentry to the health professional programs such as Medicine, Dentistry, Dental Hygiene, Pharmacy, Medical Rehabilitation (Occupational, Physical and Respiratory Therapy) and Nursing. Through the cooperation of the Province of Manitoba and the University of Manitoba, students in this program are provided with academic and personal supports. For information call 474-8800 or, within Manitoba, 1-888-216-7011.

Professional Health Program (PHP)

This program is designed to support Indigenous persons (Status, Non-Status, Metis, Inuit) in any of the professional health programs. This program provides academic, personal supports, and limited financial assistance may be available. For information call 474-8800 or, within Manitoba, 1-888-216-7011.

Aboriginal Focus Programs

AFP offers certificate and diploma programs as well as degree programs through cooperative arrangements with Aboriginal stakeholders and faculties of the University of Manitoba. Programs are offered in a central location, as in-house training to staff of an organization, or as community-based programs. Programs are offered as ‘open enrolment’ or as block-funded cohort programs through an arrangement with an employer or sponsor. Delivery methodology can be part-time or full-time study, and can incorporate technology-based delivery where technology access permits. Aboriginal organizations that identify a need for specific post-secondary or adult education not currently available may be interested in knowing that AFP has the capacity to develop new programs to meet their needs. The following are programs currently being offered:

Aboriginal Counseling Skills Certificate
(This program is not being offered 2018/2019.)
The Aboriginal Counseling Skills program provides individuals who are employed by First Nation, Metis and Inuit social service agencies with the knowledge and skills required to provide culturally appropriate counseling services to individuals and families. An Aboriginal philosophy of recognizing the strengths and resilience of families within the counseling relationship is emphasized. The certificate is offered as a general intake program in Winnipeg or as a community-based program through agreements with Aboriginal agencies. The Faculty of Social work offers graduates 3 allocated and 6 unallocated hours of credit.

Aboriginal Environmental Stewardship Diploma
(This program is not being offered 2018/2019.)

The Aboriginal Environmental Stewardship (AESD) Program is a partnership program between Aboriginal Focus Programs and the University of Manitoba’s Clayton H. Riddell Faculty of Environment, Earth and Resources and the Faculty of Arts: Department of Native Studies. The 60-credit hour diploma offers a post-secondary education program that provides the core principles of environmental science, stewardship and indigenous environmental justice. The program is designed to offer students an Indigenous community-focused perspective of environmental issues within Manitoba. The objective will be to integrate global and regional environmental issues related to the ecological, and cultural impacts as well as legal implications of resource use and exploration in the 21st century. The curriculum will focus on the incorporation of Indigenous Knowledge within a scientific framework. The AESD program is offered on-campus or as a community-based program through collaboration with external stakeholders.

Program and Graduation Requirements:

- Students must pass 60 credit hours of the program (30 credit hours of required courses, 28.5 credit hours of elective courses, and 1.5 credit hours of work experience).
- Students must achieve an average GPA of 2.5 (C+) in the program and must not have a grade lower than a “C” in every program course.
- Students must complete all course work within six (6) years from the date of the first registration in the program. Application for extension of this time limit must be approved by the Dean of Extended Education.

An academic committee will select the elective courses for each cohort offering of the program.

First Nations Community Wellness Diploma

The First Nations Community Wellness (FNCW) Diploma offers an excellent program of studies for people who wish to expand their knowledge and skills in Aboriginal mental health and community wellness services. The Diploma is offered in partnership with First Nations and Inuit Health and the University of Manitoba’s Extended Education, as well as the Faculties of Social Work, Kinesiology, Health Sciences, College of Nursing and Arts: Native Studies and Psychology. The FNCW Diploma provides students with higher education that respects Indigenous knowledge and Western theory.
through education based on Aboriginal values concerning wellness. The 60-credit hours of the FNCW Diploma are typically delivered as 7-day modules in an off-campus location or via blended/technology-based delivery. Students are eligible for transfer of credit into degree programs in the participating faculties at the University of Manitoba.

Program and Graduation Requirements:

- Students must pass 60 credit hours of the program including 33 credit hours of required courses, and 27 credit hours of elective courses or the equivalent of degree and non-degree credit.
- Students must achieve an average GPA of 2.0 (C) in the program.
- Students must complete all course work within six (6) years from the date of the first registration in the program. Application for extension of this time limit must be approved by the Dean of Extended Education.

Elective courses will be selected by the First Nations Community Wellness Diploma’s Curriculum and Management Committee once a specialization has been determined.

Aboriginal Child and Family Services Diploma Program

(This program is not being offered 2018/2019.)

The Aboriginal Child and Family Services Diploma Program provides an opportunity for students to build their knowledge and skills base in the area of child protection and family enhancement. The program would be of interest to those individuals who are currently employed, or who anticipate future employment in the field of Aboriginal Child Welfare. The diploma consists of 60 credit hours with students completing 9 required courses and 12 credit hours of electives. There is also a comprehensive program orientation to provide students with the foundational skills to assist in their studies. Students are eligible for transfer of credit into degree programs in the participating faculties at the University of Manitoba.

2.2 Continuing and Professional Studies

General Office: 185 Extended Education Complex
Telephone: 204 474 8800

A wide selection of certificates, seminars, and short programs are offered for professional and personal development including university preparation courses, as well as post-graduate and certificate programs in Education, Management and Leadership, Health and Social Services and Languages. For more information call 204-474-8800 or visit umextended.ca

University Preparation

Basic Mathematical Skills

This course provides an overview of basic computational, algebra and geometric concepts, the mastery of which will be essential for success in a pre-calculus course. Students will learn the basic concepts of calculations involving integers and fractions, algebraic computations such as factoring and solving equations, as well as some geometry such as coordinate geometry and right angle trigonometry. Upon successful completion of this course you will receive a letter grade which will demonstrate preparation for entry into MSKL 0100 Math Skills course, a pre-requisite to many first year mathematics courses.

Mathematical Skills

This course is designed for, but not exclusively for students preparing to enter first-year mathematics courses. Students will learn how to apply mathematical skills consistently and with confidence. The courses include a review of fundamental concepts, demonstrations, problem solving, applications and regular testing.

Chemistry Skills

This course provides a review of high school chemistry. Upon fulfillment of the course requirements you will receive a pass/fail, acceptable to the Department of Chemistry as evidence of preparation for entry into selected University of Manitoba chemistry courses.
Physic Skills
This course provides a review of high school physics. Upon fulfillment of the course requirements you will receive a pass/fail to the Department of Physics as evidence or preparation for entry into selected University of Manitoba physics courses.

Education
Program Development for Adult Learners
This certificate program responds to the expressed needs of business and industry for a program tailored specifically for people who develop and/or deliver teaching and training to adults, are instructional designers, program planners, curriculum developers or evaluators in a variety of work environments. One of its kind in Canada, this innovative program ushers in a new era of professional development for you, your employer, and the people you educate.

Teaching English as a Second Language
Teach English to newcomers or teach abroad with confidence and the power of your Teaching English as a Second Language credential behind you. The University of Manitoba’s TESL program is an intensive online training program followed by an in-class practicum. Learn online from wherever and put your knowledge into practice at a practicum near you, in a real ESL classroom setting.

Post-Baccalaureate Certificate in E-Learning
The two-streamed program offers a theory-based, yet hands-on approach to using instructional systems and learning technologies to design and/or deliver educational materials. Designed for new and more experienced educators and professional trainers, the PBC E-Learning explores the latest developments in online educational technology; provides a solid foundation in e-learning planning, implementation and program management, and offers an opportunity for professionals to gain the knowledge to design, implement, and manage online learning in educational and business settings.

Management and Leadership
Certificate Program in Management and Administration
The Certificate in Management and Administration is designed for supervisors, managers and professionals who are seeking to enhance their management and leadership skills and obtain a University of Manitoba credential along with a professional designation. Offered in proud partnership with the Canadian Institute of Management, the program includes courses in business administration, managerial communication, financial management, and strategic analysis. Graduates will earn the right to use the designation CIM, Certified in Management.

Human Resource Management Certificate
The Human Resource Management Certificate provides students with the leadership, teamwork, communication and strategic planning skills necessary for a successful career in human resources. This comprehensive program covers key topics such as employee relations, human resource legislation, and staff training and development while introducing students to the professional competencies required for CHRP designation. This intensive program of studies is ideally suited for professionals looking to start or advance their career in human resources.

Quality Management Certificate
The Quality Management Certificate is designed for professionals wishing to implement or manage quality assurance and control programs within their organizations. It provides learners with the necessary knowledge and skills to implement effective quality assurance principles and plan and manage quality control processes. This intensive program is beneficial for professionals working in a wide range of sectors – government, education, healthcare, manufacturing, and the service industry.

Letter of Accomplishment in Introductory Business Accounting
The Letter of Accomplishment (LOA) in Introductory Business Accounting provides students with introductory skills in financial management and accounting. It is intended for students who have little or no background in the field, but are required or interested in obtaining foundational skills in the areas of finance and accounting. The LOA consists of two courses: Introductory Accounting for Business, which provides an understanding of basic accounting principles; as well as Financial Management, which seeks to introduce students to the broader field of managerial finance.

Letter of Accomplishment in Change Management
The Letter of Accomplishment in Change Management provides new or emerging change management specialists and other professionals the opportunity to participate in professional development and/or fulfill the educational requirement for ACMP certification. The program focuses on key foundation change management practices and skills and consists of two courses (54 contact hours in total). Both courses align with ACMP standards and meet the requirements for certification.

Applied Business Management for International Students
Ideally suited for internationally educated professionals with a business management career choice, the curriculum combines comprehensive management training with targeted language support and valuable on-the-job experience.

Certificate courses range from managerial communication to legal perspectives and financial management. Additional career success workshops, mentorship opportunities and a path to professional designation - with an industry recognized association, make Applied Business Management an ideal pathway towards professional success in Manitoba and beyond.

Applied Human Resource Management for International Students
The field of Human Resources provides exciting career choices. Responsibilities of professionals in this field include attracting, motivating and retaining the most important asset of an organization, its employees. Human Resources is often seen as the link between an organization’s management and its employees and provides the knowledge, tools and employee services that make an organization a positive workplace. Completing a Certificate in Human Resource Management (HRM) prepares you for work in this field and is an excellent starting point for a rewarding career path.

Additional career success workshops, mentorship opportunities, and a path to professional designation - with an industry recognized association, make Applied Human Resource Management (AHRM) an ideal pathway towards professional success in Manitoba and beyond.

Certificate in Manitoba Municipal Administration
The Certificate in Manitoba Municipal Administration provides students with the knowledge and skills required to assume administrative responsibilities within small to mid-sized municipalities. This comprehensive program, which can be completed in one year, covers key
topics for current and future municipal administrators, including municipal accounting, municipal law and municipal administration.

**Post-Baccalaureate Certificate in Aerospace Program Management**

The Post-Baccalaureate in Aerospace Program Management offers the tools and knowledge needed to be a leader in the sophisticated and dynamic aerospace industry. The Post-Baccalaureate Certificate is an advanced credential in aerospace program management designed for current and future project, production, and operational managers, design engineers, and procurement and logistics specialists wishing to enter the field or advance their career in the aerospace industry. Learners will develop an in-depth understanding of the complete life cycle of an aerospace system; from initial identification of system requirements, to the design, manufacturing and marketing of the system, to its ongoing employment and maintenance.

**Post-Baccalaureate Certificate in Applied Leadership**

**Admission suspended**

Engagement, collaboration and teamwork are important attributes for successful leaders in the 21st century. Developing these skills through deepened self-awareness and a comprehensive understanding of how to enact and inspire organizational change is the goal of the Post-Baccalaureate Certificate in Applied Leadership. Designed for current and emerging leaders, this is an innovative program that helps professionals grow and expand their leadership potential so that they may become more effective organizational leaders.

**Health and Social Services**

**Certificate in Applied Counselling**

The Applied Counselling Certificate provides an introduction to the counselling process and helps learners develop effective counselling strategies. It is ideally suited for anyone working in a counselling context through paid or volunteer work. Participants’ varied workplaces include: health care, education, social services, and government.

**Case Management Symposium**

The annual Case Management Symposium focuses on providing case managers with the knowledge and tools to help clients return to work. An exciting line up of experts in the field will explore different topics each year, and guide participants through a series of sessions. This event also allows professionals in the field to connect with various community resources. The Case Management Symposium is beneficial for case managers, community health and social service providers, human resource professionals, and insurance providers.

**Languages**

**Intensive English Program**

The Intensive English Program (IEP) offers seven levels of English instruction from beginner to advanced, through sessions ranging in length from four weeks to one year, and consisting of 24 hours of classroom instruction per week throughout the year. English classes in reading, writing, speaking and listening as well as socio-cultural activities constitute the basis of this program. Students are housed in residence on campus or with a homestay family. Customized programming may be available for groups.

**2.3 Extended Degree Studies**

Interim Director: TBA
General Office: 185 Extended Education Complex
Telephone: 204-474-8800

General Studies provides opportunities for students to take credit courses at the University of Manitoba without being enrolled in a degree program. General Studies students include professionals developing their careers, students satisfying entrance requirements to professional and other faculties, seniors enriching their lives, students visiting from other institutions, and individuals exploring a career change. Courses are available in the Fall and Winter terms, Summer Session, through Distance and Online Education, and Off-Campus Study.

General Studies Student Advisors are available to assist with course and program planning and to provide admission and registration information throughout the year.

**Admission**

Prospective students are required to submit an online application to Extended Education (General Studies) in one of the following categories: Auditing Student, Mature Student (Canadian Military only), Special Student, or Visiting Student. Detailed information on entrance requirements and descriptions of the student categories may be found at umanitoba.ca/admissions or by contacting the General Studies office. For information about registration, course descriptions, rules, regulations, and procedures of General Studies and the University of Manitoba visit umextended.ca/guides/

**Registration**

General Studies students registering for on-campus, distance and online courses may register starting in late July. For more information about initial access times and how to determine your specific time, refer to aurora.umanitoba.ca in early July (select: Enrolment & Academic Records, Registration, Registration Time & Status).

Please refer to umanitoba.ca/registrar for more information and helpful links regarding registration procedures, fee information, and examinations. Note that applicable prerequisites as outlined in Aurora Student (Course Catalog) must be fulfilled prior to registering in a course.

You may register for up to a maximum of 30 credit hours in the combined Fall and Winter terms, and up to a maximum of 15 credit hours in any one term, including Summer Session.

**Returning Special Students**

If you need help with course selection or have any concerns about your status, please contact a General Studies Student Advisor.

**Visiting Students**

Visiting students who have been admitted and registered previously in at least one course are eligible to register in a subsequent session without reapplying for admission provided your home university has not changed since you last registered in General Studies, you have a Letter of Permission from your home university approving the selected courses, and you provide the Letter of Permission to General Studies prior to registering.

The Letter of Permission from your home institution overrides all prerequisites as stated in the course descriptions in the Undergraduate Calendar, except where a course requires Department Head or Instructor approval. This approval needs to be submitted to a General Studies Student Advisor prior to registration. We recommend that you start this process with your home institution early and have a selection of alternate courses approved in case the initial course(s) is/are full.

**Transfer Students**

A General Studies Student Advisor will enter overrides for external courses that have been evaluated by the University of Manitoba and satisfy
prerequisite requirements, provided a final grade of ‘C’ or better has been obtained. To access the Transfer Credit Equivalencies database, visit aurora.umanitoba.ca, and click on Transfer Credit Equivalencies. Note that external credits are not officially evaluated for transfer credit until an application to a degree granting faculty/school is received by the Admissions Office. For more information regarding evaluation of external courses, contact a General Studies Student Advisor.

Auditing Students

Auditing students must obtain written permission from the course instructor to audit a course. The written permission form and your written consent must be submitted to a General Studies Student Advisor who will manually register you for the course(s). New auditing students must apply for admission. Please contact General Studies for more information.

Courses Available to General Studies Students

All courses in the following faculties and schools are available to General Studies students. Prerequisites may be required for some courses as specified in the course descriptions.

Clayton H. Riddell Faculty of Environment, Earth, and Resources
Faculty of Agricultural and Food Sciences
Faculty of Arts
Faculty of Science
I.H. Asper School of Business
School of Art (visiting students may not register in any course offered by the School of Art)

All courses offered in the following faculties require teaching faculty written approval before registering, with the exception of courses open to all students as listed under University 1:

Faculty of Architecture
Faculty of Education ($0000 level courses only)
Faculty of Engineering
Faculty of Health Sciences
Faculty of Kinesiology and Recreation Management
College of Nursing
Faculty of Social Work (students with less than 30 credit hours)
Marcel A. Desautels Faculty of Music

Academic Regulations and Policies Applicable to all General Studies Students

Academic Performance: Academic Assessment gauges student success at the University. Formal academic assessment shall be done following each academic term for all General Studies students who have completed 30 credit hours or more of attempts. In order to be in "good standing" in General Studies, a student must achieve a degree Grade Point Average (GPA) of 2.00 or greater at each assessment period. Students in "good standing" may continue in General Studies or, preferably, transfer to a target faculty.

Students who do not achieve a degree GPA of 2.00 will be placed "on probation", which will appear on the student's transcript. Once "on probation", a student will be allowed to register for another term (or terms). At each point of assessment, a student "on probation" must achieve a term GPA of 2.00 in order to proceed. In order to clear probation, a student must achieve a degree GPA of 2.00. While "on probation", students are encouraged to consult a General Studies Student Advisor prior to registration and on a regular basis thereafter.

If a student does not succeed in achieving a term GPA of 2.00 by the end of the probation period, they will be placed on "academic suspension" for one calendar year. A student on "academic suspension" is normally not allowed to register in another faculty or school at the University of Manitoba or to attend any other post-secondary institution during the time of suspension. Following the suspension period, a student may reapply for admission to General Studies.

Credit Hour Policy: In an effort to assist students with academic decisions, all students who have completed 30 credit hours of study with General Studies will be required to meet with a General Studies Student Advisor before being allowed further registration. Until such time as the student meets with an advisor, a block will be placed on their record that prevents further registration.

Diploma in Labour Relations and Workplace Studies

The Diploma in Labour Relations and Workplace Studies was originally approved by Senate in 2002. Extended Education, along with Labour and Workplace Studies, developed this comprehensive university-based program that is intended to provide necessary knowledge and skills to conduct improved labour and industrial relations. The intended audience of the program is labour representatives and industrial relations practitioners; and the program has been designed in a manner that is accessible for working people qualified to enter General Studies, and able to access evening, off campus courses, and courses offered through Summer Session.

The Diploma in Labour Relations and Workplace Studies provides a broad educational experience in labour relations and workplace studies, including courses in economics and politics of work, unions and labour relations, employment legislation, labour law, and pensions and benefits.

The diploma is composed of 30 credit hours in Labour Studies.

<td>2000 level courses</td>
</tr>
<tr>
<td>LABR designated</td>
<td>3000 level courses</td>
</tr>
</tbody>
</table>

LABR 1260 and LABR 1290 are prerequisites to all other courses in the program and must be completed as the first two courses with a minimum grade of "C". Upon successful completion of these two prerequisites, students may complete the electives in the order they choose, subject to availability.

Students are required to complete all 30 credit hours and achieve a 2.5 GPA with a minimum grade of "C" in each course.

Application Process: Complete the Application for Diploma in Labour Studies, available from umextended.ca/labour-studies/

Dual Credit: Students currently admitted into another Faculty at the University of Manitoba may also apply for the Diploma in Labour Studies.

Graduation: Upon completion of the designated 30 credit hours of study, students must indicate their intent to graduate in Aurora Student or contact the General Studies student advisor.

Degree Credit: All courses from the Diploma in Labour Studies are transferable to a degree program in the Faculty of Arts and possibly other faculties. Students who have received external transfer credit towards the
Diploma program should note that some faculties and schools may have limitations on external transfer credit taken beyond a specific period. This information may be found in each faculty chapter of the University of Manitoba Undergraduate Calendar.

MILITARY SUPPORT OFFICE

The Military Support Office is designed to assist Canadian Armed Forces personnel and their immediate family members in the pursuit of a university education.

Through this unique office, the University of Manitoba acknowledges and accommodates the difficulties which extensive mobility can create for military members wishing to complete university degree programs. Recognition is given for a wide range of military training, and provision may be made for academic and financial relief when military duties interrupt studies. Academic counselling is available.

Courses are available through Distance and Online Education or on campus, either part-time or full-time. A Mature Student entry program is also available.

4.4 Fourth Year

SECTION 5: Course Descriptions
The following is a summary of the admission requirements. Equivalent academic courses completed at recognized universities elsewhere will be considered. All admission requirements, as well as application deadline dates and forms, are included in an application bulletin that is available from the university’s website (dentistry).

Minimum 60 credit hours of pre-Dentistry study including:

- BIOL 1020 and BIOL 1030
- CHEM 1300 and CHEM 1310
- CHEM 2210 and CHEM 2220
- CHEM 2360 and CHEM 2370 or MBIO 2360 and MBIO 2370
- PHYS 1020 and PHYS 1030 or PHYS 1050 and PHYS 1070
- 6 credit hours of English (taught through the English Department, usually with ENGL prefix)
- 24 credit hours of electives, 6 of which must be in the non-applied sciences or non-pure sciences.

All science courses must include the laboratory component.

Other requirements

High school prerequisites: Chemistry 40S, Pre-Calculus Mathematics 40S or Applied Mathematics 40S, Physics 40S and Biology 40S.

The 6 credit hours of English satisfies the written English requirement; the mathematics requirement must be met in the first 60 credit hours even though it is not a specific admissions requirement (PHYS 1020(M) meets the mathematics "M" requirement).
The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Dr. Gerald Niznick College of Dentistry has regulations and requirements, published below that apply specifically to its students.

The Dr. Gerald Niznick College of Dentistry expects all students to participate fully in their educational experience. This means participation above and beyond the requirements of individual courses. For example, as a part of their clinical experiences, all students must learn skills of a clinical nature, such as local anesthesia, rubber dam placement, etc. Our teaching approach includes having students practice these skills on each other. All students are expected to participate in these activities.

Further, the college has an expectation of all students that they are aware of and maintain attitudes and behaviours which exhibit a level of professionalism, empathy, and consideration of all members of their community, including faculty, staff, students or patients, similar to what is expected of an oral health practitioner.

The following policies have been adopted by the College to aid students in understanding the value the College places on these conducts/behaviours.

3.1 Essential Skills and Abilities for Admission, Promotion and Graduation in the DMD Program

As an accredited Canadian dental program, the Dr. Gerald Niznick College of Dentistry, Rady Faculty of Health Sciences at the University of Manitoba is responsible for providing a program of study that ensures graduates have the necessary qualifications (academic knowledge, clinical skills, and professional behaviors and attitudes) to enter the regulated profession of Dentistry in Canada. Becoming and being a dentist requires a wide range of highly specialized skills and abilities. Some of these are taught in dental school, while others must be brought by the individual as innate set of essential skills and abilities. The criteria for becoming registered/licensed as a dentist in Canada requires a level of motor skills and other attributes that are not necessary in other professional occupations. Similarly, the ability to provide reasonable accommodation for special learning needs in dentistry may not be the same as it is for other academic programs.

It is important to note that an offer of admission to the Dr. Gerald Niznick College of Dentistry is not evidence that the dental program has verified that an applicant has the prerequisite skills and abilities for success in the program or in obtaining future professional licensure. However, these skills and abilities are essential if students are to be successful in achieving the competency standards of the profession.

For progression in, and graduation, from the dental program, all students must conduct themselves in a professional manner, and must have the Essential Skills and Abilities (Technical Standards) discussed under the following five broad areas: Observation/perception; Communication; Motor/tactile function; Cognition; Emotional functioning

All applicants to the undergraduate program of the Dr. Gerald Niznick College of Dentistry are expected to review The Essential Skills and Abilities for Admission, Promotion and Graduation in the DMD Program document to assess their ability to meet these standards; all applicants offered admission will be required to acknowledge such review and assessment. Any candidate for the DMD degree who cannot demonstrate the required skills and abilities throughout their course of study may be requested to withdraw from the program.

Detailed information for the above policy can be found at: http://umanitoba.ca/faculties/health_sciences/dentistry/students/1097.html

3.2 Policy on Student Attendance

The Dr. Gerald Niznick College of Dentistry has a social mandate to ensure that graduating dentists are caring, skilled healthcare providers who are worthy of the public trust endowed upon them. In fulfilling this mandate, the Dr. Gerald Niznick College of Dentistry has developed comprehensive programs of education and experience to ensure that graduates meet these high expectations. Unlike non-professional education programs, where students can pick and choose their education and experiences based on personal preferences, Dental School requires students to attend and participate actively in all components of the program.

While students are required to complete assignments and pass examinations, these are not considered to be equivalent to attending Dental School. When the University confers the DMD degree, it attests to society not only that the student has shown successful examination performance, but that the student has participated in the entire educational experience defined by the Dr. Gerald Niznick College of Dentistry and has thereby demonstrated an appropriate level of professional learning and responsibility.

Students at the University of Manitoba, Dr. Gerald Niznick College of Dentistry, are required to attend all scheduled classes, examinations, small group sessions, laboratories, pre-clinical labs, and clinics unless expressly indicated otherwise by the course coordinator in the course outline/syllabus.

Students are required to be on time for all scheduled classes, examinations, small group sessions, laboratories, and pre-clinical labs. Students arriving more than 10-minutes late will be recorded as absent.

Students who do not comply with the Student Attendance Policy will face academic consequences.

Detailed information for the above policy can be found at: http://umanitoba.ca/faculties/health_sciences/dentistry/students/1097.html

3.3 Dr. Gerald Niznick College of Dentistry/School of Dental Hygiene Professional Unsuitability By-Law

Students must at all times demonstrate suitability for the dental profession. In this regard students are obligated to act with integrity and diligence in carrying out their professional responsibilities, and their behaviour and conduct in relation to others must be characterized by consideration, respect and good faith.

The Dr. Gerald Niznick College of Dentistry may require a student to withdraw from the College when the student has been found unsuited for the practices of dentistry or dental hygiene because the student has been found to have engaged in unprofessional behaviour. A student may be required to withdraw at any time throughout the academic year.

Grounds which may require withdrawal are: demonstrated behaviour which is exploitive, irresponsible, intentionally injurious or destructive to patients; and/or compromised professional judgment through self-interest and/or conflict of interest; and/or an acquired criminal conviction, either in Canada or any other jurisdiction, which is of such a nature as to place in question his/her fitness for the dental professions; and/or participation in any activity related to patient care or any activity related to the practice of the dental professions while under the influence of alcohol or drugs or while abusing prescription drugs; and/or engaging in behaviour or conduct that if engaged in by a practising dentist/dental hygienist would likely result in disciplinary action, including suspension or revocation of the license to practise, by the Manitoba Dental Association or the College of Dental Hygienists of Manitoba.

Detailed information for the above policy can be found at: http://umanitoba.ca/faculties/health_sciences/dentistry/students/1097.html

3.4 Criminal Record/Adult Abuse Registry/Child Abuse Registry

An adult criminal record, an adult abuse registry and a child abuse registry self-declaration will be required of all applicants at the time of application. A formal Adult Criminal Record Check (including vulnerable sector
Failure to provide these documents may impact on registration and a student’s ability to progress in the Dental program.

3.5 Immunization and Blood Borne Diseases Policy

The Dr. Gerald Niznick College of Dentistry and School of Dental Hygiene maintain comprehensive immunization requirements to protect the wellbeing of our students and the health of patients and communities with whom they will have contact during their curriculum.

All students enrolled in the Dr. Gerald Niznick College of Dentistry must have immunity demonstrated against the following diseases: tetanus, diphtheria, pertussis, polio, measles, mumps, rubella, varicella (chickenpox), and hepatitis B. Students need to undergo testing for tuberculosis (TB) infection, unless the student already has a past history of TB infection or TB disease documented. Students must receive yearly influenza vaccinations. Students who cannot receive certain immunizations due to allergies or pregnancy must provide a physician’s certificate stating this.

Before the first day of classes, all students must complete and return the University of Manitoba Immune Status Consent Form, as provided by the Dr. Gerald Niznick College of Dentistry Dean’s Office. Please note that any supplemental immunization documentation provided to support this document and/or any future submissions of immunization materials must be signed by a physician or nurse. All students are responsible for updating their immunizations as needed.

Students will not be permitted to attend clinics until all immunization requirements are satisfied.

For the collection and management of student immunization records, the Dr. Gerald Niznick College of Dentistry/School of Dental Hygiene partner with the Rady Faculty of Health Science Immunization Program. The Director of Immunizations and the Program Assistant collect and organize immunization data as well as provide immunization services to students at the Bannatyne campus.

All students are expected to comply with the requirements of the Rady Faculty of Health Science Immunization Program which may change from time to time due to the immunization requirements of external health care facilities where students will be expected to attend as a part of their dental/dental hygiene program.

The Dr. Gerald Niznick College of Dentistry is compliant with the Association of Canadian Faculty of Dentistry (ACFD) Guidelines for Infectious Disease and Healthcare Workers document and its recommendations regarding barring students from clinical activities who do not meet these guidelines. Further information on the ACFD guidelines can be found at the following web-site:

Any student applicant with an infectious disease should either delay their application to the program or disclose this information upon being accepted into the Dr. Gerald Niznick College of Dentistry. Should a student who has been accepted into the program but has been found to be unable to meet the immunization requirements/guidelines, every effort will be made to accommodate the student until the guidelines are met. In some cases, it may be necessary to suspend or terminate the student from the program if it is shown that the immunization requirements/guidelines are unable to be met.

3.6 CPR Certification

Accepted candidates will be required to show proof of CPR (Health Care Provider level) certification by September 15 of each year. This certification must be maintained on a yearly basis up to the date of graduation. CPR Certification levels accepted by the Dr. Gerald Niznick College of Dentistry are:

- Canadian Red Cross: ACLS (Advanced Cardiovascular Life Support for Health Care Providers)
- Heart & Stroke Association: BLS for HCP + AED
- St. John Ambulance: Health Care Provider Level C and AED

3.7 PHIA

Students are required to maintain confidentiality of patient records and abide by PHIA (Personal Health Information Act) legislation which governs and controls the sharing of personal health information. Students will be required to attend a PHIA orientation and sign a pledge of confidentiality in their first year of the program. This orientation includes content that satisfies PHIA requirements for student participation at external clinical sites under the direction of the Winnipeg Regional Health Authority (WRHA).

3.8 Sharing of Student Personal Information

Once admitted to the Dr. Gerald Niznick College of Dentistry, University of Manitoba, students’ personal information is protected by FIPPA (Freedom of Information and Protection of Privacy Act) legislation. However, prior to first registration, some personal information (name, e-mail, photo) is shared with external partners to facilitate student involvement. Please see further information below:

Mentorship Program

In a partnership between the Dr. Gerald Niznick College of Dentistry and the Manitoba Dental Association (MDA), first year Dental students are assigned a Mentor who is a member of the MDA and a practicing Dentist within the community. Each year, the MDA holds a “Welcome to the Profession” dinner where incoming students are invited to meet their Mentors. Students will then attend two to four Mentorship meetings each year throughout the four year program. The Dr. Gerald Niznick College of Dentistry provides the names, e-mail (U of M) and photographs of all first year Dental students to MDA personnel for the purpose of facilitating student participation in the Mentorship program.

Vital Source Textbook Database

Dentistry student’s text books are accessible through an electronic textbook database called Vital Source. In order to provide all Dentistry students with access to their text books, the Dr. Gerald Niznick College of Dentistry will provided Vital Source with the names and e-mail (U of M) of all students for the purpose of authenticating users and providing access to their on-line content.

Manitoba Dental Students Association/Manitoba Dental Hygiene Students Association

Students in the Dr. Gerald Niznick College of Dentistry/School of Dental Hygiene become members of and are represented by the Manitoba Dental Students Association/Manitoba Dental Hygiene Students Association. These Associations provide student representation on College/School and University Committees as well as represent students on various external organizations (CDA/MDA/MDHA, etc.). The Dr. Gerald Niznick College of Dentistry/School of Dental Hygiene provides the names, e-mail (U of M) and photographs of all first year Dental and Dental Hygiene students with the respective student Associations for the purpose of facilitating student participation.

Student information will not be used or disclosed for other purposes, unless permitted by The Freedom of Information and Protection of Privacy Act (FIPPA). If you have any questions about the collection or use of your personal information, contact the Access & Privacy Office (tel. 204-474-
3.9 Instruments Computers and Textbook

Students entering the Dr. Gerald Niznick College of Dentistry will be expected to own or purchase a PC laptop computer (the College only supports PC's given the software used in our clinical facilities) that is compliant with University computer standards (see Bookstore - Computers on Campus for annual listing) and Vital Source Technology software requirements (see www.vitalsource.com for details). The expenditure of a computer may range approximately from $1000 to $4000 within the first year of the program. The Vital Source Technologies cost over the four year program is approximately $4000 USD (note the Canadian equivalent will vary depending on the exchange rate). This cost will be amortized over the number of program years and will be included as part of the Clinical Instrument Fees.

Students are responsible for Clinical Instrument Fees which represent the cost and administration of dental instruments and sundry items used in the clinical component of dental education. The cost of instruments is broken down into 2 categories: student owned instruments and college owned instruments.

Student owned instruments are specific instruments that are the student’s property and are retained by the student after graduation. College owned instruments are specific instruments that are the college’s property and remain within the college (students are responsible for returning in good condition). Instruments are structured in this manner to meet sterilization standards and to ensure an efficient and effective clinical operation.

Administration costs of the Clinical Instrument Fee include such things as the costs needed to collate, distribute and maintain instruments (sterilization, maintenance, etc.) as well as the costs associated with maintaining the dental labs and equipment.

Over the four years of dentistry, the cost of such instruments/fees has been approximately $53,000; the bulk of the expenditure is incurred in the first two years. The college is unable to provide refunds for clinical instrument fees and will not accept returns of any student computer software (including Vital Source Technologies), clinical instruments or other items, should a student leave the college for whatever reason and upon graduation.

3.10 Voluntary Withdrawal

Students intending to withdraw from a portion or all of their courses must report immediately in person or in writing to the Dean’s Office. No fees will be refunded without the authorization of the dean. Please Note: Computer Software, Clinical Instrument fees and/or Clinical Instrument items are non-refundable. See also the chapter on General Academic Regulations and Requirements.

Students who withdraw from the Dr. Gerald Niznick College of Dentistry without notice will be considered to have terminated their connection with the college. If a subsequent application for registration is approved, they will be required to conform to the rules and regulations, fee schedules, sequence of courses, etc., in effect at the time of such subsequent application.

In cases where a student is obliged to withdraw after the final date of withdrawal published in the Calendar because of ill health or other sufficient reasons, their cases will be considered by the dean of the college.

3.11 Required Withdrawal

The Senate of the university has approved bylaws granting certain faculties, colleges and schools the authority to require a student to withdraw on the basis of unsuitability for the practice of the profession to which the program of study normally leads. Senate has approved such a bylaw for the Dr. Gerald Niznick College of Dentistry (see item 3.3 above).

Full policy information can be found at: http://umanitoba.ca/faculties/health_sciences/dentistry/students/1097.html

3.12 Decisions Concerning Academic Promotions

The letter grade “D” is the lowest acceptable level of performance in each undergraduate course leading to the degree of D.M.D. when the work of any given year is being taken for the first time. (In the case of a repeated year, the minimum passing grade in each course is “C”.)

A student who has a failing grade registered against him/her may not register for the program of the subsequent year, but may, at the discretion of Dental College Council, be permitted to repeat the failed year.

A minimum term GPA of 2.0 in each year is required to qualify a student for standing in that year.

A student who fails to obtain a minimum term GPA of 2.0 and who is not granted supplemental privileges will be considered to have failed the year.

Except by special permission of Dental College Council, no student may repeat more than one year in Dentistry, nor may any year be repeated more than once.

The work requirements of any repeated year may be modified, even increased, at the discretion of the Dental College Council.

The passing grade in each course of a repeated year in Dentistry is “C”.

If a student receives an “F” grade in a fourth year clinical course, they will be required to register and pay a fee for the entire repeated year, and the work in that year may be modified or increased by Dental College Council.

3.13 Incomplete Standing in the Dr. Gerald Niznick College of Dentistry

The incomplete “I (F)” designation is restricted to clinical courses.

Successful completion of clinical course requirements is through extended clinics rather than supplemental assessment.

A student who is unable to complete the quantitative clinical requirements in a course by the end of the academic year may apply for an incomplete grade classification (“I (F)”) and extension of time. Details of this application procedure can be obtained from the College.

3.14 Supplemental Examinations

A “Supplemental Examination” is an examination which may be offered as a privilege to a student who has failed a course or failed to achieve a satisfactory result. Such examinations are offered in order to grant the student an opportunity to rectify the inadequacy without repeating the course.

Information on Supplemental Examinations can be found in the chapter, General Academic Regulations at the beginning of this Calendar.

The following information regarding the policy of supplemental examination privilege is specific to the Dr. Gerald Niznick College of Dentistry:

Supplemental examinations are permitted for all courses except those in which remediation is not realistically feasible (pre-clinical) and/or clinical courses are NOT eligible for supplemental examination.

The student will be notified in a letter from the Dean’s Office if he/she is granted this examination privilege by Dental College Council. A student who is granted supplemental privileges is obliged to sit the examination at the soonest opportunity prior to the start of the next academic session.
The student must contact his/her Course Coordinator within 14 days of the date the notification letter from the Dean’s Office to schedule a date to write their supplemental examination.

A student in first, third or fourth year who has failed in not more than two courses, at the regular final examinations of any year, or who fails to obtain a sessional (combined fall & winter GPA) grade point average of 2.0 for all courses taken by him or her, may, at the discretion of Dental College Council, be awarded the privilege of one or two supplemental examinations.

A student in second year who has failed in not more than three courses, or who failed to obtain a sessional (combined fall & winter GPA) grade point average of 2.0 for all courses taken by him or her, may, at the discretion of Dental College Council, be awarded the privilege of one, two or three supplemental examinations.

If a student has any failures he/she must have a minimum sessional (combined fall & winter GPA) grade point average of 2.0, including the failure(s), in order to qualify for supplemental privileges.

If a student has no failures but fails to obtain a minimum sessional (combined fall & winter GPA) grade point average of 2.0, that student may be eligible for supplemental privileges.

When students are allowed to write supplemental examinations for the purpose of raising their sessional (combined fall & winter GPA) grade point average to the minimum standard of 2.0, Dental College Council will specify the courses in which the student may write supplemental examinations. For the purpose of calculating such a student’s cumulative grade point average, grade points attained in supplemental examinations will replace the grade points previously attained in the same course. Students are normally required to carry a full-time program in order to be eligible for supplemental privileges.

The passing grade in supplemental examinations is “C” in each course. A student failing a supplemental examination will be considered to have failed the year. A student may only write a supplemental once in any course; otherwise the course must be repeated.

3.15 Honours and Awards

Dean’s Honour List: awarded to students in each year of the dental program who have achieved a minimum sessional (fall & winter term combined) G.P.A. of 3.8.

To qualify for Graduation with Honours, a candidate for the D.M.D. degree must qualify for the Dean’s Honour List in both third and fourth year.

A student who repeats a year at his/her own request, i.e., not at the request of Dental College Council, is not eligible for the Dean’s Honour List or to receive any awards for the work in that repeated year.

The following policy applies to the eligibility of part-time students for academic awards: in allocating any award, the only academic performance of a student to be considered is that attained during the year(s) for which the award is made. Therefore, a part-time student is not eligible for any purely academic award, other than one in an individual course. However, a part-time student who is carrying 80 per cent or more of the normal course load for the year is eligible for any award where conditions other than academic merit apply, and further, subject to the provisions set forth above, any part-time student is eligible for any award in the individual courses taken in the year for which the award is made.

3.16 E-Mail Accounts

All students are expected to have an e-mail account with the University of Manitoba and check it regularly. The Dr. Gerald Niznick College of Dentistry does not support communications with its students through external e-mail addresses.

3.17 Financial Aid

A number of loan and bursary funds are available to dental students. Applications and further information are available through the University of Manitoba’s Financial Aid and Awards Office.

3.18 Registration Exceptions

Upon receipt of initial (and annually thereafter) Criminal Record (including Vulnerable Sector Screening), Adult Abuse Registry Check and Child Abuse Registry Check, the Dr. Gerald Niznick College of Dentistry completes registration for all students in their courses.

Students who have a failing grade/s registered against them and/or have other outstanding academic matters (i.e. deferred or supplemental examinations, modified program, etc.) in regards to the previous academic session will not be registered in the next ensuing academic session until all outstanding matters have been cleared. Students who fall into this category should contact the student advisor for further information.

A student advisor is available in D113 Dental Building or by calling (204) 789-3484.

#### SECTION 5.1 General Dentistry Course Descriptions

**DENT 1202 Early Clinical Experience**  
Cr. Hrs. 3

A series of lectures and clinical participation sessions designed to introduce the student to clinical dentistry and the relevance of basic science courses in the dental curriculum. May not be held with DENT 1010. Course evaluated on a pass/fail basis.

**DENT 1210 Dental Practice Management 1**  
Cr. Hrs. 1

This course is an introduction to the Dental Practice Management curriculum which is distributed throughout the four year program. It comprises the modules on the Essentials of Effective Leadership and Strategic Leadership; Managing the Workplace and Conflict Resolution; Essentials of Interpersonal Communication Skills; and Team Building.

**DENT 2202 Introduction to Comprehensive Care**  
Cr. Hrs. 4

This course is an introduction to an integrated, patient-centered program with patient needs as the primary focus. The course introduces students to clinical protocol and patient record documentation and communication. Students receive experience in comprehensive treatment planning as well as basic treatments in periodontics, operative dentistry, and pain control. Course evaluated on a pass/fail basis. May not be held with DENT 2430.

**DENT 3210 Dental Practice Management 3**  
Cr. Hrs. 1

This course is the third in a series of Dental Practice Management courses distributed throughout the four-year program. It comprises the modules on managerial decision-making and negotiations; operations management; self-assessment in practice; and effective management of patient and employees.

**DENT 4202 Interdisciplinary Patient Centered Care Case Studies**  
Cr. Hrs. 2

(Formerly DENT 4020) Lectures and development of portfolio case designed to enable the student to obtain, organize and critically evaluate information in order to facilitate treatment planning. May not be held with DENT 4020.

**DENT 4210 Dental Practice Management 4**  
Cr. Hrs. 2

(Formerly RSTD 4170) The management, evaluation, economics, organization, design, location, selection and marketing of a dental practice are covered by lectures and seminars. In addition, ethical considerations of dental practice, the options available to new dental graduates and the role of professional associations are discussed. May not be held with RSTD 4170.

**DENT 4222 General Practice Dentistry**  
Cr. Hrs. 10
This course is designed to consolidate the theoretical and clinical building blocks of all previous dental courses into the development of a comprehensive dental care methodology. Clinical instruction and experience will facilitate the senior dental students in developing effective patient management tools and advance their technical skills to the level of a novice general dentist. May not be held with the former DENT 4030.

DENT 4232 General Practice Seminars  Cr. Hrs. 2
Topics relating to General Practice Dentistry are reviewed and reinforced in preparation for clinical practice and National Board Examinations. This course supports the General Practice Dentistry (DENT 4222) program with procedure reviews as needed. May not be held with DENT 4030.

DENT 4240 Dental Jurisprudence  Cr. Hrs. 1
(Formerly RSTD 4160) This course provides an overview of the Canadian legal system. It defines and discusses legal concepts relevant to dentistry including issues in negligence, contracts, confidentiality, business and human rights. Identifying a dentist’s legal responsibilities to patients, peers, employees, profession and society will underlie the entire course. May not be held with RSTD 4160.

SECTION 5.2 Dental Diagnostic and Surgical Sciences Course Descriptions

DDSS 1100 Periodontology 1  Cr. Hrs.1
A pre-clinical laboratory and didactic course designed to (1) introduce students to periodontal examination procedures and to basic non-surgical periodontal therapy, (2) develop skills related to periodontal instrumentation and treatment, and (3) present fundamental concepts of periodontal anatomy, physiology and microbiology in health and disease. May not be held with DDSS 1020.

DDSS 1110 Radiology 1  Cr. Hrs. 1
A series of lectures which introduces the student to: the elementary principles of dental radiology; radiation physics, radiation biology, imaging techniques, x-ray equipment and radiation protection. May not be held with DDSS 1140.

DDSS 2100 Periodontology2  Cr. Hrs. 2
A basic didactic course with emphasis on (1) diagnosis, classification, treatment and prevention of different forms of plaque-induced periodontal diseases, (2) oral-systemic disease associations; (3) non-plaque induced gingival alterations, (4) periodontal treatment of medically compromised patients. May not be held with DDSS 2120.

DDSS 2110 Radiology 2  Cr. Hrs. 1
A series of lectures in the theoretical and practical principles of radiographic interpretation of common oral pathologic conditions as well as selected examples of pathologic conditions exhibiting important radiographic principles. May not be held with DDSS 2180.

DDSS 2122 Oral Pathology  Cr. Hrs. 5
A series of lectures emphasizing recognition, description, etiopathogenesis, clinical and/ or radiographic features, biologic behaviour, treatment and/or management of oral and paraoral conditions. May not be held with DDSS 2010.

DDSS 2130 Pain and Anxiety Control 1  Cr. Hrs. 1
A series of lectures to introduce the student to: local anaesthetics, local anaesthesia techniques, avoidance and management of complications and selection of appropriate drugs and techniques. May not be held with DDSS 2020.

DDSS 3102 Periodontology 3  Cr. Hrs. 3
This combined lecture and clinical course is designed to provide experience which will allow students to apply previous didactic learning to the clinical environment in the field of Periodontology. The classroom sessions provide description and discussion of periodontal treatment modalities and techniques, including non-surgical, surgical intervention, and implant treatment. Inter-relationships with other clinical disciplines also receive considerable attention. May not be held with the former DDSS 3220.

DDSS 3112 Oral Diagnosis and Radiology 1  Cr. Hrs. 2
This course includes a lecture component covering history-taking, clinical examination, diagnosis and treatment of soft and hard tissue lesions, emergency treatment, dental treatment of patients with systemic disease, and clinical experience. May not be held with DDSS 3200.

DDSS 3120 Pain and Anxiety Control 2  Cr. Hrs. 1
This course consists of lectures/seminars and clinical experience in: physiology of pain psychology of anxiety, management of medical emergencies, parenteral injections, and therapeutics of the various modalities of pain and anxiety control. May not be held with DDSS 3230.

DDSS 3132 ORAL AND MAXILL SURGERY 1  Cr. Hrs. 2
This course consists of lectures, seminars and clinics, covering all aspects of oral and maxillofacial surgery with an emphasis on those procedures performed by the general practitioner. May not be held with DDSS 3210.

DDSS 3142 Medicine  Cr. Hrs. 2
Lectures or seminars describing the basic mechanisms, symptoms, diagnosis and management of various disease processes included in internal medicine and their dental correlations. May not be held with DDSS 3030.

DDSS 3152 Temporomandibular Disorders and Orofacial Pain  Cr. Hrs. 2
The course reviews the foundational clinical sciences in pain biology, and function of the masticatory muscles and TMJ. It discusses the contemporary classification, diagnosis and management of Temporomandibular disorders and related orofacial pain disorders. May not be held with DDSS 3190.

DDSS 3162 Pharmacology and Therapeutics  Cr. Hrs. 3
A discussion of the basic pharmacodynamics, pharmacokinetics, mechanisms of actions, doses and adverse effects of therapeutic agents prescribed and administered by dentists. This will include antibiotics, analgesics, anxiolytics, anti-viral and anti-fungal agents. Subsequently drugs used in the management of systemic diseases will be discussed including mechanisms of actions and adverse effects, with particular focus on those which are dentally-related. May not be held with the former ORLB 3320 or the former ORLB 3060 or the former ORLB 3310.

DDSS 4112 Oral Diagnosis and Radiology 2  Cr. Hrs. 2
(Formerly DDSS 4200) This clinical course is designed to give the student clinical experience with: treatment planning, diagnostic techniques, differential diagnosis, emergency treatment and non-surgical management related to oral pathologic conditions. May not be held with DDSS 4200.

DDSS 4122 Oral & Maxillofacial Surgery 2  Cr. Hrs. 1
(Formerly DDSS 4210) This course consists of lectures, seminars and clinics covering all aspects of oral and maxillofacial surgery with an emphasis on those procedures performed by the general practitioner. May not be held with DDSS 4210.

DDSS 4150 Hospital Dentistry  Cr. Hrs. 1
(Formerly DDSS 4130) This course is designed to provide the student with a familiarization with hospital protocol, reinforcement of understanding in medicine, surgery, pharmacology and therapeutics, the dental treatment of medically compromised patients at the Health Sciences Centre, and handicapped patients in other institutional settings. May not be held with DDSS 4130. Course evaluated on a pass/fail basis.

SECTION 5.3 Oral Biology Course Descriptions
ORLB 1302 Cell and Tissue Biology  
Cr. Hrs. 4
Structure, function and chemical composition of eucaryotic cells and oral bacteria will be studied. Taste signaling, diseases, and molecular interactions within and between cells and the immune system will be described in detail. May not be held with ORLB 1050.

ORLB 1310 Head, Neck and Nervous System, Part 1  
Cr. Hrs. 4
Gross anatomy of the head and neck are described and observed by regional dissection. Overviews of the nervous system and surface anatomy of the mouth are included. May not be held with ORLB 1060.

ORLB 1320 Head, Neck and Nervous System, Part 2  
Cr. Hrs. 3
An introduction to the structure and function of the central and peripheral nervous systems and associated structures, the neurophysiology and the stomatognathic system, pain and analgesics. May not be held with ORLB 1070.

ORLB 1330 Human Growth and Development  
Cr. Hrs. 3
Human development from the origin of the reproductive cells through fertilization, conception, embryonic/fetal development, birth, growth and aging. Particular emphasis is given to development and growth of structures of the head and neck. May not be held with ORLB 1080.

ORLB 1340 Oral Tissues, Structure and Function  
Cr. Hrs. 3
This course is designed to present the normal morphology, developmental biology, biochemical structure, metabolism and functions of the dentition and para oral tissues, cartilage, bone and exocrine glands of the head and neck. Structural functional aspects of oral anatomy, biochemistry/molecular biology and physiology will be included. May not be held with ORLB 1090.

ORLB 2300 Pathology and Microbiology 1  
Cr. Hrs. 1
Study of the basic mechanisms of microbial pathogenicity and general pathology as they relate to dentistry and dental treatment. Includes the pathogenesis of bacterial, viral and fungal infections and the aetiology of neoplastic, inflammatory and metabolic diseases. May not be held with ORLB 2100.

ORLB 2312 Structure and Function of Major Organ Systems  
Cr. Hrs. 4
This course emphasizes the basic structure at both organ and cellular levels of a number of organ systems and an understanding of their role in total body function. May not be held with ORLB 2070.

ORLB 2320 Cariology and Plaque Associated Diseases  
Cr. Hrs. 3
A study of the various dietary, host and microbial factors in the etiology of dental caries and periodontal disease, and a discussion of the various methods of plaque control. May not be held with the former ORLB 2090.

ORLB 2330 Nutrition in Dentistry  
Cr. Hrs. 2
An examination of the fundamentals of nutrition and the relationship between nutrition and health within the context of the health professions. The focus is on nutritional strategies used to promote health and in the treatment of common health conditions. The primarily on-line content is followed up with a combination of oral health specific patient/clinical exercises for Dentistry students. May not be held with ORLB 2150, HYGN 2370, HNSC 2170, or PHRM 2420.

ORLB 3300 Pathology and Microbiology 2  
Cr. Hrs. 1
A study of selected infectious diseases and the application of general diagnostic pathology in dental practice. May not be held with ORLB 3020.

SECTION 5.4 Preventive Dental Science Course Descriptions

PDSD 1400 Orthodontics 1  
Cr. Hrs. 2
A series of lectures, workshops and practica designed to introduce the student to the orthodontic perspectives of applied: growth and development of craniofacial structures, relationship of craniofacial growth to general body growth, cephalometric and facial analysis, etiology and classification of malocclusion, development of the dentition, basic biomechanics and preliminary orthodontic wire bending and manipulation in orthodontics. May not be held with PDSD 1020.

PDSD 2400 Orthodontics-2  
Cr. Hrs. 2
A series of lectures and laboratories to introduce the student to: clinical protocol for examination, diagnosis and treatment planning of malocclusions, concepts of occlusion and biomechanics of orthodontic therapy, and fabrication of orthodontic appliances. May not be held with PDSD 2020.

PDSD 2410 Pediatric Dentistry- 1  
Cr. Hrs. 3
A series of lectures and laboratories to introduce the student to: the fundamental principles of dental growth and development of children, introduction to operative dentistry and preventative techniques commonly used in dentistry for children. May not be held with PDSD 2070.

PDSD 2420 Dental Public Health  
Cr. Hrs. 1
This course introduces students to healthcare concepts from a systems-level viewpoint. Topics include the methods used in Dental Public Health, history and structure of Canadian Medicare, a parallel view of Canadian dental care, social determinants of health, health promotion, measurement methods for dental health and disease, epidemiology of dental disease in Canada, and access to dental care. May not be held with the former PDSD 2130.

PDSD 3402 Orthodontics 3  
Cr. Hrs. 2
A series of seminars covering the analysis, diagnosis, treatment planning, and mechanotherapy using records of selected cases. The clinical component consists of the diagnosis and treatment planning for individuals seeking orthodontic treatment. The clinical experience includes exposure to removable and fixed mechanotherapy, screening of patients seeking orthodontic care and follow-up of retention of completed cases. May not be held with PDSD 3040.

PDSD 3404 Dental Public Health 2  
Cr. Hrs. 3
This courses uses on-line self-study, classroom discussion, a formal debate, and clinical externships to introduce students to historical and contemporary public health topics. Topics covered include the history of fluoride use to prevent dental caries, the theory and methods for oral disease prevention in populations, the principles and methods for evidence-based practice, and geriatric and sports dentistry. May not be held with the former PDSD 3140 or the former PDSD 3422.

PDSD 3412 Pediatric Dentistry 2  
Cr. Hrs. 3
A series of seminars and clinics to give the student a basic understanding and some clinical experience with: clinical procedures, emergency treatment, psychological management, preventative medical considerations and the provision of total dental care to pediatric patients. May not be held with PDSD 3050.

PDSD 4402 Orthodontics 4  
Cr. Hrs. 2
(Formerly PDSD 4060) This course consists of seminars on special topics related to the provision of orthodontic therapy. In addition, the clinical component including the diagnosis and treatment planning for individuals seeking orthodontic treatment as well as the continuation of treatment commenced in PDSD 3040. Clinical seminars cover the analysis, diagnosis, treatment planning, mechanotherapy and post-treatment evaluation of previously treated cases. May not be held with PDSD 4060.

PDSD 4412 Pediatric Dentistry 3  
Cr. Hrs. 2
(Formerly PDSD 4050) This course consists of clinical experience including exposure to common pediatric dentistry problems, cares preventive and control procedures, routine conservative procedures and the dental
treatment of children in community-based clinics. May not be held with PDSD 4050.

**PDSD 4422 Community Dentistry Externship**  Cr. Hrs. 4

The clinical portion of the program is centered in community outreach clinics in the City of Winnipeg. The students spend time at a pediatric community clinic, a low income community clinic, and at geriatric clinic. The clinics serve the elderly, children, Indigenous, or patients from low income families. The didactic portion of the program focuses mainly on geriatric dentistry. May not be held with the former PDSD 4080. Course evaluated on a pass/fail basis.

**SECTION 5.5 Restorative Dentistry Course Descriptions**

**RSTD 1500 Dental Materials 1**  Cr. Hrs. 2

This course introduces the materials commonly used in dental practice. Composition, chemistry, properties, manipulation and manipulative variables are covered by lecture, laboratory exercises and demonstrations. May not be held with RSTD 1070.

**RSTD 1512 Operative Dentistry 1**  Cr. Hrs. 6

A lecture and laboratory course introducing the fundamentals of operative dentistry. Lectures and laboratory exercises in the principles of cavity preparation, utilization of rotary and hand instruments and manipulation, placement and finishing of restorative materials are presented. May not be held with RSTD 1100.

**RSTD 1520 Dental Anatomy**  Cr. Hrs. 3

A lecture and laboratory/seminar course introducing dental terminology, tooth identification, dental morphology and concepts of dental anatomy as it relates to the intraoral functional relationship. May not be held with RSTD 1110.

**RSTD 1530 Occlusion**  Cr. Hrs. 2

A lecture and laboratory course designed to introduce the student to the concepts of dental occlusion and the relationship between the anatomy of the teeth and the TMJ. May not be held with RSTD 1110.

**RSTD 1550 Introduction to Dentistry**  Cr. Hrs. 2

A series of lectures and seminars which introduce the student to the profession, its structure and governance. Professionalism, dental ethics and communication skills are also introduced. May not be held with RSTD 1120 or RSTD 1540. Course evaluated on a pass/fail basis.

**RSTD 2502 Dental Materials-2**  Cr. Hrs. 2

This course develops a scientific basis for the selection, application, manipulation and clinical performance of dental materials. The relationship between the properties of a material and its manipulation, application and clinical behaviour is developed. May not be held with RSTD 2020.

**RSTD 2510 Operative Dentistry-2**  Cr. Hrs. 3

A lecture and laboratory course presenting modern and advanced techniques in tooth restoration. Composite resins, adhesion to tooth structure, esthetic restorations and protection of tooth vitality. Introduction to clinical treatment modalities and treatment priorities. May not be held with RSTD 2050.

**RSTD 2520 Endodontology-1**  Cr. Hrs. 2

Introduction to root canal therapy as a clinical practice, pulp and periapical pathology. The majority of the teaching is directed at the understanding and actual performance of practical endodontic techniques, performed in the laboratory setting on mannequins using extracted human teeth. May not be held with RSTD 2060.

**RSTD 2532 Fixed Prosthodontics 1**  Cr. Hrs. 6

This course is designed to review the fundamentals of fixed prosthodontic restorative techniques in conjunction with laboratory exercises involving tooth preparation, waxing, and fabrication of metal and ceramic restorations. Both conventional laboratory techniques and contemporary digital technology are introduced to closely reflect contemporary dental practice. May not be held with the former RSTD 2140.

**RSTD 2540 Removable Partial Denture Prosthodontics**  Cr. Hrs. 3

The didactic portion of this course presents the principles for the treatment of partially edentulous patients. The procedures and techniques founded on the basic principles make up the laboratory exposure. May not be held with RSTD 2220.

**RSTD 2552 Complete Denture Prosthodontics**  Cr. Hrs. 4

The didactic portion of this course presents the principles for the treatment of edentulous patients. Emphasis is placed on techniques of treatment in the laboratory component. May not be held with RSTD 2230.

**RSTD 3512 Operative Dentistry 3**  Cr. Hrs. 5

A lecture and clinical course emphasizing diagnosis, treatment planning and the application of fundamental principles of operative and esthetic dentistry. Lectures and clinical treatments dealing with current restorative materials and techniques. May not be held with RSTD 3020.

**RSTD 3522 Endodontology 2**  Cr. Hrs. 3

This course emphasizes the rationale and biologic basis for the practical technique previously taught. Techniques are discussed in greater detail and are applied to treatment of patients. The second part of the course deals with pulp biology and periapical pathology to prepare the student for understanding the rationale behind pulpal protection, prevention and treatment of pulpal disease. Laboratory exercises are performed on more complex root canal systems in preparation for General Practice Clinic. May not be held with RSTD 3050.

**RSTD 3532 Fixed Prosthodontics 2**  Cr. Hrs. 5

An introduction to the clinical practice of fixed prosthodontic techniques. An emphasis is placed on diagnosis and treatment-planning. Clinical exposure is supplemented by lecture materials. May not be held with RSTD 3040.

**RSTD 3542 Complete and Removable Partial Denture Prosthodontics**  Cr. Hrs. 3

This course consists of a series of lectures and clinics. Theories of applied prosthodontics are discussed and applications of this knowledge are made concurrently through the clinical treatment of patients. May not be held with RSTD 3090.

SECTION 5: Course Descriptions

5.1 Diploma in Dental Hygiene

5.2 Bachelor of Science in Dental Hygiene, Degree Completion Program

1.2 The Profession of Dental Hygiene

Dental hygiene is a self-regulated health service profession concerned primarily with the prevention of oral disease and the promotion of optimum oral health. As a licensed professional, the dental hygienist’s scope of practice is regulated by provincial legislation. The dental hygiene process of care consists of five components: assessment, dental hygiene diagnosis, planning, implementation, and evaluation. Current practice settings include: Private dental practice, community health centres, institutions (e.g., hospitals, long-term care facilities), primary health care centres, home care and other outreach programs, educational institutions (e.g., universities, community colleges), the military, research, and industry. Dental hygienists acquire competence through instruction in basic sciences, oral health sciences, the humanities and clinical practice. Through more than 600 hours of a competency-based clinical curriculum, students are prepared to meet the needs of a broad range of population groups.

The School of Dental Hygiene Mission Statement: In a dynamic environment of excellence and progressive learning, the University of Manitoba, School of Dental Hygiene prepares future dental hygienists to enhance the health and wellbeing of the public through oral health promotion, disease prevention and therapeutic means; and to be active members of the global health care community.

Practice Requirements

After successful completion of the National Dental Hygiene Certification Board Examination, in Manitoba, graduates must apply to the College of Dental Hygienists of Manitoba for a licence to practice as a dental hygienist. Dental hygienists must fulfil the requirements of the respective provincial regulatory authorities licensing bodies. The minimum educational credential for licensure in the province of Manitoba is the Diploma in Dental Hygiene. Licensed dental hygienists may continue their education by completing a Bachelor of Science Degree in Dental Hygiene.

Note: Students admitted to the School of Dental Hygiene must register annually with the College of Dental Hygienists of Manitoba. Further information regarding student registration requirements can be found in Section 3: Faculty Academic Regulations (section 3.1.b).

SECTION 2: Admission Requirements

2.1 Diploma in Dental Hygiene

The following is a summary of admission requirements. All admission requirements, as well as application deadline dates and forms, are included in an applicant information bulletin that is available from the Admissions Office, Enrolment Services, 424 University Centre; this information is also posted on the university’s website.

2.1.a Direct Entry

General Direct Entry/University of Manitoba Admission Requirements

Manitoba high school graduation, with five full credits at the Grade 12 level, in courses designated S (Specialized), G (General), or U (Dual Credit – University), with a minimum of three of these credits in S or U courses.

Specific Requirements for the School of Dental Hygiene

</tbody>
</table>

The required minimum grade for specified prerequisite courses including electives is a C. There is a required minimum overall grade point average of 3.0 (B) in the candidates Diploma in Dental Hygiene or Associated Degree Program.

Selection is competitive. In the event of a surplus number of applicants, selection will be based on the grade point average (GPA) over the most recently completed 60 credit hours of study completed at the accredited post-secondary level.

### SECTION 3: Faculty Academic Regulations

All students are asked to note that some academic policies and regulations are under review and are subject to change. Please check the Web Calendar at [umanitoba.ca](http://umanitoba.ca) for updated information.

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the School of Dental Hygiene has regulations and requirements, published below, that apply specifically to its students.

Direct Entry students are to be aware that as they will be registered in courses outside of the School of Dental Hygiene (non HYGN courses), they may be subject to the rules and regulations of the faculty/school in which those courses reside (primarily the Faculties of Arts and Science). Direct Entry students are encouraged to become familiar to the rules and regulations of these faculties/schools. Please contact the School of Dental Hygiene for further information.

---

General Requirements as above, plus a minimum 85% average over the following, with no less than 60% in each course:

- English 405
- TWO of Mathematics 405 (either Pre-Calculus, recommended, or Applied), Biology 405 or Chemistry 405*

* Although not required for admission, students must complete Mathematics 405 (Applied or Pre-Calculus), Biology 405 and Chemistry 405 in order to register for first year required courses for Dental Hygiene.

Notes: Candidates must meet the specific subject requirements, minimum grades, average or other requirements as listed for the program. Should demand exceed available positions, higher averages may be required to be competitive (higher than 85%). Only Canadian Citizens and Permanent Residents will be considered for admission.

Selection criteria: 100 per cent based on academic standing.

2.1 b Advanced Entry Applicants

The following is a summary of the admission requirements for Advanced Entry. Applicants to this category must successfully complete the following courses prior to application. Course are normally completed within University 1, however, equivalent academic courses completed at recognized universities elsewhere will be considered.

- ENGL 1400 or ENGL 1340
- CHEM 1300 and CHEM 1310 or CHEM 1320
- PSYC 1200
- BIOL 1410 and BIOL 1412
- STAT 1000
- 6 credit hours of electives (Sociology is strongly recommended) for a total of 30 credit hours.

Other Requirements

Minimum GPA for consideration: 3.00 with no grade less than C, with the exception of English which requires the minimum grade of C+. Admission is competitive.

Selection criteria: 100 per cent based on academic standing for the Regular Applicant Category. An interview, biographical sketch and letters of reference are considered within the Special Applicant Category. Preference will be given to Manitobans in the Special Applicant Category (includes the Canadian Indigenous/Aboriginal Peoples applicant category) and on the alternate list.

2.2 Bachelor of Science in Dental Hygiene, Degree Completion Program

The program will be available to dental hygiene diploma graduates of the University of Manitoba or other accredited dental hygiene educational institutions wishing to complete requirements for the baccalaureate degree on a full-time or part-time basis. Transfer of credit for courses completed at other institutions will be possible through appropriate University procedures. The School will evaluate credits from other institutions on an individual basis. The following is a summary of the admission requirements. All admission requirements, as well as application deadline dates and forms, are included in an applicant information bulletin that is available from the Admissions Office, Enrolment Services, 424 University Centre; this information is also posted on the university’s website.

Admission to the degree completion program requires of students that:

- They must possess a Diploma in Dental Hygiene from either a university or community college program accredited by either the Commission on Dental Accreditation of Canada or the American Dental Association’s Commission on Dental Accreditation.
- They must possess the National Dental Hygiene Certification Board (NDHCB) Certificate
- They must hold current licensure to practice dental hygiene in Canada and be eligible for licensure to practice in Manitoba.
- They must possess all the pre-requisite course requirements prior to admission (see prerequisite requirements, options A & B below)
3.1a Essential Skills and Abilities for Admission, Promotion and Graduation in Dental Hygiene Diploma Program

As an accredited Canadian dental hygiene program, the Dr. Gerald Niznick College of Dentistry, School of Dental Hygiene at the University of Manitoba is responsible for providing a program of study that ensures graduates have the necessary qualifications (academic knowledge, clinical skills, and professional behaviors and attitudes) to enter the regulated profession of Dental Hygiene in Canada. Becoming and being a dental hygienist requires a wide range of highly specialized skills and abilities. Some of these are taught in dental hygiene school, while others must be brought by the individual as an innate set of essential skills and abilities. The criteria for becoming registered/licensed as a dental hygienist in Canada requires a level of motor skills and other attributes that are not necessary in other professional occupations. Similarly, the ability to provide reasonable accommodation for special learning needs in dental hygiene may not be the same as it is for other academic programs.

It is important to note that an offer of admission to the Dr. Gerald Niznick College of Dentistry, School of Dental Hygiene is not evidence that the dental hygiene program has verified that an applicant has the prerequisite skills and abilities for success in the program or future professional licensure. However, these skills and abilities are essential if students are to be successful in achieving the competency standards of the profession.

For progression in, and graduation, from the dental hygiene program, all students must conduct themselves in a professional manner, and must have the Essential Skills and Abilities (Technical Standards) discussed under the following five broad areas: Observation/perception; Communication; Motor/tactile function; Cognition; Emotional functioning.

All applicants to the dental hygiene diploma program of the Dr. Gerald Niznick College of Dentistry School of Dental Hygiene are expected to review the Essential Skills and Abilities for Admission, Promotion and Graduation in Dental Hygiene Diploma Program document to assess their ability to meet these standards; all applicants offered admission will be required to acknowledge such review and assessment.

Any candidate for the diploma in dental hygiene program who cannot demonstrate the required skills and abilities throughout their course of study may be requested to withdraw from the program.

Detailed information for the above policy can be found at: [http://umanitoba.ca/healthsciences/dentistry/student_resources/policies.html](http://umanitoba.ca/healthsciences/dentistry/student_resources/policies.html)

3.1.b College of Dental Hygienists of Manitoba (CDHM)

The College of Dental Hygienists of Manitoba (CDHM) is a separate entity from the University of Manitoba. Students admitted into the dental hygiene degree program must be registered with CDHM in order to practice/study as a dental hygiene student in Manitoba. Re-registration is required each academic year.

Students will receive application information during the first week of classes and must complete and return the application to CDHM prior to September 15th of each year. Note that evidence of completion of a CPR – Level C course in the last 12 months is required for the application process.

Failure to register with CDHM will result in being restricted from participating in classes until registration is complete.

For further information please contact the CDHM at 204-219-2678 or cdhm@cdhm.info.

3.1.c Dr. Gerald Niznick College Of Dentistry/School Of Dental Hygiene Professional Unsuitability By-Law

Students must at all times demonstrate suitability for the dental/dental hygiene profession. In this regard students are obligated to act with integrity and diligence in carrying out their professional responsibilities, and their behaviour and conduct in relation to others must be characterized by consideration, respect and good faith.

The Dr. Gerald Niznick College of Dentistry may require a student to withdraw from the College/School when the student has been found unsuited for the practices of dentistry or dental hygiene because the student has been found to have engaged in unprofessional behaviour. A student may be required to withdraw at any time throughout the academic year.

Grounds which may require withdrawal are: demonstrated behaviour which is exploitive, irresponsible, intentionally injurious or destructive to patients; and/or compromised professional judgment through self-interest and/or conflict of interest; and/or an acquired criminal conviction, either in Canada or any other jurisdiction, which is of such a nature as to place in question his/her fitness for the dental professions; and/or participation in any activity related to patient care or any activity related to the practice of the dental professions while under the influence of alcohol or drugs or while abusing prescription drugs; and/or engaging in behaviour or conduct that if engaged in by a practising dentist/dental hygienist would likely result in disciplinary action, including suspension or revocation of the licence to practise, by the Manitoba Dental Association or the College of Dental Hygienists of Manitoba.

Detailed information for the above policy can be found at: [http://umanitoba.ca/healthsciences/dentistry/student_resources/policies.html](http://umanitoba.ca/healthsciences/dentistry/student_resources/policies.html)

3.1.d Criminal Record/Adult Abuse Registry/Child Abuse Registry

An adult criminal record, an adult abuse registry and a child abuse registry self-declaration will be required of all applicants at the time of application. A formal Adult Criminal Record Check (including vulnerable sector screening), a formal Adult Abuse Registry Check “and a formal Child Abuse Registry Check” are required at the time of registration, and annually thereafter keeping in accordance with existing policies of other health, education and social service programs at the University of Manitoba.

Direct Entry students will be required to provide these documents upon admission to the program and prior to October 1 of that year.

Failure to provide these documents may impact on registration and a student’s ability to progress in the Dental Hygiene program.

*The School will provide information on the application process (through the School).

3.1.e Immunization and Bloodborne Diseases Policy

The Dr. Gerald Niznick College of Dentistry and School of Dental Hygiene maintain comprehensive immunization requirements to protect the wellbeing of our students and the health of patients and communities with whom they will have contact during their curriculum.

All students enrolled in the School of Dental Hygiene must have immunity demonstrated against the following diseases: tetanus, diphtheria, pertussis, polio, measles, mumps, rubella, varicella (chickenpox), and hepatitis B. Students need to undergo testing for tuberculosis (TB) infection, unless the student already has a past history of TB infection or TB disease documented. Students must receive yearly influenza vaccinations. Students who cannot receive certain immunizations due to allergies or pregnancy must provide a physician’s certificate stating this.

Before the first day of classes, all students must complete and return the University of Manitoba Immunization Record Form (Package A), as provided by the School of Dental Hygiene/Dentistry Student Services Office. Please note that any supplemental immunization documentation provided to support this document and/or any future submissions of immunization materials must be signed by a physician or nurse. All students are responsible for updating their immunizations as needed.
Students will not be permitted to attend clinics until all immunization requirements are satisfied.

For the collection and management of student immunization records, the Dr. Gerald Niznick College of Dentistry/School of Dental Hygiene partner with the Faculty of Health Science Immune Program. The Director of Immunizations and the Program Assistant collect and organize immunization data as well as provide immunization services to students at the Bannatyne campus.

All students are expected to comply with the requirements of the Rady Faculty of Health Science Immune Program which may change from time to time due to the immunization requirements of external health care facilities where students will be expected to attend as a part of their dental/dental hygiene program.

The Dr. Gerald Niznick College of Dentistry and School of Dental Hygiene are compliant with the Association of Canadian Faculty of Dentistry (ACFD) Guidelines for Infectious Disease and Healthcare Workers document and its recommendations regarding barring students from clinical activities who do not meet these guidelines. Further information on the ACFD guidelines can be found at the following web-site:

Prospective students should refer to and be familiar with the Dr. Gerald Niznick College of Dentistry’s (School of Dental Hygiene) Infectious Diseases Policy Statement on the College/School website http://umanitoba.ca/healthsciences/dentistry/dentalhygiene/future/dh_pr eReq.html. Any student applicant with an infectious disease should either delay their application to the program or discontinue the program when being accepted into the Dr. Gerald Niznick College of Dentistry/School of Dental Hygiene. Should a student who has been accepted into the program but has been found to be unable to meet the policy requirements, every effort will be made to accommodate the student until the guidelines are met. In some cases, it may be necessary to suspend or terminate the student from the program if it is shown that the policy guidelines are unable to be met.

Direct Entry students are responsible to have all immunization requirements in place prior to their entrance into their second year (first clinical year) of the program. Further information will be provided upon admission to the School.

3.1.f CPR Certification

Accepted candidates will be required to show proof of CPR (Health Care Provider level) certification by September 15 of each year. This certification must be maintained on a yearly basis up to the date of graduation. CPR Certification levels accepted by the School of Dental Hygiene are:

Canadian Red Cross: ACLS (Advanced Cardiovascular Life Support for Health Care Providers)

Heart & Stoke Association: BLS for HCP + AED

St. John Ambulance: Health Care Provider Level C and AED

Life Saving Society: CPR for Health Care Providers (HCP)

Direct Entry students will not need to provide this certification in year 1 of their program; they will be expected to complete this requirement by September 15th of their first clinical year.

3.1.g PHIA

Students are required to maintain confidentiality of patient records and abide by PHIA (Personal Health Information Act) legislation which governs and controls the sharing of personal health information. Students will be required to attend a PHIA orientation and sign a pledge of confidentiality in their first clinical year of the program. This orientation includes content that satisfies PHIA requirements for student participation at external clinical sites under the direction of the Winnipeg Regional Health Authority (WRHA).

3.1.h Sharing of Personal Information

Once admitted to the School of Dental Hygiene, University of Manitoba, students personal information is protected by FIPPA (Freedom of Information and the Protection of Privacy Act) legislation. However, prior to first registration, some personal information (name, e-mail, photo) is shared with external partners to facilitate student involvement. Please see further information below:

Student Licensure and Mentorship Program

To better administer Student Licensure, the School of Dental Hygiene provides the College of Dental Hygienists of Manitoba (CDHM) with a list of advanced entry and Year 2 direct entry students, which includes names and U of M e-mail addresses.

In addition, as a partnership between the School of Dental Hygiene and the CDHM, these same students are assigned a Mentor who is a member of the CDHM and a practicing Dental Hygienist within the community.

Vital Source Textbook Database

Most Dental Hygiene student’s text books are accessible through an electronic textbook database called Vital Source. In order to provide all Dental Hygiene students with access to their text books, the Dr. Gerald Niznick College of Dentistry/School of Dental Hygiene will provided Vital Source with the names and e-mail (U of M) of all students for the purpose of authenticating users and providing access to their on-line content.

Manitoba Dental Students Association/Manitoba Dental Hygiene Students Association

Students in the Dr. Gerald Niznick College of Dentistry/School of Dental Hygiene become members of and are represented by the Manitoba Dental Students Association/Manitoba Dental Hygiene Students Association. These Associations provide student representation on College/School and University Committees as well as represent students on various external organizations (CDA/MDA/MDHA, etc.). The College of Dentistry/School of Dental Hygiene provides the names, e-mail (U of M) and photographs of all first year Dental and Dental Hygiene students with the respective student Associations for the purpose of facilitating student participation.

Student information will not be used or disclosed for other purposes, unless permitted by The Freedom of Information and Protection of Privacy Act (FIPPA). If you have any questions about the collection or use of your personal information, contact the Access & Privacy Office (tel. 204-474-9462), 233 Elizabeth Dafoe Library, University of Manitoba, Winnipeg, MB, R3T 2N2.

3.1.i Instruments, Computer, Textbooks and Uniforms

Students entering the School of Dental Hygiene will be expected to own or purchase a PC laptop computer (the School only supports PC’s given the software used in our clinical facilities) that is compliant with University computer standards (see Bookstore - Computers on Campus for annual listing) and Vital Source Technologies software requirements (see www.vitalsource.com for details). The expenditure of a computer may range approximately from $1000 to $4000 and the cost of Vital Source Technologies software amortized over the two clinical years of the program is approximately $3200 USD (note the Canadian equivalent will vary depending on the exchange rate).* These costs replace former textbook expenditures and are included as part of the Dental Hygiene Clinical Instrument Fees.

Students are responsible for Dental Hygiene Clinical Instrument Fees which represent the cost and administration of dental instruments and sundry items used in the clinical component of dental education. The cost of
standards and to ensure an efficient and effective clinical operation.

Student owned instruments are specific instruments that are the student’s property and are retained by the students after graduation. College owned instruments are specific instruments that are the college’s property and remain within the college (students are responsible for returning in good condition). Instruments are structured in this manner to meet sterilization standards and to ensure an efficient and effective clinical operation.

Administration costs of the Clinical Instrument Fee include such things as the costs needed to collate, distribute and maintain instruments (sterilization, maintenance, etc.) as well as the costs associated with maintaining the dental hygiene labs and equipment.

Over the two clinical years of the program, the cost of such instruments/fees has been approximately $19,000. The college is unable to provide refunds for Dental Hygiene Clinical Instrument Fees and will not accept returns of any student computer software (including Vital Source Technologies), clinical instruments or other items, should a student leave the college for whatever reason and upon graduation.

*Direct entry students will not be expected to purchase a laptop computer, Vital Source Software, or be charged Dental Hygiene Clinical Instrument fees until the start of their second year of the program (first clinical year).

**Please Note:** Computer Software (including Vital Source Technologies), Clinical Instrument fees and/or Clinical Instrument items are non-refundable.

3.1.j Progression Rules/Promotions

Some of the following may not apply to Direct Entry students during their first year of the program, but will come into effect once they are registered in years two and three of the program (once registered in HYGN courses as described in Section 4). Further clarification will be communicated to Direct Entry Students upon admission to the School of Dental Hygiene.

- **Rules and Regulations - Direct Entry Year 1 – DH 1**
  - The letter grade of “C” is the lowest acceptable level of performance per course in DH 1 (pre-professional year), with the exception of English, which is a C+, to progress further in the dental hygiene program.
  - Students admitted to the School via Direct Entry must complete the first year (DH 1) curriculum, including electives, within 2 years of admission. If students do not successfully complete the first year course requirements within this time frame, they will, except under special circumstances under the discretion of the Director of the School of Dental Hygiene, be required to withdraw from the program; this does not preclude these students from re-applying to the program via the advanced entry route.
  - Direct entry students must achieve a minimum term grade point average of 2.0 in all terms during the completion of their pre-professional program (DH 1).

- **Rules and Regulations - Years DH 2 and DH 3**
  - In years DH 2 and DH 3 the lowest acceptable grade is a “D” if the course is being taken for the first time (see below for a minimum requirement of repeated courses).
  - A minimum sessional grade point average of 2.0 in years DH 2 and DH 3 of the program is required to qualify a student for standing in that year. A student in years DH 2 and DH 3 who fails to obtain a minimum sessional grade point average of 2.0 and who is not granted supplemental privileges will be considered to have failed the year.
  - Except by special permission of Dental College Council, no student in years DH 2 and DH 3 may repeat more than one year of the program, nor may any single year be repeated more than once. The work requirements of any repeated dental hygiene course year may be modified at the discretion of the Dental College Council. The passing grade in each course of a repeated year in Dental Hygiene is “C”.
  - A student in DH 2 or DH 3 who has obtained a grade of “F” in more than two subjects or who fails to obtain a sessional G.P.A. of 2.0 will be regarded as having failed the year and will be required to repeat the work of that year in a succeeding annual session.

- **Attendance**
  - Regular attendance is expected of all students in all School of Dental Hygiene courses. Students should make themselves familiar with School of Dental Hygiene attendance policies and should be aware that there may be academic consequences with not complying with these regulations. For details on these policies please see the University of Manitoba’s Attendance Policy as listed in the on-line Calendar as well as individual HYGN course outlines for specific course requirements.
  - Only under exceptional circumstances may students be granted approval for absences exceeding one day for reasons other than illness. Students must make such a request in advance from the Director of the School to obtain prior approval.
  - Students registered in the School of Dental Hygiene are expected to conform to any new requirements that may be adopted from year to year. Any student returning to resume studies after an interval away is expected to conform to any new requirements that have been adopted during their absence.

3.1.k Examinations

**Deferred Examinations** A deferred examination is a privilege that may be granted to a student who is unexpectedly unable to write an examination as scheduled or a student who knows in advance that he or she is unable to write an examination at the scheduled time. Making a false or misleading claim may be considered an offence under the Student Discipline Bylaw. Penalties may range from a failed grade in the course to suspension or expulsion.

A dental hygiene student (DH 1, 2 and 3) who is unable to sit an examination because of illness or other affliction may file an application for a deferred examination with the Director of the School of Dental Hygiene. Application for deferral must normally be filed within 48 hours of the missed examination, for students in DH 1, and within seven days of the examination, for students in DH 2 and DH 3, and must be accompanied by a medical certificate or an otherwise appropriate document certifying the inability of the student to write the examination at the regular scheduled time, and, where possible, indicating the period of disability. Based on the overall application submission, the Director shall determine if the application is approved.

When an application for a deferred HYGN examination is approved, the Director, in consultation with the course coordinator concerned may:

- Permit a student to take a deferred examination in such a form as the Director/course coordinator may determine.
- Grant standing in a course without examination. In such cases a grade shall be assigned to the course on the basis of term work and assignments.

**Supplemental Examinations** A supplemental examination is an examination that may be offered as a privilege to a dental hygiene student who has failed a dental hygiene (HYGN) course or failed to achieve a satisfactory result. Such examinations are offered in order to grant the student an opportunity to rectify the inadequacy without repeating the course.

Supplemental examination privileges are permitted in the School of Dental Hygiene for all HYGN courses with the exception of those in which remediation/re-examination is not realistically feasible. Such privileges
must be approved by Dental College Council. Students seeking supplemental privileges should contact the Director indicating her/his request. Applications to write a supplemental examination must be accompanied by the paid fee before the supplemental examination can be written. The student will be notified in a letter from the Director’s Office if she/he is granted the privilege and under what specific conditions.

A student in DH 2 and DH 3 who has failed in not more than two HYGN courses at the end of the regular term, may, at the discretion of the Director and with approval from Dental College Council, be awarded the privilege of one or two supplemental examination(s). A student must maintain a minimum sessional (combined Fall and Winter terms) GPA of 2.0 in that year in order to be eligible for supplemental privileges.

The passing grade in supplemental examinations is “C” for each course.

A student who is granted supplemental privileges is obliged to sit the examination at the earliest opportunity. The student must contact the course coordinator within 7 days of the date the notification letter from the Director’s Office to schedule a plan for remediation and a date to write their supplemental examination. Supplemental examinations must be held prior to the opening of the Fall academic session.

A student who has not successfully exercised supplemental privileges will be considered to have failed the year and may be required to repeat the entire year or a modified program as required by Dental College Council. If/when the condition is removed in that session, the student will be regarded as having completed the year to which the condition applied.

NOTE: DH I students (direct entry in pre-professional program) should note that supplemental examination privileges are not normally permitted within the courses in which they will be registered. Failure of any course/s in year DH 1 of the program (pre-professional year) will normally require the course/s to be repeated during the next available offering of the course. DH 1 students should be aware that this may impact the student’s ability to progress in the dental hygiene program (see Section iii).

3.1.l Honours and Awards

Dean’s Honours: awarded to students in each year of the dental hygiene Diploma program who have achieved a minimum sessional (fall & winter term combined) G.P.A. of 3.8. In addition, only students registered for 80 per cent or more of the normal course load during a regular session are eligible for Honours Standing.

A student who fails in one or more subjects, or who fails the year at the regular final examination, is not eligible to obtain Honours Standing or to receive any awards for the work of that year.

A student repeating a year’s work is not eligible to obtain Honours Standing or to receive any awards for the work of that year.

The following policy applies to the eligibility of part-time students for academic awards:

A student who is carrying less than 80 per cent of the normal course load for the year is only eligible for an award in the individual subjects taken by him/her.

A student who is repeating a course may not be eligible for an award in that subject.

3.1.m Voluntary Withdrawal

Students intending to withdraw from a portion or all of their courses must report immediately in person or in writing to the Director’s Office. Please note: Computer Software (Including Vital Source Technology software), Dental Hygiene Clinical Instrument fees and/or Clinical Instrument items are non-refundable. See also the chapter, on General Academic Regulations and Requirements.

Students who withdraw from the School of Dental Hygiene without notice will be considered to have terminated their connection with the school. If a subsequent application for registration is approved, they will be required to conform to the rules and regulations, fee schedules, sequence of courses, etc., in effect at the time of such subsequent application.

In cases where a student is obliged to withdraw after the final date of withdrawal published in the Calendar because of ill health or other sufficient reasons, their cases will be considered on an individual basis by the Director of the School.

3.1.n Required Withdrawal

Senate has approved by-laws granting the School of Dental Hygiene the authority to require a student to withdraw on the basis of professional unsuitability; such right may be exercised at any time throughout the academic year.

This right to require a student to withdraw prevails notwithstanding any other provisions in the academic regulations of the particular faculty or school regarding eligibility to proceed or repeat.

Full policy information can be found at:

http://umanitoba.ca/healthsciences/dentistry/student_resources/policies.html

3.1.o E-Mail Accounts

All students are expected to have an e-mail account with the University of Manitoba and check it regularly. The School of Dental Hygiene does not support communications with its students through external e-mail addresses.

3.1.p Registration exceptions

Direct Entry students should contact the School of Dental Hygiene for information on registration.

Upon receipt of initial (in year two; and annually thereafter) Criminal Record (including Vulnerable Sector Screening), Adult Abuse Registry Check and Child Abuse Registry Checks, the School of Dental Hygiene completes registration for all students in their courses (Years 2 and 3). Diploma students who have a failing grade/s registered against them and/or have other outstanding academic matters (i.e. deferred or supplemental examinations, modified program, etc.) in regards to the previous academic session will not be registered in the next ensuing academic session until all outstanding matters have been cleared. Students who fall into this category should contact the student advisor for further information. A student advisor is available in D113 Dental Building or by calling (204) 789-3484.

3.2 Bachelor of Science in Dental Hygiene, Degree Completion Program

3.2.a Academic Progress

A minimum Degree Grade Point Average of 2.0 must be maintained in the Bachelor of Science in Dental Hygiene for clear standing. A grade of C is considered a passing grade for all courses applied towards degree requirements. Students who do not maintain a minimum GPA of 2.0 may be required to withdraw from the program.

3.2.b Licensure

Students in the Bachelor of Science in Dental Hygiene program must maintain professional licensure during their registration at the School of Dental Hygiene. Students should also note that licensure with the College of Dental Hygienists’ of Manitoba may be required for registration within certain core courses (example: teaching practicum) of the program. Students are responsible for all fees associated with the maintenance of
current licensure as well as application for licensure within Manitoba as may be required.

3.2.c Criminal Record/Adult Abuse Registry/Child Abuse Registry
An adult criminal record, an adult abuse registry and a child abuse registry self-declaration will be required of all applicants at the time of application. A formal Adult Criminal Record Check (including vulnerable sector screening), a formal Adult Abuse Registry Check and a formal Child Abuse Registry Check are required at the time of registration, and annually thereafter keeping in accordance with existing policies of other health, education and social service programs at the University of Manitoba.

3.2.d Writing Skills
Once in the program, students who do not exhibit ability to communicate in writing may be required to seek remediation in writing skills.

3.2.e Transfer of Credit
The School may consider University credits earned outside of dental hygiene diploma programs or earned as part of an incomplete degree for transfer credit. If a student earned credit for a required course in the baccalaureate program as part of a diploma in dental hygiene or as part of another degree, an alternative course must be submitted for consideration.

3.2.f Residence Requirements
Baccalaureate Degree-Completion Program students are required to complete at least 30 credit hours of University of Manitoba courses of the total 120 credits for the degree, with the minimum grade of “C” in each course.

3.2.g Clinic Attire
Students in the B.Sc.Dental Hygiene program must maintain appropriate clinic attire when participating in clinical activities. Students will be required to purchase clinic uniforms as specified at the time of registration.

3.2.h Program Length/Registration
Students in the Bachelor of Science in Dental Hygiene, Degree Completion Program should note that after initial registration, the length of time to complete the B.Sc.D.H. program is variable dependent upon whether courses are taken full-time or part-time. Part-time students would be expected to complete the program within two to three (2-3) years. Students should be aware that the B.Sc.D.H. program tuition fee does not include tuition fees assessed against registration in courses administered outside of the Dental Hygiene Program (non HYGN courses). Further information on fees may be obtained from the University of Manitoba’s web-site: umanitoba.ca

3.2.i Voluntary Withdrawal
Students intending to withdraw from a portion or all of their courses must report immediately in person or in writing to the Director’s Office. Please note that all program tuition fees for the Bachelor of Science in Dental Hygiene program are non-refundable. See the chapter, on General Academic Regulations and Requirements for further information on voluntary withdrawal.

Students who withdraw from the School of Dental Hygiene without notice will be considered to have terminated their connection with the school. If a subsequent application for registration is approved, they will be required to conform to the rules and regulations, fee schedules, sequence of courses, etc., in effect at the time of such subsequent application.

In cases where a student is obliged to withdraw after the final date of withdrawal published in the Calendar because of ill health or other sufficient reasons, their cases will be considered by the Director of the School.

3.2.j E-Mail Accounts
All students are expected to have an e-mail account with the University of Manitoba and check it regularly. The School of Dental Hygiene does not support communications with its students through external e-mail addresses.

3.2.k Registration exceptions
Bachelor of Science Students who will be taking courses outside of the School of Dental Hygiene will be required to follow registration regulations/restrictions governed by the faculty in which those courses reside. Normal course repeat rules and restrictions will apply. Students in the B.Sc. program will also be responsible to ensure that they have verified their initial access time for registration; consulted with an advisor and/or obtained required program approval for outside courses as necessary; checked for timetable updates for all external courses; registered and assessed their fees after registration in all courses. A student advisor is available in D113 Dental Building or by calling (204) 789-3484.

SECTION 4: Program and Graduation Requirements

4.1 Diploma in Dental Hygiene
For students admitted as of Spring 2012 and forward. Students admitted prior to 2012 should refer to the version of the University of Manitoba Undergraduate Calendar in effect on the date of their admission for clarification of program/graduation requirements. Further information may also be obtained from the School of Dental Hygiene.

Second Year/First Clinical Year (Year 1 Advanced Entry)

| Total credit hours | 30 |

4.2 Students may take courses from other programs offering programs related to dental hygiene or programs in which they are registered. A course may be accepted as a direct entry into the Dental Hygiene program or be credited outside the Dental Hygiene program.
Accredited dental hygiene programs in Canada and the U.S. have been traditionally offered as either stand-alone two year programs with direct entry from high school, or as two-year programs requiring a pre-professional year of studies prior to admission into the professional program. In order to provide access to a broad range of potential degree completion students, two options have been developed.

**Option A.** This option is for those graduates of accredited 3 year dental hygiene programs, or equivalent, or those who have completed a proscribed pre-professional year prior to entry into their dental hygiene program.

Dental hygienists from the University of Manitoba who graduated between 1993 and 2007 must complete 21 credit hours

Dental hygienists from the University of Manitoba who graduated after 2007 must complete 19 credit hours

Graduates of other (non-University of Manitoba) dental hygiene programs who completed a pre-professional year prior to entry into their dental hygiene program, may be granted up to 15 credit hours from the pre-professional year and 75 credit hours from the 2-year dental hygiene program towards their degree. These graduates will be required to complete 30 hours of University of Manitoba credits in order to complete the degree and satisfy the residency requirement.

**Option B.** Dental hygienists who are graduates of accredited two year programs without the pre-professional year, must complete the 21 credit hours as described below plus 24 credit hours of free-choice electives. This requirement applies to graduates from the University of Manitoba (prior to 1993) as well as other accredited two-year dental hygiene programs in North America with no pre-professional year. As in Option A, the residency requirement of 30 credit hours for those non-University of Manitoba graduates will be upheld.

### University of Manitoba Graduates

Students with diplomas in dental hygiene from the University of Manitoba will complete 19 credit hours if they graduated after 2007 and 21 credit hours if they graduated between 1993 and 2007. Dental hygienists who graduated from the University before 1993 will complete 24 credit hours of electives in addition to 21 dental hygiene baccalaureate credit hours (total 45).

This introductory course provides the necessary foundational knowledge requisite for preclinical experience and early client care. It includes the theory and principles underlying the practice of dental hygiene based on the four phases of the Dental Hygiene Process of Care and the concept of Professionalism. Corequisites: HYGN 1232 and HYGN 1234.

**HYGN 1238 Dental Hygiene Clinical Practice I**  
**Cr. Hrs. 3**  
The course focus is on the cognitive, psychomotor and affective knowledge and skills requisite to the dental hygiene process of care. It includes the principles underlying the practice of dental hygiene and facilitates the development of a self-directed and self-aware professional. Prerequisites: HYGN 1234 and HYGN 1236. Corequisite: HYGN 1242.

**HYGN 1242 Dental Hygiene Theory and Practice II**  
**Cr. Hrs. 4**  
A continuation of foundational knowledge requisite for clinical care on less complicated clients that includes the theory and principles underlying the practice of dental hygiene based on the Dental Hygiene Process of Care. Prerequisites: HYGN 1234 and HYGN 1236. Corequisite: HYGN 1238.

**HYGN 1262 Dental Radiology**  
**Cr. Hrs. 3**  

**HYGN 1270 Biology of the Head and Neck**  
**Cr. Hrs. 3**  
Anatomy, physiology, histology and embryology of the head and neck.

**HYGN 1280 Microbiology and Infectious Diseases**  
**Cr. Hrs. 3**  
A study of different types of microorganisms. Infectious diseases will be discussed in terms of reservoirs, transmission, pathogenesis, treatment and prevention. Emphasis will be given to common communicable diseases, the oral microflora and its role in disease and health.

**HYGN 1292 Dental Hygiene Preclinical Restorative Techniques**  
**Cr. Hrs. 2**  
A study of the principles and techniques of restorative dentistry. Introduction information on restorative dentistry specialties.

**HYGN 1320 Dental Materials**  
**Cr. Hrs. 2**  
A study of the properties of materials used in the oral environment for restorative, prosthetic, orthodontic and preventive purposes. Laboratory demonstrations and exercises are designed to demonstrate the correct preparation and handling of dental materials.

**HYGN 1340 Communications**  
**Cr. Hrs. 2**  
This course provides an introduction to basic principles of communication in relation to everyday and professional interactions. The students are sensitized to the process of communication, its complexities and its related dynamics. Particular attention is given to enabling students to develop effective professional communication skills that have the potential to promote client compliance and harmonious working relationships.

**HYGN 1352 Community Health I**  
**Cr. Hrs. 3**  
An introductory, participatory course in community oral health promotion intended to inspire a sense of community responsibility in students as health professionals responding to community needs through classroom teaching, interviews and debates.

**HYGN 1360 Periodontology I**  
**Cr. Hrs. 2**  
A study of the normal tissues of the periodontium, and an introduction to periodontal diseases, their etiology, epidemiology and treatment, especially as these relate to dental hygiene practice. A critical analysis of periodontal cases included.

### Dental Hygiene Core (Minimum 12)

#### Mandatory Courses (2)
- HYGN 2380 Pain Management

#### Elective Courses
- HYGN 4412 Dental Hygiene Practice Management and Leadership
- HYGN 4460 Community Health Independent Study
- HYGN 4470 Community Health Independent Study (2)
- HYGN 4492 Current Issues in Dental Hygiene
- HYGN 4520 Advanced Independent Study
- HYGN 4530 Teaching Practicum
- HYGN 4540 Advanced Teaching Practicum
- HYGN 4550 Advanced Independent Study II

### Potential Electives - Not part of the Core Program (up to 21 Cr. Hrs)
- HYGN 4500 Advanced Oral Pathology (UBC)
- HYGN 4510 Microbiology & Immunology
- HYGN 4472 Assessment & Treatment Planning for Advanced Periodontal Disease

### Courses approved as Potential Electives outside of the School of Dental Hygiene
- NURS 1260 Human Growth & Development
- PHIL 1290 Critical Thinking
- SOC 2490 Sociology of Health & Illness
- SOC 3540 Sociology of Health Care Systems
- HNSC 1210 Nutrition for Health & Changing Lifestyles
- PHIL 2740 Ethics & Biomedicine

### SECTION 5: Dental Hygiene Course Descriptions-1000 Level

**HYGN 1232 Oral and Dental Anatomy**  
**Cr. Hrs. 3**  
This course consists of a self-study CD and laboratory work dealing with the normal development, morphology, structure, and functions of the dentition and related structures. Corequisites: HYGN 1234 and HYGN 1236.

**HYGN 1234 Preclinical Dental Hygiene**  
**Cr. Hrs. 2**  
This introductory course teaches the necessary dental hygiene skills in laboratory and preclinical settings. Students are introduced to foundational assessment and implementation skills necessary to begin client care at the novice level. Corequisites: HYGN 1232 and HYGN 1236.

**HYGN 1236 Dental Hygiene Theory and Practice I**  
**Cr. Hrs. 4**  
This introductory course provides the necessary foundational knowledge requisite for preclinical experience and early client care. It includes the theory and principles underlying the practice of dental hygiene based on the four phases of the Dental Hygiene Process of Care and the concept of Professionalism. Corequisites: HYGN 1232 and HYGN 1234.
SECTION 5: Dental Hygiene Course Descriptions-2000 Level

HYGN 2100 Dental Hygiene Portfolio  Cr. Hrs. 2
This two credit hour course houses the evaluation component of the programmatic portfolio of student competencies that all students commence at enrolment and complete prior to graduation.

HYGN 2280 Pharmacology  Cr. Hrs. 2
Drugs used in clinical practice; a general knowledge of drugs by groups with emphasis on agents such as local anesthetics, analgesics, and antibiotics used extensively in the practice of dentistry.

HYGN 2300 Pathology  Cr. Hrs. 3
A study of the principles of general and oral pathology involving pathologic mechanisms, disorders of physiologic systems, and pathologic conditions and diseases affecting oral and para-oral structures.

HYGN 2312 Dental Hygiene Clinical Practice II  Cr. Hrs. 4
This competency-based clinical course amalgamates theoretical knowledge and clinical skills in both general clinical and community based clinical settings. Students provide care to clients with moderate oral health needs. This course is evaluated on a pass/fail basis. Prerequisites: HYGN 1238 and HYGN 1242. Corequisite: HYGN 2314.

HYGN 2314 Dental Hygiene Theory and Practice III  Cr. Hrs. 4
Learning, motivation, and behaviour modification theories are applied to oral health promotion. Dental hygiene care plans are developed using a human needs model and process of care. Ethics, jurisprudence and practice standards are discussed. Prerequisites: HYGN 1238 and HYGN 1242. Corequisite: HYGN 2321.

HYGN 2316 Dental Hygiene Clinical Practice III  Cr. Hrs. 4
This course advances the student's clinical dental hygiene skills to a level of minimal competency. Students provide dental hygiene care to clients with high oral health needs to facilitate their attainment of optimal oral health. This course is evaluated on a pass/fail basis. Prerequisites: HYGN 2312 and HYGN 2314. Corequisite: HYGN 2318.

HYGN 2318 Dental Hygiene Theory and Practice IV  Cr. Hrs. 5
The oral health needs of persons with disabilities and the development of dental hygiene care plans to address those needs are discussed as well as issues of access to dental hygiene care, employment, quality assurance, and professional growth and development. Prerequisites: HYGN 2312 and HYGN 2314. Corequisite: HYGN 2316.

HYGN 2340 Periodontology II  Cr. Hrs. 2
Continuation of the study of etiology, diagnosis and treatment of periodontal disease.

HYGN 2350 Biology of Oral Tissues  Cr. Hrs. 2
Consideration of physiology of the oral environment and its microflora in relation to health, dental caries and periodontal diseases.

HYGN 2362 Community Health II  Cr. Hrs. 3
Student abilities to deliver community oral health education/promotion programs, with attention given to barriers and strategies used to meet the unique needs of target populations less likely to have optimal oral health are further developed. Prerequisite: HYGN 1352.

HYGN 2370 Nutrition in Dentistry  Cr. Hrs. 2
An examination of the fundamentals of nutrition and the relationship between nutrition and health within the context of the health professions. The focus is on nutritional strategies used to promote health and in the treatment of common health conditions. The primarily on-line content is followed up with a combination of oral health specific patient/clinical exercises for Dental Hygiene students. May not be held with HNSC 2170 or ORLB 2330, HNSC 2170, or the former ORLB 2150 or the former PHRM 2420.

HYGN 2380 Pain Management  Cr. Hrs. 2
This course is designed to enhance the dental hygiene student’s knowledge of the mechanisms of pain control through the administration of topical and local anesthetic agents. Emphasis will be placed on the pharmacology of dental anesthetic agents and their interaction with the client’s current conditions and medications.

SECTION 5: Dental Hygiene Course Descriptions-4000 Level

HYGN 4412 Dental Hygiene Practice Management and Leadership  Cr. Hrs. 3
This course is designed to provide the student with the necessary knowledge and skills to facilitate the transition to the practice environment. The focus of the course is leadership, workplace dynamics, management, developing alternate practice settings and working with third party payers. Oral health care management in a variety of organizations such as community health agencies, private practice, research and industry will all be discussed.

HYGN 4460 Community Health Independent Study  Cr. Hrs. 3
This course is a practicum and/or independent study course focusing on the design and/or implementation and evaluation of the health promotion program process in the field. Students may choose to host an oral health awareness raising event for the public, provide community-based oral health promotion activity at a selected site, develop a small-scale oral health promotion program for an underserved population group or a similar community-based project.

HYGN 4470 Community Health Independent Study II  Cr. Hrs. 3
This course is a continuation of HYGN 4460 (Community Health Independent Study) and provides a further opportunity for the student to build on the previous independent study course or focus on the design and/or implementation and evaluation of an additional health promotion program. In either case, students may choose from oral health awareness raising event for the public, community-based oral health promotion activity, small-scale oral health promotion programming or similar community oral health project.

HYGN 4492 Current Issues in Dental Hygiene  Cr. Hrs. 3
This seminar course focuses on current topics concerning the profession of dental hygiene in Canada and internationally. Exploration of global topics will enable the student to glean a broad view of the profession.

HYGN 4500 Advanced Oral Pathology  Cr. Hrs. 3
A web-based CD-ROM distance education course designed to present the clinical and pathobiologic aspects of diseases that affect oral and maxillofacial tissues or present with significant oral manifestations of systemic diseases. This course is presented in conjunction with the University of Manitoba and the University of British Columbia.

HYGN 4510 Microbiology and Immunology  Cr. Hrs. 3
This Web CT course is offered in conjunction with the University of British Columbia. Microbiological and immunological concepts that are the scientific basis for understanding human response in health and disease will be explored. This course builds on knowledge acquired from dental hygiene entry-to-practice level education and dental hygiene practice.

HYGN 4520 Advanced Independent Study I  Cr. Hrs. 3
This course will enable the degree-completion student to explore issues or areas of interest in dental hygiene with the mentorship of a dental hygiene faculty member. Dependent upon the extent of the project, students may enroll in either three or six hours of study.
HYGN 4530 Teaching Practicum  Cr. Hs. 3
This course provides students with a seminar course in clinical teaching methodologies and the opportunity to practice teach within an undergraduate dental hygiene program under the supervision and mentorship of dental hygiene faculty members.

HYGN 4540 Advanced Teaching Practicum  Cr. Hrs. 3
This course is a continuation of HYGN 4530 (Teaching Practicum) and provides the opportunity to extend the practice teaching experience into a second term, thus strengthening the individual’s skills as a dental hygiene educator. This experience will occur under the supervision and mentorship of dental hygiene faculty members.

HYGN 4550 Advanced Independent Study II  Cr. Hs. 3
This course is a continuation of HYGN 4520 (Advanced Independent Study) and provides the opportunity for the student to pursue a more complex project which cannot be completed within the first course. Students will have selected their project topic in HYGN 4520 and will continue their exploration and write-up of this topic with the guidance of a dental hygiene faculty mentor.

1.3 Professional Designations

Home economists in Manitoba, and other provinces, are regulated by legislation. Graduates may apply to the Manitoba Association of Home Economists (MAHE) for interim professional home economist (IPHE) status, and subsequently qualify as a professional home economist (PHEc).

SECTION 2: Admission Requirements for Family Social Sciences

Admission requirements are described on the Undergraduate Admissions website at http://umanitoba.ca/student/admissions/application/index.html.

General Entrance Requirements to the Bachelor of Human Ecology - Family Social Sciences Degree Program:

A minimum adjusted grade point average (AGPA) of 2.0 in at least 24 credit hours of University 1, including 6 credit hours from Arts and 6 credit hours from Science to total 12 credit hours, plus 12-18 credit hours of other University 1 courses, for a total of 24-30 credit hours. Students must complete at least 6 more credit hours of Arts or Science courses once admitted to the Faculty. Beginning in September, 2012, high school students will be eligible to apply for direct entry to the Degree Program. Detailed information is posted on the University website (above).

For students wishing to choose the focused approach for entry to the Bachelor of Human Ecology - Family Social Sciences Degree Program the course requirements for each of the programs or areas of concentration offered by the Degree Program are described in the Start Book at http://umanitoba.ca/firstyear.

Direct Admission into the Bachelor of Human Ecology - Family Social Sciences Degree Program from High School

To be eligible for admission based on high school, students must have:

General Requirements to the University of Manitoba, plus a minimum 85% average over the following, with no less than 60% in each course:

a. English 40S
b. Applied Mathematics 40S or Pre-Calculus Mathematics 40S

c. A third 40S course (Biology, Chemistry, Physics or Computer Science 40S recommended)

SECTION 3: Department Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Bachelor of Human Ecology - Family Social Sciences Degree Program has regulations and requirements, published below, that apply specifically to its students.

3.1 Prerequisite, Corequisite, and Course Availability: Definitions

Prerequisite: If a course is prerequisite to a second course, the prerequisite must be met in order to continue in the second course. The department giving the second course may require a minimum grade of 'C' in the first course to register in the second course. Some inactive (legacy) courses may be used as prerequisites.

Corequisite: If a first course is a corequisite to a second course, the first course (unless previously completed) must be taken in the same term as the second course.

Course Availability: Not all courses listed in this Calendar are offered every year. Students are referred to the on-line calendar for courses offered in the
year. Family Social Sciences courses at the 3000 and 4000 level are available
only to students registered in the Bachelor of Human Ecology - Family
Social Sciences Degree Program or one of the minors or options associated
with the Degree Program. Courses at the 3000 and 4000 level may be taken
with written permission from an Academic Advisor as long as there is space.

3.2 Scholastic Standards

Graduation and Grade Point Average

To graduate, a student must have passed 120 credit hours acceptable for
credit in the current degree program and have obtained a minimum of 240
quality points. This is equivalent to a Degree Grade Point Average of 2.0. A
pass indicates a grade of ‘D’ or better. A student’s Degree Grade Point
Average (DGPA) will be determined from the number of effective courses
which apply at a particular stage. The effective courses consist of all courses
passed, in addition to all failures which have not been cleared, or
substituted for, in the student’s record. A maximum of 150 credit hours (25
courses or the equivalent) may be attempted in order to obtain the 120
credit hours.

Assessment

The status of each student will be assessed in May of each year in which a
student is registered. All Direct Entry students will be assessed formally
upon completion of at least 24 credit hours in May of each year using the
Bachelor of Human Ecology - Family Social Sciences Degree Program
assessment standards. Assessments can include the following comments:

• Faculty minimum met (grade point average meets the standards
listed below);
• Dean’s Honour (see 3.9)
• Academic Warning
• Probationary status (see below)
• Suspension (see below)
• Suspension - all attempts used (see below)

Academic warning indicates a grade point average between the minimum
required at the effective credit hours (year) and the DGPA requirement of
2.0.

There is a maximum of 30 credit hours of attempts allowed for each
academic program; once those attempts are used (repeated courses,
grades of F or D), it is impossible to graduate.

Probationary Standing

Students must achieve or exceed the following standards at the specified
stages in their academic careers. Failure to obtain the standard results in
probation. Once placed on probation, students who fail to meet the
appropriate performance level at the next assessment following the next
registration will be academically suspended. A student is not permitted to
be on probation for two consecutive years.

<table>
<thead>

</tr>
<tr>
<td>9 – 21 credit hours</td>
</tr>
<tr>
<td>24 – 30 credit hours</td>
</tr>
<tr>
<td>33 – 60 credit hours</td>
</tr>
<tr>
<td>33 – 90 credit hours</td>
</tr>
</tbody>
</table>

Suspension

Suspended students must remain out of the Bachelor of Human Ecology -
Family Social Sciences Degree Program for one academic year from the
date of suspension and must apply for reinstatement at the Admissions
Office no later than May 1.

Where mathematically possible for a suspended student to complete the
degree by repeating failed courses, a suspended student shall be
automatically reinstated after remaining out of the Degree Program for one
calendar year, or by achieving a degree GPA above the probationary
standard.

Suspension (All Attempts Used)

Where it is mathematically impossible for a student to complete the degree
by repeating failed courses, a suspended student, after remaining out of the
faculty for one calendar year, may attempt reinstatement. By
completing at least 12 credit hours in one term with a minimum ‘D’ grade in
all courses and a term grade point average of at least 2.0, the student will
be reinstated. The student will start the program afresh, with previous
grades of ‘C’ or better applicable to the program.

3.3 Part-time Students

The maximum time allowed for completion of the degree is 10 years. After
completion of 24 credit hours, part-time students will be evaluated each
May and must conform to the minimum performance levels.

3.4 Direct Entry

All Direct Entry students will be assessed formally upon completion of at
least 24 credit hours in May of each year using the Bachelor of Human
Ecology Family Social Science Degree Program’s assessment
standards. Probationary standing is assessed using the criteria
listed. Direct Entry students who complete fewer than 24 credit hours by
May of their first year will not be formally assessed until the following
May. Students who complete 9 - 21 credit hours with a grade point average
of less than 2.0 will be placed on academic warning.

3.5 Repeating Courses

A student may repeat any course for the purpose of attaining a better
grade. A course or its equivalent that is repeated in Fall 2016 or later will
have the highest grade count. There are no supplemental examinations for
students who have failed final or deferred examinations.

3.6 Challenge for Credit

A student wishing to challenge a course for credit should contact an
Academic Advisor. Letter grades are granted upon completion of the
course that is challenged for credit. A list of courses for challenge is
available in the Advising Office. An application is required.

3.7 Transfer of Credit

See the chapters on Admissions and Academic Regulations and
Requirements at the beginning of this Calendar.

3.8 Appeals of Academic Regulations

The Committee on Student Standing considers petitions from students who
request special consideration with respect to rules and regulations
governing their programs of study and qualification for graduation.
3.9 Dean’s Honour List

Eligible students who achieve a term Grade Point Average of 3.5 or higher in at least 12 credit hours per term will be included in the Deans Honour List.

3.10 Degree With Distinction

Students who graduate with a degree GPA of 3.75 and higher will receive a degree with distinction.

3.11 Work Permit for Study Purposes

International students who are registering for courses or programs that require work placement must obtain a valid Work Permit, in addition to maintaining a valid Study Permit. Work placement includes, but is not limited to, any paid or unpaid practicum, internships, work experience, field placement, and co-op programs that are a required component for the completion of their degree, diploma or certificate. Please contact your program advisor or the International Centre for Students for further information.

3.12 Release and Indemnification Forms

In elective courses, students may be required to sign a release form for off-campus activities.

3.13 Written English and Mathematics Requirements

The written English and Mathematics requirements are satisfied by required courses HMEC 2000 and STAT 1000 within the Bachelor of Human Ecology Family Social Science Degree Program. HMEC 2000 will be available to students upon admission to the Degree.

SECTION 4: Program and Graduation Requirements

Introduction

For students entering the Bachelor of Human Ecology - Family Social Sciences Degree Program:

In order to qualify for a degree, students must complete the 120 credit hours specified for the selected program. Elective choices provided in each program can permit students to transfer between them; however, this opportunity decreases as student’s progress. Students who transfer to another program must meet the full requirements of that program. There is a quota in effect for intake to each program per academic year. The quota may affect movement into a program after the September intake.

4.1 Advisement

The Bachelor of Human Ecology Family Social Sciences Degree Program will provide entering students with orientation information and will refer a student to a program advisor if the student requests. All returning students in the Degree Program must submit a program plan for the succeeding year before the start of registration.

4.2 Faculty Program Requirements

The following are the guidelines for the program requirements in the Degree Program. The courses outlined in the sections which follow, meet these basic requirements.

Admitted in September 2015 or Later:

All students complete a Degree Program core of 9 credit hours consisting of:

<table>
<thead>
<tr>
<th>Course Number</th>
<th>Course Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>HEAL 2600</td>
<td>Integration of Health Determinants of Individuals</td>
</tr>
<tr>
<td>HMEC 2000</td>
<td>Research Methods and Presentation</td>
</tr>
<tr>
<td>HMEC 3000</td>
<td>Introduction to Social Epidemiology</td>
</tr>
</tbody>
</table>

- Plus a minimum of 51 additional credit hours within the Degree Program;
- Plus a minimum of 27 additional credit hours outside the Degree Program of which at least 6 credit hours must be from the Faculty of Science and six from the social sciences;
- Plus a minimum of 12 additional credit hours of free electives leading to a degree requirement of 120 (123) credit hours.
- Notes:
  - Students admitted before September, 2005 and graduating after May, 2005, will make the following program adjustments:
  - Family Social Sciences students must complete an additional 3 credit hours of FMLY electives at the 3000-4000 level.
  - Students admitted between September 2005 and September 2015 are urged to seek academic advising assistance for advice regarding completion of core course requirements.

4.3 Program Electives

Courses within each program fall into one of three categories:

- Program electives must be chosen from within the program department.
- Outside electives must be chosen from a Faculty other than the Bachelor of Human Ecology Family Social Sciences Degree Program.
- Free electives may be chosen from within or outside the Degree Program.

4.4 Family Social Sciences

Head: Stephen Moses - Community Health Sciences

Applying knowledge from the social and physical sciences, students in Family Social Sciences examine factors affecting human psychosocial health and wellbeing. They study human development from infancy to old age within the context of families, communities, and culture.

Students are required to choose at least one area, or option, in which to focus their studies. The name of their option will appear as a “comment” on their transcripts. They may select from the following options: 1) Aging and Developmental Health Option; 2) Child and Youth Developmental Health Option; 3) Family Economic Health; 4) Family Violence; 5) Social Development as well as the Interfaculty Option in Aging. Family Social Sciences graduates are permitted to complete any option after their degree as a Special Student. Not every Family Social Sciences course will be offered every year. A chart providing course rotation information is available on the Family Social Sciences web page.

The Family Social Sciences program can provide students with academic preparation or complementary courses for programs such as Law, Social Work, Education or Graduate Studies.

Students interested in Family Social Sciences are also advised to review the Bachelor of Health Studies, which is part of the Interdisciplinary Health Program.

4.4.1 Students Admitted in September 2015 or Later

Courses to be taken by all Family Social Sciences students:
### 4.4.2 Aging and Development Health Option

<td></td>
</tr>
<tr>
<td>Outside Electives</td>
<td></td>
<td>12 – 15</td>
</tr>
<tr>
<td>Free Electives</td>
<td></td>
<td>27</td>
</tr>
</tbody>
</table>

**Notes:**
If students choose ECON 1010 and 1020 (former 1200) or ECON 1210 and 1220, 12 credit hours of outside electives are required.

All courses listed in the general Family Social Sciences section (above) are required. In addition, students must choose at least one area (Option) in which to focus their studies. In the following section, the courses required to fulfill each Option are listed. They will partially meet department, outside and free elective requirements. More courses will be required to complete the 120 credit hour degree. Students are encouraged to take more than one Option. Each Option must consist of 18 non-overlapping credit hours; that is, no course can satisfy the requirement of more than one Option.

* Any non-required FMLY course is a Bachelor of Human Ecology (Family Social Sciences) program elective. At least one of the non-specified program electives must be at the 3000-4000 level. For more information, students are asked to contact the Academic Advisor for the Bachelor of Human Ecology Family Social Sciences Degree Program.

4.4.3 Child and Youth Developmental Health Option

<table>

### 4.5 The After Degree Program in Family Social Sciences

An After Degree Program (ADP) in Family Social Sciences is offered to students who have completed a previous undergraduate degree. ADP students must complete 60 credit hours in total to earn their second degree in Family Social Sciences. All Family Social Sciences U1 prerequisites are waived. In order to facilitate ADP students completing the program in a timely manner, they will automatically be permitted (without special permission from the course instructor) to take Family Social Sciences 2000 level prerequisites as corequisites for any required Family Social Sciences 3000 and/or 4000 level courses. Please consult with the Academic Advisor when planning programs prior to registration. ADP students are required to choose at least one option and meet its requirements at the second year level and beyond. These 18 credit hours may include courses external to the Bachelor of Human Ecology Social Sciences Degree Program that are required to complete an option. If a second option is not chosen, then these credit hours must be taken within the program. There are no free electives in the ADP.

Students admitted in September 2015 or Later

Bachelor of Human Ecology Family Social Sciences Degree Program Core Courses (any 6 credit hours. See note 3):

At least 6 credit hours from:

Family Social Sciences Option (see note 6) 15

Family Social Sciences Electives (see note 7) 12-15

STAT 1000 Basic Statistical Analysis (see note 8) 3

TOTAL 50

NOTES:
1. The same entrance requirements will be applied to ADP students in order to maintain current Degree Program standards.

2. Basic social science knowledge is assumed because ADP students have previously completed an undergraduate degree; waiving U1 requirements for FSS courses acknowledges the skills, background and maturity of this particular group of students.

3. This choice provides students who have previously taken a research methods course with the option of avoiding redundancy in their program. Students are free to take all three core courses if they feel it would benefit them. If students select 9 credit hours of core courses, the FSS electives component is reduced to 15 credit hours.

4. This set of courses is currently required of all undergraduate FSS students and is required for students in the ADP.

5. Students are required to take a minimum of any two (6 credit hours) of the introductory level courses across options. Review the list of options found in the 120 credit hour undergraduate degree program to assist with planning for prerequisites for higher level courses.

6. Each FSS option is a total of 18 credit hours; ADP students will have taken at least one 2000 level course (3 credit hours) required by the chosen option as part of their program requirements, leaving the remaining 15 credit hours to be completed to fulfill the option. Completion of the option may include courses external to the Bachelor of Human Ecology Family Social Sciences Degree Program that are required to complete an option.

7. ADP students are encouraged to specialize in two options simultaneously to strengthen and broaden their expertise. If a second option is chosen, these credit hours may include courses external to the Bachelor of Human Ecology Family Social Sciences Degree Program that are required to complete the option. If students have completed the 2000 level course required for the second option, the requirement to complete the option is 15 credit hours. If a second option is not chosen, then these credit hours must be taken within the department.

8. Students who have previously completed an undergraduate statistics course can either transfer it in directly (if already assessed as equivalent) or can request to have it assessed for advanced standing; if successful, students will be required to add 3 credit hours to their program from courses selected from Family Social Sciences.

ADP in FSS is 60 credit hours. If students have taken any of the required courses for this degree, they can be transferred in. ADP students will need to take additional courses in order to fulfill the University of Manitoba’s Residency Requirement. This requirement states all students must complete at least 60 credit hours in the Bachelor of Human Ecology - Family Social Sciences degree program at the University of Manitoba. Students may want to discuss additional courses with the Academic Advisor’s office.

4.6 The Family Social Sciences Minor

A minor in Family Social Sciences is offered by the Bachelor of Human Ecology Family Social Sciences Degree Program. Students must complete 18 credit hours, distributed as follows: Six (6) credit hours in Family Social Sciences at the 1000 level, and at least three (3) credit hours in Family Social Sciences at the 2000 level, and at least three (3) credit hours in Family Social Sciences at the 3000 or 4000 level, with no more than 6 credit hours at the 1000 level.

Students must check with their home Faculties to see if the Family Social Sciences minor is available in their programs.

4.7 Interfaculty Option in Aging

An Option in Aging is offered by and in the following faculties, schools, and colleges: Arts, Rady Faculty of Health Sciences: Bachelor of Human Ecology Family Social Sciences Degree Program, Interdisciplinary Health, Nursing, Kinesiology and Recreation Management, Social Work, and Agricultural and Food Sciences: Bachelor of Sciences in Human Nutritional Sciences Program, Bachelor of Science in Textile Science Program.

To complete the option, students must complete each of the following requirements:

<table>
<thead>
<tr>
<th>Interfaculty Option in Aging</th>
</tr>
</thead>
<tbody>
<tr>
<td>Required Courses (6 credit hours):</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

Upon completion of these requirements, a comment will be added to the student’s transcript.

4.8 The Minor in Management

A Management Minor is offered by the Asper School of Business. Bachelor of Human Ecology Family Social Sciences Degree Program students may complete this Minor as part of the electives portion of their programs. The Minor will consist of any 18 credit hours of Management courses. Students must meet prerequisites for all courses.
4.9 The Voluntary Minor

Students in the Bachelor of Human Ecology Family Social Sciences Degree Program may declare and complete a Minor from departments and interdisciplinary programs in which a Minor is offered. The Family Social Sciences Minor is available through the Bachelor of Human Ecology Family Social Sciences Degree Program. Information about Minors in programs is found in the appropriate description of departmental/school/faculty program offerings in the Undergraduate Calendar.

Completion of the Minor is entirely optional. Students may not, however, declare both their Major and Minor from the same department/interdisciplinary program. No course may be used as part of a prescribed program in the Bachelor of Human Ecology Family Social Science Degree Program and also be part of a prescribed Minor. For example, if a course in Chemistry is part of a student's degree requirements in the Bachelor of Human Ecology Family Social Sciences Degree Program, it cannot be used as part of a Minor in another program. Completion of a Minor may require that a student take more than the minimum number of credit hours for graduation.

SECTION 5: Family Social Sciences Course Descriptions-1000 Level

FMLY 1000 Families in Contemporary Canadian Society Cr. Hrs. 3
(Formerly FMLY 1020) This course provides an introduction to issues in contemporary families from an interdisciplinary perspective. Changing and diverse family forms and experiences are reviewed. An overview of issues pertinent to family well-being, including but not limited to immigration, poverty, homelessness, racism, addiction, disability, divorce, and physical and mental illness is provided. Not to be held with FMLY 1020.

FMLY 1010 Human Development in the Family Cr. Hrs. 3
Introductory survey of key aspects of human development processes within the family context from a life span perspective. Not to be held with NURS 1260.

FMLY 1012 Introduction to Social Development Cr. Hrs. 3
This course is an introduction to Social Development with a particular emphasis on families and communities. Social development is concerned with the advancement of the common good, the effective management of social problems, the meeting of human needs, and the equitable distribution of society's resources. As such, this course explores the social factors and conditions that promote or hinder social development and how this affects the well-being of individual, families, and communities in contemporary societies. Not to be held with FMLY 1900.

FMLY 1420 Family Management Principles Cr. Hrs. 3
An introductory course that uses an ecosystem perspective resources, decision-making, planning, implementing, evaluating, and communication within family contexts. Applications to balancing work and family, individual and family stress, family finance, environmental issues, and the use of time and human resources will be made.

SECTION 5: Family Social Sciences Course Descriptions-2000 Level

FMLY 2012 Development, Conflict, and Displacement Cr. Hrs. 3
The course is an introduction to development, conflict, and displacement as they affect individuals, families and communities. Specifically, this course examines the current phenomenon of induced displacement due to social conflicts, natural disasters, or uneven development in developing countries. Students will examine concepts and issues arising from induced displacement and explore community based responses to this problem. Not to be held with FMLY 2900. Prerequisite: 1012 or consent of the instructor.

FMLY 2400 Family Financial Health Cr. Hrs. 3

A survey of topics that have an impact on the financial health of Canadian families, including personal money management, mortgage financing, credit and debt, educational and retirement planning, taxation, insurance, savings and investments. The course prepares students to help families maximize resources and increase their financial literacy. Prerequisite: FMLY 1420. Not to be held with the former FMLY 2070.

FMLY 2500 Diversity and Families Cr. Hrs. 3
(Formerly FMLY 2350) Using the theoretical frameworks of intersectionality and social ecology, this class addresses how diversity in Canada is influenced by age, gender, ability, ethnicity, race, as well as family relationships, institutions and social policies. A focus on human rights and anti-racism education is emphasized. Not to be held with FMLY 2350. Prerequisite: FMLY 1000 (FMLY 1020) or FMLY 1010 or equivalent.

FMLY 2600 Foundations of Childhood Developmental Health Cr. Hrs. 3
This course examines the theoretical and empirical foundations of childhood development and their implications for promoting developmental health. Specifically, the course considers the biological and environmental factors that influence developmental health given physical, cognitive, emotional and social development from the prenatal period to middle childhood. May not be held with PSYC 2290 or PSYC 2291. Prerequisite: FMLY 1010.

FMLY 2800 Family Violence Cr. Hrs. 3
A survey of the extent and nature of various forms of family violence across the life course. Topics include physical and sexual child abuse, sibling violence, partner violence, and elder abuse. Emphasis is on prevalence, incidence, causes, consequences and solutions. Prerequisite: FMLY 1010 or FMLY 1000 (FMLY 1020) or PSYC 1200 or SOC 1200.

SECTION 5: Family Social Sciences Course Descriptions-3000 Level

FMLY 3012 Theories of Social Development Cr. Hrs. 3
This course is a survey of social development theories that have influence the study and practice of development since the 1950s. It addresses the question of why theories of social development are necessary and why different theories emerged at particular times in history. This course examines explanations of development and underdevelopment as they impact on individuals, families and communities. Not be held with FMLY 3900. Prerequisite: FMLY 1012.

FMLY 3220 Death and the Family Cr. Hrs. 3
An examination of dying and death of family members throughout the family life cycle. Specific topics included are the meaning of death, the process of dying, caring relationships, grief and bereavement. Prerequisite: FMLY 1000 (FMLY 1020) or PSYC 1200 or SOC 1200.

FMLY 3240 Families in Later Years Cr. Hrs. 3
An investigation of family issues in the later years of life, such as housing, intergenerational relations, adjustment to retirement, sibling relations, grandparenting, and death. Students may not hold credit for FMLY 3240. Prerequisites: [FMLY 1010 and FMLY 1000 (FMLY 1020)] or PSYC 1200 or SOC 1200.

FMLY 3330 Parenting and Developmental Health Cr. Hrs. 3
Examines parenting and its influence on developmental health, with consideration of change across time, the context in which parenting occurs, and the effect of the parent-child relationship on developmental health. Prerequisites: FMLY 2600 or FMLY 3600.

FMLY 3400 Families as Consumers Cr. Hrs. 3
An examination of the factors that influence the consumer behaviour of individuals and families across the life course, with particular attention to the situation of vulnerable consumers. Theory, education, policy and practice are related to contemporary consumer issues and the impact of consumption behaviour on the environment. Prerequisites: [FMLY2400 or FMLY 2070] and [ECON 1210 or ECON 1220 or ECON 1010 or ECON 1020]. Not to be held with the former FMLY 3450.

FMLY 3470 Selected Studies in the Family I Cr. Hrs. 3
The opportunity to carry out an individual study in the area of the family of particular interest to the student. When enrolment warrants, the department may offer selected topics in a regular course format. Prerequisite: consent of instructor.

FMLY 3600 Adolescents in Families and Society Cr. Hrs. 3
This course is designed to help students understand the nature of adolescent relationships with their families in communities. The application of theory and research on adolescent relationships to professional practice with families and communities is emphasized. Prerequisite: FMLY 2600 and completion of 54 credit hours.

FMLY 3750 Fundamentals of Health Promotion Cr. Hrs. 3
This course provides an interdisciplinary life course perspective on theories and methods of health promotion. Current research, practices and policies in health promotion targeting individuals, families and communities will be critically reviewed with regard to issues of gender, culture, age, functional ability, socio-economic status, sexual orientation, and other determinants of health. Prerequisites: HEAL 2600 or KPER 1200 (or the former PERS 1200) or KPER 1400 (or the former PERS 1400).

FMLY 3780 Introduction to the Development of Programs for Children and Families Cr. Hrs. 3
An introduction to the theory and practice of program development with special emphasis on programs for children and families. The course will cover techniques for conducting need assessments, as well as the process of planning and implementing programs to address community need. Prerequisite: HMEC 2000 or HMEC 2050.

FMLY 3790 Introduction to the Evaluation of Programs for Children and Families Cr. Hrs. 3
An introduction to the theory and practice of program evaluation with special emphasis on child and family programs. Considers the purpose of evaluation, types of evaluation, evaluation design and analysis, and the evaluation process. Prerequisites: HMEC 2000 or HMEC 2050.

FMLY 3800 Conflict Resolution in the Family Cr. Hrs. 3
Students will examine the nature and development of conflict in family relationships throughout the life span. Implications of conflict for the quality of family relationships and individual development will be addressed. Prerequisite: FMLY 2800 and completion of 54 credit hours.

FMLY 3802 Intimate Partner Violence Cr. Hrs. 3
A critical examination of theory and research on violence in intimate relationships. Topics will include violence in dating, common-law, marital, ex-partner and same-sex relationships. Prerequisite: FMLY 2800.

FMLY 3806 Children, Violence and Rights Cr. Hrs. 3
Violence against children in their families takes many forms, from sexual exploitation to honour killings. We will explore, through a child rights lens, the forces contributing to violence against children, its impact on human lives, and approaches to prevention being implemented around the world. Prerequisite: FMLY 2800. Not to be held with FMLY 3804.

SECTION 5: Family Social Sciences Course Descriptions-4000 Level

FMLY 4012 Social Development Policies Cr. Hrs. 3
This course examines the formulation of social development policies and the impact of these policies on the well-being of individuals, families, and communities. The course uses a seminar format to foster students' capacity to understand and examine policy issues. Students will develop skills in understanding, analyzing, and formulation social development policies. Actual social development case studies will be evaluated and alternative family and community oriented policies discussed. Not to be held with FMLY 4900. Prerequisite: FMLY 1012.

FMLY 4220 Aging and Risk in a Global Context Cr. Hrs. 3
This course will take an interdisciplinary perspective on definitions of risk associated with a variety of determinants that shape the daily lived experience of older adults, their families and communities, and the institutions that care for them. Students will evaluate programs, policies and research, and engage in a final project of their choice. Prerequisite or Corequisite: HMEC 2650 or SWRK 2650 or REC 2650 or NURS 2610 or KIN 2610.

FMLY 4300 Field Experience Cr. Hrs. 6
Provide students with field experience in a supervised setting. The course consists of 120 hours of supervised work in an assigned setting and seminar time with peers and field experience coordinator. Grade is pass/fail. Prerequisite: 84 credit hours and consent of instructor.

FMLY 4330 Management of Family Stress Cr. Hrs. 3
Theories which influence family behaviour during stress are discussed, and coping/managerial skills to mitigate the effects of the stressors are examined. Stress management advice from agencies and in educational settings is analyzed. Prerequisite: FMLY 1000 (FMLY 1020).

FMLY 4400 Family Economics: Poverty and Wealth Cr. Hrs. 3
Analysis of principles, major problems and trends in the economic welfare of individuals and families in both the Canadian and global economies. Emphasis on families and their relationships to the economy such as income inequality, family economic policy, human capital, poverty and resource distribution within families. Prerequisites: [FMLY 2400 or FMLY 2070] and [one of ECON 1210 or ECON 1220 or ECON 1010 or ECON 1020].

FMLY 4470 Selected Studies in the Family II Cr. Hrs. 3
The opportunity to carry out advanced study in the area of the family of particular interest to the student. When enrolment warrants, the department may offer selected topics in a regular course format. Prerequisite: consent of instructor.

FMLY 4480 Work and Family Issues Cr. Hrs. 3
An exploration of the interface between paid work and unpaid work and families in the Canadian and international contexts. Topics include demographic trends; parenting, child and elder care; management of work-family conflict; development of workplace solutions; and social policy implications. Prerequisite: FMLY 2400 (or FMLY 2070) and 84 credit hours.

FMLY 4500 Senior Thesis Cr. Hrs. 3
The preparation and presentation of a comprehensive review of the literature and an empirical investigation of an approved topic. Prerequisite: Registered in the final year of the Family Social Sciences program and consent of Department Head. Application required. Enrolment limited.

FMLY 4600 Risk and Resilience in Behavioural and Social Development Cr. Hrs. 3
The development of behavioural and social difficulties are examined from a risk and resilience perspective. The interaction of factors at all levels of the human ecological system are considered in terms of their impact on increasing risk and/or building resilience in children and youth. Prerequisite: FMLY 2600

FMLY 4602 Family Relationships, Health and Well-being Cr. Hrs. 3
This course provides an in-depth survey of the interaction between family relationship dynamics, health and well-being across the life course period. The influence of family members on health-related behaviours is reviewed and preventive family-based interventions are evaluated. Prerequisite: FMLY 3600.

FMLY 4604 Children in Adversity  Cr. Hrs. 3
Millions of children live with violence, trauma and other adverse circumstances. We will explore the interactions among individual, family, cultural, legal and policy factors as they affect children's developmental pathways in the face of adversity. Prerequisite: FMLY 2600 or FMLY 3600. May not be held with FMLY 4600.

FMLY 4606 A Social Justice Perspective on Indigenous Maternal and Child Health  Cr. Hrs.3
This course examines the local and global challenges regarding the health care and health care needs of Indigenous peoples, with particular attention to childbearing women, new mothers, and young children. Interdisciplinary theories and methods applied to the study of Indigenous peoples are critically evaluated from Indigenous and social justice perspectives. Prerequisite: FMLY 2500(FMLY 2350) or NURS 3330 or NATV 1220 or NATV 1240.

FMLY 4800 Senior Seminar in Family Violence and Conflict Resolution  Cr. Hrs.3
Advanced study in the areas of family violence and/or conflict resolution. Special emphasis is placed upon current research and/or practice. Prerequisite: FMLY 3800 and completion of 72 credit hours.

FMLY 4802 Family Violence Prevention  Cr. Hrs. 3
Family violence prevention theories, research, practices and policies will be critically reviewed with regard to issues such as gender, culture, sexual orientation and others. Prerequisites: FMLY 2800. Not to be held with the former FMLY 4800.

SECTION 1: Medical Education

1.1 Mission Statement

The Mission of the Max Rady College of Medicine is to develop and deliver high quality educational programs for undergraduate and postgraduate students of medicine and medical rehabilitation, for graduates and post-doctoral fellows in the basic medical sciences and for physicians in practice; conduct research and other scholarly inquiry in the basic and applied medical sciences; and, contribute to the improvement of health status in Manitoba and beyond by providing advice, disseminating information to health professionals and the public, and by cooperating in the planning for the development and delivery of health care services.

The Mission of the Undergraduate Medical Education Program is to develop, deliver and evaluate a high quality educational program for the MD Program.

Our Graduates will approach their profession with a spirit of Discovery by:
- Welcoming and adapting to the ever-changing nature of medicine
- Appreciating the continuum of basic science and human wellness
- Building a broad and unbiased foundation of medical knowledge
- Maintaining openness to practice medicine and conduct broader academic work in urban hubs and in rural and Northern communities, in Canada and around the world

Our Graduates will embrace Scholarship by:
- Pursuing academic excellence at every stage of their careers as clinicians, researchers, academics, and administrators
- Appropriately applying medical research and innovation to patient care
- Committing to the practice of lifelong learning as professionals
- Committing to the lifelong maintenance of an evidence-based practice
- Healing through knowledge and compassion and acting as educators for patients, allied health professionals, and one another

Our Graduates will lead and collaborate within their communities by:
- Advocating for the health and safety needs of individual patients and collective populations
- Communicating effectively with all health care professionals, including generalists, specialists, and allied professionals and those in related sectors
- Exemplifying professionalism and sustaining a climate of respect in all aspects of their lives
- Fostering an atmosphere of cultural safety for all patients and populations by practicing with open-mindedness and unconditional goodwill.
- Providing expert and compassionate medical care to diverse patient populations in Canada and beyond
- In doing so, graduates of the Max Rady College of Medicine at the University of Manitoba will become exemplary physicians prepared to undertake the responsibilities entrusted to them

Medical education in Manitoba is designed to provide students with the knowledge and experience they need to practise medicine in a profession where new developments in science and public health policy create an ever-changing environment. In the first two years of the program, referred to as Pre-Clerkship, the subject matter is divided into Modules comprised of courses which cover core concepts in Human Biology, Health and Disease. The final two years, referred to as Clerkship are spent in direct contact with patients and doctors in a range of rural and metropolitan clinical settings in
which students gain experience with increasing responsibility for patient care and management.

1.2 History of the College

Medical education in Manitoba had its beginnings in 1883 when 13 physicians applied to the local legislature for a charter to form the Manitoba Medical College. The college was chartered as an affiliate of the University of Manitoba. The number of students registered for the first session was 15, and the number in attendance at each session from that date to the present has ranged from 15 to 440. The university came to the aid of the Medical School from time to time by furnishing full-time professors in chemistry, physiology, pathology, bacteriology, and zoology. With the session of 1918-1919 the Manitoba Medical College ceased to exist as a separate institution. It made a gift of all its property and equipment to the University of Manitoba “on condition that the university establish a Faculty of Medicine, and carry on the work of medical education in an efficient manner.”

In 1921, a building for the accommodation of the departments of Physiology, Biochemistry, and Bacteriology was erected on the old Medical School property, and a further unit was completed in February, 1922. In January, 1956, the new wing of the medical building was officially opened, which included new quarters for the Medical Library. In February, 1965, the Chown Building was opened providing five-stories of administration offices and space for Pharmacology and Therapeutics and the Computer Department for Health Sciences. The Basic Medical Sciences Building, containing undergraduate teaching facilities, opened in 1973. It provides accommodation for anatomy, biochemistry, physiology, and medical microbiology. The Brodie Centre officially opened in the spring of 1996; it provides a library, research and recreational facilities. In 2004, the Office of the Dean and the Education Offices relocated to new administrative facilities in the Brodie Centre. General teaching facilities are located in the medical buildings, and facilities for clinical instruction are provided in the teaching hospitals affiliated with the University of Manitoba and in related institutions. The varied settings in which medicine is practised in Winnipeg and in rural and northern Manitoba also provide students with the opportunity to study community medicine outside the major teaching institutions.

1.3 Neil John Maclean Health Sciences Library

The Neil John Maclean Health Sciences Library provides access to a wide range of evidence-based medicine resources. Online resources include core medical textbooks such as *Harrison’s Principles of Internal Medicine*, drug reference resources such as Lexi-Comp and RxTx and clinical point of care tools such as *UpToDate*, *First Consult*, *Clinical Key*, and *Access Medicine*. The Library subscribes to over 4,500 online journals and a number of essential medical databases such as PubMed, EMBASE, Scopus, and the Science Citation Index Expanded through Web of Science. Students can access all of the online resources on-campus using the Bannatyne campus wireless network and from home with a UMNetID. The Library’s facilities include an assistive technology workstation, 2 computer labs with 15 computers each, 12 seminar rooms, which can be booked by students for group study, 92 study carrels, and 24 computers for walk-in use. Librarians offer training on the use of key medical resources and information management both as part of the curriculum and in regularly scheduled sessions throughout the year.

1.4 Graduate Studies

More than 350 graduate students are doing research and pursuing Masters and Doctoral degree programs in the Max Rady College of Medicine. Their research training programs offer opportunities to conduct research at a number of sites including the Bannatyne Campus, the National Virology Laboratory and the St. Boniface Research Centre. Graduate programs are available in the Departments of Human Anatomy and Cell Science, Biochemistry and Medical Genetics, Community Health Sciences, Immunology, Medical Microbiology, Pathology, Pharmacology and Therapeutics, Physiology and Pathophysiology and Surgery.

1.5 Master of Physician Assistant Studies

The Master of Physician Assistant Studies program is the first graduate level program for Physician Assistant Education in Canada. Upon completion of the comprehensive two year program, graduates receive a Master of Physician Assistant Studies degree. The program educates outstanding Physician Assistant clinicians who serve their communities and advance the profession in Manitoba and Canada. The program also nurtures the future leaders of the profession, and leads the field in academic preparation of Physician Assistants in Canada. For further information, please refer to the Physician Assistant Studies Program website. Please refer to Graduate Academic Calendar Physician Assistant Program Info.

1.6 Department of Medical Education

The mandate of the Department of Medical Education is to work in a collaborative manner across all programs and schools within the Max Rady College of Medicine to provide expertise and services related to medical education including curriculum development, faculty development, and design of evaluation tools and assessment. The second purpose of the Department of Medical Education is to engage in research and scholarly activity related to medical education.

1.7 Continuing Professional Development

The Continuing Professional Development Program (Medicine) is an accredited academic unit responsible for creating a variety of certified educational programs for physicians and other primary care practitioners throughout the Province of Manitoba and North-western Ontario. These educational sessions incorporate plenary, small group, interactive and e-learning activities to a consistently growing audience. Each year, CPD-Med develops and co-develops over one hundred educational sessions. In addition, the program provides support in the form of event planning, organization of clinical traineeships and coordination to externally developed CPD events on a fee-for-service basis, as well as, providing accreditation of CPD events on behalf of the Royal College of Physicians and Surgeons of Canada (RCPSC). CPD-Med also provides assistance in maintaining educational standards for accredited regular scheduled series programs in a number of departments in the Max Rady College of Medicine.

SECTION 2: Admission to the Max Rady College of Medicine

The Applicant Information Bulletin is the official policy document for Admission. The document can be found at: http://umanitoba.ca/faculties/health_sciences/medicine/admissions/8830.html. The Applicant Information Bulletin is reviewed and updated annually and may be subject to change.

Doctor of Medicine (M.D.)

BSc (MED)- Bachelor of Science in Medicine
MD/PhD

Minimum time to graduation: Four years in the Max Rady College of Medicine following an undergraduate degree.

Manitoba Applicant Pool
Bilingual Stream

Out of Province Applicant Pool
First Nations, Metis and Inuit Applicant Pool

2.3 Eligibility Requirements for Admission

Refer to the Applicant Information Bulletin for the eligibility requirements:
http://umanitoba.ca/faculties/health_sciences/medicine/admissions/8830.html

2.4 Additional Requirements

- Technical Standards Requirement; the Max Rady College of Medicine has identified the requisite skills and abilities for admission, promotion and graduation in the MD program; these can be found at http://umanitoba.ca/faculties/health_sciences/medicine/education/undergraduate/policies.html
- Accommodation Policy; the Max Rady College of Medicine supports individuals with disabilities who may require accommodation to meet the requisite skills and abilities; the policy can be found at http://umanitoba.ca/faculties/health_sciences/medicine/education/undergraduate/policies.html
- Adult Criminal Record, Child Abuse Registry and Adult Abuse Registry Checks; all applicants must complete a self-declaration regarding adult criminal records, pending criminal charges and registration on the child abuse registry as an offender; this self-declaration must be done at the time of application; an adult criminal record check, declaration of pending criminal charges and child abuse registry self-check are required at the time of registration and annually thereafter;
- Professional Registration; all medical students must be eligible for, and become registered with the College of Physicians and Surgeons of Manitoba (CPSM) by the time of registration; eligibility requirements can be viewed on the CPSM website at: www.cpsm.mb.ca;
- All applicants must have participated and been successful in the Multiple Mini Interview (MMI);
- Immunization requirements can be viewed at http://umanitoba.ca/faculties/health_sciences/medicine/education/undergraduate/immunestatus.html
- Students must have CPR designated as “Health Care Provider Level C” acceptable to the standards of the Heart and Stroke Foundation at the time of registration in Year I. Students must have annual renewal of their CPR registration acceptable to the standards of the Heart and Stroke Foundation throughout the Undergraduate Medical Education program. Evidence of current renewal must be provided on an annual basis prior to the beginning of the academic year. Failure to comply, may result in exclusion from all academic programs until renewal is obtained.

2.5 Eligibility Requirements for Transfer

Applications for transfer are only accepted from students registered and in good standing at an LCME accredited medical school. Transfers can only be considered if there is a seat available through attrition. Details regarding the transfer policy can be found at the following link: http://umanitoba.ca/faculties/health_sciences/medicine/admissions/8835.html

SECTION 3: Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. Max Rady College of Medicine regulations and requirements change from time to time. Detailed information concerning the general regulations governing admissions, evaluation, academic progress and withdrawal for an undergraduate medical student may be obtained from the Undergraduate Medical Education Office. These regulations include the following:

- A student will not be permitted to register unless the student is in good academic and financial standing from the previous year.
- No year may be repeated more than once.
- A student who withdraws from the Max Rady College of Medicine without prior written notice will be considered to have terminated connection with the College and will not be eligible for re-admission.
- A student who withdraws from the College having given due notice of intention to withdraw is eligible for re-admission. If re-admission is approved the student will be required to conform to the rules and regulations, fee schedules, sequence of courses, in effect at the time of such readmission.
- A student may, after completion of the work of a full year, be granted a leave of absence for one year subject to certain conditions related to the purpose of the leave of absence and on subsequent registration will be required to conform to the rules and regulations, fee schedules, and sequence of courses in effect at the time of such registration. The Leaves of Absence (LOA) Policy can be viewed at the following link.
- A student who has been or expects to be prevented from attending any regular examination by reason of illness or other cause beyond the student’s control should at once notify the Associate Dean, Student Affairs and must abide by the requirements of the Deferred Examination Policy and Procedures found at the following link.
- The College Executive Council reserves the right to require a student to withdraw from the program for which the student is enrolled when it believes the student to be unsuited, on general considerations of scholarship, or conduct for the profession, or the field within the profession, to which the program of studies normally leads. This right prevails notwithstanding any other provision in the college regulations.
- Each student is required to present the personal and professional appearance, attitudes and behaviours expected of members of the medical profession. The Max Rady College of Medicine has a process through which lapses in professionalism are reported, investigated, and, when necessary, will result in remedial or punitive actions up to and including dismissal. The College of Medicine Professionalism website provides additional information at the following link.
- Each student must complete the undergraduate program for the M.D. degree of the Max Rady College of Medicine within seven years of entry to first-year Medicine, exclusive of those students undertaking additional academic pursuits which are acceptable to the Progress Committee. The Leaves of Absence (LOA) Policy can be viewed at the following link. When a student fails to complete the program, Progress Committee will review the academic record of the student. The reasons for the prolonged duration of the student’s program are confidential but must be approved as valid by the Associate Dean, UGME.

3.1 Requirements for the Degree of Doctor of Medicine (M.D.)
Every candidate for the degree of Doctor of Medicine must have satisfied the following requirements:

- Subsequent to the successful completion of the required university studies, a student must have attended four full sessions of not less than nine months each in this or some other school of medicine approved by the University of Manitoba, the last two years of which must have been spent as a student of the University of Manitoba.
- A student must have completed the required work, have fulfilled satisfactorily all special requirements, have received satisfactory grades throughout the entire medical program, and have discharged all indebtedness to the university.

Degrees: All degrees in Medicine will be conferred by the Senate of the university on the recommendation of the College Executive Council at a regular meeting of the University Senate or at a meeting specially called for that purpose.

3.2 Requirements for Registration to Practise Medicine

A university degree in medicine does not in itself confer the right to practice the profession of medicine in Canada. That right is obtained from a provincial registering body in the particular province in which the graduate desires to practice, and follows the successful completion of the Medical Council of Canada’s two qualifying examinations.

3.2.1 Federal Registration: The Medical Council of Canada

The Medical Council of Canada was established in 1912 by the Canada Medical Act. Its purpose is to grant a qualification to practice medicine acceptable for license in every province of Canada. It is not a licensing body, but “anyone who secures the diploma of the Medical Council of Canada by examination is registered on the Canadian Medical Register. This registration entitles one to become licensed to practice medicine in any province in Canada upon payment of the necessary fee and on meeting other provincial requirements”.

The Medical Council of Canada examinations are normally taken by undergraduate medical students of the University of Manitoba at the end of the fourth year. There is a fee for this examination. Examinations are held annually in Winnipeg in May and November, and registration for these examinations may be made with The Registrar, Medical Council of Canada, 2283 St. Laurent Boulevard, Ottawa, ON K1G 5A2. The deadline for application is usually in December; candidates are advised to contact the Medical Council of Canada for current information: www.mcc.ca.

3.2.2 Provincial Registration

The College of Physicians and Surgeons of Manitoba is the regulation body for the physicians in Manitoba. Each medical student must be registered with the College of Physicians and Surgeons of Manitoba in each year of the academic program. For information on registration in Manitoba contact: The College of Physicians and Surgeons of Manitoba, 1000&ndash;1661 Portage Ave., Winnipeg, MB R3G 3T7; telephone: (204) 774 4344 or http://cpsm.mb.ca/.

SECTION 4: The Program for the M.D. Degree

4.1 Governance

The program and its curriculum are the responsibility of the College Executive Council. The policies, regulations, implementation and modifications of the educational program for the M.D. degree are determined by the College Executive Council on the recommendation of the College of Medicine Undergraduate Medical Education Curriculum Executive Committee. The Curriculum Executive Committee is chaired by the Associate Dean, UGME. The Terms of Reference for this committee and committee membership can be viewed at the following link. The Curriculum Executive Committee is responsible for the curriculum, teaching, and evaluation in the educational program leading to the M.D. degree.

4.2 General Statement

The UGME program has undergone an exhaustive comprehensive curriculum renewal process which commenced in 2010. The new clerkship was introduced in August 2013, and the new pre-clerkship was introduced in August 2014. The curriculum was created to be a fully integrated spiral curriculum throughout all 4 years that fulfills UGME global objectives, Future of Medical Education (FMEC) recommendations and LCME/CCME standards. It was fashioned to be a Person to Community Centered curriculum (as opposed to organ system or department-based).

The program is a continuum over the four years but is divided into the Pre-Clerkship, Years 1 and 2, and the Clerkship, Years 3 and 4, for administrative purposes. The mission and objectives of the program can be found at the following link.

The Max Rady College of Medicine does not support students’ limitation of their studies to only fields and disciplines of personal interest. Nonetheless, students are encouraged to pursue areas of interest and to develop their own education through clerkship electives and summer clinical exposures or research experiences. Students learn to use information, skills and behaviour from multiple sources of teaching to prevent and solve the health care issues that face their patients and society. Students learn that physicians are part of an interdisciplinary team and health care system that provides accessible, continuous and comprehensive health care.

In order to modify and enhance the educational program, the opinions of students and their evaluation of the program and its teachers are formally sought and respected by faculty. This information is used by the Curriculum Executive Committee to improve the program.

4.3 The Plan of the Curriculum

4.3.1 Professionalism

Professionalism, behaviour and attitudes befitting medical professionals, is an important component of the Undergraduate Medical Education curriculum. The goal is to instill the attributes of professionalism and to emphasize to medical learners that professional characteristics and attributes are necessary for the practice of medicine and for their identity as physicians.

The Max Rady College of Medicine has developed a professionalism charter that serves as a framework for defining and demonstrating medical professionalism.

In cases where lapses in the level of professionalism necessary to underpin medical education are recognized, the Max Rady College of Medicine uses a Professionalism Report by which single egregious or recurrent lapses in student professionalism can be brought to the school’s attention. A summary statement will be included on an individual’s Medi­cal Student Performance Record if two or more validated reports have been received. The Max Rady College of Medicine maintains the option to dismiss students on the basis of unprofessional behaviour, regardless of performance in the curriculum.

4.3.2 Pre-Clerkship Program:

The goals and objectives of the UGME Pre-Clerkship curriculum are based on the mission and objectives of the undergraduate program as outlined in the following link. Student assessment is based on achievement of the
learning objectives provided to students on-line via a curriculum management system known as the Online Portal for Advanced Learning (OPAL).

The cur­riculum framework is based upon the principles of scaffolding and integration. The program comprises Human Biology, Health and Disease Modules commencing with a four week module – Foundation of Medicine. This module provides a basic science foundation relevant to the study and practice of medicine with the focus on principles, themes and overarching framework- these normal structure and function of molecules, cells and tissues and how homeostasis is maintained at these levels; how cells respond to perturbations in homeostasis and some of the possible consequences; major mechanisms that underlie the development of disease, and exogenous factors that threaten health.

This is followed by 23 weeks of the Human Biology and Health Modules which in sequence are: Blood and Immunology 1, Cardiovascular 1, Respiratory 1, Neuroscience 1, Musculoskeletal 1, Endocrine/Metabolism 1, Woman’s Reproductive Health 1, Gastroenterology, Hepatology, Nutrition 1 and Urinary Tract 1 courses. These courses cover the normal development, anatomy, histology, physiology and processes for the various systems, predominantly basic sciences with clinical cases (normal or abnormal) to contrast or help illustrate normal. Each course will include an overview of burden of illness or diseases related to that system. The courses will be presented in the mornings while the afternoons will consist of five Longitudinal Courses that will proceed throughout all four years. These include:

- Clinical Reasoning
- Professionalism
- Population Health
- Clinical Skills
- Indigenous Health

The content, where relevant will parallel the morning module courses.

Following completion of the Human Biology and Health Modules, the same course names will appear as Human Health and Disease Modules. This is 36 weeks in total with the first 9 weeks completing year 1 of study. Health and Disease Modules starts with an Introduction to Infectious Disease and Therapeutics course followed by Cardiovascular 2 and Respiratory 2. Year 2 of study commences with the remainder of the M2 courses in sequence: Blood and Immunology 2, Neuroscience 2, Endocrine/Metabolism 2, Woman’s Reproductive Health 2, Gastroenterology, Hepatology and Nutrition 2, Urinary Tract 2 and Musculoskeletal 2. All the courses are presented as abnormal processes, predominantly clinical cases with review and application of basic sciences. Modules will be presented in the mornings while the afternoons will be five Longitudinal Courses again including:

- Clinical Reasoning
- Professionalism
- Population Health
- Clinical Skills
- Indigenous Health

The content, where relevant, will parallel the morning module courses. Each course provides an overview of burden of illness and societal impact of diseases, and for each specific abnormality or disease where relevant the epidemiology, scientific basis and anatomy review, prevention and screening, cultural, social and ethical issues, natural history and prognosis, diagnosis, therapeutics and disease management. These may be covered during the morning module course or the afternoon Longitudinal course. The impact of Translational Research, Evidence Based Medicine and Health Care Systems will be highlighted where appropriate.

Year 1 will conclude with a one week rural primary care exposure.

Year 2 will conclude with a 10 week Consolidation module. The module will ensure all the content from the previous modules are assimilated, and includes single symptom presentations with broad differential diagnosis, multisystem disease such as complicated diabetes, “Themes” or disciplines such as pediatrics, geriatrics and systemic diseases such HIV, SLE and multiple myeloma. The consolidation module begins with the pain management curriculum and the dermatology course. The subsequent 9 weeks will be small group case based discussions to ensure all the 137 Essential Clinical Presentations have been covered at appropriate level.

The two-year Pre-Clerkship curriculum brings together teachers and facilitators from across all College Departments, other healthcare related faculties and disciplines as well as members of the public. All basic medical sciences, including anatomy, molecular biology, bio-chemistry, human genetics, immunology, microbiology, physiology contribute to the curriculum as do the clinically applied basic sciences of pathology, pharmacology and community health sciences. Clinical departments including anaesthesia, clinical health psychology, family medicine, internal medicine, obstetrics, gynaecology, ophthalmology, otolaryngology, paediatrics, psychiatry, surgery are involved in all aspects of the curriculum.

An overview of the UGME Framework within the Pre-Clerkship component of the Undergraduate Medical Education program can be viewed at the following link.

Methods of Teaching

A variety of approaches are used to facilitate learning. These include self-directed learning, small group sessions, whole group sessions, lab practicals and simulation.

Methods of Assessment

Formative and summative assessments are provided throughout the Pre-Clerkship curriculum. These include self-reflection, learning portfolios, tutor feedback, instructional tests, multiple choice examinations, practical examinations, and short and long answer examinations.

Attendance

Certain learning sessions within the UGME program are designated as “mandatory attendance” sessions. These are generally sessions in which students are learning in a small group format, patients or their families are involved; clinical skills are being taught; or clinical care is being provided. Attendance at these sessions is recorded and reported to the UGME office, and contributes to the evaluation of the learner’s professionalism. The Attendance Policy can be viewed at the following link.

The procedures outlined in this policy do not preclude course directors, session leaders and instructors from tracking student learner attendance in their sessions and discussing any concerns related to attendance with the learners.

4.3.3 Clerkship Program:

The Clerkship component of Curriculum Renewal introduced in 2013 was created to facilitate the integrated 4 year scaffold curriculum with central governance, supervised responsibility for patient care and mandatory academic time with frequent feedback and evaluation. The program is governed by the Clerkship Curriculum Committee for which the terms of reference and membership can be viewed on the website.

The Clerkship (Years 3 and 4) consists of Transition to Clerkship (5 weeks), Core Clinical Rotations (48 weeks), Electives, and CaRMS interviews (17 weeks), and Transition to Residency (12 weeks).
Transition to Clerkship (TTC) (5 weeks): The goal of TTC is for the students to expand their focus from learning during pre-clerkship years to the actual provision of care in various health care settings. This will help the students translate the knowledge gained in pre-clerkship to the clinical setting and the actual provision of care. This includes the supervised responsibilities that accompany provision of preventative health and management of disease by use of simulation, patient assessments, small group sessions and shadowing experiences. The Transition to Clerkship is launched with a prominent local keynote speaker and reciting of Hippocratic Oath, includes two weeks in various community settings and culminates in a transition to clinical service week shadowing the student’s first rotation. This includes buddy call without direct responsibility.

Core Clerkship Rotations (48 weeks): There are four 12 week blocks comprising 8 major clinical disciplines combining 2 disciplines per block to facilitate delivery of joint academic time: Surgery and Anesthesia, Internal Medicine and Emergency Medicine, Pediatrics and Obstetrics/Gynecology and Psychiatry with Family Medicine/Public Health. For more specific outline see http://umanitoba.ca/faculties/medicine/education/undergraduate/program_overview.html. The primary responsibility of the clerks in the program is the care of patients under the supervision of post-graduate students and faculty. Settings for the clerkship experience are varied, including wards and outpatient facilities of the hospitals, doctors’ offices, rural settings and community-based hospitals. A formal Academic half day occurs weekly with mandatory attendance shared and created equally by the UGME office and Longitudinal Courses, and the respective core clinical rotations. The Longitudinal Courses are those that proceed throughout all four years and include:

- Clinical Reasoning
- Professionalism
- Population Health
- Clinical Skills
- Indigenous Health

The UGME academic time includes reflection exercises and assignments. An Evidence Based Medicine Course and Capstone Project is included during this time period. The core rotations each have additional scheduled academic sessions.

Electives and CaRMS National Interview Period (14 weeks): There are 14 weeks of electives running into CaRMS National Interview Period. Throughout the elective periods, students must pursue education in a minimum of three different disciplines with a minimum duration of two weeks each. Electives may be pursued in a setting of the student’s own choice, but must be approved by the Director. Electives are responsible for all costs associated with electives and CaRMS interviews, e.g. transportation, accommodation etc.

Transition to Residency (12 weeks): Following completion of the CaRMS interviews will be two 3 week selective periods selected from a catalogue of options sandwiching CaRMS match week. During this time period students will be participating in An Evidence Based Medicine Course and Capstone Project. The CaRMS match week will include preparation for PGME sessions including types of practise, leadership skills, team work and medical legal/licensure sessions. Transition to Residency will conclude with a 4 week Comprehensive Review and Advanced Cardiac Life Support (ACLS) course

4.3.4 Requests for Conscience-Based Objections

The College of Medicine acknowledges that at times, learners may object to participating in educational activities. Learners who object to participation in educational activities may refer to the Conscience Based Exemptions Policy available online in order to seek a Conscience-Based Objection.

SECTION 5: Student Assessment and Academic Progress

5.1 Responsibility

The policies and procedures for the assessment of the students in the program for the M.D. degree are the responsibility of the College Executive Council.

Progress Committee: The Progress Committee meets regularly to evaluate the performance and progress of students enrolled in the Undergraduate Medical Education program.

The responsibilities of the Progress Committee include:

- Recommending to the College Executive Council the academic standards by which the progress of students are judged and ensuring that examiners have followed the policies and procedures set by the College Executive Council.
- Determining which students may proceed to the next stage of the program or to graduation.
- Determining which students should write supplemental examinations, or be required to take remedial study, or be required to repeat all or part of the academic year before promotion to the next stage of the program or graduation.
- Placing students on Monitored Academic Status or Probationary Academic Status.
- Ensuring that the Student Evaluation Committees have followed the policies and regulations of evaluation that have been approved by the College Executive Council.

The Pre-clerkship and Clerkship Student Evaluation Committees (PSEC, CSEC) conduct the assessment of the students. The knowledge, clinical and communication skills, attitudes and behaviour of the students are evaluated by examination, assessment of performance and completion of assignments.

The responsibilities of the PSEC, and CSEC include:

- Planning and administration of all aspects of student assessment and performance.
- Planning and administration of all supplemental examinations.
- Planning and administration of all other measures of academic performance.
- Planning and administration of remedial training for students with unsatisfactory academic performance.
- The reporting of the results of examinations, supplemental examinations, other academic performance evaluation and remedial training to the Progress Committee.

5.2 Evaluation in the Pre-Clerkship Program

5.2.1 Summative Examinations

The PSEC will inform the students of the pre-determined pass mark for each examination at the beginning of their course or module. The students, however, will be given the overall as well as the actual marks obtained in the different sections of the examination. Student results will be reported to them as a pass or fail. Grades and relative performance will be recorded in the students’ active files. A student can view his or her active file in accordance with the Student Records Policy and procedures online.

The Max Rady College of Medicine uses a Pass/Fail system where grades are not reported external to the Max Rady College of Medicine. Transcripts and Medical Student Performance Reports will indicate only whether a student has passed or failed a year, course, or module. However, within the Max
Rady College of Medicine, student grades will be used to help identify students at academic risk and to help select students for distinctions such as awards and specialized programs.

For modular courses, there are written comprehensive examinations based on the objectives at the end of each course or module. In addition, there are mid-course or mid-modular assessments (often examinations) for each course. Each examination may use various methods of assessment: multiple choice questions, short answer questions, etc. There may also be take-home assignments in each course that contribute to the final mark. Longitudinal courses will have multiple forms of assessment throughout the year, and may include written examinations, take-home assignments, OSCE examinations, or other forms of assessment.

Expectations for student conduct and information related to pass marks for summative examinations can be found in the following UGME policies.

- Examination Conduct Policy
- Examination Results Policy
- Deferred Examinations Policy
- Examination Accommodation Procedures

5.2.4 Remediation in Pre-Clerkship

Students failing a number of examinations up to the maximum allowable failures for modular courses or up to two longitudinal courses are permitted to sit supplementary examinations in accordance with the Supplemental Examination Policy that can be viewed online via a second supplemental examination. Students who fail this third attempt will fail the year. Students who fail any supplemental examination student promotion and failure at the Pre-Clerkship level can be viewed here.

Following the remediation, a student will sit a supplemental examination comparable but different from that failed. The performance of students during the remedial period will be assessed by a preceptor and will normally include an oral and/or written examination and/or repeated OSCE. Students who fail to reach the standard expected after remediation will fail the year.

Students in Year 1 and Year 2 who are successful on the supplemental examination(s) will be promoted.

Students who fail Year 1 or Year 2 will be required to repeat that particular year.

5.2.3 Formative Assessment in Pre-Clerkship

A variety of formative assessments are conducted in Pre-Clerkship including instructional tests, practice questions, reflective writing, self-evaluation, and peer-evaluations.

5.2.2 Failures of the Evaluation in Pre-Clerkship Years 1 and 2

The UGME Promotion and Failure Policy governs decisions related to student promotion and failure at the Pre-Clerkship level can be viewed here.

Students failing a number of examinations up to the maximum allowable failures for modular courses or up to two longitudinal courses are permitted to sit supplementary examinations in accordance with the Supplemental Examination Policy that can be viewed online.

Students who fail any supplementary examination in a first or second year modular course will be given a third attempt to pass the particular course via a second supplemental examination. Students who fail this third attempt will fail the year. Students who fail any supplemental examination in a first or second year longitudinal course will fail that year.

Students who are granted supplemental privileges are expected to undertake remedial study at a time determined by the Director, Remediation. Remediation usually occurs during the summer period. Following the remediation, a student will sit a supplemental examination comparable but different from that failed. The performance of students during the remedial period will be assessed by a preceptor and will normally include an oral and/or written examination and/or repeated OSCE. Students who fail to reach the standard expected after remediation will fail the year.

Students in Year 1 and Year 2 who are successful on the supplemental examination(s) will be promoted.

Students who fail Year 1 or Year 2 will be required to repeat that particular year.

5.3 Evaluation of Students in the Clerkship Program

The Max Rady College of Medicine is currently going through a period of significant Curriculum Renewal. This process began in August 2013.

5.3.1 For Students beginning Clerkship prior to August 2013:

During the clerkship years students will be evaluated on their competence and this will include assessment of their cognitive knowledge and understanding, clinical skills, problem solving and judgement, technical skills, interpersonal attributes and general professional responsibility. Assessment will be the responsibility of the CSEC.

5.3.1.1 Methods of Summative Assessment (General)

The policy and procedures applicable for evaluation are:

- Examination Conduct Policy
- Examination Results Policy
- Deferred Examinations Policy
- Examination Accommodation Procedures

Various methods will be used to assess students, including the final evaluation reports (FITERs); written external NBME examinations and OSCE-type exams. Student performance for evaluation purposes during examinations may be recorded in writing, orally, by computer or by videotaping. All material necessary to generate the mark such as papers, computer records and tapes will be destroyed once the student has passed that assessment. Such material can be of help to a student needing remediation before the examination.

To achieve this quality assurance, the Clerkship Student Evaluation Committee may use direct observation or indirect observation by audio and video monitoring. Quality assurance material is subject to the aforementioned regulations of the university and the College. Furthermore, this material, which could identify the individual student will not be released to anyone, other than the Dean and Clerkship Student Evaluation Committee without the written consent of the student.

5.3.1.2 The Introduction to Clerkship (ITC)

The goal of Introduction to Clerkship (ITC) is to prepare the student for clerkship rotations. Students will be assessed for attendance and performance in learning groups. The purpose of student evaluations in ITC is to ensure that students are ready to begin the clerkship rotations.

Readiness for clerkship must be demonstrated in many areas including: basic medical knowledge and its application; clinical skills in evaluating patients; analysis of clinical data; problem identification and diagnosis; planning of investigation; planning of management and therapy; relationships to patients and staff. These attributes will be assessed in a variety of ways throughout ITC.

Method of Assessment

Students failing to attend mandatory sessions will be reported to the Associate Dean UGME, who will inform the Clerkship Student Evaluation Committee. Each student will receive a warning from the Associate Dean's office. If this warning is ignored the student's attendance record and performance will be considered by the Clerkship Student Evaluation Committee and the student may be failed for the sessions missed. A suitable remedial period may be provided. If the student does not perform satisfactorily in the remedial period the ITC will be failed.
The student must be informed of a recommendation for failure within seven working days of the end of the session. The pass/fail decision will be given by the departmental representative to the Clerkship Student Evaluation Committee. In the case of a failing evaluation the reasons for failure must be documented and submitted to the Clerkship Student Evaluation Committee.

5.3.1.3 ITC Remediation

Failure for inadequate attendance

The coordinator of the module of sessions missed may, with approval of the Director, Clerkship Curriculum, provide the student with a remedial course, of comparable educational experience in that subject; the student will have to attend and perform satisfactorily to pass the ITC.

5.3.1.4 The Major Clinical Clerkships

Method of Assessment

The evaluation of the students during the clinical clerkship rotations may be assessed by review of clinical performance, written examinations, and projects.

Clinical Performance

The objectives of the Clerkship Program are consistent with the Undergraduate Medical Education Objectives found online.

The Midpoint In-Training Report (MITER) is a formative assessment in rotations of four weeks or longer. The student uses this report to complete a self-assessment which is then discussed with the student’s preceptor. If a student’s early performance is likely to lead to a failure, the Clerkship Director must advise the student of an impending failure by the midway point of the rotation. In such cases, the student must be given help to improve performance to the expected standard. The Clerkship Director, or designate, will collect preceptor assessments throughout the rotation. The Clerkship Director, or designate, will use all assessments to make a final decision on the student’s performance at the end of the rotation in that department. A Final In-Training Evaluation Report (FITER) of each student’s achievement of these objectives will be completed for each rotation.

A failing student must be informed of the failure by the Clerkship Director, or designate, preferably before the end of the rotation but not later than seven working days after the rotation is complete. All results will be submitted to the undergraduate committee of the department, who, for a failure, will review all the assessments and preceptors’ pass/fail assessments and determine the overall pass/fail standing for the student during the rotation in question.

The pass/fail recommendation, with the FITER and any supporting evidence for that decision, will be submitted by the departmental representative to the Clerkship Student Evaluation Committee. The pass/fail decision will be reviewed and affirmed if there is a majority vote of the members of Clerkship Student Evaluation Committee present at the first meeting of the Clerkship Student Evaluation Committee following the completed rotation. In the case of a tie, the chair of Clerkship Student Evaluation Committee will have the deciding vote, otherwise he or she will not vote.

On occasions, Progress Committee may deem it necessary to forward feed student summative assessment information to subsequent Clerkship Directors, or designates. In such instances, the student will be informed and the process will follow that outlined in the Forward Feeding Policy and Procedures found online.

Clerkship Written Examinations

Students will take the National Board of Medical Examiners (NBME) subject examinations at the end of the following clerkship periods: Obstetrics/ Gynaecology, Paediatrics, Psychiatry, and Surgery. For Internal Medicine, the NBME examination will take place after the Internal Medicine Selective rotation. For Core Surgery the NBME examination will take place following the major surgery rotation. The passing standard for National Board Exams will be the 11th percentile of the entire reference group. Students failing a NBME examination will re-sit this examination as outlined in the Supplemental Examination Policy: http://umanitoba.ca/faculties/medicine/education/undergraduate/media/S upplemental_Examinations.pdf

5.3.1.5 The Comprehensive Clinical Examination (CCE)

The goal of the Comprehensive Clinical Examination (CCE) is to objectively assess student clinical competence in generic skills of data collection, interpersonal relationships, along with the content of the case for diagnosis, investigation, and management of common clinical problems. This examination frequently uses standardized patients to test these clinical skills. The CCE committee is a sub-committee of the Clerkship Student Evaluation Committee and is chaired by the CCE coordinator. The CCE is marked to a standard predetermined by the CCE committee and the results of the examination are submitted to the Clerkship Student Evaluation Committee.

5.3.1.6 The Multiple Specialty Rotation in Clerkship (MSR)

Method of Assessment

The assessment of students during each component of the MSR clerkship rotation includes assessments of attendance, performance and could include College prepared examinations. Students will be expected to attend all clinical, small group, and laboratory sessions. Clinical performance will be judged, where applicable, as in the major clerkships. The Clerkship Director, or designate, must advise each student by the midway point of each component of the rotation if his or her performance is likely to lead to a failing assessment in that component. In such cases, the student must be given help to improve performance to the expected standard. The Clerkship Director, or designate, will use all assessments to make a final decision on the student’s performance at the end of each component of that rotation. A failing student must be informed of the failure by the preceptor, Clerkship Director, or designate preferably before the end of the rotation but not later than seven working days after the rotation is complete. All results will be submitted to the undergraduate committee of the department, who, in the case of a failure will review all the assessments and preceptor(s) pass/fail assessments to determine the overall, pass/fail standing for the student in that department.

5.3.1.7 The Elective Periods

Method of Assessment

Electives are evaluated in a similar manner to other clerkship rotations and students are required to obtain a completed elective assessment form for every elective pursued. These evaluations will be reviewed by the Director, Electives, and unsatisfactory assessments will be submitted to the Clerkship Student Evaluation Committee.

5.3.1.8 Remediation during Clerkship

A student who has received a failing FITER on a non-elective clinical rotation, shall be required to meet with the Director, Remediation for a remediation assessment. Remediation during the clerkship is typically scheduled during electives or other time as determined suitable by the College. The Director, Remediation in consultation with the Clerkship Director, or designate will coordinate this remediation, which will include further clinical experience. The policy and procedures governing remediation may be found online.
Clerkship Clinical Performance Remediation

The Clerkship Student Evaluation Committee will provide the student who has failed a clinical rotation an appropriate remedial period with the department in which the rotation was failed. The rotation will be an equivalent educational experience to the clerkship failed, and its goal will be to assist the student to reach the expected standard of clinical competence. A similar process of evaluation will be used. The remedial rotation will usually be taken during an elective period.

Remediation for NBME Examination Failures

Students failing any two NBME examinations (in the same subject or different subjects) will be required to meet with the Director, Remediation for remediation assessment. The policy and procedures governing remediation may be found online. Where a student has failed two successive NBME examinations in the same subject, the student will be required to complete a remedial period of training from the relevant. The Director, Remediation in conjunction with the Clerkship Director, or designate, will coordinate the remediation; further clinical experience may be needed to meet that purpose. Such a remedial period will be a maximum of four weeks and will usually be taken in an elective period, and followed by a third attempt at the National Board examination.

Remediation for Failure in the CCE

The Clerkship Student Evaluation Committee will devise an appropriate remedial period which will take into account the areas of weakness demonstrated by the CCE and will usually be taken during elective time. This remediation will be assessed by a clinical assessment and may include an oral and/or written exam.

Remediation for an MSR Clerkship Failure

The Clerkship Student Evaluation Committee will provide the student who has failed a clinical component of the MSR with a remedial period in the department in which the rotation was failed. This period is flexible but can be up to the same length as the failed rotation. Such a remedial rotation will be an equivalent educational experience to that failed and its goal will be for the student to reach the expected standard of clinical performance. A similar process of assessment will be used and may be supplemented by a clinical oral and/or written examination if the department deems it necessary. The remedial will usually be taken in an elective period.

Remediation for an Electives Failure

The Clerkship Student Evaluation Committee will devise a remedial period of up to four weeks which will take into account the areas of weakness revealed by the student's elective evaluation. This will be taken in the next available free time for the student. The remedial period will be evaluated by clinical assessment.

5.3.1.9 Failure of a Student in the Clerkship Program

The Clerkship Program is a continuum held over Year 3 and Year 4. A failure of the Clerkship Program is considered to be a failure of one year, see Section 3 Academic Regulations, above.

Failure of the Clerkship

The student will be determined to have failed the Clerkship Program if:

1. Failure of Clinical Assessments

The student has received failing assessments in one or more of the following:

- Two major clerkships in different disciplines (Internal Medicine, Internal Medicine Selective, Surgery, Surgery Selective, Pediatrics, Obstetrics/Gynaecology, Psychiatry, and Family Medicine)

OR

- One major clerkship and:
  - its remedial, or
  - an ITC remedial, or
  - an MSR remedial, or
  - an elective remedial

OR

- Remedials in two of the following:
  - Anesthesia
  - Emergency Medicine
  - Otolaryngology
  - Ophthalmology
  - Community Health Sciences
  - Elective
  - ITC

2. Failure of Examinations

The student has failures in one or more of the following:

- A single NBME subject examination three times

OR

- A total of five NBME examinations

OR

- The CCE after remediation

3. Remediation Related Failures

If the remediation period recommended for a student, for whatever cause, requires more than eight weeks, then the student will be deemed to have failed the Clerkship Program.

Complete information related to promotion and failure in any year of the Undergraduate Medical Education program can be found in the Undergraduate Medical Education Promotion and Failure Policy and Procedures online.

5.3.1.10 Terms for the Repeat Clerkship

A student who fails the Clerkship Program, be it because of failure of clinical assessments, failure of examinations, or failure of remediation (as above), immediately ceases in the program, and will be required to repeat the Clerkship Program. The Repeat Clerkship will consist of the following, at a minimum: Six-week rotations in each of Core Internal Medicine, Core Surgery, Paediatrics, Family Medicine, Psychiatry, and Obstetrics/Gynaecology, plus 12 to 16 weeks of electives. A student in the Repeat Clerkship will also be required to complete the ACLS course (0.5 weeks), the LMCC refresher course (4.5 weeks). The student will be granted 3 weeks for CaRMs interviews and two weeks for vacation. Furthermore, if the failure occurred prior to the completion of the Medicine Selective, Surgery Selective, Multiple Specialty Rotation (MSR), or Community Health Sciences Project, then these will be required components of the Repeat Clerkship as well. The student must satisfactorily meet all clinical assessments, examinations, the CCE, as well as remedial rotations (as appropriate), regardless of whether they had been passed previously. The
terms of the Repeat Clerkship will be submitted to the Progress Committee for review and final approval.

5.3.1.11 Terms for Failure of the Repeat Clerkship

The terms for failure of the Repeat Clerkship are the same as listed above in 5.3.1.9 “Failure of a Student in the Clerkship Program.” A student who has failed the Repeat Clerkship will be required to withdraw from the Max Rady College of Medicine program.

5.3.2 For Students beginning Clerkship on August 2013 or later:

During the clerkship years students will be assessed on their competence and this will include assessment of their cognitive knowledge and understanding, clinical skills, problem solving and judgement, technical skills, interpersonal attributes and general professional responsibility. Assessment will be the responsibility of the Clerkship Student Evaluation Committee (CSEC).

5.3.2.1 Methods of Summative Evaluation (General)

The policy and procedures applicable for evaluation are:

- Examination Conduct Policy
- Examination Results Policy
- Deferred Examinations Policy
- Examination Accommodation Procedures

Various methods will be used to assess students, including the final evaluation reports (FITERS); written external NBME examinations and OSCE-type exams. Student performance for assessment purposes during examinations may be recorded in writing, orally, by computer, by audio or by videotaping. All material necessary to generate the mark such as papers, computer records and tapes will be destroyed once the student has passed that evaluation. Such material can be of help to a student needing remediation before the examination.

To achieve this quality assurance, the CSEC may use direct observation or indirect observation by audio and video monitoring. Quality assurance material is subject to the aforementioned regulations of the university and the College. Furthermore, this material, which could identify the individual student will not be released to anyone, other than the Dean and Clerkship Student Evaluation Committee, without the written consent of the student.

5.3.2.2 The Transition to Clerkship (TTC)

The goal of Transition to Clerkship (TTC) is to prepare the student for clerkship rotations. Students will be assessed for attendance and performance in learning groups. The purpose of student assessment in TTC is to ensure that students are ready to begin the clerkship rotations.

Readiness for clerkship must be demonstrated in many areas including:

- basic medical knowledge and its application;
- clinical skills in evaluating patients; analysis of clinical data; problem identification and diagnosis;
- planning of investigation; planning of management and therapy;
- relationships to patients and staff. These attributes will be evaluated in a variety of ways throughout TTC.

Method of Assessment

Students failing to attend mandatory sessions will be reported to the Associate Dean UGME, who will inform the Clerkship Student Evaluation Committee. Each student will receive a warning from the Associate Dean’s office. If this warning is ignored the student’s attendance record and performance will be considered by the Clerkship Student Evaluation Committee and the student may be failed for the sessions missed. A suitable remedial period may be provided. If the student does not perform satisfactorily in the remedial period the TTC will be failed.

The student must be informed of a recommendation for failure within seven working days of the end of the session. The pass/fail decision will be given by the departmental representative to the Clerkship Student Evaluation Committee. In the case of a failing evaluation the reasons for failure must be documented and submitted to the Clerkship Student Evaluation Committee.

5.3.2.3 TTC Remediation

Failure for inadequate attendance

The coordinator of the block of sessions missed may, with approval of the Director, Clerkship Curriculum, provide the student with a remedial course, of comparable educational experience in that subject; the student will have to attend and perform satisfactorily to pass the TTC.

5.3.2.4 The Major Clinical Clerkships

5.3.2.4.1 The Major Clinical Clerkships for students Beginning Clerkship in August 2013 are:

- Family Medicine
- Internal Medicine
- Internal Medicine Selective
- Surgery
- Surgical Specialties
- Musculoskeletal Rotation
- Obstetrics/Gynecology
- Pediatrics
- Psychiatry

5.3.2.4.2 The Major Clinical Clerkships for students Beginning Clerkship in August 2014 or later are:

- Family Medicine
- Internal Medicine
- Surgery (Surgical Specialties is a part of this rotation.)
- Obstetrics/Gynecology
- Pediatrics
- Psychiatry
- Anaesthesia
- Emergency Medicine

Method of Assessment

The assessment of the students during the clinical clerkship rotations may be assessed by review of clinical performance, written examinations, and projects.

Clinical Performance

The objectives of the Clerkship Program are consistent with the Undergraduate Medical Education Objectives found online.

The Midpoint In-Training Report (MITER) is a formative assessment in rotations of four weeks or longer. The student uses this report to complete a self-assessment which is then discussed with the student’s preceptor. If a student’s early performance is likely to lead to a failure, the Clerkship Director must advise the student of an impending failure by the midpoint of the rotation. In such cases, the student must be given help to improve performance to the expected standard. The Clerkship Director, or designate, will collect preceptor assessments throughout the rotation. The Clerkship Director, or designate, will use all assessments to make a final decision on the student’s performance at the end of the rotation in that department. A Final In-Training Evaluation Report (FITER) of each student’s achievement of these objectives will be completed for each rotation.
All results will be submitted to the undergraduate committee of the department, who, for a failure, will review all the assessments and preceptors’ pass/fail assessments and determine the overall pass/fail standing for the student during the rotation in question.

The pass/fail recommendation, with the FITER and any supporting evidence for that decision, will be submitted by the departmental representative to the CSEC. The pass/fail decision will be reviewed and affirmed if there is a majority vote of the members of CSEC present at the first meeting of the CSEC following the completed rotation. In the case of a tie, the chair of CSEC will have the deciding vote, otherwise he or she will not vote.

On occasions, Progress Committee may deem it necessary to forward feed student summative assessment information to subsequent Clerkship Directors, or designates. In such instances, the student will be informed and the process will follow that outlined in the Forward Feeding Policy and Procedures found online.

Clerkship Written Examinations

Students will take the National Board of Medical Examiners (NBME) subject examinations at the end of the following clerkship periods: obstetrics/gynaecology, paediatrics, family medicine and psychiatry. For internal medicine, the NBME examination will take place after the internal medicine/emergency medicine block. For surgery, the NBME examination will take place after the surgery/anesthesia block. The passing standard for National Board Exams will be the 11th percentile of the entire reference group. Students failing a NBME examination will re-sit this examination as outlined in the Supplemental Examination Policy.

5.3.2.4.3 The Major Clinical Clerkships

As an alternative to the tradition block rotation described above, students will have the opportunity to apply for the Brandon Longitudinal Integrated Clerkship (LInC). This clerkship will cover the same clinical presentations and academic material of the traditional block rotation. Moreover, the program will be delivered in a longitudinal fashion with students getting exposure to the major clinical areas multiple times throughout the year. In the family medicine portion of the clerkship students will be exposed to the same preceptors over the course of the entire year for approximately one day a week including small communities around Brandon.

Evaluation and examinations will be the same as the traditional block rotation. The primary benefits of this form of clerkship are to allow students to develop relationships with preceptors, and to provide an exposure to medicine in a rural setting. Opportunities to get more one on one and hands on experience will be enhanced in this environment.

5.3.2.5 The Comprehensive Clinical Examination (CCE)

The goal of the Comprehensive Clinical Examination (CCE) is to objectively assess student clinical competence in generic skills of data collection, interpersonal relationships, along with the content of the case for diagnosis, investigation, and management of common clinical problems. This examination frequently uses standardized patients to test these clinical skills. The CCE committee is a sub-committee of the CSEC and is chaired by the CCE coordinator. The CCE is marked to a standard predetermined by the CCE committee and the results of the examination are submitted to the CSEC.

5.3.2.6 The Minor Clinical Clerkships

5.3.2.6.1 The Minor Clinical Clerkships for Students beginning Clerkship in August 2013 are:

- Emergency Medicine
- Anesthesia

5.3.2.6.2 The Minor Clinical Clerkships for Students beginning Clerkship in August 2014 are:

- Internal Medicine Selective
- Musculoskeletal Rotation
- Public Health
- Electives

5.3.2.6.3 The Minor Clinical Clerkships for Students beginning Clerkship in August 2015 or later are:

- Internal Medicine Selective
- Musculoskeletal Rotation
- Any of the assessments integral to the Population Health Course or Professionalism Course (if applicable)
- Public Health
- Evidence-Based Medicine Practice Course
- Electives
- Transition to Residency Selectives

Method of Assessment

The assessment of the students during the clinical clerkship rotations may be assessed by review of clinical performance, written examinations, and projects.

Clinical Performance

The objectives of the Clerkship Program are consistent with the Undergraduate Medical Education Objectives found online.

The Midpoint In-Training Report (MITER) is a formative assessment in rotations of four weeks or longer. The student uses this report to complete a self-assessment which is then discussed with the student’s preceptor. If a student’s early performance is likely to lead to a failure, the Clerkship Director must advise the student of an impending failure by the midway point of the rotation. In such cases, the student must be given help to improve performance to the expected standard. The Clerkship Director, or designate, will collect preceptor assessments throughout the rotation. The Clerkship Director, or designate, will use all assessments to make a final decision on the student’s performance at the end of the rotation in that department. A Final In-Training Evaluation Report (FITER) of each student’s achievement of these objectives will be completed for each rotation.

All results will be submitted to the undergraduate committee of the department, who, for a failure, will review all the assessments and preceptors’ pass/fail assessments and determine the overall pass/fail standing for the student during the rotation in question.

The pass/fail recommendation, with the FITER and any supporting evidence for that decision, will be submitted by the departmental representative to the CSEC. The pass/fail decision will be reviewed and affirmed if there is a majority vote of the members of CSEC present at the first meeting of the CSEC following the completed rotation. In the case of a tie, the chair of CSEC will have the deciding vote, otherwise he or she will not vote.

On occasions, Progress Committee may deem it necessary to forward feed student summative assessment information to subsequent Clerkship Directors, or designates. In such instances, the student will be informed and the process will follow that outlined in the Forward Feeding Policy and Procedures found online.

5.3.2.7 The Transition to Residency (TTR)
The goal of the Transition to Residency (TTR) is to prepare students for residency programs. Students will be assessed for performance on TTR selectives and in the Evidence-Based Medicine Practice Course. Attendance is mandatory for TTR.

Method of Assessment

Students failing to attend mandatory sessions will be reported to the Associate Dean UGME, who will inform the CSEC. Each student will receive a warning from the Associate Dean’s office. If this warning is ignored the student’s attendance record and performance will be considered by the CSEC and the student may be failed for the sessions missed. A suitable remedial period may be provided if determined appropriate by the College. If the student does not perform satisfactorily in the remedial period the TTR will be failed.

The TTR selectives and Evidence-Based Medicine Practice Course will be assessed by FITER.

The student must be informed of a recommendation for failure within seven working days of the end of the session. The pass/fail decision will be given by the departmental representative to the CSEC. In the case of a failing evaluation the reasons for failure must be documented and submitted to the CSEC.

5.3.2.8 Remediation during Clerkship

A student who has received a failing FITER on a clinical rotation, shall be required to meet with the Director, Remediation for a remediation assessment. Remediation during the clerkship is typically scheduled during electives or other time as determined suitable by the College. The Director, Remediation in consultation with the Clerkship Director, or designate will coordinate this remediation which will include further clinical experience. The policy and procedures governing remediation may be found online.

Clerkship Clinical Performance Remediation

The CSEC will provide the student who has failed a clinical rotation an appropriate remedial period with the department in which the rotation was failed. The rotation will be an equivalent educational experience to the clerkship failed, and its goal will be to assist the student to reach the expected standard of clinical competence. A similar process of assessment will be used. The remedial rotation will usually be taken during an elective period.

Remediation for NBME Examination Failures

Students failing any two NBME examinations (in the same subject or different subjects) will be required to meet with the Director, Remediation for a remediation assessment. Where a student has failed two successive NBME examinations in the same subject, the student will be required to complete a remedial period of training from the relevant rotation. The Director, Remediation in conjunction with the Clerkship Director, or designate, will coordinate the remediation; further clinical experience may be needed to meet that purpose. Such a remedial period will be a maximum of four weeks and will usually be taken in an elective period, and followed by a third attempt at the National Board examination.

Remediation for Failure in the CCE

The CSEC will devise an appropriate remedial period which will take into account the areas of weakness demonstrated by the CCE and will usually be taken during elective time. This remediation will be evaluated by a clinical assessment and may include an oral and/or written exam.

5.3.2.9 Failure of a Student in the Clerkship Program

The Clerkship Program is a continuum held over Year 3 and Year 4. A failure of the Clerkship Program is considered to be a failure of one year, see Section 3 Academic Regulations, above.

Failure of the Clerkship

The student will be determined to have failed the Clerkship Program if:

1. Failure of Clinical Assessments

The student has received failing evaluations in one or more of the following:

- Two major clerkships in different disciplines

OR

- b) One major clerkship and:
  - its remedial, or
  - a TTC remedial, or
  - a remedial of a minor clerkship

OR

- c) Remedials in two of the following:
  - A minor clerkship
  - TTC

2. Failure of Examinations

The student has failures in one or more of the following:

- A single NBME subject examination three times

OR

- b) A total of five NBME examinations

OR

- c) The CCE after remediation

3. Remediation Related Failures

If the remediation period recommended for a student, for whatever cause, requires more than ten weeks, then the student will be deemed to have failed the Clerkship Program.

Complete information related to promotion and failure in any year of the Undergraduate Medical Education program can be found in the Undergraduate Medical Education Promotion and Failure Policy and Procedures.

5.3.2.10 Terms for the Repeat Clerkship

A student who fails the Clerkship Program, be it because of failure of clinical assessments, failure of examinations, or failure of remediation (as above), immediately ceases in the program, and will be required to repeat the Clerkship Program. The Repeat Clerkship will consist of the following, at a minimum: Six-week rotations in each of Internal Medicine, Surgery, Paediatrics, Family Medicine, Psychiatry, and Obstetrics/Gynaecology, plus up to fourteen weeks of electives. The number of elective weeks may be reduced (from fourteen) by the number of weeks of electives already successfully completed. A student in the Repeat Clerkship will also be required to complete the ACLS course (if not already passed) (0.5 weeks), the LMCC refresher course (if not already passed) (4.5 weeks). The student will be granted 3 weeks for CaRMs interviews and two weeks for vacation. Furthermore, if the failure occurred prior to the completion of the Medicine Selective, Musculoskeletal Rotation, Emergency Medicine Rotation,
Anesthesia Rotation, Population Health course, Professionalism Course, TTR selectives, Evidence-Based Medicine Practice Course, then these will be required components of the Repeat Clerkship as well. The student must satisfactorily meet all clinical assessments, examinations, the CCE, as well as remedial rotations (as appropriate), regardless of whether they had been passed previously. The terms of the Repeat Clerkship will be submitted to the Progress Committee for review and final approval.

5.3.2.11 Terms for Failure of the Repeat Clerkship

The terms for failure of the Repeat Clerkship are the same as listed above in 5.3.2.9 “Failure of a Student in the Clerkship Program.” A student who has failed the Repeat Clerkship will be required to withdraw from the Max Rady College of Medicine program.

5.4 Regulations for Students Taking Leave from the Clerkship Program

Students may, for health or personal reasons, withdraw from clinical rotations or take temporary leave. For planned leave, prior permission must be obtained from the Associate Dean, UGME and/or Associate Dean, Student Affairs or designate. For leaves due to sudden or unexpected circumstances, the Associate Dean, UGME, the Director, Clerkship Curriculum, and the Clerkship Director or designate of the rotation must be informed. Written documentation of the reason for leave will be required by the Associate Dean, UGME. The information is confidential to the Associate Dean, UGME and Associate Dean, Student Affairs or designate. Further information please refer to the Leaves of Absence (LOA) Policy

Students who require an extended leave from the Clerkship Program may have a delayed graduation.

If a student misses more than 25% of a rotation, the student will not receive credit for the rotation regardless of the reason. The student will be required to repeat the entire rotation.

Brief periods of leave may be taken upon notification and approval by the Director, Clerkship Curriculum. For complete details on attendance during clerkship please refer to the Student Attendance Policy

Generally, the Clerkship program is completed in 79 weeks, excluding CaRMS interview time and holiday time. When, due to leaves of absence, a student will take more than 79 weeks, including elective periods, to complete the Clerkship Program the Clerkship Student Evaluation Committee will review the student’s record (clinical assessments and examinations) during the Clerkship Program to ensure that the time lost has not compromised the overall achievement of the student.

5.5 Reappraisal and Appeal of Failed Rotations and Examinations

A student who has received a failing grade in any course or on any FITER may be permitted to request a reappraisal of the assessment in accordance with the Reappraisal of Student Assessment Policy: http://umanitoba.ca/faculties/health_sciences/medicine/media/Reappraisal_of_Student_Assessments_Policy_Edit_Check.pdf

If the student is not accepting of the decision reached by a Reappraisal Committee as outlined in the above stated policy, the student can appeal the decision to the Undergraduate Student Appeals Committee: http://umanitoba.ca/faculties/health_sciences/medicine/education/undergraduate/media/Student_Appeals_Policy.pdf

A student can appeal a decision of the Undergraduate Student Appeals Committee to the Max Rady College of Medicine Student Appeals Committee and a student appeal of the Max Rady College of Medicine Student Appeals Committee can be brought to the Senate Committee on Student Appeals.

The Max Rady College of Medicine will not accept requests for reappraisal of external examinations. The National Board of Medical Examiners (NBME) provides a Score Recheck Service, details of which are posted on the NBME website at: http://www.nbme.org/Schools/Subject-Exams/score.html. Students are responsible for the cost of a Score Recheck that may be requested on their behalf by the Max Rady College of Medicine.

SECTION 6: Academic Research in Medical Education

6.1 Intro Medicine

Part of the educational responsibility of the Max Rady College of Medicine is to perform research on innovations and effectiveness in medical education. Whenever students are the research subjects, all such research must have approval from the Max Rady College of Medicine Research Ethics Board. Where students are studied individually their participation will be voluntary. Research findings will not identify individuals.

SECTION 7: Additional Degrees and Research Programs in Medicine

7.1 Bachelor of Science in Medicine (B.Sc. (Med.))

7.1.1 General Information

The Bachelor of Science in Medicine program is offered over two summer terms; following the first and second year of the undergraduate program in Medicine. The B.Sc. (Med) program is designed to provide the undergraduate medical student with an opportunity to gain firsthand experience in medical research. A large variety of basic science, translational and clinical research projects are available for the student to choose from each year.

The program consists of three components with the option of clinical exposure:

- Research project
- Written report
- Dissertation

The program is open to undergraduate students in the Max Rady College of Medicine and, if approved by the B.Sc. (Med) Committee. The work for this degree may be carried out in any department of the Max Rady College of Medicine at the University of Manitoba. This full-time program may not be taken concurrently with the MED II Research program or any part of the medical curriculum nor combined with any other programs such as traveling scholarships. The B.Sc. (Med) Program is only open to students who are in good academic standing and the students must be enrolled in the Max Rady College of Medicine at the University of Manitoba.

To enrol in the B.Sc. (Med) program the student must find a supervisor in any field within the Max Rady College of Medicine. The supervisor must hold a minimum appointment of Assistant Professor within the Max Rady College of Medicine. Together, the student and supervisor submit an application which includes an abstract and project proposal to the B.Sc. (Med) Committee. If the project proposal is accepted by the committee, students are accepted into the B.Sc. (Med) Program and can then be registered with the university for the B.Sc.(Med) summer sessions. All accepted projects require both a primary supervisor from the Max Rady College of Medicine and a Co-supervisor from any faculty or school at the University of Manitoba.

Students who require an extended leave from the Clerkship Program may have a delayed graduation.

If a student misses more than 25% of a rotation, the student will not receive credit for the rotation regardless of the reason. The student will be required to repeat the entire rotation.

Brief periods of leave may be taken upon notification and approval by the Director, Clerkship Curriculum. For complete details on attendance during clerkship please refer to the Student Attendance Policy

Generally, the Clerkship program is completed in 79 weeks, excluding CaRMS interview time and holiday time. When, due to leaves of absence, a student will take more than 79 weeks, including elective periods, to complete the Clerkship Program the Clerkship Student Evaluation Committee will review the student’s record (clinical assessments and examinations) during the Clerkship Program to ensure that the time lost has not compromised the overall achievement of the student.

5.5 Reappraisal and Appeal of Failed Rotations and Examinations

A student who has received a failing grade in any course or on any FITER may be permitted to request a reappraisal of the assessment in accordance with the Reappraisal of Student Assessment Policy: http://umanitoba.ca/faculties/health_sciences/medicine/media/Reappraisal_of_Student_Assessments_Policy_Edit_Check.pdf

If the student is not accepting of the decision reached by a Reappraisal Committee as outlined in the above stated policy, the student can appeal the decision to the Undergraduate Student Appeals Committee: http://umanitoba.ca/faculties/health_sciences/medicine/education/undergraduate/media/Student_Appeals_Policy.pdf

A student can appeal a decision of the Undergraduate Student Appeals Committee to the Max Rady College of Medicine Student Appeals Committee and a student appeal of the Max Rady College of Medicine Student Appeals Committee can be brought to the Senate Committee on Student Appeals.

The Max Rady College of Medicine will not accept requests for reappraisal of external examinations. The National Board of Medical Examiners (NBME) provides a Score Recheck Service, details of which are posted on the NBME website at: http://www.nbme.org/Schools/Subject-Exams/score.html. Students are responsible for the cost of a Score Recheck that may be requested on their behalf by the Max Rady College of Medicine.

SECTION 6: Academic Research in Medical Education

6.1 Intro Medicine

Part of the educational responsibility of the Max Rady College of Medicine is to perform research on innovations and effectiveness in medical education. Whenever students are the research subjects, all such research must have approval from the Max Rady College of Medicine Research Ethics Board. Where students are studied individually their participation will be voluntary. Research findings will not identify individuals.

SECTION 7: Additional Degrees and Research Programs in Medicine

7.1 Bachelor of Science in Medicine (B.Sc. (Med.))

7.1.1 General Information

The Bachelor of Science in Medicine program is offered over two summer terms; following the first and second year of the undergraduate program in Medicine. The B.Sc. (Med) program is designed to provide the undergraduate medical student with an opportunity to gain firsthand experience in medical research. A large variety of basic science, translational and clinical research projects are available for the student to choose from each year.

The program consists of three components with the option of clinical exposure:

- Research project
- Written report
- Dissertation

The program is open to undergraduate students in the Max Rady College of Medicine and, if approved by the B.Sc. (Med) Committee. The work for this degree may be carried out in any department of the Max Rady College of Medicine at the University of Manitoba. This full-time program may not be taken concurrently with the MED II Research program or any part of the medical curriculum nor combined with any other programs such as traveling scholarships. The B.Sc. (Med) Program is only open to students who are in good academic standing and the students must be enrolled in the Max Rady College of Medicine at the University of Manitoba.

To enrol in the B.Sc. (Med) program the student must find a supervisor in any field within the Max Rady College of Medicine. The supervisor must hold a minimum appointment of Assistant Professor within the Max Rady College of Medicine. Together, the student and supervisor submit an application which includes an abstract and project proposal to the B.Sc. (Med) Committee. If the project proposal is accepted by the committee, students are accepted into the B.Sc. (Med) Program and can then be registered with the university for the B.Sc.(Med) summer sessions. All accepted projects require both a primary supervisor from the Max Rady College of Medicine and a Co-supervisor from any faculty or school at the University of Manitoba.
University of Manitoba. Primary and Co-supervisors must hold a minimum appointment within their academic setting of Assistant Professor. All accepted projects must receive the applicable institutional ethics, biosafety or other approvals prior to commencement of the term. As well, any projects focusing on topics pertaining to indigenous people’s, must be submitted with approval from the appropriate regulatory bodies, such as First Nations and Inuit Branch, etc.

All students are required to present their research findings in both a written report and oral presentation at the conclusion of their second summer. Students are encouraged to produce an interim report due in the second year of their undergraduate training. Students will be evaluated by their Supervisor after the first summer and by the B.Sc. (Med) committee following the completion of the requirements for the B.Sc. (Med) degree. Students will be required to withdraw from the program if they make unsatisfactory progress after the first summer of research.

The B.Sc. (Med) degree will be conferred at the same time as the M.D. degree unless the student, having satisfactorily completed the requirements for the B.Sc. (Med) degree, discontinues the study of Medicine at the University of Manitoba or other approved institution. In this case, the B.Sc. (Med) degree will not be conferred. Students may defer their final dissertation upon approval by the B.Sc. (Med) Director.

The program is on a Pass/Fail basis. Withdrawal from the program (without permission from the Director) outside of the normal voluntary withdrawal time frame will be considered a fail. Authorization for withdrawal while enrolled in the program is through written application to the Director. Withdrawal without permission will result in a Fail grade.

7.2.2 Program Fees

The program fees will be additional to the Max Rady College of Medicine tuition fees. Program fees change annually.

7.2.3 Program terms

The program runs for 2 summer terms. Each term is generally between 12 and 13 weeks (subject to Max Rady College of Medicine schedule). Students are entitled to a 2 week paid vacation during each term (to be scheduled with project supervisor).

7.2.4 Stipendiary Support

Students receive stipendiary support for each term. Presently support is in the amount of $7500.00 per term.

7.2.5 Optional Clinical Exposure

If chosen, students are entitled to a minimum of 48 hours of in-clinic exposure over the two summers of the BSc (Med) Program.

7.2 MD/PhD Program

7.2.1 Purpose

The MD/PhD Program in the Max Rady College of Medicine is designed to produce academic clinician scientists who are interested in a career that combines both research and clinical medicine, providing them advanced clinical, academic and research skills.

7.2.2 Duration

The minimum program of study is the total required by the Max Rady College of Medicine for the MD program (4 years) plus the minimum requirements of the Faculty of Graduate Studies (normally two years beyond the level of the Master's degree, or three years beyond the level of a Bachelor's degree; see FGS Academic Guide, S.S.1). Typically, students undertake a 3-6 year research training interval to successfully complete doctoral training. Most students complete training in 4-5 years. Students who obtained advanced/graduate training prior to admission may be granted advanced standing. Students will be considered to be full-time graduate students throughout the entire period. They then return to third year Medicine to begin Clerkship full time.

7.2.3 Eligibility

Medical Students are eligible to apply upon initial admission to Medicine and at any time during the first two years of the MD program. Eligibility criteria should be reviewed on the Advanced Degree website: http://umanitoba.ca/faculties/medicine/research/grad_undergrad/6696.html

7.2.4 Application Process

Potential applicants should carefully review full details on the application process posted on the program website. Students wishing to apply should contact the Director of the Program early in the process. Acceptance will minimally require: 1) identification of a supervisor (within a department at the University of Manitoba which has an approved PhD program) who has adequate resources for the research expenses necessary for proposed program of study and whose department recommends acceptance, 2) interview with the College MD/PhD Selection Committee and their recommendation for acceptance, and 3) acceptance by the Faculty of Graduate Studies.

7.2.5 Program Fees

The total tuition fees payable are the sum of the fees required for the MD and PhD programs of study. Continuing fees (Faculty of Graduate Studies) are also applicable. Under current tax regulations, such fees are largely refunded as tax credits to graduates who continue to reside in the province of Manitoba. MD/PhD trainees that remain in good standing receive renewable stipend funding of $21,000 per annum for up to 6 years, or until successful defense and submission of their approved final PhD thesis. The stipend is terminated once the student has successfully defended their thesis and submitted the final corrected version to the Faculty of Graduate Studies. The 6 years of support is NOT lengthened by any years of support the student receives external to the program.

7.2.6 Administration

After initial assessment of the complete application dossier by the Advanced Degrees in Medicine Program Director, the program advisory and admission committee (PAAC), chaired by the Program Director, reviews all eligible applications and makes a recommendation to the Faculty of Graduate Studies. The Assistant Dean, Graduate Studies (Medicine) and the Associate Dean, Faculty of Graduate Studies, are advisory to the Program Director, Advanced Degrees in Medicine. The Program will: 1) review whether adequate resources are available for delivery of the program, 2) be a liaison with the trainee’s host research department, the Max Rady College of Medicine, and Faculty of Graduate Studies, and 3) review the Advisory Committee composition/function and monitor student progress.

7.2.7 Coursework

The minimum course requirements of the Faculty of Graduate Studies, as defined by individuals host research department supplementary regulations, are applicable in addition to the normal curriculum of undergraduate medical studies.

7.2.8 Research/Thesis Requirements

The quality and quantity of research supporting the thesis shall be consistent with that required for all other doctoral candidates in the field.
7.2.9 Additional Program Elements: Seminar Series and Research Progress Evaluations

Expectations for both the student and advisor are outlined in the Advisor Student Guidelines- Thesis/Practicum Programs, which must be reviewed and signed prior to any research. Students are required to regularly attend the designated research seminar series or journal clubs organized by the host research department. Students are also encouraged to seek out Professional Development opportunities offered by the host research department or University encompassing topics including effective writing, teaching training, and academic integrity. Students will be assessed a minimum of once per academic year, as per FGS guidelines. Students are required to prepare semi-annual updates for distribution to their advisory committee and the program director. Starting in the second year of the PhD training, trainees are eligible to receive up to $1000 funding per year towards attending and presenting their research at national or international conferences.

7.2.10 Conferment of the Dual Degrees of MD/PhD

Normally the graduate degree is conferred on the next available date after successful defense of the thesis and submission of the final approved thesis. For simultaneous conferment of both the MD and graduate degree, an application for notification of delayed convocation must be made to and approved by the Faculty of Graduate Studies.

7.3 MD/MSc Program

7.3.1 Purpose

The combined-degree MD/MSc Program in the Max Rady College of Medicine is designed to begin development of academic clinician scientists by providing them advanced clinical, academic and research skills.

7.3.2 Duration

The minimum program of study is the total required by the Max Rady College of Medicine for the MD program (4 years) plus the minimum requirements of the Faculty of Graduate Studies (the minimum time is equivalent to two academic terms; see FGS Academic Guide, 4.4.7). Completion of most programs requires more than this and students should review the host research department’s supplemental regulations regarding specific requirements. Students who obtained advanced/graduate training prior to admission may be granted advanced standing. Students will be considered to be full-time graduate students (see Faculty of Graduate Studies guidelines pertaining to Full-Time Status) throughout the entire period. Typically, following completion of Med II, students undertake at least a 2 year interval away from MD training to undertake and complete MSc training. They may also transfer to the MD/PhD Program. They then return to third year Medicine to begin Clerkship.

7.3.3 Eligibility

Medical Students are eligible to apply upon initial admission to Medicine and at any time during the first two years of the MD program. Eligibility criteria should be reviewed on the Advanced Degree website: http://umanitoba.ca/faculties/medicine/research/grad_undergrad/6696.html

7.3.4 Application Process

Potential applicants should carefully review full details on the application process posted on the program website. Students wishing to apply should contact the Director of the Program early in the process. Acceptance will minimally require: 1) identification of a supervisor (within a department at the University of Manitoba which has an approved MSc program) who has adequate resources for the research expenses necessary for proposed program of study and whose department recommends acceptance, 2) interview with the Program Admissions and Advisory Committee (PAAC) and their recommendation for acceptance, and 3) acceptance by the Faculty of Graduate Studies. The MD MSc program provides the Student Stipend and limited Conference travel expenses for approved applicants.

7.3.5 Program Fees

The total tuition fees payable are the sum of the fees required for the MD and MSc programs of study. Continuing fees (Faculty of Graduate Studies) are also applicable. Under current tax regulations, such fees are largely refunded as tax credits to graduates who continue to reside in the province of Manitoba. MD/MSc trainees that remain in good standing receive renewable stipend funding of $21,000 per annum for time spent actively engaged in full-time research (approximately 2-2.5 years). Trainees are also eligible to obtain up to $1000 research allowance towards attending a national/international conference in their second year to present their first authored research findings.

7.3.6 Administration

After initial assessment of the complete application dossier by the Advanced Degrees in Medicine Program Director, the program advisory and admission committee (PAAC), chaired by the Program Director, reviews all eligible applications and makes a recommendation to the Faculty of Graduate Studies. The Assistant Dean, Graduate Studies (Medicine) and the Associate Dean, Faculty of Graduate Studies, are advisory to the Program Director, Advanced Degrees in Medicine. The Program will: 1) review whether adequate resources are available for delivery of the program, 2) be a liaison with the trainee’s host research department, the Max Rady College of Medicine, and Faculty of Graduate Studies, and 3) review the Advisory Committee composition/function and monitor student progress.

7.3.7 Coursework

The minimum course requirements of the Faculty of Graduate Studies, as defined by individuals host research department supplementary regulations, are applicable.

7.3.8 Research/Thesis Requirements

The student is required to dedicate their full time to the graduate program to make timely and effective progress towards meeting degree requirements (research and academic) for successful completion. The quality and quantity of research supporting the thesis shall be consistent with that required for all other MSc candidates in the field.

7.3.9 Additional Program Elements: Seminar Series and Research Progress Evaluations

Expectations for both the student and advisor are outlined in the Advisor Student Guidelines- Thesis/Practicum Programs, which must be reviewed and signed prior to any research. Students are required to regularly attend the designated research seminar series or journal clubs organized by the host research department. Students are also encouraged to seek out Professional Development opportunities offered by the host research department or University encompassing topics including effective writing, teaching training, and academic integrity. Students will be assessed a minimum of once per academic year, as per FGS guidelines. Students are required to prepare semi-annual updates for distribution to their advisory committee and the program director.

7.3.10 Conferment of the Dual Degrees of MD/MSc

Normally the graduate degree is conferred on the next available date after successful defense of the thesis and submission of the final approved MSc thesis. For simultaneous conferment of both the MD and graduate degree, an
application for notification of delayed convocation must be made to and approved by the Faculty of Graduate Studies.

SECTION 8: Registration Information

8.1 Initial Registration Access Times

Students in the Max Rady College of Medicine Undergraduate Medical Education Program will be given access time to the registration system (Aurora Student) in July. For instructions on how to register online, please refer to the chapter, “Registration Information: Aurora Student”. Registration must be complete prior to the first day of classes.

Each student is registering in the same course for both the Fall AND Winter sessions. Med III students will be able to register in their Summer session in mid-March. Students are asked to contact the Administrator, Enrolment via email: anna.urbanik@umanitoba.ca or via telephone: (204) 789-3627 if registering difficulties are encountered.

Courses for the Undergraduate Medical Education program are:

<table>
<thead>
<tr>
<th>Program &amp; Year</th>

8.2 Web Registration Exceptions

Students who have a failing grade/s registered against them and/or have other outstanding academic matters (i.e. deferred or supplemental examinations, modified program, etc.) in regards to the previous academic session will not be allowed to register using the web registration system. Students who fall into this category should contact the Administrator, Enrolment at (204) 789-3627 for further information.

Bachelor Science in Medicine and Summer Early Exposure Programs

Students approved to participate in summer enrichment programs will be registered by the College.

8.3 Prior to Registration

New Students: All incoming students must complete an application to the College of Physicians and Surgeons of Manitoba, complete a Heart and Stroke certified course in BLS for Healthcare Providers (HCP-C) and submit the following documentation prior to the first day of class: Immunization records, Adult Criminal Records Check (with Vulnerable Sector search), Child Abuse Registry Self-Check, Adult Abuse Registry Check, Essential Skills and Abilities (Technical Standards) for Admission, Promotion and Graduation in the MD Program, and Accommodation for Undergraduate Medical Students with Disabilities. If you are unable to submit these documents by the first day of class please contact the Administrator,

Enrolment via email: anna.urbanik@umanitoba.ca or via telephone: (204) 789-3627.

Returning Students: All returning students must re-certify their CPR in a Heart and Stroke certified course in BLS for Healthcare Providers (HCP-C) and submit a copy of their card to the Max Rady College of Medicine office prior to the first day of class. Returning students must be registered with the College of Physicians and Surgeons of Manitoba by June 30 of each year and must provide current documentation on Adult Criminal Record Check (with vulnerable sector search), Adult Abuse Registry Check and Child Abuse Registry Self-Check prior to the first day of class.

SECTION 9: Biochemistry & Medical Genetics Course Descriptions-3000 Level

BGEN 3022 Introduction to Human Genetics A Cr. Hrs. 3

Introduction to basic principles of human genetics with emphasis on pedigrees analysis, population genetics and cytogenetics. May not be held with the former BGEN 3020.

BGEN 3024 Introduction to Human Genetics B Cr. Hrs. 3

Principles of human genetics with emphasis on clinical applications, including human development, disease treatments, prenatal diagnosis and ethics. May not be held with the former BGEN 3020. Prerequisite: BGEN 3022.

SECTION 9: Biochemistry & Medical Genetics Course Descriptions-4000 Level

BGEN 4010 Project Course in Human Genetics Cr. Hrs. 6

(Formerly 137.401) A research project chosen in consultation with and supervised by a faculty member. A written report is required. The course is available primarily to final year Honours students in the Honours Genetics program. Selection of project and supervision to be arranged prior to September 30 and submitted in writing to department head. Deadline for submission of first draft to supervisor by March 1. Deadline for submission of final draft to supervisor and course coordinator is March 31.

SECTION 9: Human Anatomy & Cell Science Course Descriptions-1000 Level

ANAT 1030 Human Anatomy Cr. Hrs. 3

(Formerly 080.103) To present the essentials of the organization and structure of the human body. Surface, functional and applied anatomy will be taken into consideration. For Pharmacy students only.

SECTION 9: Pharmacology Course Descriptions-4000 Level

PHAC 4030 Drugs in Human Disease I Cr. Hrs. 3

Foundation physiological principles underlying human disease integrated with drug disposition and effects of important drug groups on disorders of the autonomic and central nervous systems, and the cardiovascular system. May not be held with PHAC 4020. Prerequisites: BIOL 2410 (former ZOOL 2530) and BIOL 2420 (former ZOOL 2540).

PHAC 4040 Drugs in Human Disease II Cr. Hrs. 3

Foundation physiological principles underlying human disease integrated with effects of important drug groups on endocrine and organ system disorders, allergy and inflammation, infection, and cancer. The course also offers an introduction to basic clinical pharmacology as well as several current specialized topics in pharmacology. May not be held with PHAC
4020. Prerequisites: BIOL 2410 (former ZOOL 2530) and BIOL 2420 (former ZOOL 2540).

SECTION 9: Physiology Course Descriptions-1000 Level

PHGY 1030 Fundamentals of Medical Physiology Cr. Hrs. 6
The function and regulation of the systems and major organs of the human body as they relate to clinical disorders. For Pharmacy students only.

Postgraduate Medical Education

Dean: Brian Postl
Associate Dean: (Postgraduate Medical Education): Cliff Yaffe
Campus Address/General Office: 260 Brodie Centre, 260-727 McDermot Avenue, Winnipeg MB R3E 3P5
Email Address: PGME@umanitoba.ca
Telephone: (204) 789-3290
Fax: (204) 789-3929
Website: http://umanitoba.ca/faculties/health_sciences/medicine/education/pgme/index.html

Postgraduate Medical Education (PGME) is not an undergraduate program

Postgraduate medical education (PGME) at the University of Manitoba is comprised of a variety of training programs for graduated medical students interested in obtaining a higher level of education in Family Medicine or medical specialty. Programs are usually organized to be in one of three categories:

- Programs accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC).
- Programs accredited by the College of Family Physicians of Canada (CFPC).
- Other training and fellowship programs approved by the Max Rady College of Medicine.

Programs Accredited by RCPSC and CFPC

Programs in the first two categories are most likely to be recognized towards obtaining a license to practice medicine. The RCPSC and CFPC provide accreditation for the training program content and evaluative processes. After the successful completion of their training, candidates are eligible to challenge the appropriate national specialty exams for their particular programs. The complete listing of these programs follows in this section under the heading Description of Programs. The specific and detailed national requirements for individual programs may be obtained from the Postgraduate Medical Education Office.

The PGME Programs at University of Manitoba are accredited on a scheduled basis by the RCPSC and the CFPC. This allows PGME to oversee the training programs and support them in a variety of ways.

Several hospitals and healthcare facilities are used as training sites. The main teaching sites include: Health Sciences Centre, St. Boniface Hospital, Grace General Hospital, Misericordia Hospital (Ophthalmology) and a number of hospitals outside of Winnipeg for distributed education.

General Regulations

Once accepted into a RCPSC specialty or Family Medicine training program the learner (now referred to as a “resident”) is registered with University of Manitoba by the Postgraduate Medical Education Office. Registration fees are paid by the Winnipeg Regional Health Authority (WRHA). Each resident is registered every subsequent year of his or her training program by the PGME office. The resident must also register with the College of Physicians and Surgeons of Manitoba (CPSM) so that his or her name is entered the CPSM Educational Register.

The resident must obtain malpractice insurance, from the Canadian Medical Protective Association or its equivalent. Residents enrolled in postgraduate residency programs are expected to conform to such new requirements as may be adopted from year to year. Residents must apply directly to either the Royal College of Physicians and Surgeons of Canada or the College of Family Physicians of Canada for assessment of training and for permission to sit the college examinations. Being a resident in a program does not automatically enroll the resident for such examination or certification.

Eligibility

Graduates of Canadian medical schools are eligible for consideration of PGME training, and are required to challenge the Medical Council of Canada Qualifying Examination, Part I prior to commencing their residencies.

Generally, Canadian citizens or permanent residents once accepted into the PGME program, are eligible for provincial funding for residency training under the contract established with the Professional Association of Residents and Interns of Manitoba (PARIM).

International medical graduates (IMGs) are eligible to apply for admission after they have challenged the Medical Council of Canada Evaluating Examination. IMGs must be Canadian or permanent residents to be eligible to apply for postgraduate medical training. IMGs may apply for possible residency positions through the CaRMS match (see below).

Internationally (Visa) Sponsored-trainees represent a special training category for entrance to postgraduate medical training. The Internationally (Visa) Sponsored trainee applicant must pass the Medical Council of Canada Evaluating Examination and be sponsored by an agency which has entered into a contract with the University of Manitoba for such training. All residents must receive remuneration from an institution recognized by the Government of Manitoba while registered in a training program in PGME.

Criteria for Selection

Selection for admission to the various training programs will be made primarily on the basis of scholastic, personal and professional attributes as determined by academic records, personal interviews, letters of reference and in-training evaluation reports. The selection process is determined by each particular training program through a set selection process. Admission to the postgraduate training year one (PGY 1) for most programs is conducted through the CaRMS PGY1 match outlined below.

The College of Medicine commits to using reasonable accommodations and progressive efforts to ensure that residents with documented disabilities are considered for selection to Residency Programs for which they are academically qualified, ensuring full and safe access to the educational and learning environment and to the University facilities and services.

Other Training and Fellowship Programs

The following post-PhD programs are offered by PGME at the University of Manitoba: Clinical Psychology, Clinical Biochemistry, Clinical Microbiology and Molecular Genetics.

Fellowships are programs of specialized training beyond medical residency offered by different clinical departments. The fellowships are usually one-year in duration.

University Registration
All postgraduate trainees and fellows (not registered with the Faculty of Graduate Studies for M.Sc. or Ph.D. degrees) must be registered as postgraduate trainees in the Max Rady College of Medicine. The normal registration period is June 15 to July 1 each year, and is done by the College PGME Office.

Program Administration

The departments which provide PGME training programs in the Max Rady College of Medicine are: Anesthesia, Community Health Sciences, Family Medicine, Biochemistry and Human Genetics, Emergency Medicine, Internal Medicine, Medical Microbiology, Obstetrics, Gynecology and Reproductive Sciences, Otolaryngology, Pathology, Pediatrics and Child Health, Psychiatry, Radiology and Surgery. Some departments offer more than one program, and may also offer training in sub-specialty areas.

Each program has a Program Director and a Resident Program Committee to administer the training program. There are also program coordinators at each training site. The Program Director of each program reports both to the Department Head and the Associate Dean of PGME.

Beyond the program level, administrative matters pertaining to postgraduate residency training programs are the responsibility of the Associate Dean for PGME and the College PGME Executive Committee and its subcommittees. These committees are responsible for reviewing programs, allocation of residency positions, hearing resident appeals, and other duties as outlined in the terms of reference for each committee. The committees make recommendations to both the Associate Dean of the Max Rady College of Medicine and the College Postgraduate Executive Committee.

Description of Residency Programs

Residency Programs will generally follow one of two pathways leading to licensure eligibility as described below.

College of Family Physicians of Canada Accredited Programs

The training program for family physicians offers a two-year basic program in outpatient, in-hospital and community settings. This program is composed of several streams (urban, rural, Northern Remote, bilingual and Integrated Care of the Elderly) and the program leads to eligibility for certification with the College of Family Physicians of Canada (CFPC). A small number of positions are also available from time to time for enhanced training within the Family Medicine Training Program for a third year of training in Emergency Medicine, Anesthesia and Palliative Care, Care of the Elderly, Sports and Exercise Medicine, Cancer Care and Women’s Health. Some of these enhanced positions may be associated with a return of service requirement.

Royal College of Physicians and Surgeons of Canada Accredited Programs

The Faculty of Medicine offers a wide range of specialty and sub-specialty programs leading to eligibility for certification with the Royal College of Physicians and Surgeons of Canada. Programs vary in length from 2-7 years of medical training.

Primary Specialties:

- Anatomical Pathology
- Anesthesia
- Cardiac Surgery
- Diagnostic Radiology
- Emergency Medicine
- General Surgery
- Internal Medicine
- Medical Genetics
- Medical Microbiology
- Neurology (Adult)
- Nuclear Medicine
- Neurosurgery
- Obstetrics and Gynecology
- Ophthalmology
- Orthopedic Surgery
- Otolaryngology
- Pediatrics
- Physical Medicine and Rehabilitation
- Plastic Surgery
- Psychiatry
- Public Health and Preventative Medicine
- Radiation Oncology
- Urology
- Vascular Surgery
- Cardiology (Adult)
- Clinical Immunology and Allergy (Child & Adult)
- Critical Care Medicine (Adult)
- Developmental Pediatrics
- Endocrinology and Metabolism
- Emergency Medicine (Child)
- Gastroenterology
- Geriatric Medicine
- Gynecologic Oncology
- Hematology (Child & Adult)
- Infectious Diseases (Child & Adult)
- Maternal and Fetal Medicine
- Medical Oncology
- Neonatal-Perinatal Medicine
- Nephrology (Child & Adult)
- Palliative Medicine
- Respiratory Medicine (Child & Adult)
- Rheumatology (Adult)
- Thoracic Surgery
- Vascular Surgery

NOTE: These programs require different primary specialty credits, and may not be offered every year at the University of Manitoba.

For learners interested in a career combining health-related research and clinical activities, the University of Manitoba offers a two year Clinician Investigator Program (CIP) sponsored by the RCPSC.

Application Procedures:

All applicants for the PGY1 year of programs accredited by the RCPSC and CFPC must apply through the Canadian Residency Matching Service (CaRMS). All graduates of Canadian medical schools and international medical schools who are Canadian citizens or permanent residents and who have had no prior postgraduate medical training in Canada or the United States are eligible for the CaRMS match.

Applications for positions beyond the entry PGY1 year should be made at the PGME Office, 260 Brodie Centre or to the Program Director for the specific program. Availability of positions will vary from year to year and are not guaranteed for any program. No resident can be accepted unless a funded position is available.

The Canadian Resident Matching Service (CaRMS)
This matching service is an autonomous, national organization of the Association of Canadian Medical Colleges. It provides an orderly method for students to select where to pursue postgraduate medical education and for program directors to rank the applicants they wish to enroll. A second matching process (the second iteration) by CaRMS is subsequently available (after the 1st CaRMS match) to medical students not matched in the first iteration, and other medical graduates who have already received some prior postgraduate training. All information about registration and matching processes is available on the CaRMS website: www.CaRMS.ca. There are listings of all programs on their website.

Assessment of Residents in Postgraduate Medical Education Programs

Assessment at all levels is based primarily on clinical performance in the patient care setting. The Program Director and the Residency Program Committee in each program are responsible for the implementation of the assessment process in their own program. At the end of each clinical rotation or at other appropriate stages of the program, each trainee is assessed by an in-training assessment report (ITAR) appropriate to that program and training level. The assessor(s) discusses the assessment with the trainee and the report is forwarded to the program director. The ITAR should be signed by the resident to indicate that he or she has seen the report. This ongoing assessment process may be supplemented by written examinations, oral examinations, supervised history and physical examination and by direct observation of clinical and technical skills.

When a resident receives an unsatisfactory assessment or examination result, the program director will review the assessment with the resident. Unsatisfactory assessments will also be discussed in a confidential manner at the Residency Program Committee meeting. The committee will make recommendations regarding remedial training. If a subsequent remedial period is also assessed as being unsatisfactory, the program director will contact the Associate Dean for Postgraduate Medical Education and the Probation Protocol and Procedure will be instituted. A failed probation period may result in a resident being dismissed from his or her training program.

The Faculty College Executive Council reserves the right to require any student to withdraw from the program of enrolment when it believes the student to be unsuited, on general considerations of scholarship, professional fitness or professional conduct for postgraduate medical education. However, the Max Rady College of Medicine does not have a professional unsuitability by-law. The right to require a student to withdraw on the basis of professional unsuitability may arise through the professional unsuitability by-law of the College of Physicians and Surgeons of Canada. This right prevails notwithstanding any other provision in the faculty regulations.

Appeals

The appeals process is available on a number of different levels. A postgraduate trainee who wishes to appeal the results of any aspect of the assessment process must follow the written guidelines established by the PGME Committee and the Max Rady College of Medicine. These guidelines may be obtained from the PGME Office.

Further information on individual Residency Programs and affiliated governing bodies may be found at the following links:

http://umanitoba.ca/faculties/health_sciences/medicine/education/pgme/PGME_programs.html

http://umanitoba.ca/faculties/health_sciences/medicine/education/pgme/external_links.html
SECTION 1: Degree Programs Offered

1.1 Programs

<table>
<thead>
<tr>
<th>Program/Degree</th>
<th>Years to Complete</th>
<th>Total Credit Hours</th>
<th>Maximum Years to Complete</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bachelor of Nursing</td>
<td>4*</td>
<td>127</td>
<td>6</td>
</tr>
</tbody>
</table>

*This includes one year (30 credit hours) of study in University 1.

**This program is designed specifically for active practicing Registered Nurses.

1.2 Available Options

Inter-Faculty Option in Aging (Bachelor of Nursing only)

Inter-Faculty Option in Aging courses are offered by the following Colleges and Faculties: Arts; Nursing; Kinesiology and Recreation Management; and Social Work. To complete the Inter-College Option in Aging, students will complete a total of 18 credit hours including each of the following:

- Required Courses (six credits). See the Registration Guide for the current course number being offered.
  
  a) IDES 2650 /HMEC 2650/REC 2650/SWRK 2650 The Social Aspects of Aging (3 credit hours)
  
  b) NURS 2610/KIN 2610 Health and Physical Aspects of Aging (3 credit hours)
  
  - Electives (12 credit hours).

a) At least three credits of professional/discipline-specific applied work on aging within the student’s faculty of registration; and

b) An additional nine credit hours in aging electives from the participating faculties. Students can take nine credit hours from their own faculty but are encouraged to select offerings from other faculties. Lists of eligible elective courses are available from the student advisors.

- The nursing option in aging elective is NURS 2200 Topics in Aging.

Upon completion of these requirements, the “Option in Aging” comment will be recorded on the student’s transcript. Information on the Inter-Faculty Option in Aging is available from a student advisor.

1.3 Professional Designation

A graduate of the Bachelor of Nursing Program must write the NCLEX examination to become eligible to practice nursing. Following successful completion of all courses, the College of Nursing provides the College of Registered Nurses of Manitoba (CRNM) with a letter indicating that the student has completed the program requirements and is a potential graduand. Completion of the program entitles students to apply to work as graduate nurses and to apply to write the NCLEX examination to obtain the designation, Registered Nurse (RN). Approval of the application to write the NCLEX examination will be subject to the graduate’s meeting the requirements of the CRNM. Application and registration information can be obtained from the CRNM website at: www.crnm.mb.ca.

SECTION 2: Admission Requirements

2.1 Bachelor of Nursing Program - for Admission in 2015 and thereafter

Applicants must meet the general admission requirements of the University of Manitoba, as well as the admission requirements of each program in the College of Nursing. All admission requirements, application deadline dates and forms, are included in the Applicant Information Bulletin that is available from the Admissions Office website at http://umanitoba.ca/admissions/. The following are summaries of the admission requirements for each program in the College of Nursing.

Courses Completed at Recognized Universities Other Than the U of M

Non-Nursing courses must be assessed as exact equivalents in order to meet the specific course requirements for admission. Only courses completed within 10 years prior to the date of admission to the College of Nursing will be considered for transfer credit.

Nursing courses will be considered for evaluation and credit only if completed within 5 years prior to application/admission.

See also Section on “Advanced Standing/Transfer Credit”.

Failures in Nursing Courses

Students who fail the same Nursing course twice, prior to applying to the College of Nursing, are ineligible for admission to the College of Nursing. A course requirement to be eligible for admission. According to University policy, students who have a completed an undergraduate degree are exempt from the Written English and math requirements (see appropriate section in Calendar for University policy on Written English requirement). EFFECTIVE FALL 2019- All applicants to nursing must meet the University Written English and University Math requirements at a 1000 level or higher, a grade of "C" and completed within the last ten years.

The AGPA will be calculated on the most recent 45 credit hours (including repeated courses) of university level course work. If an applicant has less than 45 credit hours, the AGPA will reflect all credit hours completed (i.e. a minimum of 30 credit hours to a maximum of 45 credit hours). The AGPA is limited to course work taken within the 10 years prior to admission.

An AGPA higher than the minimum is recommended as admission may be competitive.

All applicants must complete a minimum of 30 credit hours in the following identified courses (or their equivalent) with a minimum grade of “C” in each course before entering the College of Nursing. All of the following pre-requisite courses used to meet the admission requirements for the Bachelor of Nursing program must be transferrable for credit into the Bachelor of Nursing program. Non-nursing courses must be completed within 10 years and Nursing courses must be completed within 5 years of admission to the College of Nursing in order to be eligible for admission and advanced standing (transfer credit).
The University Written English requirement (W) and University Mathematics requirement (M) must be completed within 10 years of admission to the Bachelor of Nursing program only if either or both courses are part of the required 30 credit hours for admission. If the W and/or M course is in addition to the required 30 credit hours and not being transferred into the Bachelor of Nursing program they do not have to meet the 10-year requirement.

The minimum Adjusted GPA for admission to the College of Nursing is 2.5.

BIOL 1410 Anatomy of the Human Body (see Note 1)
BIOL 1412 Physiology of the Human Body (see Note 1)
MBIO 1220 Essentials of Microbiology (see Note 1)
Science Electives- 9 credit hours (see Notes 1, 2, 3, 4 & 5)
Electives- 12 credit hours
Any combination of the following courses/subjects for a total of 12 credits.
- Social Sciences (see Notes 1 & 5)
- Humanities (see Notes 1 & 5)
- NURS 1280 Introduction to Nursing (see Note 7)
- NURS 1500 Preparing for Professional Nursing Education (see Note 6)
- NURS 2610 or KIN 2610 Health and Physical Aspects of Aging
- NURS 2650 or SWRK 2650 or HMEC 2650 Social Aspects of Aging

Note 1: All courses can be completed in University 1, or an equivalent program, if the students do not wish to extend their program of study.

Note 2: Science electives are courses taught by the Faculty of Science. With exception of Geological Sciences (GEOL 1XX0), courses under the Clayton H. Riddell Faculty of Environment, Earth, and Resources do not meet the Science elective requirement if taken 2003-2004 and later. 1000 level introductory Geological Sciences courses (GEOL 1XX0) will be accepted as Science courses if taken prior to September 1, 2006.

Note 3: The former BIOL 1110 Health and Health Professions may not be used as a Science elective.

Note 4: Science prerequisites. Students must meet the current Science prerequisites before registration for Science courses. See the Faculty of Science section in the General Calendar for the current prerequisites. It is preferred that the above prerequisite have been completed within the last five years. Math 40S is a prerequisite for Microbiology and Statistics.

Note 5: All courses must be 1000 level or higher. "0900" level courses (e.g., ENGL 0930) are not accepted for admission or transfer credit.

Note 6: NURS 1500 is available only to students in the Aboriginal Nursing Cohort Initiative.

Note 7: NURS 1280 must have been completed within five years of admission to the College of Nursing.

Note 8: BIOL 2410, BIOL 2420 and MBIO 3010 are effective for the Fall 2019 intake.

NOTE: NURS 1260 Growth and Development (3 cr) may not be used towards admission requirements. Students who previously completed NURS 1260 Growth and Development with a minimum of "C" and are admitted to the College of Nursing within 5 years of completing the course, up to and including the admission year 2018, will be given advance standing in the equivalent second-year course.

Applicants with Previous Bachelor of Nursing Degree
Applicants who have previously completed a Bachelor of Nursing or equivalent program in Canada or the United States are not eligible for admission to the Bachelor of Nursing program in the College of Nursing at the University of Manitoba. In exceptional circumstances students may be considered on a case-by-case basis.

Applicants from Diploma and Degree Nursing Programs Category
Applicants who have attended but have not completed a nursing diploma or degree program, the completion of which would result in the graduate’s eligibility to write the Canadian Registered Nurse Examination (or equivalent) in order to qualify for registration to practice as a Registered Nurse, must meet admission requirements including the competitive AGPA in the year of application, apply for admission by the application deadline, and provide supplementary information, including the name of the Dean, Director, Head, or Coordinator of the Nursing Program in which the student was previously registered, and who will be contacted by the College of Nursing.

The Advance Standing and Admissions Committee reserves the right to deny admission to the University of Manitoba Nursing program based on any of the supplementary information. Applicants who would be eligible to register in third or fourth year courses will be considered for admission only if space is available.

Appeals of decision are limited to the question of procedural regularity only. The merits of the decision are not subject to review.

Special Consideration Category
The Special Consideration Category will consider applicants who are Indigenous People of Canada only, including individuals of First Nations, Metis, and Inuit heritage. Applicants in this category must meet the minimum entrance requirements including a minimum AGPA of 2.5; however, they do not have to meet the competitive grade point average of admitted students in the admission year. Applicants must apply by the application deadline and also complete a supplementary application form that is available with the online application. The Supplementary Application and information are due no later than May 1.

Appeals of decisions are limited to the question of procedural regularity only. The merits of the decision are not subject to review.

Provisional Admission - Non-Academic Admission Requirements
All successful applicants are admitted provisionally pending compliance with the non-academic admission requirements of the College of Nursing. Failure to meet the requirements by July 15 for Fall admission or November 15 for Winter admission will result in the offer of admission being revoked. Contact the College of Nursing or go to http://umanitoba.ca/faculties/nursing/current/undergrad/media/Non-academic_Admission_Requirements_2018-2019_REV.pdf for further information about the Non-Academic Admission Requirements.

Applicants are advised to carefully check the recommended start dates in the above document before beginning the process of complying with these admission requirements. Any costs associated with the non-academic admission requirements are the responsibility of the applicant.

Criminal Record Search Certificate
Following their provisional admission to the program, applicants must provide a Criminal Record Search Certificate, including Vulnerable Sector
Search, by July 15 or November 15. Apply for the Criminal Record Search Certificate after April 1 and allow 4-8 weeks for processing.

A criminal conviction will not necessarily result in denial of admission to the College of Nursing. Criminal offences will be reviewed by a sub-committee of the Nursing Advance Standing and Admissions Committee for the implications of the conviction in view of the professional mandate to protect the public. Failure to disclose any criminal record will invalidate an applicant's application and shall result in automatic expulsion from the College of Nursing if the applicant has been admitted.

The College of Registered Nurses of Manitoba (CRNM) also requires that all graduates of an approved nursing education program who wish to practice nursing in this province disclose information about any conviction for an offence under the Criminal Code (Canada). The review process by the College of Nursing is independent of the review process conducted by the CRNM.

**Child Abuse Registry Check**

Following provisional admission to the program, applicants must provide a Child Abuse Registry Check by July 15 for fall admission or November 15 for winter admission. Apply for the Child Abuse Registry Check after April 1 and allow 4-8 weeks for processing.

Note: Any applicant on the Child Abuse Registry will be denied admission.

**Adult Abuse Registry Check**

Following provisional admission to the program, applicants must provide an Adult Abuse Registry check by July 15 for fall admission or November 15 for winter admission. Apply for the Adult Abuse Registry Check after April 1 and allow 4-8 weeks for processing.

**Immunization**

Immunizations and tests do not need to be completed prior to the start of classes. Students who are offered admission will be sent an “Immunization Package” for completion (due: July 15 for Fall intake; November 15 for Winter intake). Previous immunization and testing records will be reviewed and students will be informed what additional items, if any, are required. Detailed information about the immunization requirements can be found in the Non-Academic Admission Requirements handbook found at http://umanitoba.ca/faculties/nursing/current/undergrad/media/Non-academic_Admission_Requirements_2018-2019_REV.pdf

**CPR Certification**

CPR certification at the Health Care Provider (HCP) Level is a requirement for admission to the College of Nursing. Certification must be valid until the end of the academic year (i.e. April); therefore, should not be obtained before April 1st by applicants for either fall or winter admission.

**Respirator Mask-Fit Testing**

Applicants must be fit-tested with the respirator mask that is used in the event that airborne precautions are required in clinical agencies. Official proof of the mask-fit test must be submitted to the College of Nursing by July 15 for fall admission and November 15 for winter admission.

As it can take a number of weeks to obtain an appointment for fit testing, applicants are advised to book as soon as they are offered admission or earlier in order to meet the July 15 deadline for fall admission and the November 15 deadline for winter admission.

**Advanced Standing/Transfer Credit**

Advanced standing will be considered for non-nursing courses completed at any university, including the University of Manitoba, if completed within 10 years of admission to the Bachelor of Nursing program.

Nursing courses from any university, including the University of Manitoba, will be considered for advanced standing/transfer credit only if they have been completed within five years prior to admission to the College of Nursing.

See also section on “Courses Completed at Recognized Universities other than the University of Manitoba” and course requirements for admission.

**Advanced Placement Option: LPN**

Applicants who graduated from the Licensed Practical Nursing (LPN) Program from Assiniboine Community College or the Diploma in the Practical Nursing Program at University College of the North within five years of admission to the College of Nursing may be eligible for transfer credit. Applicants must meet admission requirements.

**Advanced Placement Option: RPN**

Registered Psychiatric Nurses may be eligible for advanced standing in the Bachelor of Nursing Program. Applicants should inform the College of their RPN status.

**2.2 Baccalaureate Program for Registered Nurses (BPRN)**

All admission requirements for applicants who are already Registered Nurses are described in detail in an applicant information bulletin that includes application deadline dates and application forms. This material is available from the Admissions Office website at: http://www.umanitoba.ca/student/admissions/

**Admission Requirements**

1) Graduation from an approved diploma of nursing education program;

2) Current active practicing membership in a Canadian provincial or territorial association/college of registered nurses; and

3) A minimum of 1125 hours of nursing experience will normally be required for selection.

Applicants will be provisionally admitted pending submission, by the published deadline, of the non-academic requirements: Criminal Record Search Certificate including Vulnerable Sector Search, Child Abuse Registry Check, Adult Abuse Registry Check, Immunization, CPR Certification, Respirator Mask-Fit Testing, and PHIA training.

**Failures in Nursing Courses**

Students who fail the same Nursing course twice, prior to applying to the College of Nursing, are ineligible for admission to the College of Nursing.

**Proof of Professional Registration**

Active practicing membership must be maintained throughout the program in the Canadian jurisdiction under which the student is a practicing RN. Verification will be obtained annually from the College of Registered Nurses of Manitoba by the College for returning Manitoba students.

Students from outside of Manitoba must submit proof of registration annually from the registering body to the College of Nursing.
After admission and at any time prior to completing the program, students with any changes to their active practicing status with the College of Registered Nurses of Manitoba or other Canadian jurisdiction in which they hold membership, (e.g., conditions placed on a registration or ineligibility for active practicing status), are required to report this information to the Associate Dean, Undergraduate Programs, College of Nursing. Such changes will be reviewed on a case by case basis. Failure to report a change in status may result in disciplinary action.

Transfer of Credit

University credits earned outside of nursing diploma programs or earned as part of an incomplete degree may be considered for transfer of credit. If a required course in the baccalaureate program was earned as part of a nursing diploma program or as part of another degree, an alternative course must be substituted. Transfer of credit will be considered for university level nursing courses completed within the five years prior to admission. Credit for previous nursing courses is not given if there is a lapse of five years or more from the last date of attendance in the program or if taken more than five years prior to admission. Credit for non-nursing courses taken at other universities over 10 years prior to admission will not be granted.

Graduates of the Red River College Diploma Nursing Accelerated Program (DNAP) (est. 2000) will receive 12 credit hours of advanced standing in the Baccalaureate Program for Registered Nurses (BPRN) for the following courses, provided a minimum grade of C+ was achieved in each course for transfer: NURS 3210 Research Methods, NURS 4220 Law and Ethics, and 6 credit hours of non-nursing electives. The Nursing courses must have been completed within five years, and the non-Nursing courses completed within 10 years, prior to admission to the College of Nursing. All remaining courses for the BPRN must be completed at the University of Manitoba in order to meet the residency requirement for the BPRN, unless the electives were completed at the University of Manitoba.

Transfer of Credit for Advanced Certificate Programs

No credit will be given for these certificates in the BPRN.

SECTION 3: Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the College of Nursing has regulations and requirements, published below, that apply specifically to its students.

Following the regulations for all students, please see the regulations that are specific to each program.

3.1 Regulations for the Bachelor of Nursing Program

Students are obligated to be familiar with all regulations governing their continued progress in the program.

Security of Academic Records

The University’s policies regarding the security of student academic records are found in the chapter, University Policies, of this Calendar.

Registration Status in the Program

Students admitted to the Program must complete a minimum of 3 credit hours of course work in the College of Nursing in the Fall or Winter term of their admission year.

Students are expected to maintain contact with the program by registering in at least one nursing course during each consecutive Fall and Winter term while they are enrolled in the Program.

Students who wish to interrupt their studies must apply in writing to the Associate Dean, Undergraduate Programs, for a leave of absence.

Leave of Absence

Students wishing to interrupt their studies must submit a written request for a leave of absence, normally by June 1, to the Associate Dean, Undergraduate Programs, College of Nursing. Later requests may be considered in exceptional circumstances. A leave of absence may normally be granted for a maximum period of one year. Requests for an extension to the leave of absence or for a subsequent leave of absence must be made in writing and will be subject to approval by the Associate Dean, Undergraduate Programs.

In order to return to the College of Nursing, students must submit a written request for reinstatement to the Associate Dean, Undergraduate Programs, no later than May 1 of the year of return. Requests for reinstatement will not normally be considered after May 1. Students who do not apply for reinstatement by May 1 will normally be considered as having left the Nursing program, and will be withdrawn from the College of Nursing.

Decisions made in response to requests for leaves of absence or reinstatement can be appealed to the College of Nursing Admissions Committee.

Leave of absence status does not extend the program time limit outlined in the College of Nursing regulations. To maintain leave of absence status, and not be discontinued from the College of Nursing, students may not attend any other faculty or institution during the period in which the leave of absence is in effect. Students on a leave of absence will be subject to the same criminal record, child abuse registry, and adult abuse registry policies as students taking courses. At the time of requesting a return to studies, students will be required to provide a current self-declaration of a criminal record, child abuse registry, and adult abuse registry listing.

Students who attend another faculty or institution while on leave, or who have been withdrawn from the College of Nursing because they were not granted a leave of absence and did not take at least one Nursing course in Fall or Winter term, must re-apply through Admissions should they wish to return.

Residence Requirements

See the chapter, General Academic Regulations and Requirements in this Calendar.

Coursework and Evaluation

“0900” Level Courses

Credit will not be given for “0900” courses.

University Mathematics and Written English Requirement

Students admitted September 2015 and later must satisfy the Written English requirement and Mathematics requirement prior to admission.

Prerequisite Deficiency

Students who enroll in courses provisionally pending satisfactory completion of pre- or co-requisites must, if unsuccessful, withdraw or amend their registration accordingly. The College of Nursing reserves the right to not send reminders of the requirement to withdraw.
Challenge for Credit

Students wishing to challenge a course for credit should contact a student advisor.

Supplemental Examinations or Tests

The College of Nursing does not permit supplemental examinations or tests.

Academic Progression

Students are required to obtain a minimum of “C” grade in every letter grade course, a “Pass” in every Pass/Fail course, and a Program GPA of 2.5 to graduate. A final grade of “D” or “F” in a letter grade course or “Fail” in a Pass/Fail course taken to complete the degree requirement is considered a failure.

Academic assessments will be based on student performance in letter grade courses. The Term Grade Point Average (TGPA) will be calculated at the conclusion of each academic term in which the student has completed a minimum of 6 credit hours. Students who do not complete the minimum credit hours in one term will be assessed as “too few credit hours to assess.” These students will be assessed over two terms or more at the end of the term in which they reach the threshold of 6 credit hours.

The final term of the program (NURS 4580) will be excluded from assessment providing the student meets graduation requirements.

Students are required to have a minimum Program GPA of 2.5 to be eligible for graduation. Please see http://umanitoba.ca/faculties/nursing/undergrad/assessment_policy.html for details and procedures.

Good Academic Standing

A student with a TGPA of 2.5 or higher will be assessed “Faculty Minimum Met.”

Academic Warning

The first time a student’s TGPA drops below 2.5, the student will receive an Academic Warning.

Academic Probation

The second time that a student's TGPA drops below 2.5, the student will be placed on Academic Probation.

Academic Suspension

The third time that a student’s TGPA drops below 2.5, the student will be placed on Suspension. Students who are suspended shall be ineligible to take any courses at the University of Manitoba or on a letter of permission for a minimum of eight and a maximum of 15 calendar months.

A student may apply for reinstatement on academic probation after the term of suspension has been completed.

Required to Withdraw

Students who have been permitted to return from Suspension and whose TGPA drops below 2.5 a fourth time will be Required to Withdraw. Students who are Required to Withdraw are ineligible for re-admission to the College of Nursing.

Dean’s Honour List

The Dean’s Honour list will be determined after each term of study. Students who achieve a minimum Term GPA of 3.75, and who are registered for a minimum of 12 credit hours will be placed on the Dean’s Honour List. Students registered in a Fall/Winter term spanned course will be reconsidered for their eligibility for listing on the Fall term Dean’s Honour List at the end of Winter term. Students who complete a course on a Letter of Permission may request to have these courses included in the assessment for Dean’s Honour List. Students with a grade of D, F, or “Fail” in that term will not be eligible for Dean’s Honour List.

Degree with Distinction

Students who achieve a Degree GPA of 3.8 and above based on the last 68 credit hours of course work, including Pass/Fail courses, will be eligible for a Degree with Distinction. Students with a grade of D, F, or “Fail” in the last 68 credit hours will not be eligible.

Voluntary Withdrawal

Students are allowed only one voluntary withdrawal per Nursing course in the College of Nursing.

Students who voluntarily withdraw from a Nursing course a subsequent time will have their withdrawal reversed and will be expected to complete the course. Students planning to withdraw from any course are advised to speak with a student advisor regarding the implications of this decision. Any financial implications will be the responsibility of the student.

Attendance

Regular attendance at class is expected of all students in all courses. Attendance in on-line courses will be interpreted as regular and consistent participation in the course. Attendance in the clinical practice/laboratory portions of Nursing courses is mandatory to enable the student to satisfy the evaluative criteria of the theoretical and practical components of courses. Students absent from class or practice due to illness may be required to present a certificate of illness. This certificate must be signed by a recognized health care provider. Absence for compassionate reasons is considered on an individual basis. Where absence is involved, make-up time may be required.

A course leader may initiate procedures to debar a student from attending classes and from final examinations and/or from receiving credit where unexcused absences exceed those permitted by faculty regulations.

Debarment Policy

A student may be debarred from class, clinical practice, laboratories, and examinations by action of the Associate Dean, Undergraduate Programs for persistent non-attendance, unsafe clinical practice, and/or failure to produce assignments to the satisfaction of the instructor. Once the debarment process has been initiated, the student will not be able to voluntarily withdraw from the course that is presently under investigation. Students so debarred will have failed that course.

Failures in Nursing Courses

Students will be permitted to repeat a nursing course only once following a failure. Withdrawal from the program will be required following a second failure in the same nursing course or any two clinical courses. Students who fail a Nursing course twice and are required to withdraw from the College of Nursing are ineligible for re-admission to the College of Nursing.

Clinical Absence

Bachelor of Nursing Program students returning following one year or more absence from clinical courses must complete a mandatory demonstration of psychomotor skills competency in the skills lab. Competency must be
demonstrated prior to clinical attendance. Students should consult with a student advisor for instructions. Testing must be completed prior to July 1.

Failures in Clinical (Pass/Fail) Courses

Students who fail a clinical course will be required to accept a supportive learning contract prior to being given permission to register in another clinical course.

Failures in Clinical Course Rotations

Students who fail a rotation of a clinical course in which there are multiple rotations will be debarred from the course immediately following that rotation and will receive a final grade of "Fail". These students will not be permitted to voluntarily withdraw from the course following receipt of the failed grade.

Unsafe Clinical Practice Policy

The debarment policy will be invoked when the student demonstrated unsafe clinical practice. Unsafe clinical practice involves actions or behaviours which result in adverse effects or the risk of adverse effects to the health and well-being (psychological or physical) of the client, family, staff, faculty, or other students. Unsafe clinical practice is an occurrence, or a pattern of behaviour involving unacceptable risk.

Clinical Practice

Students enrolled in nursing courses with clinical practice components may not register for any other course during those designated clinical days. Nursing clinical practice may be scheduled during the morning, afternoon or evening. Weekends are also used for some sections in clinical courses.

All students must be registered in all clinical courses for both terms by the specified deadline. Failure to register by this date may prevent accommodation in a clinical course. Current deadlines are published in the Registration Information on the College of Nursing website.

Transportation costs to clinical practice settings are the responsibility of the student.

Every effort will be made to accommodate eligible students who register for clinical courses during the initial registration period. However, spaces in clinical courses are dependent upon the availability of clinical sites, which are determined by health care agencies and the availability of clinical teachers. Therefore, the College cannot guarantee that all students who registered for the course can be accommodated.

Clinical Agency Requirements

The College of Nursing has contractual arrangements with the agencies in which students are placed for clinical practice. The contracts set out specific expectations regarding the preparation of students prior to their placement in any clinical site and their fitness to practice.

The College of Nursing assists the student to complete the following requirements and further information about how these requirements are met will be provided during Year 2 orientation or during NURS 0500.

1. Personal Health Information Act (PHIA) Training

PHIA cards are required for clinical practice and will be checked at clinical sites.

2. Non-Violent Crisis Intervention Workshop

Provided after admission.

3. Electronic Patient Record Training

The following requirements are the responsibility of the student and must be completed independently, according to deadlines established by the College of Nursing. For newly admitted students, instructions about how to fulfill these requirements is set out in Section 3.1 Admission Requirements. Information set out below is for returning students only.

4. Immunizations

Once admitted to the College of Nursing, students are required to maintain an up-to-date immunization status. Deadlines for completion of required vaccines will be established for individual students as needed. Students should keep a copy of their immunization records and retrieve their immunization records from their files upon graduation.

Penalty for Non-Compliance with Immunization Policy

Returning students who do not comply with the deadlines for completion of their immunizations, will be placed on hold status, which blocks the student from the registration system. Students on hold will be permitted to register in mid-August after all documentation has been received. Students who register in mid-August may not be able to register in some or all of the courses they had originally planned to take, and may experience a delay in completing the program. Hold status also prevents receipt of refunds or histories/transcripts from the Registrar's Office, attending clinical practice, and graduation.

5. Mandatory Annual Influenza Vaccination

All undergraduate students in the College of Nursing are required to obtain an annual influenza vaccination and submit documentation confirming the vaccination by the published deadline.

Students who do not submit documentation of flu vaccination by the published deadline may not participate in clinical practice courses in Winter Term.

6. Criminal Record Search Certificate

Some clinical practice sites require that students complete a current or additional Criminal Record Search Certificate prior to the first clinical practice day.

Students charged with or convicted of a criminal offence are required to report this information to the Associate Dean, Undergraduate Programs, College of Nursing. Failure to report a criminal offence may result in dismissal from the program. Criminal offences will be reviewed by the College of Nursing Professional Unsuitability Committee for the implications of the conviction in view of the professional mandate to protect the public.

7. Child Abuse Registry

Some clinical practice sites require that students complete a current or additional Child Abuse Registry search check prior to the first clinical practice day.

Students listed on the Child Abuse Registry are required to report this information to the Associate Dean, Undergraduate Programs, College of Nursing. A listing on the Child Abuse Registry or failure to report the listing will result in dismissal from the program.

8. Adult Abuse Registry

Some clinical practice sites require that students complete a current or additional Adult Abuse Registry search check prior to the first clinical practice day.
Students listed on the Adult Abuse Registry are required to report this information to the Associate Dean, Undergraduate Programs, College of Nursing.

9. Cardiopulmonary Resuscitation Certification (CPR)

All students are required to obtain certification in CPR at the Health Care Provider Level. Returning students, including those certified at the Instructor level, must recertify in April/May each year to ensure that their certification is valid for the entire academic year. Proof of re-certification must be submitted annually by June 1 to the Student Services Assistant or designate.

Penalty for Non-Compliance with CPR Policy

Returning students who do not comply with the deadlines for submission of the CPR re-certification, will be placed on hold status, which prevents the student from the registration system. Students on hold will be permitted to register in mid-August after all documentation has been received. Students who register in mid-August may not be able to register in some or all of the courses they had originally planned to take, and may experience a delay in completing the program. Hold status also prevents receipt of refunds or histories/transcripts from the Registrar's Office, attending clinical practice and graduation.

10. Respirator Mask Fit Testing

Mask-fit test cards are required for clinical practice and will be checked at clinical sites.

Attire for Clinical Practice

All students are required to wear uniforms, name tags and crests during clinical courses, unless given specific instructions not to do so by the agency in which they are placed for clinical practice.

Professional Unsuitability By-Law

The Senate of the University has approved a by-law granting authority to the College to require a student to withdraw for reasons of professional unsuitability. A student may be required to withdraw from the College when, at any time, the College Council, through the Professional Unsuitability By-Law, believes the student to be unsuited for the profession of nursing, on general considerations of scholarship, professional fitness or professional conduct.

Copies of this by-law may be obtained from http://umanitoba.ca/faculties/nursing/undergrad/unsuitability-by-law.html See chapter, General Academic Regulations and Requirements.

Disciplinary Appeal

Until the final disposition of a disciplinary appeal, students in the Bachelor of Nursing Program will not be permitted to attend clinical practice or the nursing skills laboratory. At the discretion of the Associate Dean, Undergraduate Programs, College of Nursing, students may be granted permission to attend the lecture component only of a nursing course(s) while awaiting a final disposition of an appeal currently in progress.

3.2 Regulations for the Baccalaureate Program for Registered Nurses (BPRN)

Students are obligated to be familiar with all regulations governing their continued progress in the program.

Security of Academic Records

The University's policies regarding the security of student academic records are found in the chapter, "University Policies", of this Calendar.

Registration Status in the Program

Students admitted to the BPRN must complete a minimum of 3 credit hours of course work in the Fall or Winter term following admission. Admission will be revoked for students who do not complete at least 3 credit hours in their first or second term of study following admission.

Students are expected to maintain contact with the program by registering in at least one nursing course during each consecutive Fall and Winter term while they are enrolled in the Program.

Students who wish to interrupt their studies must apply in writing to the Associate Dean, Undergraduate Programs, for a Leave of Absence. Refer to section on Leave of Absence for further information.

Program Planning

Students are expected to meet with a Nursing Student Advisor prior to May 15 to plan their program for the upcoming year. Students who do not meet with the Nursing Student Advisor will be placed on hold status, which blocks the student from the registration system and prevents receipt of refunds or histories/transcripts from the Registrar's Office, and graduation.

Leave of Absence

BPRN students wishing to interrupt their studies must have completed a minimum of 3 credit hours of course work in the College of Nursing in the Fall or Winter term of their admission year. Students must submit a written Leave of Absence request to the Associate Dean, Undergraduate Programs, College of Nursing. Leave of Absence status does not extend the program time limit outlined in the College of Nursing regulations. To maintain a Leave of Absence status at the University of Manitoba, students may not attend any other post-secondary institution during the period in which the Leave of Absence is in effect. See section Transfer of Credit.

Reinstatement

Students who have withdrawn from the College of Nursing (interrupted their studies without requesting a Leave of Absence) must submit a written request for reinstatement to the Associate Dean, Undergraduate Programs. The student advisor will inform the student of the appropriate procedure and advanced standing, if any, that the student may receive. Note: 1) the student who does not attend another faculty or institution and requests, within five years of voluntary withdrawal, to re-enter the College of Nursing will be advised to forward such a request to the Associate Dean, Undergraduate Programs; 2) the student who requests to return to the College of Nursing more than five years after withdrawal must re-apply; 3) the student who has attended another faculty or an institution following withdrawal from Nursing must re-apply. See section 2.1 Advanced Standing/Transfer of Credit. Note that the BPRN must be completed within five years, including time on a Leave of Absence.

Residence Requirements

Students are required to complete, with the minimum grade of "C" in each course, at least 32 credit hours of University of Manitoba courses. Of these courses, a minimum of 20 credit hours must be from among those offered by the College of Nursing.

Course Work and Evaluation

Supplemental Examinations or Tests

The College of Nursing does not permit supplemental examinations or tests.
"0900" Level Courses
Credit will not be given for "0900" courses.

Prerequisite Deficiency
Students who enrol in courses provisionally pending satisfactory completion of pre- or co-requisites must, if unsuccessful, withdraw or amend their registration accordingly. The College of Nursing reserves the right to not send reminders of the requirement to withdraw.

Challenge for Credit
Students wishing to challenge a course for credit should contact a student advisor.

Proof of Professional Registration
Verification of registration of returning students will be obtained by the College of Nursing annually from the College of Registered Nurses of Manitoba (CRNM). Students not registered with the College of Registered Nurses of Manitoba and continuing in the program must submit proof annually of active practicing status in the Canadian jurisdiction in which they hold membership.

After admission and at any time prior to completing the program, students with any changes to their active practicing status with the CRNM, or other Canadian jurisdiction in which they hold membership (e.g., conditions placed on a registration or ineligibility for active practicing status), are required to report this information to the Associate Dean, Undergraduate Programs, College of Nursing. Such changes will be reviewed on a case by case basis. Failure to report a change in status may result in disciplinary action.

Academic Progression
Students will be required to obtain a minimum of "C" grade (2.0) in every course, and a minimum Program GPA of 2.5 in order to graduate. A final grade of "D" in any course taken to complete the degree requirement is considered a failure and is not accepted by the College.

Students must have a minimum Degree GPA of 2.5 to proceed in the program. For further information, refer to: Academic Probation - Baccalaureate Program for Registered Nurses.

Dean's Honour List
Students who achieve a minimum Term GPA of 3.5, including courses taken on a Letter of Permission, and who are registered for a minimum of 12 credit hours, will be placed on the Dean’s Honour list. The Dean’s Honour list will be determined after each term of study.

Degree with Distinction
Students who obtain a Degree GPA of 3.8 and above in their program of studies will be eligible for a Degree with Distinction.

Academic Probation
Students will be assessed after the Winter term upon completion of a minimum of 18 credit hours. Students failing to achieve the minimum Degree GPA of 2.5 will be placed on probationary status.

Probationary students will be assessed at the end of the Winter term after completion of a minimum of 15 credit hours. Students failing to achieve the minimum Degree GPA of 2.5 will be placed on academic suspension.

Academic Suspension
A probationary student who does not achieve the minimum academic standing is required to withdraw from the College of Nursing with the status "academic suspension." While suspended indefinitely, after one year’s suspension the student may apply for reinstatement on academic probation.

To request reinstatement following academic suspension, the student should submit a written request before May 1 to the Chair, Student Appeals Committee, College of Nursing.

Voluntary Withdrawal
Students are allowed only one voluntary withdrawal per nursing course in the College of Nursing.

Students who voluntarily withdraw from a nursing course a subsequent time will have their withdrawal reversed and will be expected to complete the course. Students planning to withdraw from any course are advised to speak with a student advisor regarding the implications of this decision. Any financial implications will be the responsibility of the student.

Attendance
Regular attendance at class is expected of all students in all courses. Attendance in on-line courses will be interpreted as regular and consistent participation in the course. Attendance in the clinical practice/laboratory portions of nursing courses is mandatory to enable the student to satisfy the evaluative criteria of the theoretical and practical components of courses. Students absent from class or practice due to illness may be required to present a certificate of illness. This certificate must be signed by a recognized health care provider. Absence for compassionate reasons is considered on an individual basis. Where absence is involved, make-up time may be required.

A course leader may initiate procedures to debar a student from attending classes and from final examinations and/or from receiving credit where unexcused absences exceed those permitted by college regulations.

Debarment Policy
A student may be debarred from class, clinical practice, laboratories, and examinations by action of the Associate Dean, Undergraduate Programs for persistent non-attendance, unsafe clinical practice, and/or failure to produce assignments to the satisfaction of the instructor. Once the debarment process has been initiated, the student will not be able to voluntarily withdraw from the course that is presently under investigation. Students so debarred will have failed that course.

Failures in Nursing Courses
Students will be permitted to repeat a nursing course only once following a failure. Withdrawal from the program will be required following a second failure in the same nursing course. Students who fail the same Nursing course twice and are required to withdraw from the College of Nursing are ineligible for re-admission to the College of Nursing.

Professional Unsuitability By-Law
The Senate of the University has approved a by-law granting authority to the College to require a student to withdraw for reasons of professional unsuitability. A student may be required to withdraw from the College when, at any time, the College Council, through the Professional Unsuitability By-Law, believes the student to be unsuited for the profession of nursing, on general considerations of scholarship, professional fitness or professional conduct.
Copies of this by-law may be obtained from the College of Nursing website, umanitoba.ca/nursing. See chapter, General Academic Regulations and Requirements.

**Clinical Agency Requirements**

**Immunizations**

Immunizations are a requirement mandated by the Regional Health Authorities.

New students enrolling in the BPRN must provide proof of current immunization by July 15. Once admitted to the College of Nursing, students are required to maintain an up-to-date immunization status. See Penalty for Non-Compliance of Immunization and CPR section. Students should keep a copy of their immunization records and retrieve their immunization records from their files upon graduation.

**Cardiopulmonary Resuscitation Certification (CPR)**

All students must be certified at the Health Care Provider (HCP) Level. Newly admitted students must submit proof of certification to the Student Services Assistant or designate by July 15. Thereafter, registered nurses are to maintain current certification at the required level.

**Penalty for Non-Compliance of Immunization and CPR**

Students who do not comply with the deadlines for proof of current CPR and/or immunizations will be placed on hold status, which blocks the student from the registration system. Students on hold status will be permitted to register after all documentation has been received. Hold status also prevents receipt of refunds or histories/transcripts from the Registrar’s Office, attending clinical practice and graduation. Students who register after the initial registration period may not be able to register in some or all of the courses they had originally planned to take, and may experience a delay in completing the program.

**Criminal Record Check/Child Abuse Registry Check/Adult Abuse Registry Check**

Students are required to hold active registration with the CRNM which further requires a yearly self-declaration of any criminal charges or convictions. In addition, at any time prior to completing the BPRN (regardless of admission date), students charged with, or convicted of, a criminal offence or listed on the Child Abuse Registry or the Adult Abuse Registry are required to report this information to the Associate Dean, Undergraduate Programs, College of Nursing. Failure to report a criminal offence or listed on the Child Abuse Registry or the Adult Abuse Registry may result in dismissal from the program. Criminal offences will be reviewed by the College of Nursing for the implications of the conviction in view of the professional mandate to protect the public. A listing on the Child Abuse Registry or failure to report the listing will result in dismissal. In addition, please note that some clinical practice sites require that students complete a current or additional Criminal Record Check and/or a Child or Adult Abuse Registry check.

**Name Tags**

Students are required to wear a University of Manitoba, College of Nursing name tag during clinical/project courses when meeting with patients or clients.

**SECTION 4: Bachelor of Nursing**

**4.1 Bachelor of Nursing Program - if admitted September 2015 and thereafter**

Non-nursing courses must be completed within 10 years; and nursing courses must be completed within 5 years of admission to the program in order to be eligible for admission and advanced standing (transfer credit).

This program can be done by full-time and part-time study.

All courses from any given year are to be completed before proceeding to the next year.

Note 1: All courses can be completed in University 1, or an equivalent program, if students do not wish to extend their program of study.

Note 2: Science electives are courses that are taught by the Faculty of Science. With the exception of Geological Sciences GEOL 1XX0, courses under the Clayton H. Riddell Faculty of Environment, Earth, and Resources do not meet the Science elective requirements if taken in 2003-2004 and later. 1000 level introductory Geological Sciences (courses GEOL 1XX0) now offered under the Clayton H. Riddell Faculty of Environment, Earth, and Resources, will be accepted as Science courses if taken prior to September 1, 2006.

Note 3: HEAL 1600 Health and Health Professions may not be used as Science elective.

Note 4: Science Prerequisites. Students must meet the current Science prerequisites before registration for Science courses. See the chapter for the faculty of Science for the current prerequisites.

Note 5: All of the elective courses must be at the 1000 level or higher.

Note 6: NURS 1500 is available only to students in the Aboriginal Nursing Cohort Initiative.

Note 7: The former NURS 1280 must have been completed within five years of admission to the College of Nursing.

Note 8: NURS 3532. Students admitted to the College of Nursing prior to September 2017 require permission of the Associate Dean (Undergraduate Programs) to register for NURS 3532.

**Year 2** (31 credit hours)

**Term 1**
NURS 2500  Health and Illness 1: Pathophysiology/Pharmacology/Assessment  6
NURS 2510  Client and Context 1: Human Growth and Development  2
NURS 2518  Health and Illness 2: The Older Client  3
NURS 2530  Nursing Skills 1  1
NURS 2520  Professional Foundations 1: Development of Professional Identity  2
NURS 2540  Nursing Practice 1  2

Term 2
NURS 2514  Health and Illness 1: Pathophysiology/Pharmacology/Health Assessment  6
NURS 2522  Client and Context 2: Human Diversity  3
NURS 2532  Nursing Skills 2  1
NURS 2542  Nursing Practice 2  3
HNSC 2170  Nutrition for Health Professionals  2

Year 3 (30 credit hours)

Term 1
NURS 3510  Client and Context 3: Supportive and Palliative Care  3
NURS 3512  Health and Illness 4: Acute and Chronic Illness  5
NURS 3520  Professional Foundations 2: Health Education  2
NURS 3530  Nursing Skills 3  1
NURS 3540  Nursing Practice 3  4

Term 2
NURS 3514  Health and Illness 5: Mental Health and Illness  3
NURS 3532  Nursing Skills 4 (see Note 8)  1
NURS 3542  Nursing Practice 4  4
NURS 3550  Professional Foundations 3: Evidence Informed Practice in the Health Sciences  4
NURS 3560  Professional Foundations 4: Law and Ethics in Nursing Practice  3

Year 4 (36 credit hours)

Term 1
NURS 4500  Health and Illness 6: Gender and Reproductive Health  3
NURS 4510  Client & Context 4: Family Health  3
NURS 4520  Professional Foundations 5: Interprofessional and Collaborative Practice  3
NURS 4530  Nursing Practice 5  4

 Term 2
NURS 4540  Health and Illness 7: Community and Population Health  5
NURS 4550  Professional Foundations 6: Leadership and Change Management  4
NURS 4560  Professional Foundations 7: Preparation for Nursing Practice 7  1
NURS 4570  Nursing Practice 6  4

Term 3
NURS 4580  Nursing Practice 7  9

Reminder: It is the responsibility of the student to ensure that degree requirements are met. It is the responsibility of students to ensure all program requirements have been met before working as a graduate nurse and/or writing the NCLEX to become a Registered Nurse. In order to be eligible to work as a graduate nurse and/or write the NCLEX, students must meet all program requirements and requirements of the College of Registered Nurses of Manitoba.

NURS 4580 Nursing Practice 7

All other courses in the curriculum must be successfully completed and the grade posted prior to starting NURS 4580.

Any costs incurred in completing this course are the responsibility of the student. A student's chosen area for completion of practicum experience must be approved by the College of Nursing. The location of the practicum must meet the approval of the University of Manitoba. The location of the practicum is subject to change in the event approval is not received. There may be organizations which require contractual arrangements with the student and/or University of Manitoba prior to permitting the student to enter into the practicum experience. There is no guarantee the University of Manitoba will enter into such contractual arrangements to permit the student to carry out practice at a particular agency or site. In such cases, the student should be prepared to choose an alternate agency or site.

NURS 4560 Professional Foundations 7: Preparation for Nursing Practice 7

Preparation for Nursing Practice 7 must be completed in the term just prior to taking NURS 4580: Nursing Practice 7. Therefore, students who fail or withdraw from any of the following courses: NURS 4540: Health and Illness 8: Community and Population Health; NURS 4550: Professional Foundations 6: Leadership and Change Management; or NURS 4580: Nursing Practice 7 must also repeat NURS 4560: Professional Foundations 7: Preparation for Nursing Practice 7, even if it was successfully completed, in order that they are taking the course in the term just before NURS 4580: Nursing Practice 7.

In the instance where a student is required to repeat NURS 4560: Professional Foundations 7: Preparation for Nursing Practice 7, the requirement that the Professional Foundations 7 be completed as a co-requirement of Nursing Practice 6 will be waived.

4.2 Baccalaureate Program for Registered Nurses (BPRN)
Effective in Fall 2019, admission intake has been suspended.

The College of Nursing BPRN was developed to recognize and value the knowledge and experience of practicing Registered Nurses. The learner-centred, process curriculum is designed to further the capacity of Registered Nurse practice in an ever-changing and increasingly complex health care system.

The curriculum consists of a minimum of 36 credit hours in Nursing, and 9 credit hours from Arts, Science or a professional faculty (for a total of 45 credit hours).

Students may elect full-time or part-time study. A variety of community settings are utilized for clinical experience. Courses may be offered in late afternoons or evenings, during Summer session and through distance education (correspondence) or internet-based study.

Students graduating with the minimum of 45 credit hours of coursework will be considered on an individual basis for admission to the graduate program in Nursing (Master of Nursing). For further information, contact the College of Nursing, 204-474-7452.

4.2.1 Special Student Status in Nursing

Students who are not admitted to the BPRN, may be eligible to apply to the College of Nursing as a special student. Once admitted, students may register in University of Manitoba courses. Following are the guidelines for special student status:

- Special Students are allowed to register for a maximum of 15 credit hours.
- Special Students must obtain a minimum of "C" grade in a course in order to transfer credit into the BPRN.
- A nursing course completed as a special student may be accepted subsequently for credit in the BPRN up to five years from the date of completion.

Prior to registering for a nursing course, all special students must obtain written permission from a College of Nursing student advisor and present a photocopy of their current Active Practising Membership with the College of Registered Nurses of Manitoba or other jurisdiction.

Completion of courses as a special student does not guarantee admission into the BPRN. All students must complete the application forms and submit required information by the application deadline for the term in which students are applying, unless otherwise indicated at the time of application.

The College of Nursing will allow Registered Nurses admitted to another faculty at the University of Manitoba or another university to register for a maximum of 15 credit hours of nursing courses prior to being admitted to the College of Nursing. Written permission must be obtained from a student advisor and does not guarantee space in the course.

4.2.2 BPRN - Curriculum

Note: Nursing electives may not be offered every year.

NURS 4210 Independent Study in Nursing Practice 4
NURS 3560 Professional Foundations 4: Law and Ethics in Nursing Practice 3
NURS 4550 Professional Foundations 6: Leadership and Change Management 4

Nursing Electives (see Note 2) 10
Non-Nursing Electives (see Note 3) 9

Nursing Electives

10 credit hours of acceptable Nursing electives are to be chosen from the following list – at least one course chosen must be a 4 credit hour course.

- NURS 2110 Health Assessment of Individuals (3)
- NURS 2200 Topics in Aging (3)
- NURS 3200 Nursing of Individuals and Families with Long-Term Illness and Disability (4)
- NURS 3230 Perspectives on Mental Health Nursing (4)
- NURS 3330 Women and Health (3)
- NURS 2510 Client and Context 2: Human Diversity (3)
- NURS 3350 Counselling Skills for Nurses (3)
- NURS 3390 Nursing in Rural Environments (4)
- NURS 3400 Men’s Health: Concerns, Issues and Myths (3)
- NURS 4160 Community Health Nursing 2 (4)
- NURS 3510 Client and Context 3: Supportive and Palliative Care (3)

In addition, the following courses from the Inter-Faculty Option in Aging are acceptable as Nursing electives:

- NURS 2610 / KIN 2610 Health and Physical Aspects of Aging (3)
- SWRK 2650/ IDES 2650/ HMEC 2650/ REC 2650 The Social Aspects of Aging (3)

NOTES:

1) NURS 3430 should be taken in the first 12 credit hours of the program. Students who have credit for the previous NURS 3190 may substitute this course for NURS 3430.

2) Nursing electives may be used to customize a student’s program. Electives may be used to expand on a number of different areas of nursing or may be used to focus on a particular area of nursing practice.

3) Of the 9 credit hours of non-Nursing electives, no more than 6 credit hours may be at the 1000 (introductory) level. See section 5.4 for suggestions re: Non-Nursing Electives for the BPRN. Students may not take courses for credit for which it is assumed that the content was covered in the diploma nursing program (i.e., Anatomy, Physiology, Microbiology, Pharmacology, Psychology, Sociology, etc.).
4) Graduates of the DNA program at Red River College are required to substitute a 4 credit hour Nursing clinical course for NURS 3220.

5) NURS 3360 and NURS 4300 are no longer offered. Students who have previously completed either course within 5 years prior to admission to the College of Nursing may use NURS 3360 in place of NURS 3220 and/or NURS 4300 as a nursing elective.

4.2.3 Clinical Courses and NURS 3200 (Long Term Illness) and NURS 4210 (Independent Study) for the BPRN

Review section 3.1 Regulations for All Students which contains information regarding the Personal Health Information Act (PHIA), immunization and CPR regulations, and other information specific to clinical practice.

A clinical project course (normally designated by the fact that it is a 4 credit hour project based course) involves a heavier workload and time commitment than a 3 credit hour course. For most of these courses, clinical placements/assignments will be arranged between the course leader and student at or prior to the start of a term.

NURS 3200 (Long Term Illness), students must contact the course leader at least three months prior to the start of classes to state their intention to register for this course and to discuss preference of clinical sites. Placement sites will be arranged as requested by the student on a first-come, first-served basis according to the availability of the agency. Registration in this course is restricted to students who have contacted the course leader.

NURS 4210 Independent Study in Nursing

The Independent Study in Nursing is designed to provide the learner with an opportunity to synthesize previous learning while working with a high degree of independence. Under the guidance of a faculty advisor, students explore a topic of their choosing and design learning objectives consistent with the purpose of the course. Students are required to contact the course leader at least 8 weeks prior to the start of the course to select a topic and faculty advisor. The choice of topic, the proposed plan for completion of the Independent Study, and the faculty advisor must all be approved by the College of Nursing.

Information sessions are scheduled, normally in April for the Fall session and in October for the Winter session, to familiarize students with the course. Students should check the College's web page, BPRN section, for announcements about dates and times.

If a practice setting is required as part of the student's learning objectives, the student is responsible for negotiating access to the setting and addressing agency and faculty requirements. Be advised that there may be organizations which require contractual arrangements with the student and/or the University of Manitoba prior to permitting the student to enter the practice setting. These arrangements are subject to approval by the College and require pre-planning.

Note: the prerequisite for this course is 35 credit hours of completed study in the program.

4.2.4 Courses Which May be Used as Non-Nursing Electives in the BPRN

Courses may be selected from any faculty or school of the University, subject to faculty/department regulations and subject to the student's meeting any prerequisite requirements. See Note 4 under 4.4 BPRN Curriculum. Some suggestions follow:

Faculty of Arts courses - e.g. anthropology, native studies, psychology, sociology, religion

Asper School of Business (Management) - e.g. courses in business administration, management, organizational behaviour

Faculty of Kinesiology and Recreation Management

Faculty of Science - e.g. biology, chemistry, computer science, microbiology, zoology

Faculty of Social Work - e.g. courses in social welfare policy, communication skills

4.3 Courses Available to Students in Other Faculties

Students registered in faculties other than Nursing may take the following Nursing courses without College permission:

NURS 2200 Selected Topics in Aging and Health

NURS 3330 Women and Health

NURS 3400 Men's Health: Concerns, Issues and Myths

NOTE: These courses are not intended for first year students.

SECTION 5: Nursing Course Descriptions-1000 Level

NURS 1500 Preparing for Professional Nursing Education  Cr. Hrs. 3

Students will develop knowledge, skills, attitudes, and approaches to learning that increases their opportunity for success in baccalaureate nursing education. Restricted to the students in the Aboriginal Cohort in Nursing program.

SECTION 5: Nursing Course Descriptions-2000 Level

NURS 2110 Health Assessment of Individuals  Cr. Hrs. 3

Description The focus is on health assessment of adults including the normal changes which occur in childhood and aging. The course will provide opportunity to learn the health history and physical examination skills essential to health assessment.

NURS 2200 Selected Topics in Aging and Health  Cr. Hrs. 3

Emphasis will be placed on theory and research related to a current topic in aging and health. Special attention will be directed to integrating concepts and processes of aging. A practicum/field work component will be an integral part of the course. Prerequisite: core courses in the Inter-faculty Option in Aging or permission from the course leader.

NURS 2500 Health and Illness 1: Pathophysiology/Pharmacology/Assessment  Cr. Hrs. 6

This course provides students with a comprehensive survey of selected pathophysiological processes that produce alterations in human health, and the related pharmacological interventions and health assessment techniques. May not be held with the former NURS 2120, the former NURS 2220, the former NURS 3290, or the former NURS 3310.

NURS 2510 Client and Context 1: Human Growth & Development  Cr. Hrs. 2

This course provides students with knowledge of normal human growth and development across the lifespan. May not be held with NURS 1260. Registration is normally restricted to students in Year 2 of the program.

NURS 2514 Health and Illness 3: Pathophysiology/Pharmacology/Assessment  Cr. Hrs. 6

This course provides students with a comprehensive survey of selected pathophysiological processes that produce alterations in human health, and the related pharmacological interventions and health assessment techniques. May not be held with the former NURS 2120, the former NURS 2220, the former NURS 3290 or the former NURS 3310. Prerequisite: NURS
2500. Registration is normally restricted to students in Year 2 of the program.

**NURS 2518 Health & Illness 2: The Older Client**  
**Cr. Hrs. 3**  
This course provides students with knowledge of the age-related changes and illnesses experienced by older adults. It introduces students to health problems commonly occurring in this age group. Nursing strategies to encourage, maintain and enhance functional abilities and independence in older adults in the context of long term care are evaluated. May not be held with NURS 2230 or NURS 2512. Pre- or co-requisites: NURS 2500 or NURS 2510. Registration is normally restricted to students in Year 2 of the program.

**NURS 2520 Professional Foundations 1: Development of Professional Identity**  
**Cr. Hrs. 2**  
Description This course provides the student with an introduction to the conduct, knowledge and values that characterize a professional registered nurse. Registration is normally restricted to students in Year 2 of the program.

**NURS 2522 Client & Context 2: Human Diversity**  
**Cr. Hrs. 3**  
This course provides students with knowledge of the social factors that enhance or diminish the health of individuals, families and communities. Students will also analyze the concept of client-centred care and its relevance in the practices of health care professionals. May not be held with NURS 2156. Pre- or co-requisites: NURS 2500 and NURS 2520. Registration is normally restricted to students in Year 2 of the program.

**NURS 2530 Nursing Skills 1**  
**Cr. Hrs. 1**  
This course introduces students to the basic health assessment and psychomotor skills necessary to provide novice-level nursing care in the practice setting. May not be held with NURS 2120 and NURS 2130. Pre-or Corequisite: NURS 2500. Registration is normally restricted to students in Year 2 of the program. This course is graded on a Pass/Fail Basis.

**NURS 2532 Nursing Skills 2**  
**Cr. Hrs. 1**  
This course introduces students to the basic health assessment and psychomotor skills necessary to provide novice-level nursing care in the practice setting. May not be held with NURS 2120 and NURS 2130. Prerequisites: NURS 2530 and NURS 2540. Pre- or Co-requisite: NURS 2514. Registration is normally restricted to students in Year 2 of the program. This course is graded on a Pass/Fail Basis.

**NURS 2540 Nursing Practice 1**  
**Cr. Hrs. 2**  
This course enables students to demonstrate clinical competence by applying the theoretical knowledge, psychomotor skills and health assessment skills covered in Year 1 Term 1 courses in the practice setting. Pre- or co-requisites: NURS 2500, NURS 2510, NURS 2518 (or the former NURS 2512), NURS 2520 and NURS 2530. Registration is normally restricted to students in Year 2 of the program. This course is graded on a pass/fail basis.

**NURS 2542 Nursing Practice 2**  
**Cr. Hrs. 3**  
This course enables students to demonstrate clinical competence by applying the theoretical knowledge, psychomotor skills and health assessment skills covered in Year 1 Term 2 courses in the practice setting. May not be held with NURS 2190. Pre- or co-requisites: NURS 2514, NURS 2522 (or the former NURS 2516), and NURS 2532. This course is graded on a pass/fail basis.

**NURS 2610 Health and Physical Aspects of Aging**  
**Cr. Hrs. 3**  
An introduction to health, well-being and aging. Emphasis on health as multidimensional including physical, social and mental health. Integration of theory and research in examining selected issues related to health and physical aspects of aging. May not be held with NURS 2610 and PHED 2610. (A required Option in Aging course)

### SECTION 5: Nursing Course Descriptions-3000 Level

**NURS 3200 Nursing of Individuals and Families with Long-Term Illness and Disability**  
**Cr. Hrs. 4**  
Nursing of individuals and families of all age groups who require palliative nursing measures or need assistance in adapting to long-term illness. The learner will participate in planning relevant clinical experiences to meet own learning objectives.

**NURS 3220 Community Health Nursing I**  
**Cr. Hrs. 4**  
An analysis of concepts of prevention of disease/dysfunction and promotion of health in community based populations. Focus is on primary and secondary prevention and the promotion of health with identified risk groups. Population groups are assessed for risks to their physical and psychosocial health and current preventive and promotive measures analyzed and critiqued. The impact of macro systems in promoting health are discussed. MNHW NURS 3360.

**NURS 3230 Perspectives on Mental Health Nursing**  
**Cr. Hrs. 4**  
Emphasis will be placed on the mental health needs of individuals and their families who are experiencing mental health problems and/or mental illness. Diverse perspectives on mental health and illness will be explored. A clinical practicum will provide an opportunity to apply mental health nursing principles in community settings.

**NURS 3330 Women and Health**  
**Cr. Hrs. 3**  
Introduction to health concepts and issues as they relate to women from a woman’s health perspective. Emphasis on enhancing self-care and prevention. Studies the relationship between a woman and the Canadian Health Care System, and appropriate methodology for self-care, vis-a-vis nutrition, reproduction, menarche, menopause, etc. Caution: This course is not intended for 1st year students.

**NURS 3350 Counselling Skills for Nurses**  
**Cr. Hrs. 3**  
Builds on the significance of interpersonal skills in nursing practice in health and illness. Examines theoretical basis and practical application of a counselling approach with clients. Students will have the opportunity for experiential learning.

**NURS 3390 Nursing in Rural Environments**  
**Cr. Hrs. 4**  
Emphasis will be placed on the health needs of residents in a rural environment. The nature of nursing and issues encountered in a rural setting, whether in a health care institution or a community health nursing practice are explored. A clinical practicum is an integral part of the course.

**NURS 3400 Men's Health: Concerns, Issues and Myths**  
**Cr. Hrs. 3**  
An exploration and examination of concerns, issues and myths surrounding men's health and men's health related behaviours. Students will develop a knowledge base for promoting health and preventing illness in men.

**NURS 3430 Seminar in Professional Nursing Foundations**  
**Cr. Hrs. 2**  
The study and application of academic skills, nursing informatics and theoretical foundations, designed to assist diploma-prepared registered nurses to successfully transition to university and the Baccalaureate Program for Registered Nurses. May not be held with NURS 3190.

**NURS 3450 Introduction to Legal and Ethical Foundations of Nursing Practice**  
**Cr. Hrs. 3**  
The legal and ethical foundations that guide nursing practice are examined. The process of critical analysis and reasoning will be applied to common legal and ethical issues.

**NURS 3510 Client and Context 3: Supportive and Palliative Care**  
**Cr. Hrs. 3**
This course provides students with the knowledge and critical thinking skills to provide supportive and palliative nursing care to individuals and families experiencing a variety of life-threatening illnesses including end of life. May not be held with the former NURS 4250. Prerequisites: HNSC 2170 and NURS 2542. Registration is normally restricted to students in Year 3 of the program.

NURS 3512 Health and Illness 4: Acute and Chronic Illness Cr. Hrs. 5
This course provides students with the knowledge and critical thinking skills necessary to provide nursing care to individuals and families experiencing acute and chronic illness. May not be held with the former NURS 3290 or the former NURS 3310. Prerequisites: HNSC 1210 and NURS 2542. Registration is normally restricted to students in Year 3 of the program.

NURS 3514 Health and Illness 5: Mental Health and Illness Cr. Hrs. 3
This course provides students with the knowledge and critical thinking skills necessary to provide nursing care to individuals and families experiencing acute and chronic mental illness and/or mental health problems. May not be held with the former NURS 4260. Prerequisites: NURS 3512, NURS 3510 and NURS 3540. Registration is normally restricted to students in Year 3 of the program.

NURS 3520 Professional Foundations 2: Health Education Cr. Hrs. 2
This course provides students with the knowledge and skills necessary to provide health information to clients across the lifespan in a variety of settings in both planned and spontaneous situations. Emphasis will be placed on client assessment and the appropriate use of existing health information resources. May not be held with NURS 2230 or NURS 4200. Prerequisite: NURS 2542. Registration is normally restricted to students in Year 3 of the program.

NURS 3530 Nursing Skills 3 Cr. Hrs. 1
This course introduces students to the basic health assessment and psychomotor skills necessary to provide intermediate-level nursing care in the practice setting. May not be held with the former NURS 3280. Prerequisites: NURS 2542. Registration is normally restricted to students in Year 3 of the program. This course is graded on a Pass/Fail basis.

NURS 3532 Nursing Skills 4 Cr. Hrs. 1
This course provides students with the opportunity to consolidate the health assessment and psychomotor skills necessary to attain proficiency in the provision of nursing care. May not be held with NURS 3280. Prerequisite: NURS 3540. Pre- or Co-requisite: NURS 3514. Registration is normally restricted to students in Year 3 of the BN program. This course is graded on a pass/fail basis.

NURS 3540 Nursing Practice 3 Cr. Hrs. 4
This course enables students to demonstrate clinical competence by applying the theoretical knowledge, psychomotor skills and health assessment skills covered in Year 3 Term 1 courses in the practice setting. May not be held with the former NURS 3300, the former NURS 3310, or the former NURS 4270. Pre- or Co-requisites: NURS 3512, NURS 3510, NURS 3520, and NURS 3530. Registration is normally restricted to students in Year 3 of the program. This course is graded on a Pass/Fail basis.

NURS 3542 Nursing Practice 4 Cr. Hrs. 4
This course enables students to demonstrate clinical competence by applying the theoretical knowledge and simulation skills covered in Year 3 Term 2 courses in the practice setting. May not be held with the former NURS 3300, the former NURS 3310, or the former NURS 4270. Pre- or Co-requisites: NURS 3514, NURS 3550, NURS 3560 and NURS 3532. Registration is normally restricted to students in Year 3 of the program. This course is graded on a Pass/Fail basis.

NURS 3550 Professional Foundations 3: Evidence Informed Practice in the Health Sciences Cr. Hrs. 4
This course provides students with the knowledge and skills to locate and critically appraise nursing and health care literature, and to make decisions about how research knowledge can be transferred into nursing and health care practice. May not be held with the former NURS 3210. Prerequisite: NURS 2542. Registration is normally restricted to students in Year 3 of the program.

NURS 3560 Professional Foundations 4: Law and Ethics in Nursing Practice Cr. Hrs. 3
This course provides the student with knowledge regarding the legal and ethical foundations that guide nursing practice. May not be held with NURS 3450 or NURS 4220. Prerequisite: NURS 2542. Registration is normally restricted to students in Year 3 of the program.

SECTION 5: Nursing Course Descriptions-4000 Level

NURS 4160 Community Health Nursing II Cr. Hrs. 4
Application, integration and synthesis of knowledge and skills in the utilization of the nursing process with families. Development of skills in the process of change with families. Orientation to the concept of prevention and health promotion as focal concepts in the practice of nursing with families in communities. Pre- or co-requisite: NURS 3220. May not be held with NURS 4300.

NURS 4170 Issues and Trends in Nursing and Health Care Cr. Hrs. 3
Study of the forces shaping nursing education, service and research and analysis of current issues in nursing and health care. The learner will develop awareness of professional nursing roles and responsibilities.

NURS 4190 Leadership in Nursing Practice Cr. Hrs. 3
Focuses on selected theories of leadership and management. Effective interpersonal behaviour in health care organizations will be examined. The learner will explore own potential to effect change in the health care system.

NURS 4210 Independent Study in Nursing Cr. Hrs. 4
The learner will have an opportunity to formulate a learning contract to explore, in depth, an area of nursing. This learning contract is to include a major emphasis on the theoretical basis of the selected topic. Prerequisite: 35 credit hours of completed study in the program.

NURS 4290 Clinical Practicum Cr. Hrs. 10
This course enables students to integrate and critically apply concepts, theories and relevant research to an area of practice and a client group of their choice. Care will address all levels of health, reflect application of a focused body of theory, and consider concepts of leadership, research, ethics, family and community care. Prerequisites: all courses in the program. Course is evaluated on a pass/fail basis.

NURS 4500 Health and Illness 6: Gender and Reproductive Health Cr. Hrs. 3
This course provides students with the knowledge and critical thinking skills to provide nursing care in response to the social construction of gender; gender-related health care needs; and the reproductive health needs of individuals and families. May not be held with NURS 2240. Prerequisite: NURS 3542. Registration is normally restricted to students in Year 4 of the program.

NURS 4510 Client and Context 4: Family Health Cr. Hrs. 3
This course provides students with the knowledge and critical thinking skills to support the health promotion of families across the lifespan. May not be held with NURS 2240. Prerequisite: NURS 3542. Registration is normally restricted to students in Year 4 of the program.

NURS 4520 Professional Foundations 5: Interprofessional and Collaborative Practice Cr. Hrs. 3
This course provides students with the knowledge, attitudes and skills necessary to collaborate with other care providers, including those from other health care disciplines, to problem solve and make decisions to enhance client care outcomes. For Bachelor of Nursing students:
Prerequisite: NURS 3542. Registration is normally restricted to students in Year 4 of the program. For Baccalaureate Program for Registered Nurses students: permission of the College of Nursing Registrar. Students in the Faculties of Health Sciences; Social Work; Education; Kinesiology and Recreation Management; Arts, Department of Psychology; and Faculty of Agricultural and Food Sciences, Department of Human Nutritional Sciences: completion of at least Year 3 of their program and permission of the Nursing Registrar. Students from other faculties and programs interested in taking this course will be considered on a case-by-case basis.

NURS 4530 Nursing Practice 5
Cr. Hrs. 4
This course enables students to demonstrate clinical competence by applying the knowledge and skills covered in Years 2 and 3 and Term 1, Year 4 courses, in the clinical setting. May not be held with NURS 2180. Pre-or Co-Requisites: NURS 4500, NURS 4510, NURS 4520. Registration is normally restricted to students in Year 4 of the program. This course is graded on a pass/fail basis.

NURS 4540 Health and Illness 7: Community and Population Health
Cr. Hrs. 5
This course provides students with the knowledge and critical thinking skills to work with groups and communities to support population based health promotion and disease prevention. May not be held with the former NURS 4420 or the former NURS 4440. Prerequisite: NURS 4530. Registration is normally restricted to students in Year 4 of the program.

NURS 4550 Professional Foundations 6: Leadership and Change Management
Cr. Hrs. 4
This course provides the student with knowledge regarding contemporary issues in nursing and health care, and the forces that shape contemporary and future nursing practice. Emphasis is placed on leadership development, change theory and critical inquiry. May not be held with the former NURS 4310. Prerequisite: NURS 3542. Registration is normally restricted to students in Year 4 of the program.

NURS 4560 Professional Foundations 7: Preparation for Nursing Practice 7
Cr. Hrs. 1
This course will enable students, in collaboration with the course leader, to assess their readiness for NURS 4580: Nursing Practice 7 and to remediate any knowledge or skill deficits identified during the assessment process. Students will also complete all requirements necessary for the selection and confirmation of the clinical setting in which they will complete NURS 4580: Nursing Practice 7. Co-requisite: NURS 4570. Registration is normally restricted to students in Year 4 of the program. This course is graded on a pass/fail basis.

NURS 4570 Nursing Practice 6
Cr. Hrs. 4
This course enables students to demonstrate clinical competence by applying knowledge and skills covered in Years 2, 3 and 4 courses in the clinical setting. May not be held with the former NURS 4430. Prerequisite: NURS 4530. Pre-or Co-requisites: NURS 4540 and NURS 4550. Co-requisite: NURS 4560. Registration is normally restricted to students in Year 4 of the program. This course is graded on a pass/fail basis.

NURS 4580 Nursing Practice 7
Cr. Hrs. 9
This course enables students to consolidate the knowledge, skills, and attitudes included in the Bachelor of Nursing program and achieve the CRNM entry-level competencies. May not be held with NURS 4290. Registration in this course is dependent on the completion of all other courses in the program. This course is graded on a pass/fail basis.
SECTION 4: Program and Graduation Requirements

4.1 Student Responsibility

4.2 Registration Assistance

4.3 Course Information by Year

SECTION 5: Course Descriptions

SECTION 1: Degree Programs Offered

1.1 Programs

<table>
<thead>
<tr>
<th>Program/Degree</th>
<th>*Years to Complete</th>
<th>*Total Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>B.Sc. Pharmacy</td>
<td>5</td>
<td>166</td>
</tr>
</tbody>
</table>

*This includes one year (30 credit hours) of study in University 1.

Students who are accepted for the fall 2018 intake will enter the B.Sc. (Pharmacy) program. Upon successful completion of their first year, students will be automatically transitioned into a modified Year 1 of the 4-year Doctor of Pharmacy (PharmD) program for the fall of 2019. Upon successful completion of the PharmD program, these students will graduate with a Doctor of Pharmacy degree.

1.2 Professional Designation

The College of Pharmacists of Manitoba

Students who are accepted for admission to the College of Pharmacy shall file an application for registration as a student of the College of Pharmacists of Manitoba, prior to the start of classes in September of the year they are admitted. Detailed information will be provided to each student, and can also be obtained from The College of Pharmacists of Manitoba, 200 Tache Ave., Winnipeg, Manitoba R2H 1A7; telephone, (204) 233-1411. Failure to complete this requirement will result in students being unable to participate in the Structured Practice Experiential Program (SPEP).

Full information on the requirements for licensure in the Province of Manitoba is available from the Registrar of The College of Pharmacists of Manitoba.

Pharmacy Examining Board of Canada

All applicants for licensure must pass the qualifying examinations of the Pharmacy Examining Board of Canada. Although PEBC has no language proficiency requirements, Provincial Regulatory Authorities do require these tests and language proficiency does affect candidates’ performance in the Qualifying Examination (Part I and Part II). Effective written and verbal communication skills, at levels satisfactory for a health professional, are essential for practice and for success in taking the PEBC examinations.

SECTION 2: Admission Requirements

2.1 Course Requirements

(University of Manitoba)

Chemistry CHEM 1300 and CHEM 1310
Biology BIOL 1020 and BIOL 1030
Mathematics MATH 1500, or MATH 1510, or MATH 1520, or MATH 1230
6 credit hours of Faculty of Arts courses
9 credit hours of open electives (any faculty)

Electives must include a 3 credit hour course which will meet the University's Written English (W) requirement. 0900 level courses such as ENGL 0930 are NOT acceptable as electives.

All admission requirements, as well as application deadline dates and forms, are included in the Applicant Information Bulletin which is available on the University website at:
http://umanitoba.ca/student/admissions/application/programs/pharmacy-application.html

2.2 Other Requirements

Other requirements

High school prerequisites: Biology 40S, Chemistry 40S, and Pre-Calculus Math 40S (min. 60%).

Minimum AGPA for consideration: 3.50. (Please refer to the College of Pharmacy Applicant Information Bulletin for more details.)

The admission process includes a written critical skills essay.

Selection criteria: 70% AGPA, 30% Written critical skills essay.

Criminal Record Check, Child Abuse Registry Check and Adult Abuse Registry Check

Many health care agencies where Pharmacy students are placed in a health care setting require a criminal record check, child abuse registry check and adult abuse registry check. As a result all successful applicants to the College of Pharmacy are required to provide a self-declaration of a Criminal Record, Child Abuse Registry and Adult Abuse Registry listing following provisional admission, and subsequently a current, official Criminal Record Search, Child Abuse Registry Check and Adult Abuse Registry Check. All documents must be submitted to the College of Pharmacy Dean’s Office by the first day of classes. Any applicant on the Child Abuse Registry will be denied admission. A criminal conviction will not necessarily result in denial of admission to the College of Pharmacy. Criminal offences will be reviewed by a sub-committee of the Pharmacy Admissions Committee for the implications of the conviction in view of the professional mandate to protect the public. Failure to disclose any adult criminal record or listing on the Child Abuse or Adult Abuse Registry will invalidate an application and shall result in automatic expulsion from the College of Pharmacy if the applicant has been admitted. In addition, the College of Pharmacists of Manitoba requires that all graduates of the College of Pharmacy who wish to obtain a license to practice pharmacy in this province, must disclose information about any conviction for an offence under the Criminal Code (Canada), the Controlled Drugs and Substances Act (Canada), or the Food and Drugs Act (Canada) in order to be considered for eligibility for registration with the College of Pharmacists of Manitoba. The review process conducted by the College of Pharmacy is independent of the review process conducted by the College of Pharmacists of Manitoba.

Immunization
All students enrolled in the College of Pharmacy must be immunized against the following diseases: diphtheria, tetanus, pertussis, polio, rubella, measles, mumps, varicella (chickenpox), hepatitis A and B, influenza and screened for Tuberculosis (Mantoux testing). Students admitted to first year Pharmacy will be provided with an Immunization package at the time of acceptance into the program. Students have the option to complete their immunizations with their own healthcare provider or participate in the Rady Faculty of Health Sciences Immunization Program on campus. Students will be required to complete their Immunization Record Form by the end of their first year. Students will not be able to attend clinical rotations until all immunization requirements are up-to-date. Students are responsible for updating their immunizations as needed. Completion of the immunization schedule is required for course progression in Pharmacy.

SECTION 3: College Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the College of Pharmacy has regulations and requirements, published below, that apply specifically to its students.

3.1 Scholastic Progress

For course progression in the College of Pharmacy students must achieve a minimum combined fall and winter term GPA of 2.00, and attain the minimum passing grade of “C” in each course.

A student in any of the first three years of the pharmacy program who records no more than two grades of “D” during the academic year, and who achieves a minimum combined fall and winter term GPA of 2.00, may at the discretion of the of the dean be permitted to apply for a supplementary examination in those courses.

A student in the fourth year of the pharmacy program who records no more than one grade of “D” during the academic year, and who achieves a minimum combined fall and winter term GPA of 2.00, may at the discretion of the of the dean be permitted to apply for a supplementary examination in that course.

Application forms for supplementary examinations are available in the College of Pharmacy Dean’s Office, and the examination is subject to a prescribed fee. Supplementary exams will normally take place in the following mid-summer examination session each year.

A student who has failed to record a minimum grade of “C” in more than two courses within years one to three of the pharmacy program, or in more than one course in the fourth year of the pharmacy program, or who records a grade of “F” during the academic year at any stage during their program may not be granted supplementary examinations unless the dean by reason of special circumstances applicable to the student’s case otherwise decides.

A candidate who has been allowed to sit for a supplementary examination may not be awarded a grade higher than “C” in that course. Grade calculations for any course following supplementary examination will be inclusive of on-course assessment. Grades achieved following supplementary examination will replace those grades originally recorded on the student’s academic record.

A student who fails to achieve a passing grade of “C” in one course, following supplementary examination if that option is offered, and who achieves a minimum combined fall and winter term GPA of 2.00, will be required to repeat that course and may at the discretion of the dean be required to repeat all, or a number of courses in that year.

A student whose combined fall and winter term GPA falls below 2.00, or who fails to achieve a minimum passing grade of “C” in two courses, following supplementary examination if that option is offered, and whose combined fall and winter term GPA remains above 1.75, will be considered to have failed that year, and will be required to repeat all subjects in the following academic year.

The records of all students who fail a year, and the disposition of the cases, shall be reported to College Council for information, but not for debate. Students who have cause to disagree with the disposition may file an appeal against the decision.

A student who fails more than one year in the program, or who fails the same year twice, shall be required to withdraw from the Pharmacy program.

A student who fails to achieve a passing grade in more than two courses in the academic session, or whose combined fall and winter term GPA falls below 1.75, or who fails to achieve a passing grade in a repeated year, will be required to withdraw from the Pharmacy program.

3.2 Appeals Concerning Scholastic Progress

Should a student wish to appeal against any decision concerning scholastic progress, the following procedure should be followed:

The problem should be discussed with the Associate Dean (Academic) of Pharmacy, who will supply information about the appeals procedure, academic regulations and related matters.

Students who still wish to proceed with an appeal should consult the office of Student Advocacy for advice and assistance, and a letter of appeal must be sent to the dean within 21 days of receiving notification of the decision. The letter should state the nature of the decision being appealed and the alternative that is being requested.

The Dean will respond in writing to notify the appellant of the date and time the student should attend a meeting of the College Appeals Committee.

The Appeals Committee will comprise: the Dean of the College (or designate) as chair; one senior support staff member as secretary; three members of the full-time faculty appointed by the full-time faculty; a representative of the profession appointed by the College of Pharmacists of Manitoba. The chair and senior support staff member are non-voting members.

Appellants have the right to attend the hearing of their appeal and may have a representative to assist them at the appeal hearing. This representative may be the Student Advocate or a fellow student or other full-time member of the university community not receiving payment for appearing, or working for Legal Aid. In addition, if the student wishes, one member of his or her immediate family, and also if desired a lawyer, may be present, but as observers who do not participate. The decision of the Appeals Committee will be conveyed to the student as soon as possible after the hearing.

If the appellant is still dissatisfied they may wish to discuss the issue further with Student Advocacy. Student appellants should not expect a favourable decision when their appeal is based on grounds related to external factors such as employment, sports, or hobbies.

3.3 Transfer of Credit Earned Elsewhere

The College of Pharmacy will transfer in external grades in a manner that is consistent with the University of Manitoba policy on the transference of external grades. The relevance of courses completed to the student’s educational objective at the University of Manitoba and the quality of academic achievement as evidenced by the student’s grades will be
determining factors in assessing acceptability of credits earned elsewhere. No transfer of credit will be given for courses taken ten years or more prior to the application date. No transfer of credit will be permitted for courses where a "D" grade (or its percentage equivalent) has been awarded.

### 3.4 Residence Requirements

A minimum of two years attendance at the university within the College is required for the Bachelor of Science in Pharmacy, except with the permission of the College.

### 3.5 Attendance at Class

Regular attendance is required of all students in all courses. Students who are absent from class for a period of three days or more due to illness must present a certificate from a physician to the Dean's Office upon their return. An instructor may initiate procedures to debar a student from attending classes and from final examinations where unexcused absences exceed three continuous sessions. Students must obtain prior approval from the Dean for an absence exceeding one day for reasons other than illness.

### 3.6 Voluntary Withdrawals

Any student seeking to withdraw from a portion of, or all of their courses must provide written notification to the Dean's Office of the reasons for this request. Re-entry to Pharmacy by students who voluntarily withdraw, will be dependent on the availability of space and external rotation facilities. Any student who has voluntarily withdrawn from a portion of, or all of their courses in Pharmacy on more than one occasion will not be permitted re-entry into the program. Withdrawals for medical or compassionate reasons will not contribute toward this maximum. Students who, for medical reasons, withdraw from the program may not re-register until they have established, through proper medical consultation, their fitness to resume studies.

### 3.7 Deferred Final Examinations

Students may file an application for a deferred final examination with the Dean for reasons of illness or other disability, or for compassionate reasons, setting out the reasons for the deferral. The application must normally be filed within forty-eight (48) hours of the scheduled date of the missed examination or, in a case where more than one examination was missed, within forty-eight (48) hours of the scheduled date of the last examination missed. The application must be accompanied by a medical certificate or otherwise appropriate documentation certifying the reason for the deferral, the inability of the student to write the examination at the regular scheduled time and, where possible, indicating the period of incapacity. Based on the evidence provided, the Dean shall decide whether the application is approved. Students who, for medical reasons receive deferred examination privileges for all final examination series may not re-register until they have established, through proper medical consultation, their fitness to resume studies.

Students may request a deferred examination(s) on the grounds that they are unable to write said examination(s) due to:

(a) participation in an inter-university, provincial, inter-provincial, national or international scholastic or athletic event

(b) religious obligations; or

(c) a medical condition.

Students requesting a deferred examination due to a known condition as listed above must file an application normally twenty (20) working days prior to the day of the scheduled examination.

Any student requesting deferred examination(s) will be required to sign an undertaking that the student has not discussed, reviewed, had access to, or otherwise become aware of the contents of the deferred examination except as expressly authorized by the instructor or professor for the course in which the deferred examination is being undertaken.

### 3.8 Incompletes

A student who is unable to complete the term work prescribed in a course may apply to the instructor prior to the end of lectures for consideration of a grade classification of "Incomplete". Should an "incomplete" be granted the student will still be required to write the final examination, if one is scheduled for the course, and a temporary grade of "IF" will be submitted. In addition to the grade, the recommendation for an "incomplete" should indicate the reason(s) for consideration being given, a description of the outstanding work to be completed, and the date by which the work must be submitted. If a final grade is not reported by the above maximum extension deadlines, the letter "I" will be dropped and the grade of "F" will remain as awarded, unless where specific circumstances warrant, the Associate Dean (Academic) extends the date by which an Incomplete must be cleared. Instructors must formally request such an extension prior to the lapse of the maximum deadline date. In addition, the Registrar’s Office must be notified of the extension.

### 3.9 Dean's Honour List

Eligible students who achieve a combined fall and winter sessional GPA of 4.00 or higher will be placed on the Dean’s Honour List. Eligible students must have completed a minimum of 12.5 credit hours in each of the fall and winter terms. (Exception: Fourth year students must complete a minimum of 10 credit hours during the winter term.) The Dean's Honour List designation is not applied until the end of the winter term.

### 3.10 Academic Self-Declaration

All students accepted into the College of Pharmacy will be required to complete a Self-Declaration of Records Form which declares current or previous academic suspensions and disciplinary actions. The disclosure contained therein must be satisfactory to the College of Pharmacy.

### 3.11 Experiential Training (Structured Practical Experiential Program (SPEP))

Approved Placement Sites are limited, and the University cannot warrant that it will be able to find suitable placement sites in convenient locations, in a timely manner or at all. Students are responsible for all costs associated with SPEP, including travel and living expenses where placements are outside Winnipeg.

Under The Workers Compensation Act (Manitoba), students of the University of Manitoba who are engaged in a field practicum as a required part of their program are generally covered for injuries sustained in the course of and arising out of the practice experience. However, where the practicum takes place outside of Manitoba, and the student is not a Manitoba resident, workers compensation coverage may not be extended, based on the provisions of The Workers Compensation Act. However, other insurance coverage may be available to registered students. Students are encouraged to contact the SPEP Coordinator at the earliest opportunity to determine if any such alternative arrangements are possible.

### 3.12 Academic Honesty

Many courses in the College of Pharmacy require group projects and students should be aware that these are subject to the same rules regarding academic honesty as individual projects. Because of the unique nature of group work, all members of the group should exercise special
care to insure that work completed does not violate academic integrity. Should a violation occur, group members will be held jointly accountable unless the violation can be attributed to a specified individual, or group of individuals.

In the College of Pharmacy all suspected cases of academic dishonesty will be passed to the Dean’s Office for evaluation.

### 3.13 Professional Unsuitability By-Law

The Senate has approved a by-law granting authority to the College to require a student to withdraw for reasons of professional unsuitability. Copies of this by-law may be obtained from the College of Pharmacy Dean’s Office.

### 3.14 Completion of the Bachelor Program

The maximum time allowable for completion of the Bachelor of Science, Pharmacy degree is seven years. Students must successfully complete all of the course work associated with a year in the program prior to being allowed to register for courses in the next year. In certain cases, the dean may grant exceptions to this requirement.

### SECTION 4: Program and Graduation Requirements

#### 4.1 Student Responsibility

Students are advised to carefully review the College of Pharmacy chapter of the Undergraduate Calendar to ensure compliance with degree program requirements.

It is the student’s responsibility to know all relevant regulations, policies and practices.

Final completion of degree requirements is the responsibility of the student.

The University of Manitoba Registration System is not a degree audit system and the onus is on students to make sure they are selecting courses appropriate to their academic program.

#### 4.2 Registration Assistance

If you have questions or problems with your registration you can contact the Aurora Student Help Line at (204) 474-9420, or call the College of Pharmacy Dean’s Office at (204) 474-9306.

#### 4.3 Course Information by Year

##### First Year Orientation

A mandatory orientation session will be held on Tuesday, September 4, 2018 for 1st Year Pharmacy students. More information on the orientation session will be provided to all students admitted to the college.

##### First Year Students

**Students** who are accepted for the fall 2018 intake will enter the B.Sc. (Pharmacy) program. Upon successful completion of their first year, students will be automatically transitioned into a modified Year 1 of the 4-year PharmD program for the fall of 2019. Upon successful completion of the PharmD program, these students will graduate with a Doctor of Pharmacy degree.

It is important that you register at your initial access time to guarantee that you get space in the required Science courses. All Pharmacy reserved space in Science will only be held until early August.

When registering for Chemistry & Microbiology please register in the correct lecture & lab sections that have been reserved for Pharmacy Students.

Please refer to the Academic Schedule for all important dates.

#### The courses in the first year of the program are as follows:

<table>
<thead>
<tr>
<th><strong>Course No.</strong></th>
<th><strong>Credit Hours</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 2210</td>
<td>Organic Chemistry</td>
</tr>
<tr>
<td>CHEM 2360</td>
<td>Biochemistry 1</td>
</tr>
<tr>
<td>CHEM 2370</td>
<td>Biochemistry 2</td>
</tr>
<tr>
<td>PHRM 1000</td>
<td>Introduction to Pharmacy</td>

<td>Fundamentals of Medical Physiology</td>
</tr>
<tr>
<td><strong>Total Credit Hours</strong></td>
<td><strong>30</strong></td>
</tr>
</tbody>
</table>

##### Second Year Students

It is important that you register at your initial access time to guarantee that you get space in the required Science courses. All Pharmacy reserved space in Science will only be held until early August.

When registering for Microbiology please register in the correct lecture section that has been reserved for Pharmacy Students.

Please refer to the Academic Schedule for all important dates.

IPE events will be held on the afternoons of Friday, September 14, 2018 and Friday, January 25, 2019.

**PHRM 2700** (SPEP-2) – This course falls under the Spring/Summer session guidelines. The College of Pharmacy Dean’s Office will register you for this course in March. Fees for PHRM 2700 will be assessed in March 2019.

#### SPEP-2

The courses in the second year of the program are as follows:

<table>
<thead>
<tr>
<th><strong>Course No.</strong></th>
<th><strong>Credit Hours</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>PHRM 2100</td>
<td>Pharmacy Skills Lab 2 (PSL-2)</td>

PHRM 4800  Electives Program  10

Total Credit Hours  34

Total Program Credit Hours: 136

Notes:
Students may not obtain any grade lower than “C” in all required courses.

A decision will be made annually on whether these courses will be taught in fall or winter term or both.

SECTION 5: Course Descriptions

PHRM 1000 Introduction to Pharmacy  Cr. Hrs. 1
This course provides an orientation to Pharmacy and to the application of medicines within the context of today’s dynamic medical care system. It has been designed to highlight professionalism early in the Pharmacy curriculum and will provide the opportunity for students to interact with Pharmacy professionals “at the cutting edge” of pharmacy practice.

PHRM 1110 Pharmacy Skills Laboratory  Cr. Hrs. 5
This is a multifaceted course using an integrated skills laboratory format to develop essential skills that students require for pharmacy practice. These skills primarily involve communication, problem solving and critical thinking that form the foundation for life-long learning. Exploring ethical principles and professionalism are also essential components of this course.

PHRM 1300 Fundamentals of Pharmaceutics  Cr. Hrs. 2
In a classroom and laboratory setting, this course provides an introduction to the compounding of pharmaceutical products and the physiochemical basis of product formulation. Practical aspects of formulation and an introduction to the dispensing function are also explored.

PHRM 1310 Fundamentals of Pharmaceutics  Cr. Hrs. 3
(Lab required) In a classroom and laboratory setting, this course provides an introduction to the compounding of pharmaceutical products and the physiochemical basis of product formulation. Practical aspects of formulation and patient counselling regarding the products is also explored. May not be held with PHRM 1300. Registration is normally restricted to students in Year 1 of the program.

PHRM 1430 Applied Pathophysiology for Pharmacy Students  Cr. Hrs.3
A comprehensive theoretical foundation of the phenomena that produce alterations in human physiology function across the lifespan. Course content will prepare the student for subsequent courses related to diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations.

PHRM 1440 Applied Pathophysiology  Cr. Hrs. 4
A comprehensive foundation of the underlying patho-physiological mechanisms associated with various types of human disease. Course content will serve as an essential pre-requisite required to prepare students for subsequent advanced clinical courses related to diagnosis and medical management (pharmacological and non-pharmacological approaches) of the disease(s). May not be held with PHRM 1430. Registration is normally restricted to students in Year 1 of the program.

PHRM 1700 Structured Practical Experiential Program 1  Cr. Hrs. 1
This course is a service-learning experience, providing students the opportunity to work in community-based patient/client-centred settings. This course also includes two half day job shadowing experiential rotations in a variety of pharmacy practice settings (eg. community pharmacy practice, institutional pharmacy practice) under the supervision of
pharmacist preceptors consistent with the Manitoba Pharmacy Act. It serves to familiarize students with the health care setting and the pharmacist’s role. Students will be graded on a pass/fail basis.

**PHRM 2100 Pharmacy Skills Lab 2**  
Cr. Hrs. 3  
This course develops essential skills required for pharmacy practice. Focus is on drug distribution, pharmacy law, communication with “standardized patients” and drug information.

**PHRM 2222 Medicinal Chemistry**  
Cr. Hrs. 3  
This course explores the physicochemical aspects of drug structure in absorption, distribution, metabolism, and excretion and the interaction between drugs and their receptors as they relate to the biochemical, pharmacological, and therapeutic actions of medicinal compounds. Not to be held with the former PHRM 220 or PHRM 3220. Prerequisites: CHEM 2210, CHEM 2360, CHEM 2370.

**PHRM 2270 Pharmaceutics/Biopharmaceutics**  
Cr. Hrs. 6  
This course introduces principles of formulation and good pharmaceutical manufacturing practice, including aspects of product development and assessment, stability testing, and quality control. It also explores the application of dosage forms to clinical situations.

**PHRM 2280 Pharmacokinetics**  
Cr. Hrs. 3  
This course introduces principles of pharmacokinetics to predict how drugs will be absorbed, distributed, metabolized and excreted from the body. Practical application of concepts and calculations will be emphasized.

**PHRM 2320 Clinical Pharmacy 1**  
Cr. Hrs. 3  
This course introduces principles of drug therapy to manage self-care conditions and ambulatory ailments. There is also a component of health promotion with a focus on clinically relevant nutrition topics for pharmacists. Non-prescription and prescription treatment approaches will be covered within the course. May not be held with the former PHRM 2310.

**PHRM 2700 Structured Practical Experiential Program 2**  
Cr. Hrs. 2  
This course offers experiential learning in a variety of pharmacy practice settings (e.g. community pharmacy practice, institutional pharmacy practice) It consists of 2 one week rotations at the end of the second year of the program. This course builds on skills learned in SPEP 1 and focuses on the practice of drug preparation and distribution, non-prescription medication counseling, and jurisprudent under the supervision of pharmacist preceptors consistent with the Manitoba Pharmacy Act. Students will be graded on a pass/fail basis.

**PHRM 3110 Pharmacy Skills Laboratory III**  
Cr. Hrs. 3  
This course develops essential skills required for pharmacy practice. The focus is on interaction with patients and other health care professionals and the application of essential knowledge, skills and values required for the provision of pharmaceutical care. May not be held with PHRM 3100.

**PHRM 3230 Principles of Professional Practice**  
Cr. Hrs. 2  
This course offers the opportunity to explore professionalism, ethics and socio-economic aspects of the health care system. May not be held with PHRM 3210.

**PHRM 3310 Clinical Pharmacy 2**  
Cr. Hrs. 10  
This course builds on principles of drug therapy introduced in Clinical Pharmacy 1. Aspects of providing direct patient care are emphasized to identify, solve and prevent actual or potential drug-related problems. The course also expands knowledge of "Over the Counter (OTC)" medications as therapeutic alternatives and introduces home diagnostic testing.

**PHRM 3320 Pharmaceutical Analysis Lab**  
Cr. Hrs. 3  
This course offers the opportunity to prepare pharmaceutical dosage forms and perform analytical testing on the products. Qualitative and quantitative instrumental assay techniques are introduced.

**PHRM 3430 Natural Products**  
Cr. Hrs. 3  
Medicinal products of natural origin; introduction to systems of complementary medicine. Therapeutic aspects and products are emphasized.

**PHRM 3520 Principles of Scientific Literature Evaluation**  
Cr. Hrs. 4  
Primary literature is critically analyzed. Discussion of how study results impact on treatment strategies are emphasized. May not be held with PHRM 3510.

**PHRM 3550 Clinical Pharmacokinetics**  
Cr. Hrs. 3  
This course explores the practical application of pharmacokinetic concepts, calculations, and patient factors which effect pharmacokinetics in the clinical setting. Emphasis is on selected medications that require closer monitoring to ensure efficacy and patient safety. May not be held with PHRM 3500 or 046.350.

**PHRM 3640 Principles of Biotechnology**  
Cr. Hrs. 3  
Introduction of biotechnology in pharmaceutical science and pharmacy. Students will be introduced to concepts from molecular biology, immunology, biotechnology and pharmacogenomics.

**PHRM 3700 Structural Practical Experiential Program 3**  
Cr. Hrs. 4  
This course offers experiential learning in a variety of pharmacy practice settings (e.g. community pharmacy practice, institutional pharmacy practice) It consists of 2 two week rotations at the end of the third year of the program. This course builds on skills learned in SPEP 1 and SPEP 2 and focuses on the introduction of applying pharmaceutical care to patients under the supervision of pharmacist preceptors consistent with the Manitoba Pharmacy Act. Students will be graded on a pass/fail basis.

**PHRM 4230 Pharmacy Practice Management**  
Cr. Hrs. 4  
An Introduction to administrative and behavioural sciences as they relate to planning, organization and operation of pharmacy practice and to the control of human and financial resources.

**PHRM 4310 Clinical Pharmacy 3**  
Cr. Hrs. 4  
A problem-based therapeutics course that builds on PHRM 3310. The emphasis is on the provision of pharmaceutical care to enhance students’ ability to identify, resolve and prevent drug-related problems in given clinical scenarios.

**PHRM 4450 Toxicology**  
Cr. Hrs. 3  
Toxicology of prescription and non-prescription medications and drugs of abuse. The emphasis is on the study of emergency treatments of the overdosed patient. Forensic aspects of common poisonings and drug overdoses are also discussed.

**PHRM 4470 Current Topics**  
Cr. Hrs. 3  
A discussion of topics of immediate interest to the profession. Subject to satisfactory completion of required projects and presentations. Attendance of 80% is mandatory. Students will be graded pass/fail.

**PHRM 4700 Structural Practical Experiential Program 4**  
Cr. Hrs. 10  
This course offers experiential learning in a variety of pharmacy practice settings (e.g. community pharmacy practice, institutional pharmacy practice) It consists of 2 six week rotations. This course builds on skills learned in SPEP 1, SPEP 2 and SPEP 3 and focuses on practicing advanced pharmaceutical care and further developing therapeutic and disease.
knowledge under the supervision of pharmacist preceptors consistent with the Manitoba Pharmacy Act. Students will be graded on a pass/fail basis.

PHRM 4800 PHARM ELECTIVES Cr. Hrs. 10

This program offers students the opportunity to explore areas in research and professional practice that are not part of the required undergraduate courses. Students have the option of applying to conduct projects at sites pre-approved by the College or to propose alternative avenues for self-directed learning. All project proposals need to obtain final approval from the College of Pharmacy which facilitates students’ placement. Assessment will be based on written reports submitted by individual students to the College of Pharmacy. Students will be graded on a pass/fail basis.

College of Rehabilitation Sciences

Dean: Reg Urbanowski
Head: Ken Chambers, Department of Respiratory Therapy
Campus Address/General Office: R106-771 McDermot Ave., Bannatyne Campus

Students admitted into the program of studies in respiratory therapy should note carefully that while the University of Manitoba, College of Rehabilitation Sciences may admit students to its course of studies, the right to practice as a respiratory therapist is granted only through the appropriate authority of the province concerned, through a process of licensure. To be eligible for employment in Manitoba, graduates must register with the Manitoba Association of Registered Respiratory Therapists (MARRT). Regulations are similar in most other provinces in that the students must pass the CBRC examination and be registered with the regulatory body in that jurisdiction. Further information regarding registration in Manitoba can be found at http://www.marrt.org/index.jsp?p=membership. Students are highly encouraged to become student members of both provincial and national professional associations.

The Respiratory Therapy program maintains accreditation through the Council on Accreditation of Respiratory Therapy Education (CoARTE). The University of Manitoba Respiratory Therapy program underwent a complete accreditation process in 2013 and was awarded “accreditation” status by CoARTE until 2019.

SECTION 2: Admission Requirements

Intro Rehabilitation Sciences

The following is a summary of the admission requirements for Respiratory Therapy. Equivalent academic courses completed at the University of Manitoba or recognized universities elsewhere will be considered. All admission requirements, as well as application deadline dates and forms, are included in applicant information packages that are available from the College of Rehabilitation Sciences website (http://umanitoba.ca/rehabsciences/rt/admissions). Info can also be obtained from the Admissions Office, Enrolment Services, 424 University Centre. This information is also posted on the university’s website.

2.1 Course Requirements: Respiratory Therapy

Regular Program
students are required annually to review and update immunizations as necessary.

**Cardiopulmonary Resuscitation Certification**

All students (both new and returning) in the Department of Respiratory Therapy are required to obtain Heart and Stroke Foundation of Canada certification in cardiopulmonary resuscitation annually. Certification must be at the Basic Life Support (BLS) for Healthcare Providers. Students in year 1 and 2 of the program will be required to provide proof of certification before the first day of their fieldwork placement. For students in all years of the program, proof of certification must not have an issue date prior to the last week in June of the current year. This will ensure that the certification remains current until the end of the clinical education period for each year in the program.

**Mask Fit Certification**

Clinical/fieldwork education sites require Respiratory Therapy students to maintain mask fit certification. Information on acquiring this certification is provided to new students with the Health Record Form Packages. All students are required to maintain mask fit certification throughout the program.

**3.3 Dean’s Honour List**

Students carrying a full course load, with a sessional Grade Point Average of 3.7 or higher and have not done resit or supplemental exams, are placed on the Dean’s Honour List.

**3.4 Attendance**

Regular attendance is expected of all students in all courses. Prior permission is required for any anticipated absences. Students absent from class due to illness may be required to present a certificate from a physician. Unexcused absence from an examination may result in a grade of zero for that examination. Make-up examinations may be allowed under special circumstances.

**3.5 Criminal Record and Vulnerable Persons Check, Adult Abuse Registry Check and Child Abuse Registry Check**

All respiratory therapy students are required to obtain a formal Criminal Record and Vulnerable Persons Check, an Adult Abuse Registry Check, and a formal Child Abuse Registry Check by the first day of classes each year of the program. These records must have been issued within the ninety (90) days previous to that date to ensure that they remain current until the end of the clinical education period for each year of the program. These documents are required for participation in all clinical/fieldwork education activities.

Students may not obtain any grade lower than “C” in all required courses.

**4.2 Clinical/Fieldwork Education**

Sixteen hundred (1,600) full-time hours of clinical/fieldwork experience are required. Three hundred and twenty (320) hours of clinical education time is organized into blocks that occur during years one and two of the B.R.T. program. The remaining 1,280 hours of clinical education is conducted throughout year three. All placements occur in Manitoba, with the majority of these occurring within greater Winnipeg.
SECTION 5: Course Descriptions-Medical Rehabilitation

REHB 2450 Research Methodology for Medical Rehabilitation Cr. Hrs. 3
A theory and practical course designed to provide a basic understanding of research principles and their application in Medical Rehabilitation. 45 hours.

SECTION 5: Course Descriptions-Respiratory Therapy

RESP 1400 Introduction to Professional Practice Cr. Hrs. 3
This course provides an introduction to the profession of Respiratory Therapy and the roles and responsibilities of a Respiratory Therapist as a member of the health care team. Emphasis is placed on professional conduct, communication and decision-making around issues affecting client-centered care. The course also introduces the safety aspects of delivering respiratory therapy according to the Canadian Standards Association, as well as workplace health and safety. This course is restricted to students in year one of the Bachelor Respiratory Therapy program.

RESP 1410 Health Systems and Respiratory Care Cr. Hrs. 3
Building on RESP 1400, Introduction to Professional Practice, this course further explores the role of the Respiratory Therapist as a regulated health care professional in Canada and the function of regulatory and professional advocacy organizations. Students will learn concepts of patient safety and quality and how human, material, and financial resource management is accomplished in the Canadian health care system. Emphasis is placed on the integration of professional practice knowledge, skills and attitudes. This course is restricted to students in year one of the Bachelor Respiratory Therapy program.

RESP 1420 Applied Physiology for Respiratory Therapy Cr. Hrs. 6
The course is designed to provide students with a basic understanding of the function and regulation of the systems and major organs of the human body as they relate to clinical respiratory sciences. This course is restricted to students registered in year one of the Bachelor of Respiratory Therapy program.

RESP 1430 Respiratory Therapeutics 1 Cr. Hrs. 6
A lecture and laboratory course which introduces basic therapeutic concepts, technologies and techniques employed in respiratory therapy including medical gases, humidity and aerosol therapy, and bronchopulmonary hygiene. It introduces the principles of gas physics, and the physical and chemical properties of medical gases used in respiratory care. This course is restricted to students registered in year one of the Bachelor of Respiratory Therapy program.

RESP 1440 Pharmacology Cr. Hrs. 3
This course will introduce the principles of pharmacology, those factors modifying drug effects, and individual pharmacologic agents including: ANS drugs, CNS drugs, cardiovascular medications, respiratory medications, antibiotics, and other drugs relevant to Respiratory Therapy. This course is restricted to students registered in year one of the Bachelor of Respiratory Therapy program.

RESP 1450 Principles of Mechanical Ventilation Cr. Hrs. 6
The course will focus on the fundamental physical and physiologic principles involved with mechanical ventilation under normal and abnormal respiratory conditions. Various forms and application strategies of positive pressure ventilation will be introduced and explained as to their effects on the physiological systems. This course is restricted to students registered in year one of the Bachelor of Respiratory Therapy program.

RESP 1460 Basic Fieldwork 1 Cr. Hrs. 4
This course is comprised of 160 hours of clinical fieldwork experiences in respiratory therapy, provided under the supervision of registered respiratory therapists at one or more approved clinical sites. This course is restricted to students registered in year one of the Bachelor of Respiratory Therapy program.

RESP 2200 Primary Care in Respiratory Therapy Cr. Hrs. 3
This course provides an understanding of primary care in Respiratory Therapy practice as a method of supporting individuals and populations with respiratory disease. Students will learn the principles of health promotion and disease prevention, as well as chronic disease management and self-management strategies. This course is restricted to students registered in year two of the Bachelor of Respiratory Therapy program who have completed all of the required courses for year one of the program.

RESP 2210 Pathophysiology Cr. Hrs. 6
This course will introduce the pathogenesis of primary diseases of the cardio-respiratory, peripheral vascular, central and peripheral nervous systems. Specific disorders of the renal, metabolic, and immune systems, as well as infectious diseases with particular relevance to respiratory therapy will be introduced. The course will also introduce the differential diagnosis and current strategies employed in the management of these diseases. This course is restricted to students registered in year two of the Bachelor of Respiratory Therapy program who have completed all the required courses for year one of the program.

RESP 2220 Physical Examination and Health Assessment Cr. Hrs. 3
This course focuses on the development of the patient/client history and physical examination skills essential to health assessment. Students will apply the findings of health assessments in the determination of differential diagnoses and in the development of respiratory care plans. This course is restricted to students registered in year two of the Bachelor of Respiratory Therapy program who have completed all the required courses for year one of the program.

RESP 2230 Respiratory Therapeutics 2 Cr. Hrs. 6
This lecture and laboratory based course introduces advanced respiratory therapeutics including airway management, anaesthesia, invasive hemodynamic techniques, blood sample procurement and analysis, and others commonly employed in respiratory therapy. This course is restricted to students registered in year two of the Bachelor of Respiratory Therapy program who have completed all the required courses for year one of the program.

RESP 2240 Clinical Mechanical Ventilation Cr. Hrs. 3
This course will discuss the initiation and management of all types of mechanical ventilation, both conventional and advanced, with intra and inter-facility patient transport. Interpretation of detailed pulmonary mechanics will be discussed to allow for assessment of ventilated patients. This course is restricted to students registered in year two of the Bachelor of Respiratory Therapy program who have completed all the required courses for year one of the program.

RESP 2250 Ventilator Instrumentation Cr. Hrs. 3
This is a comprehensive course in the function, operation, and application of specified neonatal, pediatric and adult ventilators. Illustration of the necessary skills to setup, monitor and troubleshoot the ventilator will be examined in the classroom as well as in simulated patient case scenarios. This course is restricted to students registered in year two of the Bachelor of Respiratory Therapy program who have completed all the required courses for year one of the program.

RESP 2260 Cardiopulmonary Diagnostics Cr. Hrs. 3
This course will introduce the principles of cardiac and pulmonary function diagnostics including: static and dynamic measures, determination of volumes and capacities, exercise physiology. Cardiopulmonary function changes relative to common diseases and abnormal physiologic states will be evaluated. This course is restricted to students registered in year two of the Bachelor of Respiratory Therapy program who have completed all the required courses for year one of the program.

RESP 2380 Basic Fieldwork 2  
Cr. Hrs. 4
Building on RESP 1460 (Basic Fieldwork1) and RESP 2390 (Clinical Integration and Simulation), this course is comprised of fieldwork experiences which provide the student the opportunity to apply the integrated concepts learned in the first two years of the Respiratory Therapy program in a clinical setting. This course will prepare students for advanced clinical education coursework. Prerequisites: RESP 1460, RESP 2390.

RESP 2390 Clinical Integration and Simulation  
Cr. Hrs. 6
This course provides the student an opportunity to integrate concepts learned in the first two years of the Respiratory Therapy program, and to learn life support protocols prior to participation in advanced clinical education coursework. The course will be delivered through a variety of formats including classroom, seminar, and clinical simulation. Prerequisite: This course is restricted to students registered in year two of the Bachelor of Respiratory Therapy program who have completed all required courses for year one of the program.

RESP 3320 Clinical Education in Pediatric Respiratory Care  
Cr. Hrs. 3
Three weeks of clinical experience in the Pediatric Intensive Care Unit at Children's Hospital. Shiftwork and extended shifts may be required. Course evaluated on a pass/fail basis. 144 hours.

RESP 3350 Clinical Education in Pulmonary Diagnostics  
Cr. Hrs. 3
Three weeks of clinical experience in the pulmonary diagnostic laboratory of an approved clinical site. Course evaluated on a pass/fail basis. 144 hours.

RESP 3360 Clinical Education in Anesthesia  
Cr. Hrs. 3
Three weeks of clinical experience designed to acquaint the student with actual clinical techniques and procedures used in the operating and recovery room. Course evaluated on a pass/fail basis. 144 hours.

RESP 3370 Clinical Education in Community Care  
Cr. Hrs. 4
Four weeks of clinical experience in community care settings including: pre-hospital care, health and wellness promotion, interfacility transport, chronic care, home care and community outreach. Course evaluated on a pass/fail basis. 180 hours.

RESP 3410 Clinical Education in Critical Care  
Cr. Hrs. 8
This course enables students to critically apply skills and concepts in the care of adult patients requiring critical respiratory care. The focus is on attainment of essential Respiratory Therapy competencies for practice. This course is evaluated on a pass/fail basis. This course is restricted to students registered in year three of the Bachelor of Respiratory Therapy program who have completed all the required courses for year two of the program. May not be held with the former RESP 3310.

RESP 3420 Clinical Education in Neonatal Care  
Cr. Hrs. 5
This course enables students to critically apply skills and concepts in the care of infants requiring critical respiratory care in the Labor & Delivery, and Neonatal units of the hospitals. The focus is on attainment of essential Respiratory Therapy competencies for practice. This course is evaluated on a pass/fail basis. This course is restricted to students registered in year three of the Bachelor of Respiratory Therapy program who have completed all the required courses for year two of the program. May not hold with the former RESP 3330.

RESP 3430 Clinical Education in General Therapeutics  
Cr. Hrs. 6
This course enables students to critically apply skills and concepts in the care of adult patients requiring general respiratory care (non-critical care) in the hospital setting. The focus is on attainment of essential Respiratory Therapy competencies for practice. This course is evaluated on a pass/fail basis. This course is restricted to students registered in year three of the Bachelor of Respiratory Therapy program who have completed all the required courses for year two of the program. May not hold with the former RESP 3380.

RESP 3440 Current Topics in Respiratory Therapy  
Cr. Hrs. 6
Focuses on current issues in health and healthcare, in particular as they relate to respiratory therapy. Students complete a thorough review of the current evidence for practice and ongoing research relating to a topic of interest, and present their findings in a professional forum. This course is restricted to students registered in year three of the Bachelor of Respiratory Therapy program who have completed all the required courses for year two of the program. Not to be held with the former RESP 3300.

SECTION 2: Admission Requirements for the Interdisciplinary Health Program

Admission requirements are described on the Undergraduate Admissions website at http://umanitoba.ca/student/admissions/application/index.html

General Entrance Requirements to the Interdisciplinary Health Program: A minimum adjusted grade point average (AGPA) of 2.0 in at least 24 credit hours of University 1, including 6 credit hours from Arts and 6 credit hours from Science to total 12 credit hours, plus 12-18 credit hours of other University 1 courses, for a total of 24-30 credit hours. Students must complete at least 6 more credit hours of Arts or Science courses once admitted to the Faculty.

Other requirements for University study

High school prerequisites required for University level courses in certain programs: Mathematics 40S (pre-calculus or applied) and Chemistry 40S are required for the science requirements in the Interdisciplinary Health Program. Students planning to take BIOL 1020 for any program must have Biology 40S and any Grade 12 Mathematics course.

Minimum Adjusted GPA for consideration: 2.0.

For students wishing to choose the focused approach for entry to the Interdisciplinary Health Program, the course requirements for each of the programs or areas of concentration offered by the program are described in the Start Book at http://umanitoba.ca/firstyear/.

Direct Admission into the Health Sciences/Health Studies Degree Programs from High School

To be eligible for admission based on high school, students must have: General Requirements to the University of Manitoba, plus a minimum 85%
average over the following, with no less than 60% in each course:
  a. English 40S
  b. Applied Mathematics 40S or Pre-Calculus Mathematics 40S
  c. Biology 40S, Chemistry 40S, Physics 40S or Computer Science 40S

SECTION 3: Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Interdisciplinary Health Program has regulations and requirements, published below, that apply specifically to its students.

3.1 Prerequisite, Corequisite, and Course Availability: Definitions

**Prerequisite:** If a course is prerequisite to a second course, the prerequisite must be met in order to continue in the second course. The department giving the second course may require a minimum grade of 'C' in the first course to register in the second course. Some inactive (legacy) courses may be used as prerequisites.

**Corequisite:** If a first course is a corequisite to a second course, the first course (unless previously completed) must be taken in the same term as the second course.

**Course Availability:** Not all courses listed in this Calendar are offered every year. Students are referred to the on-line calendar for courses offered in the year. Interdisciplinary Health Program courses at the 3000 and 4000 level are available only to students registered in the Interdisciplinary Health Program or one of the minors or options associated with the Program. Courses at the 3000 and 4000 level may be taken with written permission from an Academic Advisor as long as there is space.

3.2 Scholastic Standards

Graduation and Grade Point Average

To graduate, a student must have passed 120 credit hours acceptable for credit in the current degree program and have obtained a minimum of 300 quality points. This is equivalent to a Degree Grade Point Average of 2.50. A pass indicates a grade of ‘D’ or better. A student’s Degree Grade Point Average (DGPA) will be determined from the number of effective courses which apply at a particular stage. The effective courses consist of all courses passed, in addition to all failures which have not been cleared, or substituted for, in the student’s record. A maximum of 150 credit hours (25 courses or the equivalent) may be attempted in order to obtain the 120 credit hours.

Assessment

The status of each student will be assessed in May of each year in which a student is registered. Assessments can include the following comments:

- Faculty minimum met (grade point average meets the standards listed below);
- Dean’s Honour (see 3.9)
- Academic Warning
- Probationary status (see below)
- Suspension (see below)
- Suspension - all attempts used (see below)

Academic warning indicates a grade point average between the minimum required at the effective credit hours (year) and the DGPA requirement of 2.0.

There is a maximum of 30 credit hours of attempts allowed for each academic program; once those attempts are used (repeated courses, grades of F or D), it is impossible to graduate.

**Probationary Standing**

Students must achieve or exceed the following standards at the specified stages in their academic careers. Failure to obtain the standard results in probation. Once placed on probation, students who fail to meet the appropriate performance level at the next assessment following the next registration will be academically suspended. A student is not permitted to be on probation for two consecutive years.

<td>2.5</td>
<td></td>
</tr>
</tbody>
</table>

Suspension

Suspended students must remain out of the Degree Program for one academic year from the date of suspension and must apply for reinstatement at the Admissions Office no later than May 1.

Where mathematically possible for a suspended student to complete the degree by repeating failed courses, a suspended student shall be automatically reinstated after remaining out of the Degree Program for one calendar year, or by achieving a degree GPA above the probationary standard.

**Suspension (All Attempts Used)**

Where it is mathematically impossible for a student to complete the degree by repeating failed courses, a suspended student, after remaining out of the program for one calendar year, may attempt reinstatement. By completing at least 12 credit hours in one term with a minimum ‘D’ grade in all courses and a term grade point average of at least 2.0, the student will be reinstated. The student will start the program afresh, with previous grades of ‘C’ or better applicable to the program.

3.3 Part-time Students

The maximum time allowed for completion of the degree is 10 years. After completion of 24 credit hours, part-time students will be evaluated each May and must conform to the minimum performance levels.

3.4 Direct Entry

To be eligible for admission based on high school, students must have: General Requirements to the University of Manitoba, plus a minimum 85% average over the following, with no less than 60% in each course:

- a. English 40S
- b. Applied Mathematics 40S or Pre-Calculus Mathematics 40S
- c. Biology 40S, Chemistry 40S, Physics 40S or Computer Science 40S

3.5 Repeating Courses
A student may repeat any course for the purpose of attaining a better grade. A course (or its equivalent) that is repeated in Fall 2016 or later will have the highest grade count. There are no supplemental examinations for students who have failed final or deferred examinations.

### 3.6 Challenge for Credit

A student wishing to challenge a course for credit should contact an Academic Advisor. Letter grades are granted upon completion of the course that is challenged for credit. A list of courses for challenge is available in the Advising Office. An application is required.

### 3.7 Transfer of Credit

See the chapters on Admissions and Academic Regulations and Requirements at the beginning of this Calendar.

### 3.8 Appeals of Academic Regulations

The Committee on Student Standing considers petitions from students who request special consideration with respect to rules and regulations governing their programs of study and qualification for graduation.

### 3.9 Dean’s Honour List

Eligible students who achieve a term Grade Point Average of 3.5 or higher in at least 12 credit hours per term will be included in the Deans Honour List.

### 3.10 Degree With Distinction

Students who graduate with a degree GPA of 3.75 and higher will receive a degree with distinction.

### 3.11 Work Permit for Study Purposes

International students who are registering for courses or programs that require work placement must obtain a valid Work Permit, in addition to maintaining a valid Study Permit. Work placement includes, but is not limited to, any paid or unpaid practicum, internships, work experience, field placement, and co-op programs that are a required component for the completion of their degree, diploma or certificate. Please contact your program advisor or the International Centre for Students for further information.

### 3.12 Release and Indemnification Forms

In elective courses, students may be required to sign a release form for off-campus activities.

### 3.13 Written English and Mathematics Requirements

The written English and Mathematics requirements are satisfied by required courses HMEC 2000 and STAT 1000 within the Interdisciplinary Health Program. HMEC 2000 will be available to students upon admission to the Interdisciplinary Health Program.

### SECTION 4: Program and Graduation Requirements

Students entering the Interdisciplinary Health Program will select one of the following two programs:

- Health Sciences Program
- Health Studies Program

In order to qualify for a degree, students must complete the 120 credit hours specified for the selected program. Elective choices provided in each program can permit students to transfer between them; however, this opportunity decreases as students' progress. Students who transfer to another program must meet the full requirements of that program.

### 4.1 Advisement

The Interdisciplinary Health Program will provide entering students with orientation information and will refer a student to a program advisor if the student requests. All returning students in the program must submit a program plan for the succeeding year before the start of registration.

### 4.2 Interdisciplinary Health Program

Program Director: Dr. Mark Nachtigal

This curriculum consists of two degree programs: the Bachelor in Health Sciences and the Bachelor in Health Studies. These degree programs offer new approaches to planning, administration and delivery of health services by fully integrating biological science and social science in understanding the health of people. Students will gain experience of dealing with health issues at the individual, community and institutional levels, as well as across the lifespan. The two degrees can serve as the foundation for careers in biomedical sciences, health care teams and community health management. They offer a general course of study, not a professional status. Students can use both degree programs to build the knowledge and prerequisites for entry into professional programs in the health and social science fields.

#### 4.2.1 Bachelor of Health Studies Admission as of September 2018

The Bachelor of Health Sciences (BHSc) degree is a four year interdisciplinary program that incorporates science, humanities and social science to provide students with an integrative perspective on health. The BHSc provides students with an interdisciplinary background and skill set that will contribute to their preparation for a future in health-related careers. This interdisciplinary skill set is seen as advantageous for students applying for education in professional health programs and graduate studies.

The Bachelor of Health Sciences (BHSc) Degree consists of 120 credit hours. There is one concentration available as an option, the Biomedical Sciences concentration. A Concentration is 18 credit hours.

Students should consult the Academic Calendar to ensure that they have the appropriate pre- or co-requisites before they attempt to register in a course. A number of courses are cross-listed between departments/faculties. Students are strongly encouraged to seek the advice of the Academic Advisor in the Interdisciplinary Health Program in order to plan their programs.

The BHSc Electives List would apply only to those students admitted to the BHSc degree program in the Fall of 2018 and later. The existing list of IHP electives should be followed by students admitted to the BHSc prior to the Fall of 2018.
courses related to the mechanisms of disease, giving students an opportunity to experience how diseases are researched through biomedical laboratory experience. This concentration will provide students not only with an interdisciplinary experience involving both the biological and social sciences, but with a new path to further studies in biomedical disciplines.

A written statement must be submitted to the Student Advisor declaring an interest in obtaining the concentration normally by May 15, following completion of HEAL 3610 (minimum grade of B). Students will be informed whether they have been accepted into the concentration normally by mid-June.

Normally, enrolment will be limited to the 24 eligible students who have achieved the highest degree GPAs after completion of HEAL 3610.

### Biomedical Sciences Concentration

Students registered in the Bachelor of Health Sciences can choose to complete a Biomedical Sciences Concentration. This concentration offers

Notes:
- Equivalent courses offered through Université de Saint-Boniface may be used in lieu of the specified courses identified in the degree program chart. Université de Saint-Boniface courses end in the number “1” (e.g. BIOL 1021).
- Of 36 credit hours of program electives, 21 must be science electives.
- Of the 36 credit hours of program electives, 24 must be at the 3000-4000 level.

### Biomedical Sciences Concentration

Students registered in the Bachelor of Health Sciences can choose to complete a Biomedical Sciences Concentration. This concentration offers

4.2.2 Bachelor of Health Sciences Electives List as of September 2018

### Bachelor of Health Sciences Electives list

The B.H.St. Electives List in this section would apply only to those students admitted to the B.H.St. degree program in the Fall of 2018 and later. The existing list of IHP electives should be followed by students admitted to the B.H.Sc. prior to the Fall of 2018. The existing list of IHP electives can be found in section 4.2.10.

The science requirement may be met using any course offered by the Faculty of Science, and the Faculty of Agricultural and Food Sciences on the approved elective list (see below).

**In addition to the following courses from the Clayton H. Riddell Faculty of Environment, Earth and Resources:**

- ENVR 1000 Environmental Science 1: Concepts
- ENVR 3400 Introduction to Environment and Health
- ENVR 4400 Advanced Issues in Environment and Health

**Or the following courses from Rady Faculty of Health Sciences or Max Rady College of Medicine:**

- HEAL 3610 Mechanisms of Disease 1
- BGEN 3020 Introduction to Human Genetics
- PHAC 4030 Drugs in Human Disease I
- PHAC 4040 Drugs in Human Disease II

**Faculty of Agricultural and Food Sciences**

- FOOD 4150 Food Microbiology I
- HNSC 1200 Food: Facts and Fallacies
- HNSC 2130 Nutrition through the Life Cycle
- HNSC 2140 Basic Principles of Human Nutrition
- HNSC 3300 Vitamins and Minerals in Human Health
- HNSC 3310 Macronutrients and Human Health
- HNSC 3320 Nutrition Education and Dietary Change

4.2.3 Bachelor of Health Studies Admission as of September 2018

The Bachelor of Health Studies (B.H.St.) Degree now consists of 3 Concentrations from which students must declare at least one. A Concentration is 18 credit hours. Students must choose from one of the following 3 Concentrations:
- 1. Health Policy, Planning and Evaluation or
- 2. Health Promotion and Education or
- 3. Family Health

Students should consult the Academic Calendar to ensure that they have the appropriate pre- or co-requisites before they attempt to register in a course. A number of courses are cross-listed between departments/faculties. Students are strongly encouraged to seek the advice of Academic Advisor in the Interdisciplinary Health Program in order to plan their programs.

The new B.H.St. Electives List would apply only to those students admitted to the B.H.St. degree program in the Fall of 2018 and later. The new elective list can be found in section 4.2.8. The existing list of IHP electives should be followed by students admitted to the B.H.St. prior to the Fall of 2018 and can be found in section 4.2.10.

The Health Policy, Planning, and Evaluation concentration can provide foundational knowledge related to health policy development and related evaluation, as well as programming services. This concentration can be a potential route for those wishing to pursue related graduate studies in Community Health Sciences (although students in all three concentrations are eligible to pursue graduate studies), or for individuals seeking careers in areas such as Health Policy Analysis or Program Planning and Evaluation Coordinators.

The Health Promotion and Education concentration would be a route through which students wishing to pursue a career as a home economics teacher could obtain their 'teachable subjects' in family studies and nutrition. Students are advised that additional training will be required and that consultation with academic advisors in the Faculty of Education is recommended. Aside from home economics education, this concentration would lay the foundation for a future career options as Community Health Educators or Health-related Organization/Foundation Fundraising, or Health and Safety Coordinators.

The Family Health concentration was created to ensure that those students interested in family social science (an existing major that the university plans to phase out) would clearly see a place for themselves in the new academic structure. One of the features of the Family Health concentration will be the ability to take courses relevant to the existing Family Social Science options (Aging and Developmental Health; Child and Youth Developmental Health; Family Economic Health; Family Violence; Social Development) allowing the program to be flexible and meet individual student needs. This degree provides the educational background suitable for a future career as a Community Wellness Worker, Victim Services Worker, Youth Care Worker, Residential Care Manager.

4.2.4 Bachelor of Health Studies Program Chart Admission as of September 2018

### Notes:
- Equivalent courses offered through Université de Saint-Boniface may be used in lieu of the specified courses identified in the degree program chart. Université de Saint-Boniface courses end in the number “1” (e.g. SOC 1201).
- See Bachelor of Health Studies electives list for courses that would meet the science requirement.
- Of the 21 credit hours of program electives, 9 must be at the 3000-4000 level.

**Note:** *Students considering a career as a Home Economics teacher through the Faculty of Education after degree program should consult with an academic advisor in the Faculty of Education. Some courses (marked with an asterisk) may be required for completion of higher level courses in the “teachable subject areas” in foods and nutrition and family social sciences and will require careful program planning.

### 4.2.8 Bachelor of Health Studies Electives List Admission as of September 2018

The B.H.St. Electives List in this section would apply only to those students admitted to the B.H.St. degree program in the Fall of 2018 and later. The existing list of IHP electives should be followed by students admitted to the B.H.St. prior to the Fall of 2018. The existing list of IHP electives can be found in section 4.2.10.

The science requirement may be met using any course offered by the Faculty of Science on the approved elective list (see below), in addition to the following courses:

- Faculty of Agricultural and Food Sciences
- FOOD 4150 Food Microbiology

SWRK 3130 Contemporary Canadian Social Welfare

**4.2.9 Bachelor of Health Sciences prior to September 2018**

**Health Sciences Degree (Total credit hours: 120)**

The Bachelor of Health Sciences degree provides students with an interdisciplinary background and skill set that will contribute to their preparation for a future in health-related careers. This interdisciplinary skill set is seen as advantageous for students applying for education in professional programs and graduate studies.

The curriculum of this program integrates social science concepts, such as for September 2018

Health Studies Degree (Total credit hours: 120) Prior To Admission

Students registered in the Bachelor of Health Sciences can choose to complete a Biomedical Sciences Concentration. This concentration offers courses related to the mechanisms of disease, giving students an opportunity to experience how diseases are researched through biomedical laboratory experience. This concentration will provide students not only with an interdisciplinary experience involving both the biological and social sciences, but with a new path to further studies in biomedical disciplines.

A written statement must be submitted to the Student Advisor declaring an interest in obtaining the concentration normally by May 15, following completion of HEAL 3610 (minimum grade of B). Students will be informed whether they have been accepted into the concentration normally by mid-June.

Normally, enrolment will be limited to the 24 eligible students who have achieved the highest degree GPAs after completion of HEAL 3610.

Biomedical Sciences Concentration

<td>BIOL 2520&lt;br&gt;CHEM 2360&lt;br&gt;HEAL 3610</td>
</tr>
</tbody>
</table>

Notes:

1. HEAL 2600, HEAL 3600, and HEAL 4600 are offered in a case-study format in years 2, 3 and 4.
2. It is recommended that students accepted into the Biomedical Sciences Concentration complete PHAC 4030 and PHAC 4040 as 6 credit hours of the Science electives.
3. Only students registered in the B.H.Sc. degree program may complete a Biomedical Sciences Concentration.
4. Courses required for the Biomedical Sciences Concentration could count toward 18 of the 36 credit hours of approved elective course work to be completed in Years 3 and 4 of the B.H.Sc. degree.
5. Registration in HEAL 4630 and HEAL 4640 is restricted to students accepted into the Biomedical Sciences Concentration and requires permission of the Instructor. Registration in these courses must be confirmed by the Student Advisor.
6. 6 HEAL 3610 will be offered as an elective course for all students in the B.H.Sc. degree.

Health Studies Degree (Total credit hours: 120) Prior To Admission for September 2018

The curriculum of this program integrates social science concepts, such as sociology and economics with science concepts, such as biology and metabolism.

The integration supports the promotion of health by creating a new understanding among graduates of the determinants of health and how these determinants influence the health of individuals, families, and communities, as well as health services. This degree combines knowledge from science and social science disciplines in their content and learning experiences.

Health Sciences Degree (Total credit hours: 120)

The Bachelor of Health Sciences degree provides students with an interdisciplinary background and skill set that will contribute to their preparation for a future in health-related careers. This interdisciplinary skill set is seen as advantageous for students applying for education in professional programs and graduate studies.

### Biomedical Sciences Concentration

Students registered in the Bachelor of Health Sciences can choose to complete a Biomedical Sciences Concentration. This concentration offers courses related to the mechanisms of disease, giving students an opportunity to experience how diseases are researched through biomedical laboratory experience. This concentration will provide students not only with an interdisciplinary experience involving both the biological and social sciences, but with a new path to further studies in biomedical disciplines.

A written statement must be submitted to the Student Advisor declaring an interest in obtaining the concentration normally by May 15, following completion of HEAL 3610 (minimum grade of B). Students will be informed whether they have been accepted into the concentration normally by mid-June.

Normally, enrolment will be limited to the 24 eligible students who have achieved the highest degree GPAs after completion of HEAL 3610.

### Notes:

1. HEAL 2600, HEAL 3600, and HEAL 4600 are offered in a case-study format in years 2, 3 and 4.
2. It is recommended that students accepted into the Biomedical Sciences Concentration complete PHAC 4030 and PHAC 4040 as 6 credit hours of the Science electives.
3. Only students registered in the B.H.Sc. degree program may complete a Biomedical Sciences Concentration.
4. Courses required for the Biomedical Sciences Concentration could count toward 18 of the 36 credit hours of approved elective course work to be completed in Years 3 and 4 of the B.H.Sc. degree.
5. Registration in HEAL 4630 and HEAL 4640 is restricted to students accepted into the Biomedical Sciences Concentration and requires permission of the Instructor. Registration in these courses must be confirmed by the Student Advisor.
6. HEAL 3610 will be offered as an elective course for all students in the B.H.Sc. degree.

Health Studies Degree (Total credit hours: 120) Prior To Admission for September 2018

The curriculum of this program integrates social science concepts, such as sociology and economics with science concepts, such as biology and metabolism.

The integration supports the promotion of health by creating a new understanding among graduates of the determinants of health and how these determinants influence the health of individuals, families, and communities, as well as health services. This degree combines knowledge from science and social science disciplines in their content and learning experiences.
4.3 Health Sciences and Health Studies Minors

Minors in Health Sciences and Health Studies are offered by the Interdisciplinary Health Degree program.

4.4 Interfaculty Option in Aging

An Option in Aging is offered by and in the following faculties, schools, and colleges: Arts, Rady Faculty of Health Sciences: Bachelor of Human Ecology Family Social Sciences Degree Program, Interdisciplinary Health Program, Nursing, Kinesiology and Recreation Management, Social Work, and Agricultural and Food Sciences: Bachelor of Science in Human Nutritional Sciences Program.

To complete the option, students in the Interdisciplinary Health Program must complete each of the following requirements:

<table>
<thead>

</tbody>
</table>

Upon completion of these requirements, a comment will be added to the student's transcript.

4.5 The Minor in Management

A Management Minor is offered by the Asper School of Business. Interdisciplinary Health students may complete this Minor as part of the electives portion of their programs. The Minor will consist of any 18 credit hours of Management courses. Students must meet prerequisites for all courses.

4.6 The Voluntary Minor

Notes:

1.1 HEAL 2600, HEAL 3600, and HEAL 4600 are offered in a case-study format in years 2, 3 and 4.

2. Before entering continuing years in the Interdisciplinary Health Program, the overall program must be planned with academic advice. Program advising begins in early April.

3. Students are strongly encouraged to seek the advice of Academic Advisors in the Interdisciplinary Health Program in order to plan their programs to develop pathways of knowledge that will assist them in moving toward careers in chosen fields.

4. Students in both programs are required to structure their course selections as follows:

- In Health Sciences, students are required to take 21 credit hours of science and 12 credit hours of social science courses from 36 credit hours of Approved Electives.
- In Health Studies, students are required to take 21 credit hours of social science and 12 credit hours of science courses from 36 credit hours of Approved Electives.

5. Students in both programs are required to take at least 24 credit hours at the 3000 and 4000 levels from 36 credit hours of Approved Electives.

Students should consult the University Calendar to ensure that they have the appropriate pre- or corequisites before they attempt to register in a course. A number of courses are cross-listed between departments/faculties. The Academic Advisor will give additional guidance...
Students in the Interdisciplinary Health Program may declare and complete a Minor from departments and interdisciplinary programs in which a Minor is offered. A Family Social Sciences Minor is available. Information about Minors in programs other than Interdisciplinary Health is found in the appropriate description of departmental/school/faculty program offerings in the Academic Calendar.

Completion of the Minor is entirely optional. Students may not, however, declare both their Major and Minor from the same department/interdisciplinary program. No course may be used as part of a prescribed program in the Interdisciplinary Health Program and also be part of a prescribed Minor. For example, if a course in Chemistry is part of a student’s degree requirements, it cannot be used as part of a Minor in another program. Completion of a Minor may require that a student take more than the minimum number of credit hours for graduation.

SECTION 5: General Human Ecology Course Descriptions-2000 Level

HMEC 2000 Research Methods and Presentation Cr. Hrs. 3
An introduction to research designs, methods and techniques, as well as the practice of disseminating results, in the context of selected determinants of health. Applications in natural and social sciences will be presented. Skills related to presenting research findings will be taught. Prerequisite: STAT 1000. Not to be held with HMEC 2050.

HMEC 2030 Human Ecology: Perspectives and Communication Cr. Hrs. 3
(Required) Theory and practice of written and oral communication set within the context of the subject matter of areas of Human Ecology. Students may not hold credit for HMEC 2030.

HMEC 2050 Introduction to Research in Human Ecology Cr. Hrs. 3
A general introduction to research issues in natural and social sciences and their application in the various subject areas in human ecology. Prerequisites: (HMEC 2030) and STAT 1000.

HMEC 2650 The Social Aspects of Aging Cr. Hrs. 3
An examination of the social aspects of aging. Emphasis on understanding the aging process as a life transition involving adaptation through interaction with social and physical environments. Students may not hold credit for HMEC 2650 or SWRK 2650 or REC 2650.

SECTION 5: General Human Ecology Course Descriptions-3000 Level

HMEC 3000 Introduction to Social Epidemiology Cr. Hrs. 3
This course provides an overview of the basic concepts, principles and methods of social epidemiology and their applications for research and practice from a human ecology perspective. Applications to social determinants of health across the life course may include but are not limited to income and food security, early child development and others. Prerequisites: HMEC 2000 [or HMEC 2050] or any 2000-level or higher research course and [HEAL 2600 or HMEC 2030].

HMEC 3100 Communication for Professional Practice Cr. Hrs. 3
Advanced communication skills as applied to professional practice in the fields of human ecology. Students may not hold credit for HMEC 3100. Prerequisites: 39 credit hours in the Human Ecology program and HMEC 2030.

HMEC 3500 Developmental Health Cr. Hrs. 3
This course examines how social inequalities affect population health across the lifespan. It is guided by the determinants health with a particular focus on socioeconomic variables. Local, provincial, national and international perspectives provide meaningful insight into the roles of equality and inequality. Prerequisite: Any 2000 level research methods course.

SECTION 5: General Human Ecology Course Descriptions-4000 Level

HMEC 4090 Practicum in Human Ecology Cr. Hrs. 6
This is a partnership among the university, field supervisor, and the student. It provides an opportunity for students to work in a supervised setting (e.g., health, social services or business) with health professionals as field supervisors. Students also have in-class experiences and assignments with an academic instructor. Prerequisite: 84 credit hours in the Human Ecology General or Interdisciplinary Health program and consent of instructor. Application required. Limited Enrolment.

SECTION 5: Interdisciplinary Health Degree Program Course Descriptions

HEAL 1600 Health and Health Professions Cr. Hrs. 3
(Formerly BIOL 1110) Students discuss the inter-relationship between health, health determinants, and the impact that sciences, health-science, behavioural-social sciences, and technology, have on health care and the health professions. Participants will consider their own role as health care consumers. Not to be held with BIOL 1110.

HEAL 2600 Integration of Health Determinants of Individuals Cr. Hrs. 3
Students study, integrate and apply the determinants that affect the health of individuals throughout the life span to selected case or learning scenarios. The case or learning scenarios present a variety of issues in the delivery of health-related services that are intended to benefit individual health. Prerequisites: One of CHEM 1300 or BIOL 1020 or STAT 1000; and one of PSYC 1200 or SOC 1200 or consent of instructor.

HEAL 3600 Integration of Health Determinants for Communities Cr. Hrs. 3
Students study, integrate and use community level determinants of population health in selected case or learning scenarios. These cases present a variety of issues in the design of health related services that are intended to benefit population health. Prerequisites: HEAL 2600 with a grade of “C” or higher and 39 credit hours in the Curriculum for Interdisciplinary Health or consent of instructor.

HEAL 3610 Mechanisms of Disease 1 Cr. Hrs. 3
This course will provide an overview of cellular processes and immunology, followed by an introduction to common processes underlying the development of human diseases. These include: cell injury and death (including metabolism and aging); neoplasia, inflammation; toxins and trauma; genetic diseases and susceptibility; and immune dysregulation. The focus will be on both local and systemic disease processes, and the progression of cells and tissues from a healthy to a pathological state. For IHP students only. Prerequisites: BIOL 2520 (C) and CHEM 2360 (C).

HEAL 4500 Injury Prevention Across the Life Course Cr. Hrs. 3
This course provides an interdisciplinary life course perspective on theories and methods of injury prevention. Current research, practices and policies in injury prevention across a wide variety of contexts, including but not limited to homes, communities, sport and the workplace, will be critically reviewed with regard to issues of gender, culture, age, functional ability,
socio-economic status, sexual orientation, and other determinants of health. Prerequisites: HEAL 2600 or FMLY 1000 or SOC 1200 or PSYC 1200.

**HEAL 4600 Integration of Health Determinants for Canada and the World**

Cr. Hrs. 3

Students use selected case or learning scenarios to study the determinants of population health that depend on decision making in governmental or international agencies. The case scenarios present a variety of issues in the governance and management of population health. Prerequisites: HEAL 3600 and 57 credit hours in the Curriculum for Interdisciplinary Health or consent of instructor.

**HEAL 4610 Health Studies Capstone**

Cr. Hrs. 3

Students will explore selected topics from the social sciences to synthesize and evaluate actions that can affect the health of people. The course summarizes the social sciences knowledge that forms the basis for all health related professional work. Prerequisite: A grade of C+ in HEAL 3600 and 57 credit hours in the Curriculum for Interdisciplinary Health or consent of instructor. Restricted to students in Health Sciences and Health Studies.

**HEAL 4620 Health Sciences Capstone**

Cr. Hrs. 3

Students will explore selected topics from the biological sciences to synthesize and evaluate actions that can affect the health of people. The course summarizes the biological science knowledge that forms the basis for all health related professional work. Prerequisite: a grade of C+ in HEAL 3600 and 57 credit hours in the Curriculum for Interdisciplinary Health or consent of instructor. May not hold with HEAL 4610

**HEAL 4630 Mechanisms of Disease 2**

Cr. Hrs. 3

This course will expand upon the concepts learned in HEAL 3610 by exploring systemic diseases. The focus will be on understanding how some disease processes are not constrained by individual tissues and/or organs and may progress to affect the patient systemically. Specific diseases such as cancer, diabetes, multiple sclerosis, and HIV will be used as examples. For Bachelor of Health Sciences students only. Prerequisite: HEAL 3610 (B).

**HEAL 4640 Mechanisms of Disease 3**

Cr. Hrs. 3

(Lab required) Students will learn experimental techniques commonly used in modern biomedical science through lectures and laboratory sessions. Students will have the opportunity to conduct hands-on experiments in a modern research setting by rotating through five laboratory modules that will explore biomedical science methods such as histology and microscopy, cell culture, molecular biology, systems biology and proteomics, and HLA genotyping. These modules will be based on the diseases discussed in HEAL 4630, and will allow students to establish a direct connection between their experimental work and disease mechanisms. For students in the Bachelor of Health Sciences program only. Prerequisites: HEAL 4630 (B) and HEAL 3610 (B) and instructor permission required.

**HEAL 4650 Selected Topics in Interdisciplinary Health**

Cr. Hrs. 3

The opportunity to carry out individual study in the area of interdisciplinary health. When enrolment warrants, special topics may be offered in a regular course format. Prerequisite: Consent of Instructor and Chairperson.
SECTION 2: Admission Requirements

Admission Information

The following is a summary of the admission requirements for the Faculty of Kinesiology and Recreation Management. All admission requirements, as well as application deadline dates and forms, are included in the Applicant Information Bulletin that is available from the Admissions Office, Enrolment Services, 424 University Centre; this information is also posted on the University of Manitoba website in January each year.

Direct Entry (from High School)

The Faculty of Kinesiology and Recreation Management accepts some of the annual admissions quota into the three degree programs (excluding Athletic Therapy) directly from High School.

In addition to the general U of M admission requirements for high school students, to be considered for direct entry into the Faculty of Kinesiology and Recreation Management you will require a minimum 85% average over the following courses, with no less than 60% in each individual course.

Kinesiology/Physical Education Admission Requirements (Direct Entry Category 2)

- English 40S
- Applied Mathematics 40S or Pre-Calculus Mathematics 40S
- One of Biology 40S (recommended for Bachelor of Kinesiology), Chemistry 40S, Physics 40S, or Computer Science 40S

Recreation Management and Community Development Admission Requirements (Direct Entry Category 3)

- English 40S
- Applied Mathematics 40S or Pre-Calculus Mathematics 40S
- A third 40S course

Please note that due to limited space students may require a higher average than stipulated. Any student applying for Direct Entry admission to this faculty will automatically be considered for admission to University 1, should they not be granted Direct Entry admission.

Regular Advanced Entry Admission (from U1 or another academic program)

The Advanced Entry admission requirements for all degrees include a minimum of 24 credit hours of successfully completed coursework to include the following required courses listed below. In order to complete the degree in the shortest time possible it is recommended that students take the required Year 1 courses before applying to the Faculty. Entering students who have not completed all of the required Year 1 courses must complete them during their program. Academic course work completed from other recognized post-secondary institutions will be considered once evaluated for equivalency.

Kinesiology/Kinesiology-Athletic Therapy/Physical Education

Admission Requirements (Advanced Entry)

- BIOL 1410 Anatomy of the Human Body and
- BIOL 1412 Physiology of the Human Body (minimum grade of C) and
- KPER 1500 Foundations of Physical Education and Kinesiology (minimum grade of C) and
- 15 additional credit hours

Recreation Management and Community Development Admission Requirements (Advanced Entry)
Minimum GPA for admission consideration is 2.0 but admission is competitive.

The Faculty of Kinesiology and Recreation Management strives for a student body within its degree programs that is representative of the rich diversity of peoples within the province and to enrich the overall teaching and learning climate. Our Indigenous Achievement and other University of Manitoba priorities are realized through an Individual Consideration admissions category for applicants who identify as the following underrepresented group: Canada Indigenous/Aboriginal Peoples, Racialized Minorities, Mature Students, ACCESS Program Students, Persons with Disabilities, and those with exceptional circumstances. Students applying under Individual Consideration must have successfully completed at least one year of study (min 24 credit hours) and a minimum AGPA of 2.0.

2.1 Transfer and Second Degree Students

Students admitted to the Faculty of Kinesiology and Recreation Management following the completion of another recognized university degree or coursework may transfer in credit that is deemed equivalent toward the course requirements of a Kinesiology and Recreation Management undergraduate degree. Students are eligible to transfer a maximum of 50 credit hours to the Bachelor of Physical Education degree and a maximum of 60 credit hours to the Bachelor of Kinesiology and Bachelor of Recreation Management and Community Development programs.

Students who hold a degree and have completed further courses at the University of Manitoba which are applicable to their second degree in the Faculty of Kinesiology and Recreation Management but which were not used for credit toward their first degree may receive additional transfer credit for that work.

Equivalent courses completed at other universities or post-secondary institutions will be considered for admission and transfer credit only if the courses have been taken within the last 10 years.

Students are encouraged to contact an Academic Advisor in the Faculty General Office for information on how to optimize their transfer credit. Course transfer equivalencies will not be processed until after an application and all necessary documents have been submitted.

2.2 Visiting Students

Students who are enrolled and pursuing a degree at another institution may apply to be a visiting student with the Faculty of Kinesiology and Recreation Management. A Letter of Permission from the home institution granting permission to register for courses from the University of Manitoba is required in order for access to be granted to those courses.

3.1 Policy on Minimum Grade in Faculty Required Courses

A minimum grade of "C" is required to pass all faculty required courses within the degree program. Students are permitted to repeat a failed faculty required course and are strongly encouraged to meet with an academic advisor to discuss an academic progression plan.

3.2 Scholastic Standards: Academic Assessment

Scholastic Standards:

Formal academic assessments are performed following each term for all Faculty of Kinesiology and Recreation Management students who have completed 3 or more credit hours. As a result of this assessment students will be determined to be minimum met, satisfactory, on probation, suspension warning, or academic suspension for one year. All academic assessments will appear on the student’s official transcript.

Minimum Met

Students must achieve a minimum DGPA of 2.0 at each point of assessment in order to have met the minimum requirements of the Faculty of Kinesiology and Recreation Management. Students who do not achieve a minimum DGPA of 2.0 will be placed on probation.

Probation

Once placed on probation, a student will be placed on hold and must meet with an academic advisor to review performance and to receive an override in order to register for another term. Students on probation who achieve a minimum term GPA of 2.0 will be assessed as satisfactory. Students who do not achieve a minimum term GPA of 2.0 will be placed on suspension warning.

Satisfactory

The assessment of satisfactory is used once a student has been placed on probation but has subsequently achieved a minimum term GPA of 2.0. Students with satisfactory standing will be able to register without restrictions. Students who do not maintain a minimum term GPA of 2.0 will be placed on suspension warning.

Suspension Warning

Once placed on suspension warning, a student must meet with an academic advisor before registering for another term. Students on suspension warning who achieve a minimum term GPA of 2.0 will be assessed as satisfactory. Students who do not achieve a minimum term GPA of 2.0 will be placed on academic suspension.

Academic Suspension

A student placed on academic suspension in the Faculty of Kinesiology and Recreation Management is not permitted to register for a period of one calendar year. The notation “Academic Suspension for 1 Year” will be recorded on the student’s transcript.
Once a student has served a one year suspension, they must contact an academic advisor in order to be reinstated for future registration.

3.3 Dean’s Honour List

Students enrolled in 12 credit hours or more who achieve a Term GPA of 3.50 or higher will be placed on the Dean’s Honour List. The Dean’s Honour List will be calculated after each term (i.e. Fall, Winter, and Summer).

The Dean’s Honour List designation will appear on the student’s transcript.

3.4 University Gold Medal and Program Medals

Gold Medal

The Faculty of Kinesiology and Recreation Management will award the University Gold Medal to the graduating student who:

1) has achieved the highest grade point average of all graduating students (minimum 3.75) on courses constituting the last two years of an eligible program (and including transfer courses in the applicable years); and,

2) has completed at least 80 percent of what is considered to be the normal full course-load in each of the last two years of the eligible program.

Program Medals

There are two program medals awarded each year in the Faculty of Kinesiology and Recreation Management to the two students with the highest standing (according to the University Gold Medal criteria) in the programs in which the winner of the University Gold Medal in Kinesiology and Recreation Management is not registered (the three programs are Kinesiology, Physical Education, and Recreation Management and Community Development).

3.5 Degree With Distinction

Awarded to students who graduate with a cumulative Degree GPA of 3.8 or higher. The notation of “Degree with Distinction” will appear on the student’s parchment and transcript.

3.6 Attendance and Withdrawal

Students absent from class for three or more days due to illness are required to present a certificate from a physician. Unexcused absence of more than three hours of class time in a theory course or experiential learning course may result in the student being required to withdraw from the course or may result in an “F” grade being assigned.

3.7 Leave of Absence

Students who have not registered for a full academic session will need to reactivate their status by contacting the Faculty General Office and must consult with an Academic Advisor. Students who have been absent from study for more than 5 years or have attended another institution since their last registration (not on a Letter of Permission) will have to re-apply for admission to the university.

3.8 Time Limit for Completion of the Degree

Students admitted to the Bachelor of Kinesiology, Bachelor of Physical Education, or Bachelor of Recreation Management and Community Development degree programs must complete all requirements to graduate within ten years of admission to the program. Students with questions relating to the time limit regulation should consult the Undergraduate Program Administrator.

3.9 Student Academic Appeals

Students who wish to appeal matters concerning their academic status should contact the Faculty of Kinesiology and Recreation Management Associate Dean (Undergraduate Studies). The Faculty has an academic appeals process for students who wish to appeal a policy or decision affecting their program of study.

SECTION 4: Program and Graduation Requirements

Degree Requirements and Course Selection

It is the student’s responsibility to have read the Undergraduate Academic Calendar carefully, and to know all relevant university and faculty regulations, policies and practices. Completion of degree requirements is the responsibility of the student. Returning students should contact their advisor if they have any questions concerning their curriculum.

The four degree programs have a base of shared core courses. Shared core courses are intended to ensure students recognize the interconnections across our Faculty and its related fields of practice, and to facilitate the professional education of students.

In Fall 2017 the Faculty of Kinesiology and Recreation Management introduced an updated curriculum. In Fall 2018 and later, all students admitted through Year 1 Direct Entry and Year 2 Advanced Entry admission will follow the updated curriculum program requirements for each undergraduate degree program.

4.1 Program Requirements: Bachelor of Kinesiology

(Students admitted Direct Entry in September 2017 or later)

Program and Graduation Requirements: Bachelor of Kinesiology

To graduate with a four-year Bachelor of Kinesiology degree, a student must have passed the 120 credit hours of the program outlined below and must have achieved a Degree Grade Point Average (DGPA) of 2.00 with a minimum grade of “C” in all Faculty-required courses. A maximum of 158 credit hours may be attempted in order to obtain the 120 credit hours required for graduation with the Bachelor of Kinesiology degree.

## 4.2 Program Requirements: Bachelor of Kinesiology - Athletic Therapy

(Students admitted Year 2 Advanced Entry in September 2018 or later)

Program and Graduation Requirements: Bachelor of Kinesiology - Athletic Therapy

To graduate with a four-year Bachelor of Kinesiology – Athletic Therapy degree, a student must have passed the 120 credit hours of the program outlined below and must have achieved a Degree Grade Point Average (DGPA) of 2.00 with a minimum grade of “C” in all Faculty-required courses.

A maximum of 158 credit hours may be attempted in order to obtain the 120 credit hours required for graduation with the Bachelor of Kinesiology - Athletic Therapy.

Students are expected to progress through the Athletic Therapy program as outlined below. It is strongly recommended that courses be completed in the sequence and year indicated, otherwise an additional year may be required.

Valid Health Care Provider CPR and Standard First Aid certification are required before the beginning of each term of registration (if lapsed, students must re-certify). Each year while in the program, Athletic Therapy students must also register as members with both the Manitoba Athletic Therapists Association (MATA) and Canadian Athletic Therapists Association (CATA).

Athletic Therapy Practica (KIN 3912, KIN 3914 & KIN 4910)

Students in the Athletic Therapy Program will be required to complete several hours of clinical and field (sports team) experiences on campus and in the community during their degree. These experiences provide opportunities to apply the knowledge and skills students obtain via their educational curriculum, in a practical hands-on manner, and therefore enhance their preparation for the Canadian Athletic Therapy Association (CATA) examinations. Students must successfully complete the previous year’s courses and be registered in all of the present year’s courses in order to register in each practicum (KIN 3912, KIN 3914 & KIN 4910).

### Degree Exit Requirement:
Current Basic Rescuer CPR and Emergency or Standard First Aid Certification

**4.5 Program Requirements for Students Admitted Prior to 2018**

Faculty of Kinesiology and Recreation Management Students admitted before September 2018 will notice changes to course and program requirements. Students admitted prior to 2018 should contact the Undergraduate Program Administrator or Academic Advisor at the Faculty General Office for information on their specific degree requirements and courses required for graduation. All degree program requirements can be found in the Undergraduate Calendar of the corresponding year of admission.

**4.6 Minor in Recreation Studies (123)**

The Recreation Studies Minor consists of 18 hours of credit in the following courses offered by the Faculty of Kinesiology and Recreation Management. To qualify for and declare the Minor in Recreation Studies, students must achieve a grade of "C" or better in KPER 1400. A student must obtain department approval (when necessary) and declare the minor with their home faculty for access into advanced REC courses.

Required Core Courses for the Minor in Recreation Studies (6 credit hours):
- REC 1400 Introduction to Leisure Travel (3 credit hours)
- REC 2400 Management and Marketing of Leisure Services (3 credit hours)

Two Required Elective Courses for the Minor in Recreation Studies (Choose 6 credit hours from the following):
- REC 2100 Introduction to Outdoor and Land-Based Recreation (3 credit hours)
- REC 2110 Introduction to Sport Management (3 credit hours)

**4.7 Interfaculty Option in Aging**

The Option in Aging is offered by and in the following faculties: Arts, Nursing, Kinesiology and Recreation Management, and Social Work.

Students in the Faculty of Kinesiology and Recreation Management can elect to complete the Option in Aging which consists of 18 credit hours of aging-related coursework. All Option in Aging students MUST complete the following two courses (6 credit hours):
- KIN 2610/ NURS 2610 Health and Physical Aspects of Aging (alternates between faculties)
- REC 2650/HMEC 2650/SWRK 2650 Social Aspects of Aging (alternates between faculties)

PLUS ONE OF (3 credit hours):
- REC 4250 Leisure and Aging (BRMCD students; not offered every year)
- KIN 4500 Physical Activity and Aging (BKin students)

**AND ELECTIVES* (9 credit hours):**

Approved age related courses from Kinesiology and Recreation Management or other faculties. A current list of applicable courses is available at the Faculty General Office.

In order to declare the Option in Aging, students must meet with an Academic Advisor once they have successfully completed the two compulsory courses of KIN 2610/ NURS 2610 and REC 2650/HMEC 2650/SWRK 2650.

Upon graduation, a student who has met all the requirements will have the concentration added to their transcript indicating they have completed the Option in Aging.

**4.8 Supervised Fieldwork Experience (PERS 4630)**

The supervised fieldwork experience is a professionally supervised experience that provides the student with the opportunity to apply knowledge gained in academic courses, and gives exposure to a workplace environment in a related field.
Students in the BKin and BRMCD programs are eligible to register for the 12 credit hour course provided they will complete 90 credit hours toward the degree and achieve a minimum Degree Grade Point Average of 2.5 or higher at the end of the third year of their degree. Student placements are scheduled for 13 weeks (working full-time) during the Fall Term (September through December). Information on the application process, deadlines and course details are available on the Faculty website and at the Faculty General Office.

4.9 External Minors

Kinesiology and Recreation Management students may choose and declare an external minor offered by the Faculty of Arts, Clayton H. Riddell Faculty of Environment, Earth, and Resources, Faculty of Human Ecology, Faculty of Science, Faculty of Management, Marcel A. Desautels Faculty of Music, or School of Art. Completion of a declared minor is optional and may be achieved through the use of electives in a program. See the applicable faculty and department chapters for the requirements of each minor. Minors must be declared with an Academic Advisor at the Faculty General Office in order to be approved and appear on a student’s transcript.

In order to declare the Management Minor from the I. H. Asper School of Business, Faculty of Kinesiology and Recreation Management students must achieve a 3.0 DGPA (or higher). If a student has successfully completed 18 credit hours of course work from the Faculty of Management, and a 2.0 GPA in the Management course work by the time of graduation, the Minor in Management may also be declared upon completion of the degree program.

SECTION 5: Registration Information for All Students

Faculty Academic Advisors

If you require further information after reading the Undergraduate Calendar, contact the Kinesiology and Recreation Management academic advisors, 8:30 a.m. - 4:30 p.m. Monday - Friday.

Patti Dickieson, Academic Advisor
103B Frank Kennedy Centre
Telephone: (204) 474 9748

Glenda Kramer, Advising/Office Assistant
102 Frank Kennedy Centre
Telephone: (204) 474 9747

5.1 Faculty Orientation Sessions

All new students admitted to the Faculty must attend an Orientation session in order to be unblocked from registration. Dates will be provided with the letter of acceptance (normally in early July before registration initial access) and on the Faculty website.

At this session students will receive important information regarding their program, registration, and an orientation manual. Upon acceptance into the Faculty, students from outside of the province will be sent an orientation manual and should contact an Academic Advisor to discuss registration and other matters prior to registration initial access.

5.2 Course Sequencing and Prerequisites

Planning the sequence of required courses is essential. Several Faculty courses in all degrees require successful completion of another course in order to register. Some courses may only be offered once per year. Please check current catalogue course descriptions and class schedules in your program to ensure that you achieve what is necessary for efficient course enrolment in future terms.

5.3 Experiential Learning Courses (ELCs)

Experiential learning courses (ELCs) provide three credit hours of integrated theory and practice, and include applied activities that are designed to translate theoretical components to hands-on-learning in the gymnasium, dance studio, fitness studio, playing field, outdoor environment or clinic. Students should refer to the course attendance policy in Section 3.6. Below is a list of Faculty of Kinesiology and Recreation Management experiential learning courses:

- KIN 2750 Athletic Therapy Skills
- KIN 3740 Resistance Training and Conditioning
- PHED 2400 Coaching Theory and Practice
- PHED 2402 Advanced Coaching Theory and Practice
- PHED 2710 Human Movement Principles
- PHED 2720 Developmental Games and Activities
- PHED 2730 Gymnastics, Dance and Rhythmic Activities
- PHED 2742 Group Fitness and Leadership
- PHED 3102 Indigenous Song and Dance
- PHED 3710 Active Health and Human Potential
- PHED 3750 Lifestyle Activities
- PHED 3760 Diverse Populations Mentorship
- PHED 3770 Indigenous Games and Activities
- PHED 4710 Outdoor Education
- REC 4720 Wilderness Adventures

5.4 Courses Requiring an Active Facility Use Pass

In some courses students will be required to activate the student facility use pass in order to gain access into and utilize various learning environments. Students should be prepared to have their pass active within the first week of class in the applicable term. Students report to the Recreation Services Customer Service Desk in Frank Kennedy Centre.

5.5 Course Field Work Fees

The following courses will be assessed Field Work Fees upon registration. Fees are viewable in the Aurora Student Class Schedule under Detailed Class Information for each course listed:

- KIN 3320 Advanced Anatomy
- KPER 1500 Foundations of Physical Education and Kinesiology
- PHED 2710 Human Movement Principles
- PHED 2742 Group Fitness and Leadership
- PHED 3102 Indigenous Song and Dance
- PHED 3710 Active Health and Human Potential
- PHED 3750 Lifestyle Activities
- PHED 4710 Outdoor Education
- REC 3090 Sustainable Nature-Based Tourism
- REC 4720 Wilderness Adventures

5.6 Courses Available to Students in Other Faculties and Schools

Students from other faculties who wish to register for courses with registration restrictions may seek departmental permission by obtaining a form from the Faculty General Office (102 Frank Kennedy Centre) at the end of the initial registration access period of the applicable session.

Students who have declared the Recreation Studies Minor may register for additional Recreation Studies courses with the help of their academic advisor in their faculty – refer to requirements in Section 4.6.

SECTION 6: Kinesiology, Phys Ed & Recreation
Course Descriptions (KPER) 1000 level
KPER 1400 Concepts of Recreation and Leisure  
Cr. Hrs. 3
The nature and scope of recreation and leisure, the past influences and implications for the future. An overview of the types and roles of various components of the leisure service delivery system. May not be held with the former PERS 1400 or the former REC 1400.

KPER 1200 Physical Activity, Health and Wellness  
Cr. Hrs. 3
An examination of the importance of physical activity for health and wellness. Provides an overview of the present and recommended levels of physical activity, the factors influencing participation in physical activity, Indigenous peoples’ approaches to health, the role of recreation in health and wellness, and individual, organizational and national interventions for increasing physical activity. May not be held with the former PHED 1200 or the former PERS 1200.

KPER 1500 Foundations of Physical Education and Kinesiology  
Cr. Hrs. 3
An introduction to physical education and kinesiology as a profession and a discipline, including an overview of sub-disciplines, resources, and careers; a personal physical assessment; and principles for achieving physical fitness. This course includes a field trip component. May not be held with the former PERS 1500 or the former PHED 1500.

KPER 2000 Special Topics (Introductory)  
Cr. Hrs. 3
An introductory examination of selected topics in the fields of kinesiology, physical education and recreation. Topics will vary depending on faculty expertise and student need. This course can be completed as a topics course multiple times under different titles.

KPER 2120 Academic Skills in Kinesiology and Recreation Management  
Cr. Hrs. 3
This course provides interdisciplinary and multidisciplinary academic preparation and communication skills for students pursuing undergraduate degrees from the Faculty of Kinesiology and Recreation Management. Prerequisites: [KPER 1200 (or the former PERS 1200 or the former PHED 1200)] and [KPER 1400 (or the former PERS 1400 or the former REC 1400) or KPER 1500 (or the former PERS 1500 or the former PHED 1500)].

KPER 2170 History of Physical Activity and Leisure  
Cr. Hrs. 3
This course examines the post-Confederation history of Canadian sport, physical education, physical fitness and recreation, as well as the growth of public programs. Using the concepts of social class, gender, race, and ethnicity, the focus is on the ways in which Canadian physical activity, recreation, and sport have been organized since Confederation and the processes by which people have fashioned them, within the dynamic of economic, social, and political struggles and changes. May not be held with the former PERS 3170 or the former KIN 3170, or the former PHED 3170, or the former PHED 3070. Prerequisites: [KPER 1200 (C) (or the former PERS 1200, or the former PHED 1200)] and KPER 2120 (C).

KPER 2200 Planning Principles  
Cr. Hrs. 3
While contexts in practice may vary, planning is an essential competency for all professional in recreation, kinesiology, and physical education. This course emphasizes principles and processes in effective planning, implementation, and evaluation. May not be held with the former PERS 2200 or the former PHED 3080 or the former REC 2530. Prerequisites: [KPER 1200 (or the former PERS 1200 or the former PHED 1200)] or [KPER 1400 (or the former PERS 1400 or the former REC 1400)] or [KPER 1500 (or the former PERS 1500 or the former PHED 1500)].

KPER 2320 Human Anatomy  
Cr. Hrs. 3
(Lab required) Structure of the skeletal, articular, and muscular systems of the human body. May not be held with the former KIN 2320 or the former PHED 2320. Prerequisites: BIOL 1412 (C) or BIOL 1413 (C) or the former ZOOL 1330 (C).

KPER 2330 Biomechanics  
Cr. Hrs. 3
(Lab required) The mechanical and anatomical analysis of human movement. May not be held with the former KIN 2330 or the former PHED 2330. Prerequisites: KPER 2320 (or the former KIN 2320 or the former PHED 2320).

KPER 2350 Introduction to Research  
Cr. Hrs. 3
(Lab required) Students will become familiar with the basic principles and methods of research in the humanities, biological, life and social sciences. Students will develop the conceptual foundations and practical skills needed to locate, understand, and evaluate primary research publications. May not hold with the former PERS 3350, the former KIN 3350, the former REC 3350 or the former REC 2010. Prerequisites: STAT 1000 or STAT 1001.

KPER 2540 Psychology of Sport and Physical Activity  
Cr. Hrs. 3
This course provides students with an understanding of psychological variables affecting individuals within sporting and activity contexts. Topics to be explored include motivation, arousal/anxiety, group dynamics and youth involvement in sport. May not be held with the former KIN 2540 or the former PHED 2540.

KPER 2700 Motor Control and Learning  
Cr. Hrs. 3
(Lab required) Principles underlying human motor performance and motor skill learning. May not be held with the former KIN 3450 or the former PHED 3450.

KPER 3140 Health Promotion  
Cr. Hrs. 3
An introduction to health promotion with emphasis on the benefits of physical activity for health and wellness, factors influencing participation in physical activity, health promotion strategies, and interventions for increasing physical activity applied at the individual, organizational, and national levels. Prerequisites: [KPER 2200 (or the former PERS 2200)] and [KPER 2350 (or the former PERS 3350 or the former KIN 3350 or the former PHED 3350 or the former REC 3350 or the former REC 2010)].

KPER 4000 Special Topics  
Cr. Hrs. 3
A theoretical and practical examination of selected topics in the fields of recreation, leisure, physical education and kinesiology. Topics will vary depending on faculty expertise and student need. This course can be completed as a topics course multiple times under different titles. Prerequisites: [KPER 1200 (or the former PERS 1200 or the former PHED 1200)] or [KPER 1400 (or the former PERS 1400 or the former REC 1400)] or [KPER 1500 (or the former PERS 1500 or the former PHED 1500)] or department approval.

KPER 4600 Directed Study  
Cr. Hrs. 3
Completion of an independent study or fieldwork experience, including a major written submission, approved by the department and under the direction of a faculty member. This course can be completed as a topics course multiple times under different titles.

SECTION 6: Kinesiology Course Descriptions-2000 Level

KIN 2200 Basic Trauma and Life Support  
Cr. Hrs. 3
(Lab required) Assessment and management of medical emergencies common to sports. Topics will include on-field primary and secondary surveys, airway management, assessment and management of head, spinal, chest, abdominal and extremity trauma. Open only to Athletic Therapy
students or with permission of the instructor. May not be held with the former KIN 3200 or the former PHED 3200.

**KIN 3230 Human Anatomy**  
Cr. Hrs. 3  
(Lab Required) Structure of the skeletal, articular, and muscular systems of the human body. May not be held for credit with PHED 2320, REHB 1480, REHB 1490, or REHB 1500. Prerequisite: BIOL 1030 (C) or both BIOL 1000 and BIOL 1010 (C+ in each) or BIOL 1412 (ZOOL 1330) (C).

**KIN 2330 Biomechanics**  
Cr. Hrs. 3  
(Lab Required) The mechanical and anatomical analysis of human movement. May not hold for credit with PHED 2330 or PHED 2310. Prerequisite: KIN 2320 or PHED 2320 (C).

**KIN 2610 Health and Physical Aspects of Aging**  
Cr. Hrs. 3  
An introduction to health, well-being and aging. Emphasis on health as multidimensional including physical, social and mental health. Integration of theory and research in examining selected issues related to health and physical aspects of aging. This is an Option in Aging course and may not be held for credit with PHED 2610 or NURS 2610.

**KIN 2750 Athletic Therapy Skills**  
Cr. Hrs. 3  
This course will focus upon the theoretical study and practical application of massage therapy (basic and advanced) and sport specific taping, splinting and bracing techniques. The intent of this course is to help prepare students for their future in the profession of Athletic Therapy. May not hold for credit with PHED 2020 or PHED 3180. Open to Athletic Therapy students only.

**SECTION 6: Kinesiology Course Descriptions-3000 Level**

**KIN 3160 Pathology and Sport Medicine**  
Cr. Hrs. 3  
(Lab required) Analysis of types of injuries and emergency procedures, and practical experience in first aid, taping and wrapping, massage, and various preventive techniques. May not be held with the former PHED 3160 or the former PHED 3060. Prerequisite: KPER 2320 (or the former KIN 2320 or the former PHED 2320).

**KIN 3320 Advanced Human Anatomy**  
Cr. Hrs. 3  
(Lab Required) This course will concentrate on the structure and function of the human body’s various tissues, organs and systems with particular emphasis upon basic histology, function and gross anatomy. This course will help prepare students who are interested in pursuing careers in Athletic Therapy and Kinesiology. Note: A fieldwork fee is attached to the course. Prerequisite: KPER 2320 (or the former KIN 2320 or the former PHED 2320).

**KIN 3330 Functional Assessment and Restoration A**  
Cr. Hrs. 3  
(Lab required) General principles of assessment and restoration; assessment of acute and chronic musculo-skeletal injuries of the lower extremity; rehabilitation techniques to ensure full restoration of function. May not be held with KIN 3300 (PHED 3300). Prerequisite: KIN 3320 (C).

**KIN 3332 Functional Assessment and Restoration B**  
Cr. Hrs. 3  
(Lab required) Assessment of acute and chronic musculo-skeletal injuries of the upper extremity and spine; rehabilitation techniques to ensure full restoration of function. May not be held with KIN 3300 (PHED 3300). Prerequisite: KIN 3330 (C).

**KIN 3400 Therapeutic Modalities**  
Cr. Hrs. 3  
(Lab required) This course will concentrate on the use of therapeutic modalities commonly utilized in the profession of Athletic Therapy. It will introduce the student to various thermal mechanical, and electromagnetic agents used for therapeutic purposes. May not be held with the former PT 2720. Prerequisite: BIOL 1412.

**KIN 3450 Motor Control and Learning**  
Cr. Hrs. 3  

**KIN 3470 Exercise Physiology**  
Cr. Hrs. 3  
(Lab required) Physiological and functional responses to acute and chronic exercise, focusing on the cardiovascular, respiratory and neuromuscular systems. May not be held for credit with PHED 3470 or PHED 3430. Prerequisites: BIOL 2420 (ZOOL 2540) (D) or BIOL 1412 (ZOOL 1330) (C).

**KIN 3512 Principles of Fitness Training**  
Cr. Hrs. 3  
Theoretical concepts of designing programs employing the principles of overload and adaptation for all components of fitness for all age groups. May not hold with PHED 3090 (KIN 3090) or PHED 3512. Prerequisite: a grade of C or better in PHED 3430 or KIN 3470 or PHED 3470.

**KIN 3700 Advanced Motor Control and Learning**  
Cr. Hrs. 3  
This course focuses on the fundamentals of the nervous system as they relate to human movement and the application to motor control and learning. Emphasis is placed on an advanced understanding and application of theories and models of motor control and learning, including the introduction to how different components of the central and peripheral nervous systems contribute to movement. Prerequisite: KPER 2700 (or the former KIN 3450 or the former PHED 3450).

**KIN 3740 Resistance Training and Conditioning**  
Cr. Hrs. 3  
Development of theoretical and practical knowledge of strength training and conditioning for programming over the entire healthy population from inactive sedentary individuals to elite athletes. May not hold for credit with PHED 2620 (PHED 3740). Prerequisite: KIN 2320 (PHED 2320) (C) and KIN 3470 (PHED 3470 or PHED 3430) (C). Co-requisite: KIN 3512 (KIN 3090, PHED 3512, PHED 3090) (C). Requires a paid facility use pass.

**KIN 3912 Athletic Therapy Practicum**  
Cr. Hrs. 4  
To provide clinical and on-field internship experiences on campus and in the community for prospective Athletic Therapy candidates. May not hold for credit with the former PHED 3910 or the former KIN 3910. Evaluated on a pass/fail basis. Prerequisite [KIN 2750 (or the former PHED 2020 or the former PHED 3180)] and [KPER 2320 (or the former KIN 2320 or the former PHED 3200)] and [KIN 2200 (or the former KIN 3200 or the former PHED 3200)].

**KIN 3914 Clinical Block Placement**  
Cr. Hrs. 2  
Clinical internship experiences on campus and in the community for prospective Athletic Therapy candidates. Evaluated on a pass/fail basis. May not be held for credit with KIN 3910 (PHED 3910). Prerequisites: KIN 3912.

**SECTION 6: Kinesiology Course Descriptions-4000 Level**

**KIN 4040 Advanced Exercise and Health Psychology**  
Cr. Hrs. 3  
This course provides students with an advanced understanding of research, theory and contemporary issues in exercise and health psychology. Using a variety of methods, such as case studies, narrative, and research articles, students will learn to critically read and evaluate research in the field. Students will also explain and apply influential theories and models. Contemporary research topics covered in this class include psychological influences on health behaviours, including exercise, as well as the psychological outcomes of these health behaviours. Prerequisite: KPER...
KIN 4060 Drugs and Ergogenic Aids in Sport  Cr. Hrs. 3
A multidisciplinary examination of drugs, hormones, dietary supplement and methods used by athletes in attempting to enhance athletic performance. Ethical concerns and mechanisms of action will be examined for steroids, stimulants, masking agents, blood doping, and hormonal and dietary supplements among others. May not hold for credit with PHED 4060. Recommended prerequisite BIOL 1412 (ZOOL 1330) or BIOL 2420 (ZOOL 2540).

KIN 4070 Development and Movement Disorders  Cr. Hrs. 3
This course is designed to provide the student with an understanding of neuroscience as it relates to motor control and learning through consideration of foundational content in how the central and peripheral nervous systems contribute to movement control and the contributions of sensory feedback. The role of the nervous system for motor function will be explored through an understanding of a selection of developmental and acquired neurological disorders. Students will have an opportunity to examine the application of a selection of the content and theories to the study of a sample of neurological and/or developmental disorders. May not be held with the former PERS 4200 when titled "Developmental and Movement Disorders." Prerequisite: KPER 2700 (C), or the former KIN 3450 (C), or permission of the instructor.

KIN 4160 Advanced Pathology and Sport Medicine  Cr. Hrs. 3
Basic principles of pathology and clinical manifestations of cardiac respiratory, and neurologic disorders. Preventative measures, assessments and treatment methods employed in care of patients with these disorders will also be examined. May not be held for credit with PHED 4050. Prerequisites: (KIN 3160 (C) (or the former PHED 3160, or the former PHED 3060)) and (KIN 3320 (C)) and (KPER 3470 (C) (or the former KIN 3470, or the former PHED 3470, or the former PHED 3430)).

KIN 4260 Human Factors and Ergonomics  Cr. Hrs. 3
This course reviews principles of human factors and ergonomics and explores the systematic application of human capabilities, limitations and behaviours with regard to the design of usable elements within specific environments. Emphasis is placed on the interactive nature of human-machine systems, the development of ergonomic models, and the techniques used to assess the design of modern work and living environments. Prerequisite: KPER 2700 (C) or the former KIN 3450 or the former PHED 3450.

KIN 4330 Advanced Biomechanics  Cr. Hrs. 3
(Lab required) A biomechanical analysis of the skills and techniques of the major sports, games, and exercises. May not be held with the former PHED 4360. Prerequisite: KPER 2330 (or the former KIN 2330 or the former PHED 2330 or the former PHED 2310).

KIN 4370 Physiology of Exercise in Extreme Environments  Cr. Hrs. 3
Learn how humans exercise and work under five environmental extremes: heat, cold, hypobaria (altitude), hyperbaria (under water) and microgravity (space). After learning how each environment limits exercise and poses health risks, students will then apply knowledge of exercise physiology to determine how training and acclimatization can mitigate these limitations to maximize performance. Knowledge attained in this course will be valuable professionally (e.g., providing training for athletes in heat and cold), for personal recreation (e.g., mountaineering, SCUBA diving), or research (e.g., microgravity). May not be held with KPER 4000 or the former PERS 4200 when titled “Physiology of Exercise in Extreme Environments.” Prerequisite: KIN 3470 (C).

KIN 4400 Therapeutic Exercise Rehabilitation  Cr. Hrs. 3
This course will concentrate on therapeutic exercise for the upper and lower extremities, torso and spine. Content will focus upon using exercise and basic therapy techniques to restore function by addressing deficiencies in range of motion, flexibility, strength, power, endurance, proprioception, coordination, agility and speed. Prerequisites: KIN 3160 (C) (or the former PHED 3160 or the former PHED 3060)) and (KPER 3512 (C) (or the former KIN 3512, or the former KIN 3090, or the former PHED 3090)).

KIN 4460 Fitness Appraisal and Lifestyle Counselling  Cr. Hrs. 3
Theoretical knowledge and practical training related to physical activity, fitness and lifestyle appraisal and counselling. Note: This course prepares students for certification as a Certified Personal Trainer (CPT) by the Canadian Society for Exercise Physiology. B. Kin. students who wish to prepare for certification as a Certified Exercise Physiologist (CEP) by the Canadian Society for Exercise Physiology, should consult the Undergraduate Program Administrator for information. May not be held for credit with PHED 4460. Prerequisites: KPER 3470 (C) or the former KIN 3470 or the former PHED 3470 or the former PHED 3430). Pre- or Corequisites: KPER 1200 (C) (or the former PERS 1200 or the former PHED 1200) and KIN 3512 (C) or the former KIN 3090 or the former PHED 3090). Requires an active Recreation Services Membership.

KIN 4470 Advanced Exercise Physiology  Cr. Hrs. 3
An advanced examination of the physiological factors that affect human performance during physical activity. This will include exposure to related research and the development of techniques for its critical assessment. May not be held with PHED 4410. Prerequisites: KPER 3470 (C) or the former KIN 3470, or the former PHED 3470, or the former PHED 3430).

KIN 4500 Physical Activity and Aging  Cr. Hrs. 3
The study of the aging processes and the effects of exercise and lifestyle factors on the health and fitness of the aging adult. May not be held for credit with PHED 4500. Prerequisite: KIN 3512 (KIN 3090, PHED 3512, PHED 3090) (C) or permission of the instructor.

KIN 4540 Advanced Topics in Sport Psychology  Cr. Hrs. 3
This course will provide the student with a deeper understanding of psychological variables affecting individuals within sport contexts, including an exploration of various research methods and theories/research related to motivation, youth, and applied work in sport psychology. May not hold with the former PHED 4540. Prerequisite: KPER 2540 (or the former KIN 2540 or the former PHED 2540).

KIN 4560 Advanced Fitness Appraisal and Lifestyle Counselling  Cr. Hrs. 3
(Lab required) Advanced theoretical knowledge and experiential learning related to physical activity, fitness and lifestyle assessment, counselling, and exercise prescription for apparently healthy and clinical populations. Prepares students for certification as a Certified Exercise Physiologist (CEP) by the Canadian Society of Exercise Physiology. May not be held with the former PHED 4530. Prerequisites: (KIN 4460 (C) (or the former PHED 4460) and (KPER 3512 (C) (or the former KIN 3512, or the former KIN 3090, or the former PHED 3090)). Requires an active Recreation Services membership.

KIN 4910 Athletic Therapy Practicum  Cr. Hrs. 6
To provide clinical and on-field internship experiences on campus and in the community for prospective Athletic Therapy candidates. May not be held for credit with PHEP 4910. Evaluated pass/fail. Prerequisite: KIN 3914 (KIN 3910, PHED 3910) (C) and KIN 3400 (C) and KIN 3320 (C).

SECTION 6: Phys Ed & Rec Studies General Course Descriptions-1000 Level
PERS 1300 Introduction to Leisure Travel  Cr. Hrs. 3
To provide an introduction to tourist behaviour and the tourism system through an overview of: why people travel; the components of tourism; the scope and organization of tourism in Canada; and the interrelationship between recreation and tourism. May not be held for credit with REC 1200.

SECTION 6: Phys Ed & Rec Studies General Course Descriptions-3000 Level

PERS 3100 Inclusive Physical Activity and Leisure  Cr. Hrs. 3
This course introduces the foundations of inclusive physical activity and leisure and the application of this knowledge to individuals from diverse backgrounds and experiences with a focus on people with various forms of impairment. May not hold for credit with PHED 3390 (REC 3060). Prerequisite: PERS 2100 (C).

PERS 3340 Philosophy of Physical Activity and Leisure  Cr. Hrs. 3
Issues in sport, physical education and recreation will be examined from a philosophical perspective. May not be held for credit with KIN 3340 (REC 3340, PHED 2340). Prerequisite: PERS 2100 (C).

PERS 3460 Sociology of Physical Activity and Leisure  Cr. Hrs. 3
This course examines sociological factors that influence and shape participation in the areas of physical activity, sport and leisure. The exploration of students’ own experiences in this field is emphasized, using an analytical model examining experiences as they arise out of the interplay of social structure and individual agency. May not hold for credit with PHED 3460.

SECTION 5: Phys Ed & Rec Studies General Course Descriptions-4000 Level

PERS 4100 Current Issues  Cr. Hrs. 3
A capstone course examining current issues and strategies for addressing them in the broad fields related to kinesiology, recreation management, and physical education. Prerequisite: Successful completion of 90 credit hours of course work in the BKin or the BRMCD degree programs.

PERS 4110 The Olympics and the Global Sporting Event  Cr. Hrs. 3
Critical examination of the sporting and cultural significance of the modern Olympic Games and other global events, with emphasis given to the Olympic and Paralympic Games that occur in the year the course is offered. Prerequisite: PERS 3460 (C) or permission of instructor.

PERS 4310 Physical Activity Counselling  Cr. Hrs. 3
The purpose of this course is to introduce students to physical activity counselling and the associated interpersonal and counselling skills as well as relevant theories that underpin behaviour change and counselling techniques. Through case studies, readings, research, discussions, simulations, role plays and real counselling work students will learn, reflect on and practice proven counselling skills that build motivation and facilitate behaviour change. Pre-requisites: KIN 2540 (C), or PSYC 2660 (C), or the former PSYC 3660 (C).

PERS 4320 Sport and the Body  Cr. Hrs. 3
A critical analysis of current, interdisciplinary topics pertaining to sport and the body. This course tackles difficult and controversial questions related to the active body. Pre-requisite: PERS 3460 Sociology of Physical Activity and Leisure (c) or permission of the instructor. May not be held with: PERS 4200.

PERS 4340 Sport, Film and Society  Cr. Hrs. 3
This seminar format course encourages students to use films as “texts” through which important sociocultural themes related to the study of sport, recreation, physical activity, dance, and physical education can be explored. It builds upon themes explored in courses such as PERS 3460 and uses film as a way to examine the intersections between the representations of key historical and sociological concepts, such as social class, gender, and race/ethnicity and the representations of sport and the moving body. The course is organized around these themes and includes a variety of film genres, primarily feature films and documentaries. Each seminar includes one or more screenings upon which class discussions are based. The course concludes with a screening of the films made by the students themselves, a key component of the course evaluation. Prerequisite: PERS 3460 or written permission of the instructor.

PERS 4630 Supervised Fieldwork Experience  Cr. Hrs. 12
The fieldwork practicum is a professionally supervised field experience that provides an opportunity to apply knowledge gained in academic courses, and exposure to new concepts of professional practice in the fields of physical activity, health and wellness, or leisure. Students are placed for a 13-week period of full-time work within a suitable agency. May not be held for credit with PHED 4620 (REC 3080, or REC 4630). Prerequisite: Successful completion of 90 credit hours of course work in the BKin or BRMCD degree programs and a minimum DGPA of 2.5.

SECTION 6: Physical Education Course Descriptions-2000 Level

PHED 2400 Coaching Theory and Practice  Cr. Hrs. 3
An introduction to theoretical and practical aspects of coaching at the community and school level, including the examination of topics of philosophical, psychological, ethical and technical significance. The course prepares students for certification from the national Coaching Certification Program (Competition A). May not hold for credit with KIN 2400, KIN 3720, PHED 3720 or PHED 3050. Requires a paid facility use pass.

PHED 2402 Advanced Coaching Theory and Practice  Cr. Hrs. 3
An analysis of the theoretical and practical aspects of coaching at elite levels, with a particular focus on topics of psychological and technical significance. An emphasis is placed on the sport psychology research literature. The course prepares students for certification from the National Coaching Certification Program (Competition B). May not be held for credit with KIN 2402 or KIN 3730 or PHED 3730. Prerequisite: KIN 2400 or PHED 2400 or PHED 3720 or KIN 3720 or PHED 3050 (C). Requires a paid facility use pass.

PHED 2442 Health Education  Cr. Hrs. 3
By integrating theory with practice, this course explores conceptions of health and education. Current health models and motivational theories will guide strategies for understanding health education. The course introduces students to conceptions of “active health” that challenge and support models of wellness and wellbeing. May not be held with the former PHED 3440. Prerequisite: KPER 1200 (or the former PERS 1200 or the former PHED 1200).

PHED 2550 Growth and Motor Development  Cr. Hrs. 3
Detailed study of physical growth and motor development from conception to adolescence, with implications for physical activity programs.

PHED 2710 Human Movement Principles  Cr. Hrs. 3
An introduction to the principles of inclusive physical education through the integration of theory, practice and guided reflection pertaining to the development of fundamental movement skills and strategies applied to educational games, gymnastics, and dance. May not hold for credit with PHED 1420. Requires a paid facility use pass.
PHED 2742 Group Fitness and Leadership

This course integrates theory and practice necessary to design and lead safe and effective group fitness programs (e.g., interval, circuit, conditioning, choreography). Emphasis is placed on the Manitoba Curriculum Student Learning Outcomes in "Movement Safety, Personal and Social Management", and prepares students for Group Fitness Leader Certification. This course includes a field trip component. May not be held with the former PHED 1640 or the former PHED 2630 or the former PHED 2640 or the former PHED 2740 or the former KIN 2740. Prerequisite: KPER 2320 (C) (or the former KIN 2320 or the former PHED 2320). Requires an active Recreation Services membership.

SECTION 6: Physical Education Course Descriptions-3000 Level

PHED 3102 Indigenous Song and Dance

An introduction to a variety of traditional and culturally relevant Indigenous songs and dances representative of Canada’s Indigenous peoples, including First Nations, Metis and Inuit, taught using western and traditional teaching styles with an emphasis on hands-on learning. May not be held with the former PERS 4200. A fieldwork fee is attached to the course.

PHED 3122 Developmental Games and Activities

Practical and theoretical aspects of designing educational game experiences applicable to early through senior years physical education, to include the design, implementation, and assessment of safe and inclusive physical activities as well as planning, organizational and teaching strategies. Introduces students to Manitoba Curriculum Student Learning Outcomes in "Movement Safety, Personal and Social Management”. May not be held with the former PHED 2720 or the former PHED 2650. Prerequisite: PHED 2710.

PHED 3360 Culturally Relevant Physical Education and Health

An investigation of physical health and education from a critical theorist perspective, that is, one that investigates the different relations of power and privilege (based on ability, gender, race, socio-economic class, sexuality ...) experienced within education experiences of young people from diverse backgrounds will be analyzed from a holistic perspective. May not hold for credit with PHED 3100 (057.310). Prerequisite: PHED 2720 (PHED 2650 or 057.265) (C).

PHED 3362 Culturally Relevant Pedagogies

Lab required An investigation of physical health and education from a critical theorist perspective, that is, one that investigates the different relations of power and privilege (based on ability, gender, race, socio-economic class, sexuality etc.) experienced within education and physical activity contexts. The physical education experiences of young people from diverse backgrounds will be analyzed from a holistic perspective. May not be held with the former PHED 3100 or the former PHED 3360. Prerequisite: PHED 3122 or the former PHED 2720.

PHED 3522 Coaching the High Performance Athlete A

The development of advanced technical and theoretical expertise in coaching, including conflict management, psychology of performance, effective leadership, making ethical decisions, and practice planning. The course prepares students to be “Trained” in the Competition-Developmental level of the National Coaching Certification Program (NCCP). May not be held with the former PHED 3520 or the former KIN 3520. Prerequisites: Faculty permission and 45 credit hours of university course work. The student must demonstrate a high level of proficiency as an athlete, coach or official in their sport.

PHED 3532 Coaching the High Performance Athlete B

The development of advanced technical and theoretical expertise in coaching, including prevention and recovery, leading drug free sport, developing athletic abilities, and designing a basic sport program. The course completes the fully "Trained" component of the Competition-Development level of the National Coaching Certification Program (NCCP). May not be held with the former PHED 3530 or the former KIN 3530. Prerequisites: PHED 3522 (C) or the former PHED 3520 or the former KIN 3520 (C).

PHED 3710 Active Health and Human Potential

An examination of lifestyle behaviours which can enable or constrain human wellness and potential. By integrating theory with practice, current wellness models and motivational theories will guide strategies for wellness planning personal and professional practice. Introduces students to Manitoba Curriculum Student Learning Outcomes in "Personal and Social Management", and "Healthy Lifestyle Practices", as well as curricular connections for the teaching of "active health". May not be held for credit with PHED 3440.

PHED 3732 Dance and Rhythmic Activities

Practical and theoretical aspects of designing dance and rhythmic activity experiences applicable to early through senior years physical education, to include the design, implementation, and assessment of safe and inclusive physical activities as well as planning, organizational and teaching strategies. Incorporates Manitoba Curriculum Framework of Outcomes for K to 8 dance (2011) and Grade 9-12 dance (2015). May not be held with the former PHED 2730 or the former PHED 3410. Prerequisite: PHED 2710.

PHED 3750 Lifestyles Activities

An introduction to the knowledge, skills, and attitudes that aid in the development of lifelong physically active and healthy lifestyles. May not hold for credit with KIN 3750 (REC 3750). Requires a paid facility use pass. Note: A fieldwork fee is attached to the course.

PHED 3760 Diverse Populations Mentorship

Practical and theoretical aspects of designing physical activity experiences for students from diverse population, including on site leadership opportunities in a multicultural school context. Evaluated pass/fail.

PHED 3770 Indigenous Games and Activities

This course will provide Indigenous and non-Indigenous students with a unique opportunity to explore, in theory and practice, traditional and contemporary world views related to historical, cultural, and environmental approaches to Indigenous games and activities.

SECTION 6: Physical Education Course Descriptions-4000 Level

PHED 4710 Outdoor Education

To introduce the students to the basic outdoor skills associated with summer/winter backpacking/cross-country skiing/snow shoeing trips. Students will then learn to use a variety of outdoor settings for education opportunities on a variety of topics and disciplines. May not hold for credit with KIN 4710 (REC 4710). A fieldwork fee is attached to the course.

SECTION 6: Recreation Studies Course Descriptions-2000 Level

REC 2100 Introduction to Leisure Travel

To provide an introduction to tourist behaviour and the tourism system through an overview of: why people travel; the components of tourism; the scope and organization of tourism in Canada; and the interrelationship
between recreation and tourism. May not be held with the former PERS 1300 or the former REC 1200.

**REC 2130 Introduction to Outdoor and Land-Based Recreation**  
**Cr. Hrs. 3**  
This course provides an introduction to both Indigenous and non-Indigenous perspectives on land-based education and outdoor recreation. Students examine how as individuals and groups we can build strong relationships and a robust sense of connection with others, with the land, the outdoors, and with recreation through academic and experiential explorations. Prerequisite: KPER 1400 (or the former PERS 1400 or the former REC 1400).

**REC 2150 Introduction to Therapeutic Recreation**  
**Cr. Hrs. 3**  
An examination of the current principles of therapeutic recreation in relation to their practical application to individuals in clinical settings such as nursing homes, hospitals and other long-term care facilities. May not be held with the former REC 4150. Prerequisite: KPER 1400 (or the former PERS 1400 or the former REC 1400).

**REC 2170 Introduction to Sport Management**  
**Cr. Hrs. 3**  
This course provides an introduction to sport management focusing primarily on North American sport. This course gives students an introduction to basic management functions and how they relate to sport management at the community, interscholastic, intercollegiate and professional levels. May not be held with the former REC 4170. Prerequisite: KPER 1400 (or the former PERS 1400 or the former REC 1400).

**REC 2400 Management and Marketing of Leisure Services**  
**Cr. Hrs. 3**  
9Lab required Basic management, and marketing principles and practices and their applicability to delivery of leisure services. Topics include financial resources, budgeting, people-centred management, and marketing. Prerequisite: KPER 1400 (or the former PERS 1400 or the former REC 1400).

**REC 2650 The Social Aspects of Aging**  
**Cr. Hrs. 3**  
An examination of the social aspects of aging. Emphasis on understanding the aging process as a life transition involving adaptation through interaction with social and physical environments. This is an Option in Aging course and may not be held for credit with IDES 2650 (HMEC 2650, SWRK 2650).

**SECTION 6: Recreation Studies Course Descriptions**

**3000 Level**

**REC 3090 Sustainable Nature-Based Tourism**  
**Cr. Hrs. 3**  
Analysis of the growth and development of sustain-able nature-based tourism as a global and regional phenomenon. Particular emphasis will be placed upon the fundamental principles of sustainability, natural resource and visitor management for recreation, and the role of outdoor recreation and education in Sustainable Tourism Planning and Management. Prerequisite: (KPER 1400 (or the former PERS 1400 or the former REC 1400)) and (REC 2100 (or the former PERS 1300 or the former REC 1200)). Note: A fieldwork fee is attached to the course.

**REC 3200 Advanced Program Planning and Leadership**  
**Cr. Hrs. 3**  
Consideration and application of program planning principles as they relate to specialized contexts and diverse populations. Foundations of leadership and interpersonal communication for effective and successful program implementation. May not hold for credit with REC 2540 (REC 3870). Prerequisite: PERS 2200 (PHED 3080, REC 2530) (C). Requires a paid facility use pass.

**REC 3220 Program Planning and Evaluation**  
**Cr. Hrs. 3**  
(Lab required) Consideration and application of program planning principles as they relate to specialized contexts and diverse populations. Foundations of interpersonal communication for effective and successful program implementation with emphasis on program evaluation. May not be held with the former REC 3200, the former REC 2540 or the former REC 3870. Prerequisite: KPER 2200 (or the former PERS 2200).

**REC 3310 Cultural Tourism**  
**Cr. Hrs. 3**  
This course will provide students with an understanding of various stakeholder perspectives related to visiting and operating cultural tourism attractions. The following topics will be discussed: tourists’ motivations and experiences, cultural resource managers’ perspectives on tourism, tourism industry leaders’ viewpoint on cultural resources and the relationship between cultural producers and consumers. Prerequisite: REC 2100 (or the former PERS 1300 or the former REC 1200).

**REC 3850 The Planning of Recreation Areas and Facilities**  
**Cr. Hrs. 3**  
The process used to plan both recreational open spaces and facilities. Special consideration is given to the role of the recreation professional in relationship to other planners. Prerequisite: REC 3220 or the former REC 3200.

**SECTION 6: Recreation Studies Course Descriptions**

**4000 Level**

**REC 4060 Person Centred Leisure Education**  
**Cr. Hrs. 3**  
A detailed examination of person-centred leisure education with an emphasis on both theoretical and practice models and their application to the recreation service delivery system. Prerequisites: KPER 3100 (C) (or the former PERS 3100, or the former REC 3060, or the former PHED 3390).

**REC 4070 Community Development and the Leisure Service Delivery System**  
**Cr. Hrs. 3**  
The nature of community and the unique role that leisure service organizations play in the complex process of community development. Prerequisite: PERS 2200 (REC 2530, PHED 3080) (C) and REC 2400 (C) and completion of 70 percent of the core courses in Recreation Management and Community Development.

**REC 4120 Recreational Travel and Tourism**  
**Cr. Hrs. 3**  
The purpose of this course is to provide students with a better understanding of the travel and tourism industry through an examination of its history, service systems and issues. Prerequisite: REC 2100 (or the former PERS 1300 or the former REC 1200).

**REC 4250 Leisure and Aging**  
**Cr. Hrs. 3**  
The nature of the aging process and its impact on leisure behaviour. The factors influencing leisure among older adults, policy issues, and program and service methods and implications will be examined. May not be held with the former REC 4130. Prerequisites: KPER 3100 (C) (or the former PERS 3100, or the former REC 3060, or the former PHED 3390) or REC/SWRK/HMEC 2650 (C) or permission of instructor.

**REC 4350 Parks and Protected Areas Planning and Management: Field Studies**  
**Cr. Hrs. 6**  
The course is taught in two segments, an on-campus component and field study component taking place in Banff National Park. The on-campus component examines the historical development of the concept of parks and protected areas, the role of interpretation, management and research in the parks and emerging issues in the management of parks and protected areas. In addition, during the on-campus component planning for the field will take place. The field segment will focus on a wide variety of management issues with particular attention to Banff National Park.
Emerging issues and trends will be examined and past management responses evaluated. There will be opportunities for students to investigate specific management issues of interest to them and to participate in current research being conducted in the park. Prerequisite: Written permission of the instructor required. Offered with GEOG 4350.

**REC 4400 The Administration of Special Events**  
Cr. Hrs. 3  
Students will learn about theories and concepts that inform the study of special events and will be exposed to advanced management principles and practices and their applicability to the delivery of special events. May not be held for credit with the former REC 4310. Prerequisite: REC 3220 or the former REC 3200.

**REC 4720 Wilderness Adventures**  
Cr. Hrs. 3  
Student will learn how to plan and participate in one or more wilderness adventure activities such as canoe tripping, sailing, kayaking, climbing, winter camping, etc. Students will also concentrate on conducting these activities safely with clients. It is hoped that this experience will positively affect future life sport and recreation activities. May not be held for credit with KIN 4720 or PHED 4720. A fieldwork fee is attached to the course.

*This includes two years (60 credit hours) of study in an undergraduate program.

Equivalent academic courses completed at recognized universities elsewhere will be considered. For all admission requirements see: http://law.robsonhall.ca/jd/admission-to-first-year

*The Master of Laws is a thesis-based program designed for completion in one year after the completion of a three year J.D. program. The program consists of participation in the Graduate Legal Theory Seminar, two additional courses and completion of a substantial thesis. Further details are available through the LL.M. website: http://law.robsonhall.ca/mlm/admissions. Applicants should also consult the Faculty of Graduate Studies website: umanitoba.ca/graduate_studies/.

SECTION 2: The Profession and the Faculty of Law

Juris Doctor-J.D.

Robson Hall, Faculty of Law, offers a three year J.D. program that starts with the fundamental doctrinal courses that allow students to acquire a solid foundation in law. From the foundational courses, students can move into legal specialties of their choice, or choose to pursue a J.D. concentrating on Indigenous law, business law, or human rights. Clinical legal education has been a part of the J.D. program since the early 1970s and students develop lawyering skills under faculty guidance, expanding their perspectives and ethical understanding of the role of practising lawyers. Scholarship and research is built into the J.D. program so students have an opportunity to develop a critical understanding of law and its development.

2.1 The Study of Law

Legal education in Canada is divided into two phases: the academic study of law at one of the university law schools and practical training under the auspices of a provincial law society for those who wish to be admitted to practice and called to a Bar. As there is a reciprocal recognition of university law degrees between the common law provinces (all provinces except Quebec), the academic study can be taken in any one of these provinces.

A sound education in law provides a good foundation for a great variety of careers. In the past most law graduates have entered the private practice of law to concentrate on various types of legal work including: real estate transactions, commercial contracts, company law, family law, taxation. While the tendency to specialize in the practice of law is becoming more prevalent, most lawyers continue to be general practitioners prepared to perform most types of legal work according to the needs of their clients.

Besides the private practice of law, law graduates can join the legal departments of corporations as in-house counsel, or various government agencies that maintain legal departments. Law graduates also find careers in non-profit organizations, business, “law enforcement, social work, and journalism.”

2.2 Clinical Learning

The curriculum invites critical assessment of the role of law in society as well as the development of skills relevant to the practice of law. In addition to lectures and seminars, students are given an opportunity to develop, under supervision, some of the research, writing and oral advocacy skills which will prove useful in the practise of law. In first year, students are acquainted with the various resource materials available in a law library, and they follow a program designed to develop legal research and writing techniques. In second and third years, students participate in negotiation exercises, mock trials and appeals and moot court competitions. Students may choose from a range of Clinical Courses, including clerkships with the Court of Queen’s Bench and the Court of Appeal, Internships and Externships. Throughout their legal studies students may serve actual legal clients through participation at the University Law Centre, Pro Bono Students, L. Kerry Vickar Business Law Clinic and The Legal Help Centre. This clinical training is just one element of the program at Robson Hall that contributes to the excellent reputation of our graduates.

2.3 Research and Publications

Research and scholarly writing are integral elements of the mission of the University and the law school. Professors research, write and consult with the larger legal community in their particular area of expertise and students have similar opportunities. Each year students must take a writing requirement which provides an opportunity to explore a particular area of law in depth. Students have the opportunity to work on a number of scholarly publications including: Asper Review of International Business and Trade Law, Canadian Journal of Human Rights, Manitoba Law Journal, Robson Crim and Underneath the Golden Boy.

2.4 Faculty of Law Centres of Excellence

Robson Hall is home to two named research chairs. In 1999, the Faculty of Law established the Asper Chair of International Business and Trade Law. The Asper Chair sponsors a variety of research including bi-annual academic conferences in international business and trade law. An internship program allows up to four students a year to work with the Asper Chair and creates opportunities for students to advance their education, while gaining skills necessary to pursue careers in law or business with an international focus. Additionally, students involved in the Asper program have the opportunity to participate in international commercial dispute resolution competitions.

The Marcel Desautels Chair in Private Enterprise and the Law has a mandate to conduct research and provide education on issues of specific interest to the privately held or family owned businesses. The Desautel Centre’s focus is on the needs of closely held businesses. The Faculty of Law also operates the Kerry Vickar Small Business Law Clinic which is headed by a director who is assisted by volunteer mentors from the practising bar.

2.5 Student Organizations

All law students are members of the Manitoba Law Students’ Association (MLSA), the student government. Student participation in faculty governance takes place through the representation of elected members of the MLSA. In addition to the Manitoba Law Students’ Association there exists a diversity of student groups at Robson Hall. No matter what your interests, joining a student group can greatly enhance your law school experience by providing you with greater opportunities throughout the year to interact with the community and other students. Student groups include:

- Business Law Group
- Canada Law Games
- Christian Legal Fellowship (CLF)
- Criminal Law Group
- Curling Club
- Debating Club
- Employment and Labour Club
Environment Law Group
Feminist Legal Forum
Health and Elder Law Club
Human Rights Collective
Manitoba Indigenous Law Students Association (MILSA)
Mental Health Group
Migration Law Group
MBA Mentorship Program
Outlaws
Pro Bono Students Canada (PBSC)
Robson Hall Mediators

**SECTION 3: Admission to the Faculty of Law**

**3.1 Course Requirements for Admission to J.D. Program**

Robson Hall, Faculty of Law offers three First Year Admission categories:

- Index Score (Regular) Category (50% GPA and 50% LSAT score)
- Individual Consideration Category
- Canadian Indigenous Category

The minimum academic requirement to apply is two (2) full-years of university degree level courses (equivalent to 60 credit hours). Included in the 60 credit hours should be a course to fulfill the University’s mathematics requirement. Completion of the JD program fulfills the University’s Written English requirement. For additional information about the University’s Mathematics and Written English requirements, see the ‘General Academic Regulations’ of this calendar.

All applicants must write the Law School Admission Test (LSAT).

Please visit the Robson Hall website: [http://law.robsonhall.ca/jd/admission-to-first-year](http://law.robsonhall.ca/jd/admission-to-first-year).

**SECTION 4: Academic Regulations**

All students are asked to note that some academic policies and regulations are under review and are subject to change. Please check the Web Calendar at [www.umanitoba.ca](http://www.umanitoba.ca) for updated information.

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Law has regulations and requirements, published below, that apply specifically to its students.

**4.1 Residence requirements for the Juris Doctor Degree**

To obtain the Juris Doctor (J.D.) degree from the University of Manitoba, ordinarily a student must successfully complete two of the three years of the Juris Doctor (J.D.) program at the University of Manitoba. The remaining year may be completed at another law school as approved by the Admissions Committee or the Dean’s office.

**4.2 Licence to Practise Law**

Graduates who wish to practise must apply to the Law Society of the province in which they wish to practise. Law societies generally require applicants to complete a bar admission course. The Law Society must be satisfied as to the good character and repute of its applicants, as well as their academic competence and qualifications. Inquiries with regard to the Province of Manitoba should be made to the Law Society of Manitoba.

**4.3 Regulations of the Faculty of Law**

Regulations of the Faculty of Law, as amended from time to time governing attendance, evaluation, prizes, and progression may be consulted at the Faculty’s website [www.umanitoba.ca/faculties/law](http://www.umanitoba.ca/faculties/law).

**4.4 Miscellaneous Registration Matters**

The Associate Dean’s office shall, subject to appeal to the Academic Affairs Committee, consider and determine all applications from students admitted to the faculty for permission: (i) to take part of their law studies at another university under a letter of permission with conditions; (ii) to defer their law studies for a period of one or more academic years after successfully completing first or second year, and to permit such students to re-register following such an absence with conditions; (iii) to withdraw before completing the academic year for which they are registered and to permit, in the case of a student who withdraws from first year under exceptional circumstances, that student to re-register for a subsequent academic year as a supernumerary student, and in the case of a second or third year student, to permit such student to re-register for a subsequent academic year; in all cases with or without conditions; (iv) to switch from the full-time program to the half-time program and vice versa.

**SECTION 5: Program Requirements**

**5.1 Juris Doctor Admission as of September 2018**

This section describes the program requirements that are in effect for the academic year. However, prospective students should be aware that the Faculty of Law regularly reviews its curriculum to ensure that it continues to meet the current needs of our students.

**First Year**

Each full-time student is required to take all of the following courses:

<table>

* No more than three of these electives can be selected for credit. Note: A student is permitted to take only one moot for credit in each of second and third year. Students may take more than three of these electives but no credit will be awarded over the limit.

**Third Year**

You may only take one of: Clinical Administrative Law, Advanced Advocacy, Intensive Criminal Law, Legal Help Centre Clinical or Clinical Family. If you take Art of the Deal you may take Clinical Administrative Law, Advanced Advocacy, Intensive Criminal Law Legal Help Centre Clinical or Clinical Family. You may not take any other clinical course if you are taking Clinical Criminal Law.

**SECTION 6: Registration**

All students will need to register themselves through Aurora. Please check the Faculty of Law website for detailed information.

**SECTION 7: Law Course Descriptions-1000 Level**

**LAW 1102 Contracts**

This course covers the basic principles of contract law, including how a contract is formed; what is an offer; what constitutes acceptance; whether all promises are enforceable as a contract; when parties should be allowed to avoid obligations; what happens if one party misrepresents the quality of subject matter of the contract; what happens when a party makes a mistake about what they buy or sell; what should happen if one party takes advantage of another for a better deal for themselves. May not be held with LAW 1100.

**LAW 1140 Criminal Law and Procedure**

A general introduction to criminal law and procedure dealing with principles of criminal liability, common defenses to criminal charges, selected specific offences, and the basic procedures to be followed in the administration of criminal justice in Canada.

**LAW 1460 Constitutional Law**

An examination of the legal problems arising from the nature of the Canadian political structure and, in particular, the distribution of legislative powers between the federal parliament and the provincial legislatures and an introduction to the impact of the Canadian Charter of Rights and Freedoms.

**LAW 1480 Torts and Compensation Systems**

A general introduction to the law of torts and other compensation systems such as the Workers’ Compensation and Criminal Injuries Compensation schemes.

**LAW 1500 Property**

A general introduction to the principles of property with special emphasis on the principles of real property, their historical development and modern application.

**LAW 1530 Legal System**

An introduction to the study of law including initial analysis of various aspects of legal history, the structure of the legal system, legal reasoning, statutory interpretation, dispute resolution and the role of the judiciary.

**LAW 1540 Legal Methods**

An introduction to legal research and writing skills and oral advocacy. Grading: Pass/Fail

**SECTION 7: Law Course Descriptions-2000 Level**

**LAW 2400 Wills and Succession**

The law of testate and intestate succession, Part IV of The Marital Property Act, and The Dependents’ Relief Act.

**LAW 2490 Trusts**

The nature and functions of modern inter vivos and testamentary trusts. The creation of express, private trusts, charitable trusts, resulting trusts, and constructive trusts. The administration of trusts, and real and personal remedies of beneficiaries under trusts.

**LAW 2600 Evidence**

A study of the rules relating to the admissibility and weight of evidence in judicial proceedings.

**LAW 2602 Evidence**

A study of the rules relating to the admissibility and weight of evidence in judicial proceedings. May not be held with LAW 2600.
SECTION 7: Law Course Descriptions-3000 Level

LAW 3012 International Business Law  Cr. Hrs. 3
An exploration of the legal, practical and social realities of international business transactions.

LAW 3014 International Trade Law  Cr. Hrs. 3
The course will deal with the doctrine, practice and policy issues in international trade and business.

LAW 3019 Corporations II  Cr. Hrs. 3
An advanced study of corporations law from various theoretical and practical perspectives.

LAW 3018 Human Rights Law  Cr. Hrs. 3
Critical and constructive study, at an advanced level, of a significant major subject or set of topics in Human Rights Law.

LAW 3020 Clinical Administrative Law  Cr. Hrs. 3
The primary purpose of this course is to train students in lawyering skills. Students will be required to engage in classroom work and participate in simulated exercises. Emphasis will be given to the difference between board and court advocacy.

LAW 3022 Insurance Law  Cr. Hrs. 3
Introduction to the basic principles of insurance law. The fundamental elements to most types of policies will be examined with particular emphasis on property and liability insurance. The terms and provisions specific insurance policies and coverages such as automobile, property, liability policies will also be covered.

LAW 3024 The Legal Profession and Professional Responsibility  Cr. Hrs. 3
A general introduction to the problems of professional responsibility and the ethics of lawyers individually, as well as the legal profession collectively. Topics dealt with will include ethical problems of the lawyer in the role of the advocate and in the role of counsellor (confidentiality, conflict of interest, etc.); professional responsibility in the delivery of legal service (competency, fee determination, specialization, regulation etc) and the legal profession and the public interest (governance of profession, discipline, professional liability etc) These problems are to be studied by the critical examination of case law, codes, canons, and other published materials, by classroom discussion and debate on problems; and by workshops and panels which involve practising lawyers.

LAW 3026 Trademarks and Patents  Cr. Hrs. 3
An in-depth examination of the law of Trade-marks and Patents, including underlying policy objectives.

LAW 3028 Copyright Law  Cr. Hrs. 3
An in-depth examination of the law of Copyright.

LAW 3030 Research Paper B  Cr. Hrs. 3
Details in each case to be worked out with the Associate Dean. 10,000 words for 3 credit hours. May not be held with LAW 3490.

LAW 3032 Court of Queen's Bench Clerkship  Cr. Hrs. 3
Students will be expected to provide research assistance to the Justices, and students will be asked to provide written memoranda and other research to help the Justices prepare for trial or application hearings. Discussions of legal issues may follow from the work that students do. May not be held with LAW 3250 when titled "Court of Queen's Bench Clerkship" Grading: Pass/Fail.

LAW 3034 Court of Appeal Clerkship  Cr. Hrs. 3
Students will be expected to provide research assistance to the Justices, and students will be asked to provide written memoranda to help the Justices prepare for hearings. Discussions of legal issues may follow from the other work that students do. Grading is on a Pass/Fail basis.

LAW 3050 Commercial Law  Cr. Hrs. 3
A study of secured transactions and negotiable instruments.

LAW 3070 Gender and the Law  Cr. Hrs. 3
An exploration of ideas about gender differentiation in law, the legal system, legal education and the legal profession. It will offer an introduction to the feminist critique of law and feminist theories about sexual equality and discrimination.

LAW 3090 Children and the Law  Cr. Hrs. 3
Relationships between child, family, state and law are examined within an interdisciplinary context, focusing on such issues as rights theories and the public/private distinction; regulation of young offenders, child protection and state intervention; and child victims in the courts.

LAW 3120 Philanthropy and the Law  Cr. Hrs. 3
This course investigates the origins of, and regulation of, charities and charity law as well as regulation of other non-profit entities. Typical topics considered in this course include the social, economic and cultural importance of an ethic of giving, the tax benefits attendant upon charitable status, dimensions of fund-raising, public and private foundations and terrorism and international charities.

**LAW 3132 Clinical Family**  
**Cr. Hrs. 3**

This course will serve as a bridge between the introductory family law course and the Advanced Family Law course, enabling students to develop a deeper understanding of the issues in this area of the law and to be better prepared to assimilate the necessary skills to be successful in this high demand area of practice. May not be held with LAW 3250 when titled Clinical Family. Registration restricted to students in Year 3. Prerequisite LAW 2640. Grading: Pass/Fail.

**LAW 3170 Dispute Resolution**  
**Cr. Hrs. 3**

This course offers a detailed exploration of the theory and practice of dispute resolution focusing on the various approaches, private and court-connected, currently used to resolve conflict. In critically examining selected alternative dispute resolution mechanisms, the course exposes students to issues such as rights-based and interest-based dispute resolution, power, gender and culture in ADR processes and the functions, and skills required of, third party interveners. May not be held with the former LAW 3160 or LAW 3162.

**LAW 3210 Competitions A**  
**Cr. Hrs. 2**

Credit for selected students who satisfactorily participate in those academic competitions approved by Faculty Council. Grading: Pass/Fail.

**LAW 3212 Immigration Law**  
**Cr. Hrs. 3**

The refugee definition; the need for refugee protection; procedural protection for refugee claimants; a comparative study of refugee determination systems; the legality of a refugee sanctuary movement; the legal status of refugee claimants in Canada; refugee and immigrant detention; the relevance of Charter guarantees to refugees and immigrants; visa requirements and airline fines; the international system of refugee protection; racist intention and effect in immigration and refugee law; material misrepresentation as a ground of exclusion; medical inadmissibility; equivalence of Canadian and foreign criminal offenses for purposes of exclusion; the relevance of foreign laws in determining family composition of sponsored immigrants. May not be held with LAW 3200.

**LAW 3220 Competitions B**  
**Cr. Hrs. 3**

Credit for selected students who satisfactorily participate in those academic competitions approved by Faculty Council. Grading: Pass/Fail.

**LAW 3230 Aboriginal Peoples and Land Claims**  
**Cr. Hrs. 3**

The course shall provide an overview of land claims and treaty land entitlement policies in Canada and their impact upon land claims by Aboriginal communities.

**LAW 3250 Current Legal Problems D**  
**Cr. Hrs. 3**

Critical and constructive study, at an advanced level, of a significant major subject or set of topics. Grading: Pass/Fail.

**LAW 3302 Clinical Criminal Law**  
**Cr. Hrs. 6**

The primary purpose of this offering is to train students in lawyering skills in the criminal law area. To this end, instruction is given on an intensive basis in small groups. Students may be required to engage in classroom work to participate in various forms of simulation exercises and to conduct actual client based cases under the supervision of the instructor. Particular emphasis will be given to questions of professional responsibility and ethics. Registration restricted to students in Year 3. May not be held with LAW 3300. Prerequisites: (LAW 2602 or LAW 2600) and LAW 3590. Corequisite: LAW 3532 or LAW 3340. Grading: Pass/Fail.

**LAW 3310 Aboriginal Peoples and the Law**  
**Cr. Hrs. 3**

A study of the laws relating to Aboriginal Peoples in North America from the colonial period to the present. Special emphasis will be given to aboriginal rights, hunting and fishing rights, the legal aspects of Indian Treaties and the Indian Act. A more general treatment will be given to a study of Aboriginal Peoples’ relationship to civil and criminal law in modern Canadian society.

**LAW 3330 Employment Law**  
**Cr. Hrs. 3**

A detailed study of employment law including employment principles, constructive and wrongful dismissal, just cause, human rights and remedies.

**LAW 3340 Advanced Advocacy**  
**Cr. Hrs. 3**

Advanced topics in trial presentation, procedure and evidence with concentration on jury trials.

**LAW 3360 Advanced Legal Research**  
**Cr. Hrs. 3**

This course will provide students with the wherewithal to conduct legal research across a number of jurisdictions using both print and digital formats. Students are evaluated on a number of research exercises, a midterm examination, a major research pathfinder and a presentation of research results.

**LAW 3370 The Legislative Process**  
**Cr. Hrs. 3**

A study of how statutes and regulations are made in the Province of Manitoba, and how lawyers can effectively represent their clients in the context of lawmakers by politicians, civil servants and regulators.

**LAW 3380 Issues in Law and Bio Ethics**  
**Cr. Hrs. 3**

The course deals with the legal aspects of prevention, creation, alteration, maintenance and termination of life through medical and other scientific means.

**LAW 3392 Securities Law**  
**Cr. Hrs. 3**

A study of the basic concepts and application of the securities regulatory system in Canada. May not be held with LAW 3390.

**LAW 3394 Internet and E-Commerce Law**  
**Cr. Hrs. 3**

This is a perspectives course. It will cover legislation, case law and practical drafting techniques in many areas in order to better equip students in the practice of law, and at the same time invite students to reflect upon the political and social issues that arise as "cyberlaw" develops. Subject matter of the course: The legislation, court decisions, policy debates and practical drafting and litigation techniques connected with the internet and e-commerce. A variety of issues will be covered, including: freedom of expression issues, jurisdiction, internet speech regulation; online privacy issues; intellectual property issues, including domain names and downloading of copyright material; internet commerce issues, such as the law of contracts pertaining to online contracting. May not be held with LAW 3980 when titled “Internet and Ecommerce Law”.

**LAW 3410 Canadian Legal History**  
**Cr. Hrs. 3**

The historical background of the Canadian legal system.

**LAW 3450 Remedies**  
**Cr. Hrs. 3**

A study of the law relating to damages, specific performance, injunctions, and other equitable remedies.

**LAW 3510 Corporate Taxation**  
**Cr. Hrs. 3**
A study of federal tax laws as they affect corporation income, as well as a discussion of the effects of income tax laws on corporate and other commercial planning.

**LAW 3520 Taxation of Trusts and Estates**  
Cr. Hrs. 3  
A study of taxation principles as they relate to partnership and trust income and estate planning.

**LAW 3530 Administrative Law**  
Cr. Hrs. 3  
An introduction to administrative law generally, with concentration on the judicial review of the exercise of statutory authority by administrative entities.

**LAW 3532 Intensive Criminal Law**  
Cr. Hrs. 3  
This course follows the general introduction to the complexities and principles of criminal law presented in earlier courses on criminal law and evidence. It emphasizes the ways in which these complexities and principles play out in practice and has a strong practical component. It is well-suited for students considering working in the field of criminal law. The first half of the course will address the demands placed on prosecutors and defence counsel at various points of a prosecution, including, inter alia, application for judicial interim release, the preparation of pre-trial motions, direct and cross-examination, and sentencing. These demands are not only statutory, but also logistical, tactical and ethical. The second half of the course will look at these demands in the context of certain “special” criminal law contexts, including, inter alia, impaired driving, young offenders, domestic violence, and drug prosecutions. Registration restricted to students in Year 3. May not be held with LAW 3250 when titled “Intensive Criminal Law”. Grading: Pass/Fail.

**LAW 3590 Charter Issues in Criminal Law**  
Cr. Hrs. 3  
The rules of Criminal Procedure and principles underlying and unifying such rules with a particular emphasis on the effect of the Charter of Rights and Freedoms on those rules.

**LAW 3600 Environmental Law**  
Cr. Hrs. 3  
The balance between technical development and the life-support capacity of the environment. The acquisition and nature of private rights in natural resources and their control by legislation and common law. Remedies for environmental degradation. Constitutional and international legal issues.

**LAW 3620 Comparative Law**  
Cr. Hrs. 3  
An introduction to civil law; a brief historical survey, codification, judicial philosophy, detailed study of selected comparative law topics in tort and contract with special reference to the Civil Code of the Province of Quebec. An introduction to Soviet law, detailed study of selected topics in Soviet law.

**LAW 3674 Advanced Public Law**  
Cr. Hrs. 3  
This course provides students with a fuller appreciation and knowledge of several topics of interest and importance for Canadian public law, including the changing boundaries of public law in our “shrinking” state, the scope and meaning of judicial, administrative and bureaucratic independence, the role of international human rights norms in Canadian constitutional and administrative law, the intersection between the Canadian Charter of Rights and Freedoms and administrative law and the role of guidelines, policies and other "soft law" in public administration. Although focused on Canadian public law, the course may include a comparative component and draw from the public law experience of other jurisdictions. May not be held with LAW 3980 when titled "Advanced Public Law". Prerequisite: LAW 3530.

**LAW 3690 Real Estate Transactions**  
Cr. Hrs. 3  
The law relating to vendors and purchasers of land and to mortgages and other security on land.

**LAW 3740 Public International Law**  
Cr. Hrs. 3  
Public international law has a complex history, one that lends itself to conflicting interpretations. It has also been the object of a variety of competing theoretical projects, most of which diverge radically on questions of form and substance. This course provides a historically and theoretically reinforced introduction to the basic rules, principles, and institutions of public international law.

**LAW 3770 Labour-Management Relations**  
Cr. Hrs. 3  
A survey of the development of trade unions; their present status under both federal and provincial legislation regarding the right of association, collective bargaining, and the settlement of disputes.

**LAW 3824 Scholarly Publications**  
Cr. Hrs. 3  
The course will provide students with hands-on experience in working with scholarly writing. Students will develop their evaluation and critical analysis skills through the process of editing for publication all submissions to the Journal. May not be held with the former LAW 3820 or the former LAW 3822. Grading: Pass/Fail.

**LAW 3826 Advanced Scholarly Publications**  
Cr. Hrs. 3  
The course will provide students with hands-on experience in working with scholarly writing. Students will develop their evaluation and critical analysis skills through the process of completing full substantive and copy edits on two or three articles during the course of the year. Working as Senior Editors students will develop their interpersonal skills by communicating with authors and by supervising and managing the work of Junior Editors. May not be held with LAW 3250 when titled “Advanced Scholarly Publications”. Grading: Pass/Fail.

**LAW 3828 Preventing Wrongful Convictions**  
Cr. Hrs. 3  
This course examines the causes of wrongful convictions, how to avoid them, detection mechanisms and remedies that should be provided under international instruments when a miscarriage of justice has occurred. The course starts by examining the environmental factors that nurture a miscarriage of justice, including the adversarial system of criminal justice. It then examines the role of the various players in the criminal justice system, and how each can inadvertently feed into a wrongful conviction - individually, or in combination with other factors. May not be held with LAW 3980 when titled “Preventing Wrongful Convictions”.

**LAW 3832 Legal Aid Clinic**  
Cr. Hrs. 3  
Students who are selected to act as student supervisors at the University Law Centre during the summer and who continue to actively serve the University Law Centre during their third year may, by successfully completing a written assignment approved by a faculty supervisor, opt for the Legal Aid Clinic. May not be held with LAW 3830. Grading: Pass/Fail.

**LAW 3852 Private International Law**  
Cr. Hrs. 3  
It has to do with choosing what place to sue, what law applies when the law of more than one place might apply, and with the enforceability of judgments through foreign courts. May not be held with LAW 3850.

**LAW 3862 Business Transactions: The Art of the Deal**  
Cr. Hrs. 6  
A study, involving practical exercises of certain aspects of solicitors' work, including interviewing, negotiating, counseling and memo writing.

**LAW 3880 Municipal and Planning Law**  
Cr. Hrs. 3  
A general course in municipal law, including important aspects of land-use control and planning law. Although the course deals generally with the nature, structure, functions, and powers of the various units comprising the
local level of government, the focus is primarily on municipal corporations. Topics covered include assessment and taxation, land-use planning and control, tort liability, judicial review of bylaws, qualification and accountability of councillors, and the law relating to expropriation, as well as some discussion of contemporary urban problems.

LAW 3940 Canadian Charter of Rights and Freedoms  Cr. Hrs. 3
An in-depth study of the legal, philosophical and historical foundations of the Canadian Charter of Rights and Freedoms. Included is a study of both the American and European experience with Charters of Rights as well as Canadian case law.

LAW 3980 Current Legal Problems B  Cr. Hrs. 3
Critical and constructive study, at an advanced level, of a significant major subject or set of topics.

LAW 3990 Externship  Cr. Hrs. 12
The primary purpose of the Externship is to allow students an opportunity to work in a legal context where they gain professional knowledge and skills related to law, the legal profession and legal practice. Particular emphasis will be given to questions of professional responsibility and ethics. Within the workplace, students will be required to participate in various forms of exercises and to conduct work within an actual work setting where they face real day-to-day work situations under the supervision of practicing lawyers. Depending on the nature of the placement, they may be required to engage in classroom work. Registration restricted to students in Year 3. Grading: Pass/Fail.

NOTE: Students admitted to the Asper School of Business prior to September 2011 should refer to the Academic Calendar for the year in which they were admitted for a description of their program requirements.

1.2 Available Majors and Option

The following Majors may be used to complete the Bachelor of Commerce (Honours) program:

- Aboriginal Business Studies
- Accounting
- Actuarial Mathematics
- Entrepreneurship/Small Business
- Finance
- Generalist
- Human Resources Management/Industrial Relations
- International Business
- Leadership and Organizations
- Logistics and Supply Chain Management
A detailed explanation of the requirements for each major may be found in Section 4.2.

The Co-operative Education Option is the only option that may be used to complete the Bachelor of Commerce (Honours) program. Complete details on the requirements for the Co-operative Education Option are found in Section 4.3.

1.3 Accreditation

In 2009, the Asper School of Business received re-accreditation from AACSB International - The Association to Advance Collegiate Schools of Business.

In 2009, the Asper School of Business received accreditation from the SOA - Society of Actuaries.

These prestigious recognitions affirm the faculty’s commitment to the continuous improvement of its courses and programs. The mission of the Asper School of Business is to provide management education in Manitoba by creating and disseminating leading edge knowledge and developing skills relevant to current and future managers in organizations operating in a global environment.

SECTION 2: Admission Requirements

2.1 Admission Requirements from High School and Previous Post-Secondary Institutions

The following is a summary of the admission requirements for the Bachelor of Commerce (Honours.). Equivalent courses completed at other universities will be considered for admission and transfer credit only if the courses have been taken within the last 10 years. All admission requirements, as well as application deadline dates and forms, are included in the Applicant Information Bulletin that is available from the Admissions Office, 424 University Centre. This information is also posted on the University of Manitoba’s website.

Direct Entry from High School

To be eligible to apply high school students must have:

1. Manitoba high school graduation, with five full credits at the Grade 12 level, in courses designated S (Specialized), G (General), or U (Dual Credit - University), with

2. A minimum 85% average over three courses: Pre-Calculus Math 40S or Applied Math 40S (Recommended Pre-Calculus 40S), English 40S, and one other 40S/U course; and

3. A minimum 60% in each of the three courses noted in point 2 above, and

4. Applicants may require a higher average than stipulated in point 2 to be successful in the annual competition for admission.

See Applicant Bulletin for complete details.

Track 1 Transfer Students

The following is a summary of the admission requirements for the Bachelor of Commerce (Honours.) for Track 1 transfer students. Equivalent courses completed at other universities will be considered for admission and transfer credit only if the courses have been taken within the last 10 years.

Requirements (for Track 1 Transfer students)

- [ECON 1010 (3) and ECON 1020 (3)] (6)
- 6 credit hours from: Anthropology, History, Mathematics, Philosophy, Political Studies, Psychology, or Sociology (6)*
- Mathematics MATH 1520 or MATH 1500 (3)
- Statistics STAT 1000 (3)
- A 3 credit hour Written English (“W”) course from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline) (3)
- 3 credit hours of electives (3)**

Minimum 24 credit hours completed by April 30. Although 24 credit hours is the minimum requirement for admission, a full year course load would require 30 credit hours; therefore, students only taking 24 credit hours for admission will need to pick up an extra 6 credit hours of course work once in the Asper School of Business.

An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business.

If students want to complete 30 credit hours in Year 1, students are recommended to take 6 credit hours from this suggested list of recommended courses: GMGT 1010 plus one of GMGT 2060, GMGT 2070 or MKT 2210.

* Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.

**Critical Thinking (Philosophy) PHIL 1290 is a preferred elective choice**

Students must achieve a minimum grade of “C” on each course listed above. Admission in this category is competitive.

See Applicant Bulletin for complete details.

Track 2 Transfer Students

Applicants who are missing one or more of the Track 1/Foundation course requirements may apply under Track 2 provided they have met the following criteria: completed a minimum of 24 credit hours; achieved a minimum admission GPA of 3.1; and achieved a minimum grade of “C” on each course comprising the 24 credit hours. Track 2 applicants are encouraged to complete all outstanding Track 1/Foundation required courses during their first year after admission to the Asper School of Business.

Minimum 24 credit hours completed by April 30. Although 24 credit hours is the minimum requirement for admission, a full year course load would require 30 credit hours; therefore, students only taking 24 credit hours for admission will need to pick up an extra 6 credit hours of course work once in the Asper School of Business.

*Students must achieve a minimum grade of “C” on each course listed above. Admission in this category is competitive.

See Applicant Bulletin for complete details.

Priority for Admission

All admission requirements, as well as application deadline dates and forms, are included in the Applicant Information Bulletin that is available from the Admissions Office, 424 University Centre. This information is also posted on the University of Manitoba’s website.
Admission to the Asper School of Business is limited to an annual quota. The quota will be filled by selecting students from a rank-ordered list of applicants in the following order:

For September 2014:

First Priority – Direct Entry from High School applicants.

Second Priority - Track 1 applicants with an AGPA of 2.60 or greater in descending order of AGPA. Thirty spaces are reserved for the Track 2 applicants with an AGPA of 3.10 or higher in descending order of AGPA.

Third Priority - Track 2 applicants (who are not already admitted under the Second Priority) with an AGPA of 3.10 or greater in descending order of AGPA.

Fourth Priority - Track 1 applicants with an AGPA of 2.00 - 2.59 in descending order of AGPA.

Both Track 1 applicants and Track 2 applicants may require an AGPA well in excess of the minimum to be successful in the annual competition for admission.

Other requirements

High school prerequisite: Grade 12 Pre-Calculus Mathematics 40S (or equivalent, with a minimum 60 %)

The Written English and Mathematics requirements are satisfied by Track 1/Foundation courses.

Minimum AGPA for consideration: 2.0 for Track 1 applicants; 3.1 for Track 2 applicants.

Admission to the Asper School of Business is limited to an annual quota and is competitive.

The Bachelor of Commerce (Honours) program does not have a Mature Student Category for admission.

All students seeking admission to the Bachelor of Commerce (Honours) program must first complete either the Direct Entry, Track 1 or Track 2 requirements.

All students planning to enter the Bachelor of Commerce (Honours) program must obtain a minimum of 60 per cent in Grade 12 Pre-Calculus Mathematics 40S (or equivalent) in order to complete all degree requirements.

The Bachelor of Commerce also has a Special Consideration.

The Bachelor of Commerce also have Special Consideration and Canadian Indigenous Ancestry categories of admission. See Applicant Bulletin for complete details.

Advance Standing: Transfer and Second Degree Students

Students who do not meet the eligibility requirements for admission after their first year of University can spend another year (or more) in another faculty, complete the eligibility requirements, and then apply (or re-apply) for admission. Students who complete additional course credits beyond the Track 1/Foundation or Track 2 requirements are eligible to receive applicable advance standing upon admission to the Asper School of Business.

The following regulations apply to students who must (or choose to) take more than one year to qualify for admission to the Asper School of Business.

All transfer and second degree students will be required to:

Meet the admission requirements of Track 1 or Track 2 in the year of application.

Complete all 120 credit hours required in the Bachelor of Commerce (Honours) program, including the 24 credit hours that comprise the specific Track 1/Foundation course requirements, the Core requirements, the course requirements for one Major, Business Options, and Elective courses. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. After admission to the Asper School, students in Track 2 must complete all outstanding courses listed in the Track 1/Foundation course requirements and achieve a minimum grade of “C” in each course.

Students who are admitted to the Asper School of Business who have completed more than the minimum 24 credit hours requirement of Track 1/Foundation course or Track 2 may be eligible to receive transfer credit for the additional work completed, provided the additional course work is creditable toward the degree requirements of the Bachelor of Commerce (Honours).

Students who are admitted to the Asper School of Business following the completion of another degree program are eligible to receive a maximum of 60 hours of transfer credit for applicable courses completed as part of their first degree. Students who, within their first degree, have more than 60 hours of transferable credits would be required to take substitute courses for credits in excess of the 60 hour limit on transfer.

Students who have a degree and in addition have completed further courses at the University of Manitoba which are applicable to the B. Comm.(Hons.) program that were not used for credit toward their first degree may receive additional transfer credit for that work.

Equivalent courses completed at other universities will be considered for admission and transfer credit only if the courses have been taken within the last 10 years.

Students are encouraged to contact a Undergraduate Program Advisor in the Undergraduate Program Office for information on how to optimize their transfer credit and advance standing.

See Applicant Bulletin for detailed information on admission requirements.

2.2 Admission Requirements from Joint Programs with Manitoba Colleges

The Asper School of Business has established Joint Programs with Red River College, Assiniboine Community College, University College of the North, and école technique et professionnelle. Graduates of the Business Administration Diploma (University Stream) from these four colleges are eligible to apply directly to the Asper School of Business.

Successful applicants will receive block transfer credit for their courses completed in the Business Administration Diploma and are required to complete specified courses at the University of Manitoba in order to receive the Bachelor of Commerce (Honours) degree. Requirements for the Joint Programs are listed in Section 4.

Admission to each Joint Program is limited to an annual quota and is competitive. Students must achieve a minimum grade point average of 3.00 on their Business Administration Diploma (University Stream) to be eligible for admission. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Applicants are ranked in descending order of their grade point average and are admitted until the annual quota is met.
See Applicant Bulletin for detailed information on admission requirements.

SECTION 3: Academic Regulations

All students are asked to note that some academic policies and regulations are under review and are subject to change. Please check the Undergraduate Program Office for updated information.

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Asper School of Business has regulations and requirements, published below, which apply specifically to its students and to non-business students taking business courses.

3.1 Changes in Program Requirements

Once students are admitted to the Asper School and have successfully completed any portion of the program, they will not be required to meet new course requirements subsequently stipulated for that portion of the program, whether the requirements be for the faculty or for an individual major.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

3.2 Evening Program

The Asper School of Business does not offer an evening program. Although a limited number of business courses may be offered in evening time slots during both the Regular and Summer Sessions, it is not possible to complete all the course requirements of the Bachelor of Commerce (Honours) program without recourse to daytime attendance.

3.3 Management Minor for Non-Business Students

The Management Minor consists of any 18 hours of credit in courses offered by the Asper School of Business. Entrance requirements and enrolment limits vary with a student's faculty of registration. Students planning to enrol in this minor should consult a student advisor in your home faculty.

3.4 Student Responsibility

The Bachelor of Commerce (Honours) program undergoes changes from time to time. As a result, some changes in program structure, content and regulations may be made for the current and upcoming academic year. Specific program information for the regular program, the co-operative education program option, Joint Programs, and 2+2 Programs may be obtained from the Undergraduate Program Office.

Student's Responsibility

It is the responsibility of all students to ensure that they follow the program of study as outlined in their chosen Major and that they meet all the requirements as specified by the University of Manitoba and the Asper School of Business.

When you are registering for courses, it is your responsibility to ensure that you have satisfied all prerequisite and concurrent course requirements.

It is your responsibility to ensure you have registered for the correct courses to satisfy the requirements of the Bachelor of Commerce (Honours) degree.

Read course descriptions carefully to make sure you are not registered for a course that “May Not Be Held With” a course you have already taken. You will not be allowed to apply both courses toward your degree requirements.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

3.5 Prerequisite Requirements

Prerequisite requirements must be met for entry into and continuance in the faculty.

Students must also meet all individual course prerequisites for further study in the program.

A passing grade is acceptable for prerequisite purposes for courses offered by the Asper School of Business unless a higher grade is called for in the course description.

3.6 Degree GPA Requirement for Graduation

Students Admitted in 2011 and Thereafter

Students admitted to the Asper School of Business in 2011 and thereafter must achieve a minimum degree GPA of 2.00 on all 120 credit hours required in the Bachelor of Commerce (Honours) degree program. Students must also achieve a passing grade of “D” or better in each course except for the individual courses required in the Track 1/Foundation course requirements that require a grade of “C” or better in each course.

All Track 1/Foundation courses, Core courses, Major courses, Business Options, and Electives applicable to the Bachelor of Commerce (Honours) degree requirements, as well as the grades achieved in each course, are transferred into the Asper School of Business and are included in the degree GPA. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

3.7 Calculation of the Cumulative GPA

The computation of the cumulative GPA is the same as that described in the chapter, General Academic Regulations and Requirements.

3.8 Residency Requirement

All Business students must complete a minimum of 60 credit hours at the University of Manitoba in order to satisfy the residence requirement of the Bachelor of Commerce (Honours) degree.

Students participating in approved International Exchange Programs may be exempt from the 60 credit hour requirement. Please consult with the Undergraduate Program Office for more details.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

Students considering completing course work at another university are referred to the chapter, General Academic Regulations and Policy, and the section on Letter of Permission.

3.9 Time Limit for Completion of the Degree

The maximum period of eight years for completion of degree requirements will be reduced by one year for each block of 15 credit hours of advance standing received at the point of admission. This time limit applies to all students, whether full-time or part-time.
The maximum period for completion of degree requirements for students enrolled in the co-operative education option is currently under faculty review.

A student who does not complete all degree requirements within the time limit permitted will be required to withdraw from the faculty. Students may appeal to the Undergraduate Program Committee for a one year time extension; all appeals must be accompanied by a detailed letter explaining the student’s circumstances and appropriate supporting documentation.

3.10 Probation Regulations

Maximum Number of Failures

Each student in the Asper School of Business is permitted a maximum of 15 credit hours of failures. If a student has more than 15 credit hours of failed courses and a degree grade point average (DGPA) of 2.00 or higher, the student will be placed on Probation and have a formal academic assessment of “On Probation” automatically placed on their academic record. Such students will be subject to the course load and performance requirements of the Probation Program.

Details and procedures concerning the Probation Program are available from the Undergraduate Program Office or see Academic Matters on the Asper School of Business website.

Probation Program

Students in academic jeopardy should carefully monitor each term’s academic results. Students placed on Probation, will immediately be placed on “hold” in the Asper School of Business and have a formal academic assessment of “On Probation” added to their transcript.

Students who have been placed on Probation must process all registration through an Asper Program Advisor and will only be reinstated to regular student status in the Asper School of Business if all the specific conditions of the Probation Program have been met, including having met a minimum DGPA of 2.00.

If a student successfully completes the Probation Program, their student status is automatically reinstated to regular student status.

A student who fails the first Probation Program is permitted to enter a second Probation Program.

A student who successfully completes the Probation Program and who later fails an additional course in a subsequent term will immediately be placed on Probation again and be permitted another opportunity to enter the Probation Program.

Students are permitted a maximum of 2 consecutive attempts in the Probation Program. If a student fails the second consecutive Probation Program, the student will automatically have an academic assessment of “Required to Withdraw from Faculty” (WF) placed on their academic record. (See section 3.13 Required to Withdraw from Bachelor of Commerce (Honours) Program.)

Details and procedures concerning the Probation Program are available from the Undergraduate Program Office or see Academic Matters on the Asper School of Business website.

3.11 Repeating, Substituting and Extra Courses

Required Courses

A student who withdraws from a Core course or who wants to repeat a Core course because of a passing or failing grade, should, if possible, repeat that course during the following Fall or Winter Term. The student will be subject to Limited Access as per the University’s Voluntary Withdrawal and Repeat Course Policies (see General Academic Regulations and Requirements). If a student repeats a course for which a grade was recorded, only the highest of the grades achieved will be included in the computation of the degree GPA.

Students may not substitute another course for a Core course.

Major Courses

Students who achieve a grade of “F” in a Major course must either repeat that course or substitute another Major course if the Major requirements permit an alternate choice. Upon completion of the Major course, only the highest of the grades achieved will be included in the computation of the degree GPA. When a course is to be substituted, the student must seek the approval of the Undergraduate Program Office in writing, prior to enrolling in the new course; failure to do so may result in a denial of the course substitution.

Electives and Business Options

Students who achieve a grade of “F” in an Elective or Option may either repeat that course or substitute another approved course in its place. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other Faculties and Schools, excluding the Asper School of Business. Upon completion of the course, only the highest of the grades achieved will be included in the computation of the degree GPA.

When a course is substituted for a failed Elective or Option, a student must request approval from the Undergraduate Program Office in writing prior to enrolling in the new course; failure to do so may result in a denial of the course substitution.

Students who want to supplement their Majors may take up to 12 hours of their Business Options from that area.

Voluntary Withdrawals and Voluntary Repeats

If a student voluntarily withdraws from a course and wants to enrol in the course in another term or if a student wants to voluntarily repeat any course in which a passing grade has been achieved (for example, in order to improve their degree GPA, or to meet a prerequisite requirement) they will be subject to all published University or Faculty registration restrictions (for example, students repeating courses will be subject to Limited Access as per the University's Voluntary Withdrawal and Repeat Course Policies; see General Academic Regulations and Requirements). After completion of a voluntary course repeat only the highest of the grades achieved will be included in the computation of the degree GPA. When a student wishes to voluntarily repeat a course, the student should seek written approval of the Undergraduate Program Office.

Extra or Substitute Courses

Students who would like to take courses extra to their degree are permitted, however students should seek approval of the Undergraduate Program Office prior to registration. When a course is extra to the degree but a student would like to substitute the course for another already in the degree, the student should seek written approval of the Undergraduate Program Office, prior to enrolling in the new course; failure to do so may result in a denial of the course substitution.

3.12 Completing Two Majors (Second Major)

Students Wishing to Complete Two Majors
Note the following Asper School of Business policy: “Students will not be given any registration priority for a second major”. The Asper School of Business cannot guarantee that you will obtain space in the courses you would like for a second major.

Students who have completed all the requirements or who have all the courses in registration for a major are not permitted to formally declare a different major unless there is space in the courses needed to complete the different major. Students are not permitted to declare a different major in order to obtain space in full courses.

3.13 Required to Withdraw (WF) from the Bachelor of Commerce (Honours) Program

All students admitted in September 2015 and thereafter, in the I. H. Asper School of Business will have a formal academic assessment once they have completed 24 or more credit hours of coursework. After that point a student will have a formal academic assessment at the end of every Fall, Winter and Summer term.

At any point of formal academic assessment, if a student i) has a degree grade point average (DGPA) of less than 2.00 or ii) fails a second consecutive Probation Program, they will be required to withdraw from the Asper School of Business. A student in this situation will automatically have an academic assessment of “Required to Withdraw from Faculty” (WF) placed on their academic record.

Such a student will cease to be a student in the Asper School of Business but may apply for admission to another Faculty according to the rules of that unit. If such a student desires to gain entry back to the Asper School of Business, they must re-apply for admission and will have to meet the requirements for admission at the time of the new application.

3.14 Withdrawal from Bachelor of Commerce (Honours) Program for No Registration after Admission

- A student who does not register for any courses in the Fall or Winter term after admission will cease to be a student in the Asper School of Business. Such students must re-apply for admission if that is desired and will have to meet the requirements for admission at the time of the new application.
- A student who registers for course work in the Fall or Winter term after admission but subsequently voluntarily withdraws from all course work may be permitted to re-register at any time thereafter, subject to all faculty policies and requirements as they existed at the time of first admission and completing a signed declaration of non-attendance at another post-secondary institution. Such students should be aware of the time limit for completion of the degree.
- A student who applies for transfer to another university program and subsequently registers for courses will cease to be a student in the Asper School of Business. Such a student must re-apply for admission if that is desired and will have to meet the requirements for admission at the time of the new application.

3.15 Withdrawal from Individual Courses

Required Courses

Students in the Asper School of Business may withdraw without academic penalty from a required Core course provided they have not previously failed or withdrawn from that course and that they have met the Voluntary Withdrawal deadlines established by the university (see Deadline for Withdrawals in the Academic Schedule).

Electives and Business Options

Students may withdraw without academic penalty from an Elective or Option provided they do so before the final date for withdrawal (see Deadline for Withdrawals in the Academic Schedule). An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business.

Authorized Withdrawals

Authorized Withdrawals from courses after the registration revision period in each term may be granted on the basis of medical and compassionate grounds. A medical certificate signed by a physician or other appropriate professional must document medical grounds. Appeals based on compassionate reasons and circumstances must be supported by appropriate documentation. Students requesting Authorized Withdrawals should contact the Undergraduate Program Office.

3.16 Withdrawal from the Asper Co-op Program

Details for all the Asper Co-op Program’s requirements are found in Section 4.3 of the UG Calendar

Note: Specifically Section 4.3.6 Withdrawal from the Asper Co-op Program.

3.17 Maximum Course Load/Minimum Course Load

Students are not permitted to take more than 18 credit hours during an academic term without permission from the Undergraduate Program Manager.

Students enrolled in the Asper Co-op Option must register in a minimum of 9 credit hours between co-op work terms, unless written permission is obtained from the co-op office to complete back to back work terms (see Section 4.3.5 Academic Term Requirements for the Asper Co-op Program).

While on a co-op work term, a Cooperative Option student is not normally permitted to take more than three hours of academic credit and may not take more than one course at a time (see Section 4.3.4 Work Term Requirements for the Asper Co-op Program).

3.18 Course Selection and Requirements

All students are limited to a maximum of six credit hours of IDM 4050 Readings in Management, IDM 4070 Management Research 1, and IDM 4080 Management Research 2. These courses are considered Business Options, rather than as part of any Major.

ACC 3080 Canadian Income Taxation, FIN 3270 Personal Financial Planning, FIN 3420 Security Analysis and FIN 3440 Real Estate Investments are also considered general Options. They are not part of any major.

3.19 Eligibility Requirements for Awards

To be eligible for the Dean’s Honours List a student must complete a minimum of 12 credit hours of courses at the University of Manitoba during one academic term and achieve a term GPA of at least 3.50. Students participating in approved International Exchange Programs may be eligible for the Dean’s Honour List.

To be eligible for most awards, a student must complete a minimum of 24 credit hours of courses at the University of Manitoba during an academic year consisting of consecutive Fall and Winter terms. Co-operative Education students are eligible to apply for most awards; please check the Asper Undergraduate Program website and/or with the Financial Aid and Awards Office for more information on the eligibility requirements for Co-operative Education students.
The degree “With Distinction” will be awarded to all students graduating with the Bachelor of Commerce (Honours) Degree who attain a degree GPA of 3.80 or better on the following criteria: students admitted to the Asper School of Business in 2011 and thereafter will have their degree GPA determined on the basis of all courses which form a part of the 120 credit hours required in the four-year degree program.

The University Gold Medal, Silver Medal and Bronze Medal in Business shall be awarded annually. The candidate for the one medal may be a graduate from either the Bachelor of Commerce (Honours) or the Bachelor of Commerce (Honours) [Co-operative Education Option]. Students graduating in October, February, and May are eligible for these awards in Business which shall be awarded annually at the spring convocation.

Students interested in the detailed terms of reference for the University Gold Medal in Business or who are interested in bursaries, awards and scholarships should contact the Undergraduate Program Office in Asper or the University’s Financial Aid and Awards Office.

3.20 Examination Regulations

The faculty adheres to the General University Examination Regulations Policy. For particular examination regulations, including deferred examinations, pertinent to the Faculty, students are referred to the pamphlet, Examination Regulations for the Asper School of Business, available from the Undergraduate Program Office. The faculty does not offer supplemental examinations. The faculty does not offer Challenge for Credit examinations.

3.21 Letter of Permission to Take Courses at another University for Transfer of Credit

Students wishing to complete courses at another institution for credit at the University of Manitoba will apply for written permission from the Registrar’s Office prior to registering at the other institution. Students should apply for the Letter of Permission at least 4-6 weeks in advance.

To be eligible to take courses on a Letter of Permission, a Business student must:

- Be applying to take a course not currently offered by Asper (when applying to take a course transferred as an Asper course) in the term for which they are applying and
- Have completed a minimum of 24 credit hours in the Asper School of Business in addition to any transfer credits received upon admission.

Students (including Asper students on an exchange program) will not be granted a Letter of Permission for capstone courses of the Bachelor of Commerce (Honours) Program or capstone courses in its majors (regardless if the course is or is not being offered in any term).

See the on-line University of Manitoba “Academic Calendar and Catalog”, Faculty of Management/I.H. Asper School of Business, Program and Graduation Requirements, Program Requirements for Majors, for the defined capstone courses of the Bachelor of Commerce (Honours) program and capstone courses in its majors.

Faculty Council Amendments Approved February 1, 2013.

3.22 Plagiarism, Cheating and Personation

The Asper School of Business has adopted the Senate definition and policy on plagiarism, cheating and personation as described in the chapter, General Regulations and Requirements. A student found guilty of participating in any of these activities is subject to serious academic penalty and possible prosecution under the Canadian Criminal Code.

3.23 Student Appeals of Academic Regulations

Except as otherwise noted, student appeals should be directed to the Secretary of the Undergraduate Program Committee in the Undergraduate Program Office. The Committee considers appeals from Asper students who request special consideration in respect to rules and regulations governing their programs of study.

A certificate from an appropriate professional agency, such as the University Counselling Service or a licensed medical practitioner, should support appeals based on compassionate or medical problems.

3.24 Security of Academic Records

The Asper School of Business has adopted supplementary criteria and procedures on access to student academic records to supplement the university policy on Disclosure and Security of Student Academic Records. Copies of these policies are available in the Undergraduate Program Office. (Currently under review.)

3.25 Transcripts and Degree Parchments

Majors on Transcripts

After you graduate with your Bachelor of Commerce (Honours) degree, your formally declared major will appear on your University of Manitoba transcript. Your major will appear on your transcript once you have formally declared it on Aurora. Your major will not be listed on the Bachelor of Commerce (Honours) parchment.

If you complete the requirements of a second major within the credit hours required for the Bachelor of Commerce (Honours) degree, you may request that the second major also appear on your transcript after you graduate. See the Undergraduate Program Office in your graduating term to complete a request form.

Co-operative Education Option on Transcripts

If you have successfully completed the Co-operative Education Option, it will appear on your University of Manitoba transcript after you graduate with your Bachelor of Commerce (Honours) degree. The Co-operative Education Option will appear on your transcript once you have formally declared it on Aurora. Also, the Co-operative Education Option will appear on the Bachelor of Commerce (Honours) parchment.

SECTION 4: Program and Graduation Requirements

The Bachelor of Commerce (Honours) program comprises 120 credit hours of course work. The Co-operative Education Option also comprises 120 credit hours of course work plus a minimum of three 4-month approved work terms. The degree encompasses the following components which will be listed in detail below: Track 1/Foundation courses, Program Core courses (common to all students), Major courses, Business Options and Elective courses. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business.

Each student must declare at least one major and present a minimum Degree Grade Point Average of 2.00.

Detailed information on the degree regulations is found in Section 3, in the Undergraduate Program Office (268 Drake) or on the undergraduate web site at: umanitoba.ca/faculties/management/programs/undergraduate/

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.
4.1 Program Requirements for the Bachelor of Commerce (Honours) Program – Direct Entry, Track 1 and Track 2 (including students admitted from International Articulation Agreements)

All students admitted under these tracks (including International Students and International from 2+2 Joint Programs) will complete the Bachelor of Commerce Honours Program. The Bachelor of Commerce (Honours) degree is comprised of 120 credit hours and can be divided into the following components:

- The Track 1/Foundation Course Requirements (24 credit hours)
- The Core (51 credit hours)
- The Major (12 credit hours)
- Business Options (15 credit hours)
- Electives (15 credit hours)
- Business Option or Elective (3 credit hours)

These components comprise 120 credit hours; their associated limits and definitions are defined below.

NOTE: Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

Track 1/Foundation Course Requirements

All students must complete the specified Track 1/Foundation course requirements. Direct Entry students from high school will complete the Track 1/Foundation courses in their first year. Track 1 students complete these requirements prior to their admission to the Asper School of Business. Track 2 students have completed 24 credit hours of university course work but are missing one or more of the specific Track 1/Foundation courses. Track 2 students should complete all outstanding Track 1/Foundation courses during their first year after admission to the Asper School of Business and must achieve a minimum grade of “C” in each outstanding Track 1/Foundation courses.

The Core

The CORE consists of 51 credit hours of specified mandatory courses from all four departments in this faculty as well as courses taught by the departments of Economics, Environment, Global Political Economy, Political Studies, Philosophy and Sociology. All students are required to complete the Core. The Core presents the essence of a business degree program. The majority of the Core courses are taken in Years 2 and 3 of the Bachelor of Commerce Honours Program.

The Major

Each student is required to complete the course requirements of one MAJOR. Each department and the Dean’s Office have developed one or more Majors. Each Major consists of a 12 credit hours of course work specified by the department. Subject to demand and faculty resources, specialized Majors are available in Aboriginal Business Studies, Accounting, Actuarial Mathematics, Entrepreneurship/Small Business, Finance, Generalist, Human Resources Management/Industrial Relations, International Business, Logistics and Supply Chain Management, Management Information Systems, Management of Organizations, Marketing, and Operational Research/Operations Management. A list of the Departments and the Majors they oversee is outlined below.

Students will normally choose a Major at the beginning of the third year of the program, following completion of many of the Core courses, which introduce the areas. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

Business Options

This component of the program consists of a required number of Business courses, meaning courses taught by the Faculty of Management/I.H. Asper School of Business, freely selected by the student. These courses are referred to as Business OPTIONS. Students are required to complete 15 credit hours of Options. All Business Options courses must be at the 2000 Level or higher, except for language courses used as part of the International Business Major. Some students may want to take Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in another or several other Majors. Students who want to supplement their Majors may take up to 12 hours of their Options from that area. Students may complete a second Major as part of their Options requirements. Such students should consult with staff in the Undergraduate Program Office.

Electives (non-business courses)

This component of the program is the NON-BUSINESS ELECTIVE requirement; within this document it will be referred to as an Elective. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must complete 15 credit hours of Electives that meet the following criteria; a minimum of 6 credit hours of the Electives must be at the 2000 Level or higher plus a minimum of 3 credit hours of the Electives must comprise a freely chosen course that meets the Written English “W” requirement at any level.

Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective and it must be at the 2000 Level or higher.

Course Requirements for Direct Entry, Track 1 and Track 2 Students

The tables below list the Core courses that all Business students must complete. The courses are listed by year in a suggested sequence. Students normally complete the Core courses in the sequence shown.

To determine which additional courses to take each year (i.e., non-Core courses) students should consult the listing of course requirements for each year of their chosen Major.

regardless of admit type must take these courses and achieve a minimum grade of “C” (see applicant bulletin for complete details).

5) The prerequisite to GMGT 2060 is GMGT 1010 (D).

6) In addition to 51 credit hours of Core courses all students must take 12 credit hours in one Major, 15 credit hours of Business Options (which must be at the 2000 Level or higher, except for language courses used as part of the International Business Major.), 15 credit hours of Electives (which must include a minimum of 6 credit hours at the 2000 Level or higher plus 3 credit hours of Written English "W") plus 3 credit hours of either Business Options or Electives (which must be at the 2000 Level or higher).

7) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRIR 4520, MKT 3300, MKT 3540 (Cross-Cultural Brand Management topic only) or SCM 3230.

8) Ethics requirement: One of the following courses: PHIL 2290, PHIL 2750, PHIL 2790, PHIL 2830, GMGT 3030 or GMGT 3581. If a 6 credit hour course is chosen, 3 credit hours will count as Electives.

9) Alternative Management Requirement: One of the following must be chosen: AGRI 3030 (Cooperatives in Business and Community topic only), ECON 2540, LABR 2300, NATV 3120, NATV 4220, NATV 4320, POLS 3250, POLS 3270, SOC 3838 or any one of the following Asper courses: GMGT 4210, LEAD 3030, or MKT 3246 (or the former MKT 3240 when titled Sustainability Marketing Topic only).

10) Students may register for Electives in any year. Registration in Options and Major courses normally begins in Year 3 of the 4-Year program.

11) The prerequisite for MATH 1520 or MATH 1500 is a 60 per cent in Grade 12 Pre-Calculus Mathematics 40S or equivalent or a grade of “C” in the MSKL 0100 Mathematical Skills course taught by Extended Education; the prerequisite for MATH 1230 is a 70% in Pre-calculus Mathematics or the former Mathematics 40S (300) (70%) or the MSKL 0100 Mathematical Skills offered by Extended Education (B).

12) The prerequisite for STAT 1150 is a minimum of 70% in Pre-calculus Mathematics 40S or a grade of B or better in MSKL 0100 Mathematical Skills offered by Extended Education or equivalent.

### Course Key

All Core courses are taught by the Asper School of Business except the following:

**NOTES:**

1) 6 credit hours from: Anthropology, History, Mathematics, Philosophy, Political Studies, Psychology, or Sociology. Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.

2) Students are required to select a three credit hour course to satisfy the Written English “W” requirement. The “W” course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline and therefore do not fulfil the Track 1/Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.

3) PHIL 1290 Critical Thinking is a preferred elective.

4) For Track 1 transfer students these 24 credit hours of specified courses are the minimum requirements for admission. Direct Entry high school admits will also be taking these Foundation courses in Year 1. All students...
The Major consists of NATV 3120 and NATV 4320 plus three credit hours from Aboriginal Business Studies
ACC 1101. The capstone course for the Faculty is GMGT 4010. The capstone course for a major will be listed with the major details below (if none is listed then there is no course defined as a capstone course for that major).

NOTE: Equivalent courses offered through Université de Saint-Boniface may be used in lieu of the specified courses identified in the requirements for the majors. Université de Saint-Boniface courses end in the number “1” (e.g. ACT 1200). Students admitted to the Asper School of Business prior to September 2018 may use ACT 4630 toward the 12 credit hours of the Actuarial Mathematics major, but only if the course was taken prior to September 2018.

Students interested in or enrolled in Actuarial Mathematics should consult the Director or an Undergraduate Program Advisor for program planning advice.

Students are required to attain a minimum grade of “C+” in all 12 credit hours of Actuarial courses that will contribute to the Major in order to graduate with an Actuarial Mathematics Major.

Students are also advised that the following 15 credit hours of courses are required (and another 3 credit hours are recommended) to obtain the Actuarial Mathematics Major:

- MATH 1300 [or MATH 1220] (C) and MATH 1700(B) [or MATH 1322 (C)]. These courses can be used to satisfy Track 1/Foundation courses or alternately as electives in Year 1. Note: Both MATH 1300 and MATH 1700 are prerequisite to MATH 2720 which is required for ACT 2120.
- MATH 2720 [D]. Students declaring Actuarial Mathematics as their first major may take this course as either a Business Option or non-Business Elective.
- STAT 1000 [or STAT 1150] and STAT 2400 and STAT 3400. STAT 2400 is needed for ACT 2120, and is a prerequisite for STAT 3400, which is needed for ACT3130, ACT 3630, ACT 4020 and ACT 4030. These courses can contribute to the 2000+ Level elective requirement of the degree.

Plus STAT 2000 [or STAT 2150] is a recommended elective. NOTE: STAT 2000 [or STAT 2150] is a prerequisite for FIN 3410.

Entrepreneurship/Small Business

The Major consists of: ENTR 3100, ENTR 4100, and FIN 3240, plus one of the following: ENTR 3102, ENTR 3104, or ENTR 3106.

Finance

The major consists of 12 credit hours from: FIN 3410*, FIN 3480*, and FIN 4400** plus one of FIN 3400, FIN 3420, FIN 3450, FIN 3460*, FIN 4240, FIN 4250, FIN 4260, or FIN 4270 and a requirement that students have a minimum of C+ in the prerequisite course of FIN 2200.

*The prerequisites for FIN 3410, FIN 3460 and FIN 3480 are: [FIN 2200 (C+), MATH 1220 (C) or MATH 1300 (C) or MATH 1310 (C)], and [STAT 2000 (C) or STAT 2150 (C)].

**The prerequisite for FIN 4400 is FIN 3480 (D).

Finance students are also required to take MATH 1300 (C) or MATH 1310 (C) and STAT 2000 (C) as part of the electives in their program since they are part of the prerequisite for the finance courses as stated above.

Capstone Course: FIN 4400**.

Generalist
The Major consists of one course from the required list of courses from four different Majors (i.e., Options that are not part of a Major’s required course requirements are not eligible for the Generalist Major).

**Human Resources Management/Industrial Relations**

The Major consists of: HRIR 3450 plus three of the following: HRIR 4410, HRIR 4420, HRIR 4480, HRIR 4520 OR HRIR 3450 plus two of the following: HRIR 4410, HRIR 4420, HRIR 4480, HRIR 4520, plus one of the following: HRIR 3430, LABR 3010, LABR 3060, LABR 3070, LABR 3130, and LABR 3140.

Students entering the second year of the four-year program are advised to take HRIR 2440 since it is a prerequisite to advanced courses in the area.

**International Business**

The Major consists of: FIN 3450, INTB 2200, HRIR 4520, and MKT 3300.

One of the above four courses may be used in the core program; therefore the major will be comprised of the remaining three courses plus one course from the following list: MKT 3240 Special Topics in Marketing (Cross-Cultural Brand Management topic only), ACT 4250 Managing Insurance Operations in the International Business Environment or SCM 3230 Global Chain Management.

Students majoring in International Business are permitted to take 12 credit hours of a foreign language and/or courses with an international focus from an approved list and have these non-business courses count as Business Options. The list is available in the Undergraduate Program Office.

**Leadership and Organizations**

The Major consists of 12 credit hours from: GMGT 3010, LEAD 3010, LEAD 3020, LEAD 3030, LEAD 3040, LEAD 4010 AND LEAD 4020.

Students entering the second year of the four year program are advised to take GMGT 2070 and GMGT 2060 as they are prerequisites to some of the advanced courses in the major.

Students entering second year are strongly recommended to take LEAD 2010 prior to taking LEAD 4020 and speak with an Asper Student Program Advisor for course planning advice.

**Logistics and Supply Chain Management**

The Major consists of: SCM 2210, SCM 2230, SCM 3360 plus one of the following: SCM 2220, SCM 2240, SCM 2250, SCM 2260, SCM 3230, SCM 3250, SCM 3260, SCM 3270, SCM 3280, SCM 3630, SCM 4250 (not to be held with the former SCM 4240).

Recommended Business Options/Electives in this area include: MIS 3500, MIS 3510, INTB 2200, HRIR 3450, GMGT 3160, GMGT 4160, MSCI 3400, IDM 4050, IDM 4070, IDM 4080, MKT 3220, MKT 3340, GEOG 3800, ECON 2010, ECON 3010.

**Management Information Systems**

The Major consists of MIS 3500, MIS 3510, MIS 3520, and MIS 4500 and a requirement that students have a minimum C+ in the prerequisite course of MIS 2000.

MIS 3510 (D) and COMP 1010 (C) are prerequisites for the required MIS 3500 course.

**Options available in this area are ACC 3530 and MIS 4250.**

Students interested in pursuing the Management Information Systems Major are encouraged to take MIS 2000 in the second year of the four-year program since it is a prerequisite to advanced courses in the area.

Students interested in pursuing the Management Information Systems Major are also encouraged, but not required, to complete COMP 1020.

Capstone Course: MIS 4500.

**Management of Organizations (Discontinued/Deleted)**

NOTE: Students previously pursuing the major may have to consult with the Business Administration Department Head for information and feasibility on completing the major.

**Marketing**

The Major consists of MKT 3220*, MKT 3230, MKT 4210 and 3 hours from MKT 3240, MKT 3300, MKT 3242, MKT 3246, MKT 3310, MKT 3340, MKT 3390, MKT 4270. In addition to the 12 credit hours required for the major, Marketing students may take up to an additional 12 credit hours from the above list.

*Marketing students are also required to take STAT 2000 or STAT 2150 as one of their electives since it is a prerequisite for MKT 3220.

Capstone Course: MKT 4210.

**Operational Research/Operations Management**

The Major consists of any 12 hours from MSCI 3400, OPM 3650, OPM 3660, OPM 3670, MSCI 4220, OPM 4620.

Prior to registration, all students enrolled in Operational Research/Operations Management should consult the Department Head or a Undergraduate Program Advisor for program planning advice.

**4.3 Program Requirements for the Asper Co-op Program**

Contact and Program Information
Director: Kelly Mahoney
Asper Co-op Office Room 254 Drake
Telephone: 204-474-8521
Email: aspercoop@umanitoba.ca

The Asper School of Business offers a co-operative education option designed to complement and enrich the academic program with work experience. The co-op work terms provide students with practical experience, assistance in financing their education, and guidance for future career specialization.

All students must complete all 120 credit hours of the program including the Core, one of the Majors listed above in Section 4.2, as well as the Option and Elective course components. Students who intend to complete the Asper Co-op Program must also complete a minimum of three (3) 4-month co-op work terms. Students admitted from September 2011 and who successfully complete the minimum three co-op work terms can combine the work terms together to satisfy 3 credit hours of Business Options.

**4.3.1 Entrance Requirements and Selection Criteria for the Asper Co-op Program**

Those applying to the Asper Co-op Program must have completed or obtained:

- All Bachelor of Commerce (Honours) admission requirements as specified in the University of Manitoba Undergraduate Calendar, the Asper School of Business.
- A minimum degree grade point average of 3.0 upon assessment of the Asper School of Business Bachelor of Commerce (Honours) Program.
In addition to the above requirements:

- An interview with the Co-op Office will be required for admission to the Asper Co-op Program.
- Applicants for the Asper Co-op Program will be evaluated based on a complete application. (see Section 4.3.2 Application Requirements for the Asper Co-op Program).

Note: Each year, 5 seats will be allotted to the Canadian Indigenous Ancestry Category. This category is intended for all First Nations, Métis, and Inuit applicants who have attained a minimum DGPA of 2.75 and met all other requirements for application to the Asper Co-op Program. Students wishing to be considered in the Canadian Indigenous Ancestry Category must indicate so in the appropriate section on the Asper Co-op Program Application Form. If students do not indicate this on the application form, they will not be eligible for consideration within this category. All applicants admitted under this category are required to register with the Indigenous Business Education Partners (IBEP) for a period of at least two academic terms following admission. If you are unsure whether to apply under this category, please consult with the Indigenous Business Education Partners (IBEP), 350 Drake Centre, phone (204) 474-7401. Proof of Indigenous Ancestry will be required to register for IBEP. Unfilled seats in this category will not be filled from outside the category and will not be transferred for use in future years.

If a student has been found to have deliberately falsified information in the application for the Asper Co-op Program, the matter will be immediately reported to the Associate Dean, Undergraduate Program as an allegation of academic dishonesty and handled according to the University Student Discipline Bylaw.

If, prior to acceptance into the Asper Co-op Program, it is found that the student has had an allegation of academic dishonesty upheld against them, the student will no longer be eligible for entrance to the co-operative education option.

Students are advised that satisfying the minimum entrance requirements does not guarantee a place in the Asper Co-op Program. In the event that the demand for placements exceeds the number of places available or that appropriate levels of staffing of the co-op office are not available, a cap may be placed on the number of students accepted into the Asper Co-op Program. In such situations, the Asper School of Business reserves the right to determine and select the best qualified applicants.

4.3.2 Application Requirements for the Asper Co-op Program

In addition to the minimum requirements of the Asper School of Business, applicants for the Asper Co-op Program will be evaluated based on a complete application. This will include the following:

- A completed co-op application form and
- A completed Consent of Release of Personal Information form and
- A statement of purpose: The applicant must submit a statement outlining his/her motivations for participating in the Asper Co-op Program, and
- A group interview conducted by the Co-op Office.

Upon completion of the co-op application form and the group interview, each applicant’s academic standing is verified by the Undergraduate Program Office.

Applications to the Asper Co-op Program must be received prior to the application deadline specified on the Co-op website (www.umanitoba.ca/asper/co-op), except by special permission from the Program Director. All completed applications must be submitted directly to the Co-operative Education Program Office.

4.3.3 Structure and Sequencing for the Asper Co-op Program

The Asper Co-op Program consists of both academic terms and co-op work terms.

Each academic term and each co-op work term will commence in January, May or September.

The sequence of academic terms and co-op work terms is variable to suit the needs of students and co-op employers and will be approved by the co-op office.

Students are expected to follow the academic/work term sequence defined by the Asper School of Business from admission through to graduation.

4.3.4 Work Term Requirements for the Asper Co-op Program

The Asper Co-op Program will include 12 months spent in co-op work terms with a co-op office approved employer. Normally, each co-op work term will be completed with one employer. Typically, the co-op work terms will be taken in three, 4-month-long co-op work terms; however, other schedules may also be approved on an as-needed basis.

A minimum grade of “C” is required in each co-op work term course. Students who fail to meet the minimum “C” grade in each of their co-op work term courses will be required to withdraw from the co-operative education program and have the following academic assessment noted on their transcript “Required to Withdraw from the Asper Co-op Program”.

Asper Co-op students are required to submit at least three written co-op work term reports on their work term activities. These reports are due at times designated by the co-op office. The co-op office will provide students with instructions regarding the content and format requirements of the co-op work term reports.

Indications of unsatisfactory performance by a student on a work term will be thoroughly investigated by the co-op office. As a result of the investigation, if benefits from further professional training are questionable, the student may be required to withdraw from the Asper Co-op Program and the following academic assessment noted on their transcript “Required to Withdraw from the Asper Co-op Program”. The student would then be assessed for eligibility to enter the regular B. Comm. (Honours) program (see Section 4.3.6 Withdrawal from the Asper Co-op Program for more information).

While on a co-op work term, a Cooperative Option student is not normally permitted to take more than three hours of academic credit. Students wishing to enroll in more than 3 credit hours while on a co-op work term must apply to the Co-op Faculty Advisor for permission to do so, including furnishing a letter from their co-op employer indicating that the employer approves of this exception; if approved a student may not take more than six hours of academic credit while on a work term and may not take more than one course at a time.

4.3.5 Academic Term Requirements for the Asper Co-op Program

Coursework requirements of the Asper Co-op Program are equivalent to the coursework requirements of the B. Comm.(Honors) program with exception that each Co-op Work Term (Course IDM 2982, 3982, 4982) will receive 1 credit hour for each co-op work term course passed. Students passing all three co-op work term courses will be permitted to use the three
Students enrolled in the Asper Co-op Program are required to maintain satisfactory progress toward their B. Comm. (Honours) degree and be registered in a minimum of 9 credit hours between co-op work terms after admission to the Asper Co-op Program, unless back to back work terms have been approved by the co-op office.

While on a co-op work term, a Cooperative Option student is not normally permitted to take more than three hours of academic credit (see section 4.3.4 Work Term Requirements for the Asper Co-op Program); choosing to do so does not reduce the requirement of enrolment in a minimum of 9 credit hours in each academic term unless written permission is obtained from the co-op office.

Students whose degree G.P.A. falls below 2.0 in any given term are subject to withdrawal from the B. Comm. (Hons) program as per section 3.13. Students may be required to withdraw from the Bachelor of Commerce (Honours) Program in the Asper Undergraduate Calendar.

To continue in the Asper Co-op Option a student's performance will be evaluated following each academic term to ensure standards are met for continuance in the Asper Co-op Program. The student must meet all academic degree and individual course prerequisites for further study, departmental continuation and graduation requirements. Continuation is also contingent upon satisfactory performance on co-op work terms (see Section 4.3.4 Work Term Requirements for the Asper Co-op Program).

### 4.3.6 Withdrawal from the Asper Co-op Program

Students may be required to withdraw from the Asper Co-op Program for any of the following reasons:

- Failure to maintain the minimum academic requirements of the Asper School of Business,
- Failure to maintain the minimum credit hour requirements of the academic term in the Asper Co-op Program,
- Failure to achieve a minimum grade of "C" on any work term,
- Unsatisfactory performance in the work place during a co-op work term (see section 4.3.4 Work Term Requirements for the Asper Co-op Program),
- Failure to observe the ethical standards of the Asper School and the University in place at the time; including being found guilty of academic dishonesty, or
- When, in the opinion of the Co-op Director and Co-op Faculty Advisor, the student does not exhibit sufficient qualities of ability, skills, aptitudes, attitudes, diligence or motivation to complete the Asper Co-op Program successfully.

Students who have been required to withdraw from the Asper Co-op Program for either academic assessment reasons or other reasons will have the following academic assessment placed on their transcript: "Required to Withdraw from the Asper Co-op Program".

A student who withdraws after participating in the recruitment period or after accepting a position with an employer for a co-op work term, without written approval of the Co-op Faculty Advisor or Co-op Director, will be withdrawn from the Asper Co-op Program and have the following academic assessment noted on their transcript "Required to Withdraw from the Asper Co-op Program.

Students who wish to withdraw voluntarily from the Asper Co-op Program may do so by written letter to the Co-op Director at any time prior to participating in the recruitment period through applications and/or interviews and prior to accepting a position for a co-op work term. Students may be granted permission to revert back to the regular Bachelor of Commerce (Honours) program without being required to withdraw.

### 4.3.7 Appeals for Exceptions to Academic and Non-Academic Regulations and Appeals in the Asper Co-op Program

Appeals to academic regulations relating to the Asper Co-operative Education Option (i.e., those relating to the entrance, continuing, and graduation requirements) will be processed in a similar manner to any other request for exception to academic regulations. Normally, the student's written request, accompanied by any supporting documentation, e.g. written notice of medical or compassionate circumstances, and a written recommendation from the Co-op Faculty Advisor with or the Co-op Director, will be directed to the Undergraduate Program Manager for either immediate disposition or to forward on to the Undergraduate Program Committee for its consideration.

Appeals to non-academic program-related issues should be resolved by contact with the Co-op Director, or the Co-op Faculty Advisor. Appeals related to non-academic entrance or continuance issues are the responsibility of the Co-op Director. If these appeals are not resolved to the student's satisfaction, the student may appeal in writing to the Undergraduate Program Committee through the Undergraduate Program Manager.

### 4.3.8 Graduation from the Asper Co-op Program

B. Comm. (Hons.) Cooperative Option students who are required to revert or voluntarily revert to an alternative degree program must fulfill all academic requirements of that degree.

To graduate from the Asper Co-op Program, students are required to meet the Bachelor of Commerce (Honours) Program graduation requirements as outlined in the Asper School of Business section of the University of Manitoba Undergraduate Calendar, plus completion of twelve months of co-op work terms (or a minimum of 3 approved co-op work terms) with each Co-op work term course having been assigned a "C" grade or better. Students passing all three co-op work term courses will be permitted to use the three co-op work term courses together as equivalent to three (3) credit hours of a 2000+ level business option.

### 4.4 Program Requirements for the Asper School of Business/Red River College Joint Program

Prior to admission to the Asper School of Business/Red River College Joint Program, students must complete the Business Administration Diploma (University Stream) at Red River College with a minimum cumulative grade point average of 3.00. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Admission is limited and competitive. Following admission to the Asper School of Business, students in the Joint Program will be required to complete 66 credit hours to earn the Bachelor of Commerce (Honours) degree. The 66 credit hours can be divided into the following components: the Core, the Major, Business Options, and Electives. These components and their associated limits are defined below.

**NOTE:** Senate has approved changes to the RRC/Asper articulation agreement effective for the September 2018 intake. Please contact the Asper Undergraduate Program Office, Room 268 Drake, for information and details on the admission requirements and transfer credit processing.

**NOTES:**

1. Students admitted to the Asper School of Business prior to September 2018 should refer to the Academic Calendar for the year in which they were admitted for the requirements for this major.
2) September 2018 is the last intake of the old articulation agreement created for "University Stream” graduates from the RRC diploma.

3) For students admitted under the "University Stream" and following the old program requirements, prior to and including September 2018, the degree requirements include:

The Core

The CORE comprises 30 credit hours of the 66 required in the Joint Program. The Foundation courses (6 credit hours) should be taken in the first year at the Asper School. Students must achieve a minimum "C" grade in each Foundation course. The Program Core courses (24 credit hours) may be taken at any point in the program, but the course GMGT 4010 must be taken in the student's final term. Core courses are listed below in the Course Requirements for RRC Joint Program Students.

The Major

Each student must complete the course requirements of one MAJOR. Each Major will consist of a 12 credit hour unit of course work. Information on completing a Second Major is listed in Section 3.12. The Majors are listed in Section 4.2.

Students may begin taking courses for their major as soon as prerequisites are met. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

Note: Students in the Asper School of Business/Red River College Joint Program who want to major in Finance will be required to take FIN 2200 as one of their Business Options. Likewise, students who want to major in Leadership and Organizations must take GMGT 2060 as one of their Business Options.

Business Options

This component of the program consists of a required number of Business courses freely selected by the student. These courses are referred to as Business OPTIONS. Students must take at least 12 credit hours of Business Options. All Business Options courses must be at the 2000 Level or higher, except for language courses used as part of the International Business Major. Some students may want to take Business Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in another or several other Majors. Students who want to supplement their Majors may take up to 12 credit hours of their Business Options from that area. Students may complete a second Major as part of their Business Options requirements. Such students should consult with staff in the Undergraduate Program Office.

Electives

This component of the program is the ELECTIVE requirement. An elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must take at least 9 credit hours of Electives that meet the following criteria; a 3 credit hour course at the 2000 Level or higher, 3 credit hours must be a freely chosen course that meets the Written English "W" requirement at any level plus a 3 credit hour elective at any level.

Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective and it must be at the 2000 Level or higher.

Course Requirements for RRC Joint Program Students

The course requirements for the Asper School of Business/Red River College Joint Program are as follows.

Students should register for the Foundation courses in their first year at the University of Manitoba and must achieve a minimum "C" grade in each course.

Foundation Courses Cr. Hrs
- MATH 1520 or MATH 1500 or MATH 1230 (see Note 1) (3 credit hours)
- Written English Course (see Note 2) (3 credit hours)

Program Core Requirements
- ACC 1110 (3 credit hours)
- MIS 2000 (3 credit hours)
- GMGT 1010 (3 credit hours)
- SCM 2160 (3 credit hours)
- GMGT 4010 (must be taken in final term) (3 credit hours)
- Ethics (see Note 3) (3 credit hours)
- Alternative Management Studies (see Note 4) (3 credit hours)
- International Business (see Note 5) (3 credit hours)

Total Credit Hours 30

NOTES:
1) The prerequisite for MATH 1520 or MATH 1500 is a 60 per cent in Grade 12 Pre-Calculus Mathematics 40S or equivalent or a grade of "C" in the MSKL 0100 Mathematical Skills course taught by Extended Education; the prerequisite for MATH 1230 is a 70% in Pre-calculus Mathematics or the former Mathematics 40S (300) (70%) or the MSKL 0100 Mathematical Skills offered by Extended Education (B)

2) Students are required to select a three credit hour course to satisfy the Written English "W" requirement. The "W" course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline and therefore do not fulfil the Track 1/ Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.

3) All Management students must complete three credit hours of Ethics. Students may fulfill this requirement by completing one of the following courses: PHIL 2290 (6), PHIL 2750 (3), PHIL 2790 (6), PHIL 2830 (3), GMGT 3030 (3) or GMGT 3581 (3). If a 6 credit hour course is chosen, 3 credit hours will count toward the core Ethics requirement and 3 credit hours will count as Electives.

4) Alternative Management Requirement: One of the following must be chosen: AGRI 3030 (Cooperatives in Business and Community topic only), ECON 2540, LABR 2300, NATV 3120, NATV 4220, NATV 4320, POLS 3250, POLS 3270, SOC 3838 or any one of the following Asper courses: GMGT 4210, LEAD 3030 or MKT 3246 (or the former MKT 3240 when titled Sustainability Marketing topic only). Take careful note of any course prerequisites in your timetable planning. Course prerequisites will be waived for Asper students in the following courses: NATV 3120, NATV 4220 NATV 4320, and POLS 3270; students must contact an Asper Program Advisor before registration for the prerequisite waiver. May be taken in Year 3 or Year 4.

5) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRIR 4520, MKT 3300, MKT 3240 (Cross-Cultural Brand Management topic only) or SCM 3230.

Overall Program Requirements Cr. Hrs.
- Foundation Courses (6 credit hours)
• Program Core Courses (24 credit hours)
• Major Courses (12 credit hours)
• Business Options (12 credit hours)
• Electives (9 credit hours)
• Business Option or Elective (3 credit hours)

Total Credit Hours 66 credit hours

4.5 Program Requirements for the Asper School of Business/Assiniboine Community College Joint Program

Prior to admission to the Asper School of Business/Assiniboine Community College Joint Program students must complete the Business Administration Diploma (University Stream) at Assiniboine Community College with a minimum cumulative grade point average of 3.00. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Admission is limited and competitive. Following admission to the Asper School of Business, students in the Joint Program will be required to complete 66 credit hours to earn the Bachelor of Commerce (Honours) degree. The 66 credit hours can be divided into the following components: the Core, the Major, Business Options, and Elective courses. These components and their associated limits are defined below.

NOTE: The Joint Program is currently under review; transfer credit details are subject to change. Please contact the Asper Undergraduate Program Office, Room 268 Drake, for information and details on the admission requirements and transfer credit processing.

NOTE: Students admitted prior to September 2011 should refer to the Calendar for the year in which they were admitted for a description of their program requirements.

The Core

The CORE comprises 39 credit hours of the 66 required in the Joint Program. The Foundation courses (12 credit hours) should be taken in the first year in the Asper School. Students must achieve a minimum "C" grade in each Track 1/Foundation course. The Program Core courses (27 credit hours) may be taken at any point in the program, but the course GMGT 4010 must be taken in the student’s final term. Core courses are listed below in Course Requirements for ACC Joint Program Students.

The Major

Each student must complete the course requirements of one MAJOR. Each Major will consist of a 12 credit hour unit of course work. Information on completing a Second Major is listed in Section 3.12. The Majors are listed Section 4.2.

Students may begin taking courses for their major as soon as prerequisites are met. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

Note: Students in the Asper School of Business/Assiniboine Community College Joint Program who want to major in Finance will be required to take FIN 2200 as one of their Business options. Likewise, students who want to major in Marketing must take MKT 2210 as one of their Business Options.

Business Options

This component of the program consists of a required number of Business courses freely selected by the student. These courses are referred to as Business OPTIONS. Students must take 9 credit hours of Business Options. All Business Options courses must be at the 2000 Level or higher, except for language courses used as part of the International Business Major. Some students may want to take Business Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in other Majors. Students who want to supplement their Majors may take up to 9 hours of their Business Options from that area. Students may complete a second Major as part of their Business Options requirements. Such students should consult with staff in the Undergraduate Program Office.

Electives

This component of the program is the ELECTIVE requirement. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must 3 credit hours of Electives that is a freely chosen course that meets the Written English "W" requirement at any level.

Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective and it must be at the 2000 Level or higher.

Course Requirements for ACC Joint Program Students

The course requirements for the Asper School of Business/Assiniboine Community College Joint Program are as follows.

Students should register for the Track 1/Foundation courses in their first year at the University of Manitoba and must achieve a minimum “C” grade in each course.

Foundation Courses Cr. Hrs.

- 6 credit hours from: ANTH, HIST, MATH, PHIL, POLS, PSYC OR SOC (See Note 1) (6 credit hours)
- MATH 1520 or MATH 1500 or MATH 1230 (see Note 2) (3 credit hours)
- Written English Course (see Note 3) (3 credit hours)

Program Core Requirements

- MIS 2000 (3 credit hours)
- GMGT 2060 (3 credit hours)
- GMGT 1010 (3 credit hours)
- MSCI 2150 (3 credit hours)
- SCM 2160 (3 credit hours)
- GMGT 4010 (must be taken in final term) (3 credit hours)
- Ethics (see Note 4) (3 credit hours)
- Alternative Management Studies (see Note 5) (3 credit hours)
- International Business (see Note 6) (3 credit hours)

Total Credit Hours 39 credit hours

NOTES:
1) 6 credit hours from: Anthropology, History, Mathematics, Philosophy, Political Studies, Psychology, or Sociology. Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.

2) The prerequisite for MATH 1520 or MATH 1500 is a 60 per cent in Grade 12 Pre-Calculus Mathematics 40S or equivalent or a grade of "C" in the MSKL 0100 Mathematical Skills course taught by Extended Education; the prerequisite for MATH 1230 is a 70% in Pre-calculus Mathematics or the former Mathematics 40S (300) (70%) or the MSKL 0100 Mathematical Skills offered by Extended Education (B). Students who have been admitted into the Joint Program and who successfully complete the Mathematical Skills...
course may be entitled to an additional three credit hour Elective from their Business Administration diploma.

3) Students are required to select a three credit hour course to satisfy the Written English "W" requirement. The "W" course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline and therefore do not fulfill the Track 1/ Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.

4) All Business students must complete three credit hours of Ethics. Students may fulfill this requirement by completing one of the following courses: PHIL 2290 (6), PHIL 2750 (3), PHIL 2790 (6), PHIL 2830 (3), GMGT 3030 (3) or GMGT 3581 (3). If a 6 credit hour course is chosen, 3 credit hours will count toward the core Ethics requirement and 3 credit hours will count as Electives.

5) Alternative Management Requirement: One of the following must be chosen: AGRI 3030 (Cooperatives in Business and Community topic only), ECON 2540, LABR 2300, NATV 3120, NATV 4220, NATV 4320, POLS 3250, POLS 3270, SOC 3838 or any one of the following Asper courses: GMGT 4210, LEAD 3030 or MKT 3246 (or the former MKT 3240 when titled Sustainability Marketing topic only). Take careful note of any course prerequisites in your timetable planning. Course prerequisites will be waived for Asper students in the following courses: NATV 3120, NATV 4220, NATV 4320, and POLS 3270; students must contact an Asper Program Advisor before registration for the prerequisite waiver. May be taken in Year 3 or Year 4.

6) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRIR 4520, MKT 3300, MKT 3240 (Cross-Cultural Brand Management topic only) or SCM 3230.

Overall Program Requirements Cr. Hrs.
- Track 1/Foundation Courses (12 credit hours)
- Program Core Courses (27 credit hours)
- Major Courses (12 credit hours)
- Business Options (9 credit hours)
- Electives (3 credit hours)
- Business Option or Elective (3 credit hours)

Total credit hours 66 credit hours

4.6 Program Requirements for the Asper School of Business /University College of the North Joint Program

Prior to admission to the Asper School of Business/University College of the North Joint Program students must complete the Business Administration Diploma (University Stream) at University College of the North with a minimum cumulative grade point average of 3.00. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Admission is limited and competitive. Following admission to the Asper School of Business, students in the Joint Program will be required to complete 81 credit hours to earn the Bachelor of Commerce (Honours) degree. The 81 credit hours can be divided into the following components: the Core, the Major, Business Options, and Electives. These components and their associated limits are defined below.

NOTE: The Joint Program is currently under review; transfer credit details are subject to change. Please contact the Asper Undergraduate Program Office, Room 268 Drake, for information and details on the admission requirements and transfer credit processing.

NOTE: Students admitted prior to September 2011 should refer to the Academic Calendar for the year in which they were admitted for a description of their program requirements.

The Core

The Core comprises 39 credit hours of the 81 required in the Joint Program. The Foundation courses (15 credit hours) should be taken in the first year in the Asper School. Students must achieve a minimum "C" grade in each Foundation course. The Program Core courses (24 credit hours) may be taken at any point in the program, but the course GMGT 4010 must be taken in the student's final term. Core courses are listed below in Course Requirements for UCN Joint Program Students.

The Major

Each student must complete the course requirements of one MAJOR. Each Major will consist of a 12 credit hour unit of course work. Information on completing a Second Major is listed in Section 3.12. The Majors are listed in Section 4.2.

Students may begin taking courses for their major as soon as prerequisites are met. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

Note: Students in the Asper School of Business/University College of the North Joint Program who want to major in Finance will be required to take FIN 2200 as one of their Business Options. Likewise, students who want to major in Marketing must take MKT 2210 as one of their Business Options.

Business Options

This component of the program consists of a required number of Business courses freely selected by the student. These courses are referred to as Business OPTIONS. Students must take 15 credit hours of Business Options. All Business Options courses must be at the 2000 Level or higher, except for language courses used as part of the International Business Major. Some students may want to take Business Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in other Majors. Students who want to supplement their Major may take up to 12 hours of their Business Options from that area. Students may complete a second Major as part of their Business Options requirements. Such students should consult with staff in the Undergraduate Program Office.

Electives

This component of the program is the ELECTIVE requirement. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must take 12 credit hours of Electives that meet the following criteria; 6 credit hours must be at the 2000 Level or higher, 3 credit hours must be a freely chosen course that meets the Written English "W" requirement at any level plus a 3 credit hour elective at any level.

Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective and it must be at the 2000 Level or higher.

Course Requirements for UCN Joint Program Students

The course requirements for the Asper School of Business/University College of the North Joint Program are as follows.
Students should register for the Foundation courses in their first year at the University of Manitoba and must achieve a minimum "C" grade in each course.

**Foundation Courses**

- 6 credit hours from: ANTH, HIST, MATH, PHIL, POLS, PSYC OR SOC (See Note 1) (6 credit hours)
- MATH 1520 or MATH 1500 or MATH 1230 (see Note 2) (3 credit hours)
- Written English Course (see Note 3) (3 credit hours)
- STAT 1000 or STAT 1150 (see Note 7) (3 credit hours)

**Program Core Requirements**

- MIS 2000 (3 credit hours)
- GMGT 1010 (3 credit hours)
- MSCI 2150 (3 credit hours)
- SCM 2160 (3 credit hours)
- GMGT 4010 (must be taken in final term) (3 credit hours)
- Ethics (see note 4) (3 credit hours)
- Alternative Management Studies (see Note 5) (3 credit hours)
- International Business (see Note 6) (3 credit hours)

**Total Credit Hours (39 credit hours)**

**NOTES:**

1) 6 credit hours from: Anthropology, History, Mathematics, Philosophy, Political Studies, Psychology, or Sociology. Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.

2) The prerequisite for MATH 1520 or MATH 1500 is a 60 per cent in Grade 12 Pre-Calculus Mathematics 40S or equivalent or a grade of "C" in the MSKL 0100 Mathematical Skills course taught by Extended Education; the prerequisite for MATH 1230 is a 70% in Pre-calculus Mathematics or the former Mathematics 40S (300) (70%) or the MSKL 0100 Mathematical Skills offered by Extended Education (B).

3) Students are required to select a three credit hour course to satisfy the Written English "W" requirement. The "W" course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 2010 are not considered to be from a specific discipline and therefore do not fulfill the Track 1/ Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.

4) All Business students must complete three credit hours of Ethics. Students may fulfill this requirement by completing one of the following courses: PHIL 2290 (6), PHIL 2750 (3), PHIL 2790 (6), PHIL 2830 (3), GMGT 3030 or GMGT 3581 (3). If a 6 credit hour course is chosen, 3 credit hours will count toward the core Ethics requirement and 3 credit hours will count as Electives.

5) Alternative Management Requirement: One of the following must be chosen: AGRI 3030 (Cooperatives in Business and Community topic only), ECON 2540, LARB 2300, NATV 3120, NATV 4220, NATV 4320, POLS 3250, POLS 3270, SOC 3838 or any one of the following Asper courses: GMGT 4210, LEAD 3030 or MKT 3246 (or the former MKT 3240 when titled Sustainability Marketing topic only). Take careful note of any course prerequisites in your timetable planning. Course prerequisites will be waived for Asper students in the following courses: NATV 3120, NATV 4220 NATV 4320, and POLS 3270; students must contact an Asper Program Advisor before registration for the prerequisite waiver. May be taken in Year 3 or Year 4.

6) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRIR 4520, MKT 3300, MKT 3240 (Cross-Cultural Brand Management topic only) or SCM 3230.

7) The prerequisite for STAT 1150 is a minimum of 70% in Pre-calculus Mathematics 40S or a grade of B or better in MSKL 0100 Mathematical Skills offered by Extended Education or equivalent.

**Overall Program Requirements Cr. Hrs.**

- Foundation Courses (15 credit hours)
- Program Core Courses (24 credit hours)
- Major Courses (12 credit hours)
- Business Options (15 credit hours)
- Electives (12 credit hours)
- Business Option or Elective (3 credit hours)

**Total Credit Hours 81**

**4.7 Program Requirements for the Asper School of Business /École technique et professionnelle joint program**

Prior to admission to the Asper School of Business/Ecole technique et professionnelle Joint Program students must complete the Business Administration Diploma (University Stream) at École technique et professionnelle with a minimum cumulative grade point average of 3.00. Students must have graduated from the Diploma program within the last 5 years to be eligible for admission. Admission is limited and competitive. Following admission to the Asper School of Business, students in the Joint Program will be required to complete 66 credit hours to earn the Bachelor of Commerce (Honours) degree. The 66 credit hours can be divided into the following components: the Core, the Major, Business Options, and Electives. These components and their associated limits are defined below.

**NOTE:** The Joint Program is currently under review; transfer credit details are subject to change. Please contact the Asper Undergraduate Program Office, Room 268 Drake, for information and details on the admission requirements and transfer credit processing.

**NOTE:** Students admitted prior to September 2011 should refer to the 2010-2011 Undergraduate Calendar for a description of their program requirements.

**The Core**

The CORE comprises 36 credit hours of the 66 required in the Joint Program. The Foundation courses (12 credit hours) should be taken in the first year in the Asper School. Students must achieve a minimum "C" grade in each Foundation course. The Program Core courses (24 credit hours) may be taken at any point in the program, but the course GMGT 4010 must be taken in the student’s final term. Core courses are listed below in Course Requirements for ETP Joint Program Students.

**The Major**

Each student must complete the course requirements of one MAJOR. Each Major will consist of a 12 credit hour unit of course work. Information on completing a Second Major is listed in Section 3.12. The Majors are listed in Section 4.2.

Students may begin taking courses for their major as soon as prerequisites are met. Students have an opportunity to transfer from one Major to another, but this opportunity decreases as the student progresses in the program.

**Note:** Students in the Asper School of Business/Ecole technique et professionnelle joint program who want to major in Finance will be required to take FIN 2200 as one of their Business Options.

**Business Options**
This component of the program consists of a required number of Business courses freely selected by the student. These courses are referred to as Business OPTIONS. Students must take at least nine and not more than 9 hours of Business Options. All Business Options courses must be at the 2000 Level or higher, except for language courses used as part of the International Business Major. Some students may want to take Business Options which will supplement their Major, whereas other students may prefer to broaden their educational base by selecting Business courses in other Majors. Students who want to supplement their Majors may take up to 9 hours of their Business Options from that area. Students may complete a second Major as part of their Business Options requirements. Such students should consult with staff in the Undergraduate Program Office.

Electives

This component of the program is the ELECTIVE requirement. An Elective is any three or six credit hour course freely chosen by the student from courses taught in the degree programs of other faculties and schools, excluding the Asper School of Business. Students must take at least six credit hours of Electives that meet the following criteria: 3 credit hours must be at the 2000 Level or higher and 3 credit hours must be a freely chosen course that meets the Written English “W” requirement at any level.

Business Option or Elective

This component of the program consists of 3 credit hours which may be either a Business Option or Elective but it must be at the 2000 Level or higher.

Course Requirements for ETP Joint Program Students

The course requirements for the Asper School of Business/École technique et professionelle Joint Program are as follows.

Students should register for the Foundation courses in their first year at the University of Manitoba and must achieve a minimum "C" grade in each course.

Foundation Requirements Cr. Hrs.

- 6 credit hours from: ANTH, HIST, MATH, PHIL, POLS, PSYC OR SOC (See Note 1)
- MATH 1520 or MATH 1500 (see Note 2) (3 credit hours)
- Written English Course/Elective (see Note 3) (3 credit hours)

Program Core Requirements

- MIS 2000 (3 credit hours)
- GMGT 1010 (3 credit hours)
- MSCI 2150 (3 credit hours)
- SCM 2160 (3 credit hours)
- GMGT 4010 (must be taken in final term) (3 credit hours)
- Ethics (see note 4) (3 credit hours)
- Alternative Management Studies (see Note 5) (3 credit hours)
- International Business (see Note 6) (3 credit hours)

Total Credit Hours 36

NOTES:

1) 6 credit hours from: Anthropology, History, Mathematics, Philosophy, Political Studies, Psychology, or Sociology. Courses chosen for this requirement must be independent from courses taken to fulfill other degree requirements.

2) The prerequisite for MATH 1520 or MATH 1500 is a 60 per cent in Grade 12 Pre-Calculus Mathematics 40S or equivalent or a grade of “C” in the MSKL 0100 Mathematical Skills course taught by Extended Education, or the prerequisite for MATH 1230 is a 70% in Pre-calculus Mathematics or the former Mathematics 40S (300) (70%) or the MSKL 0100 Mathematical Skills offered by Extended Education (B). Students who have been admitted into the Asper School of Business/École technique et professionelle Joint Program and who successfully complete the Mathematical Skills course may be entitled to an additional three credit hour Elective from their Business Administration diploma.

3) Students are required to select a three credit hour course to satisfy the Written English “W” requirement. The “W” course for the Foundation course requirement must be from a specific discipline (ARTS 1110, GMGT 1010 and GMGT 1020 are not considered to be from a specific discipline and therefore do not fulfil the Track 1/ Foundation Written English course requirement). Courses that satisfy the Written English requirement are listed in the chapter, General Academic Regulations and Policy.

4) All Business students must complete three credit hours of Ethics. Students may fulfill this requirement by completing one of the following courses: PHIL 2290 (6), PHIL 2750 (3), PHIL 2790 (6), PHIL 2830 (3), GMGT 3030 or GMGT 3581 (3). If a 6 credit hour course is chosen, 3 credit hours will count toward the core Ethics requirement and 3 credit hours will count as Electives.

5) Alternative Management Requirement: One of the following must be chosen: AGRI 3030 (Cooperatives in Business and Community topic only), ECON 2540, LABR 2300, NATV 3120, NATV 4220, NATV 4320, POLS 3250, POLS 3270, SOC 3838 or any one of the following Asper courses: GMGT 4210, LEAD 3030 or MKT 3246. Take careful note of any course prerequisites in your timetable planning. Course prerequisites will be waived for Asper students in the following courses: NATV 3120, NATV 4220 NATV 4320, and POLS 3270; students must contact an Asper Program Advisor before registration for the prerequisite waiver. May be taken in Year 3 or Year 4.

6) International Business Requirement: One of the following courses must be chosen: ACT 4250, INTB 2200, FIN 3450, HRR 4520, MKT 3300, MKT 3240 (Cross-Cultural Brand Management topic only) or SCM 3230.

Overall Program Requirements Cr. Hrs.

- Foundation Courses (12 credit hours)
- Program Core Courses (24 credit hours)
- Major Courses (12 credit hours)
- Business Options (2000+ level, except for language courses used as part of the International Business Major,) (9 credit hours)
- Electives (2000+ level & a “W” elective course any level) (6 credit hours)
- Business Option or Elective (3 credit hours)
- Total Credit Hours (66 credit hours)

SECTION 5.1 Accounting and Finance-Accounting

Course Descriptions 1000 Level (ACC)

ACC 1100 Introductory Financial Accounting Cr. Hrs. 3
(1 Lab required) Examination of accounting postulates underlying the preparation and presentation of financial statements.

ACC 1110 Introductory Managerial Accounting Cr. Hrs. 3
(1 Lab required). Role of accounting in creation and application of business information used by decision-makers in the management of enterprise. Prerequisite: ACC 1100 (009.110) (D). Prerequisite or Concurrent Requirement: ECON 1010 (D) and ECON 1020 (D) or the former ECON 1200 (D).

SECTION 5.2 Accounting and Finance-Accounting

Course Descriptions-2000 Level (ACC)

ACC 2010 Intermediate Accounting – Assets Cr. Hrs. 3
Accounting policies and practices dealing with calculation and measurement of assets and related reporting problems. Prerequisite: ACC 1110 (C+).

ACC 2020 Intermediate Accounting – Equities Cr. Hrs. 3
Consideration of current accounting relating to equities with attention to the accounting treatment of current and long-term liabilities, income tax allocation, share capital, and surplus. May not be held with FIN 3250 or ACC 2021. Prerequisites: (ACC 2010 (C) or ACC 2011 (C)) and (FIN 2200 (C) or FIN 2201 (C)).

SECTION 5.3 Accounting and Finance-Accounting Course Descriptions-3000 Level (ACC)

ACC 3030 Advanced Accounting Cr. Hrs. 3
Topics include: partnerships, consolidations, mergers, reporting on conglomerates, and fund accounting. Not offered every year. May not be held with ACC 3031. Prerequisites: (ACC 2010 (C) or ACC 2011 (C)) and (ACC 2020 (C) or ACC 2021 (C)).

ACC 3040 Cost Accounting Cr. Hrs. 3
Study of accounting concepts and functions as they relate to product costing, planning, control, and decision-making. Prerequisite: ACC 1110 (C+).

ACC 3080 Canadian Income Taxation Cr. Hrs. 3
(Lab required): Structure and concepts of the Canadian income tax system, calculation of income and tax thereon for individuals and corporations, introduction to planning principles. May not be held with ACC 3050 or ACC 3051. Prerequisite: ACC 1100 (C+).

ACC 3530 Accounting Information Systems Cr. Hrs. 3
Role of accounting systems in total management information systems; design and installation of accounting systems. Prerequisites: ACC 1110 or ACC 1111 (D) and MIS 2000 or MIS 2001 (D).

SECTION 5.4 Accounting and Finance-Accounting Course Descriptions 4000 Level (ACC)

ACC 4010 Auditing Cr. Hrs. 3
Study of philosophy and concepts of auditing, legal and ethical responsibilities of the auditor, basic techniques of auditing including statistical sampling and flowcharting, and the operational audit. May not be held with ACC 4011. Prerequisites: (ACC 2010 (C) or ACC 2011 (C)) and (ACC 2020 (C) or ACC 2021 (C)).

ACC 4030 Accounting Theory Cr. Hrs. 3
Examination of principles and postulates of accounting theory. Coverage of selected topics will vary from year to year depending on interests of course participants. May not be held with ACC 4031. Prerequisites: (ACC 2020 or ACC 2021 (C)) and (FIN 2200 or FIN 2201 (C)).

ACC 4040 Advanced Managerial Accounting Cr. Hrs. 3
A critical examination of managerial accounting techniques and the controllership function. Prerequisite: ACC 3040 (D).

SECTION 5.5 Accounting and Finance-Finance Course Descriptions 2000 Level (FIN)

FIN 2200 Corporation Finance Cr. Hrs. 3
An introduction to corporate finance regarding the allocation & acquisition of funds. Topics include: discounted cash flows, capital budgeting, financial instruments, cost of capital, risk-return trade-offs, market efficiency, capital structure and the use of derivatives. May not be held with FIN 2201. Prerequisite: (A grade of "D" or better in ACC 1100 or ACC 1101) and (a grade of "C" or better in MATH 1230 or MATH 1500 or MATH 1501 or MATH 1520) and (a grade of "C" or better in STAT 1000 or STAT 1001 or STAT 1150) and (a grade of "C" or better in both ECON 1010 (or ECON 1011) and ECON 1020 (or ECON 1021) or the former ECON 1200 (or the former ECON 1201)).

SECTION 5.6 Accounting and Finance-Finance Course Descriptions 3000 Level (FIN)

FIN 3240 Entrepreneurial Finance Cr. Hrs. 3
Study of entrepreneurial finance, addressing both investment and financing decisions of new ventures, covering both in theory and in practice. May not be held for credit in any program with FIN 3470 and may not be held in place of FIN 3470. Prerequisite: FIN 2200 (D).

FIN 3250 Financial Statement Analysis Cr. Hrs. 3
A study of the methods and techniques used for interpretation of annual financial reports and the significance of alternative accounting policies on reported income. Students may not hold credit for both FIN 3250 and ACC 2020. Prerequisite: ACC 1100 (D).

FIN 3270 Personal Financial Planning Cr. Hrs. 3
An introduction to financial planning techniques used in professional practice. Topics include financial assessment, income tax planning, risk management, insurance, debt and credit management, investments, retirement planning, and estate planning. Prerequisite: FIN 2200 (D).

FIN 3400 Investment Banking Cr. Hrs. 3
The practice and theory of investment banking including valuation, initial public offerings, mergers and acquisitions, and restructuring. Prerequisite: FIN 2200 (C+).

FIN 3410 Investments Cr. Hrs. 3
An introduction to investment analysis and modern portfolio theory. Topics include equilibrium in the capital markets, fixed income securities, equities and derivative instruments. May not be held with FIN 3411. Prerequisites: [A grade of "C+" or better in FIN 2200 or FIN 2201] and [a grade of "C" or better in MATH 1220 or MATH 1300 or MATH 1301 or MATH 1310] and (a grade of "C" or better in STAT 2000 or STAT 2001 or STAT 2150).

FIN 3420 Security Analysis Cr. Hrs. 3
This course provides a practical application of techniques to analyse a company for investment purposes and evaluate purchases of stock and fixed-income securities. Topics include financial statement analysis, ratio analysis, alternative methods for forecasting corporate profits and dividends, risk assessment, and valuation techniques. Prerequisites: FIN 2200 (C+).

FIN 3440 Real Estate Investments Cr. Hrs. 3
An introduction to real estate finance. Topics include valuation, financing, transaction, tax and legal issues. Prerequisite: FIN 2200 (C+).

FIN 3450 International Finance Cr. Hrs. 3
An introduction to the theory of comparative advantage, foreign exchange markets, international parity relations, international debt and equity markets, international debt operating exposures, and international capital budgeting. Prerequisite: FIN 2200 (C+).

FIN 3460 Financial Markets and Institutions Cr. Hrs. 3
A study of financial systems with emphasis on Canada. Major topics include monetary policy, financial markets, financial institutions, financial
MIS 3470 Small Business Finance  Cr. Hrs. 3
Study of the financial issues faced by small business enterprises. Prerequisite: FIN 2200 (D). May not be held with FIN 3420.

MIS 3480 Corporate Finance Theory and Practice  Cr. Hrs. 3
Intermediate Corporate Finance including the following topics: Capital budgeting theory and techniques, determination of relevant cost of capital, capital structure, dividend policy, leasing and other special topics. May not be held with FIN 3481. Prerequisites: [a grade of "C+" or better in FIN 2200 or FIN 2201] and [a grade of "C" or better in MATH 1220 or MATH 1300 or MATH 1310 or MATH 1311] and [a grade of "C" or better in STAT 2000 or STAT 2001 or STAT 2150].

SECTION 5.7 Accounting and Finance-Finance
Course Descriptions-4000 Level (FIN)

FIN 4230 Selected Topics in Finance  Cr. Hrs. 3
A study of current issues in finance. Topics considered will depend on the interests and needs of the participants. Prerequisite: FIN 2200 (C+).

FIN 4240 Financial Modeling  Cr. Hrs. 3
Spreadsheet implementation of practitioner-oriented financial models. May not be held with FIN 4230 when titled "Financial Modeling". Prerequisite: FIN 3410 (C).

FIN 4250 Behavioral Finance  Cr. Hrs. 3
Understand how human biases impact the financial decisions of market participants and the practical implications. Prerequisite: FIN 2200 (C+).

FIN 4260 Advanced Finance Theory  Cr. Hrs. 3
Theories that provide the foundation for modern corporate finance. Empirical tests of finance theories. Implications for managers. Prerequisites: FIN 3410 (D) and FIN 3480 (D).

FIN 4270 Options and Futures  Cr. Hrs. 3
Mechanics of futures, options and swaps markets. Topics include arbitrage, hedging, forward rate agreements, models of derivative valuation and value-at-risk. Prerequisite: FIN 3410 (D).

FIN 4400 Financial Management Practices  Cr. Hrs. 3
Application of theoretical models in finance to real-world problems using cases. Topics include working capital management, long-term investment and financing decisions, valuation, risk management, reorganizations and international financial management. Prerequisite: FIN 3480 (D).

SECTION 5.8 Accounting and Finance-Management
Info Systems Course Descriptions-2000 Level (MIS)

MIS 2000 Information Systems for Management  Cr. Hrs. 3
(No lab) Introduction to information systems in organizations, systems development/acquisition, and management issues concerning information technology in organizations.

SECTION 5.9 Accounting and Finance-Management
Info Systems Course Descriptions-3000 Level (MIS)

MIS 3500 Database Management Systems  Cr. Hrs. 3
Designing, developing and managing database systems, by using mainstream design methodologies and popular development tools. Prerequisites: [MIS 3510 (D)] and [COMP 1010 (C)].

MIS 3510 Systems Analysis and Design  Cr. Hrs. 3
Analyzing business tasks, processes, information and information technology, and designing information systems by employing methodologies, techniques and popular software used by information systems professionals. Prerequisites: MIS 2000 (C+).

MIS 3520 Data Communications and Networking  Cr. Hrs. 3
A study of basic data communications topics, including communication media, protocols, network security, network topologies (local and wide area networks), Web development and network management issues. Prerequisite: MIS 2000 (C+).

SECTION 5.10 Accounting and Finance-
Management Info Systems Course Descriptions
4000 Level (MIS)

MIS 4250 Advanced Topics in Management Information Systems  Cr. Hrs. 3
A study of current issues in MIS. The topics for this course will vary over time, depending on student interests, faculty interests, and student demand. Not offered every year. Prerequisite: consent of instructor.

MIS 4500 Management Information Systems Strategy  Cr. Hrs. 3
A survey of the various issues associated with managing information as a resource. Explores MIS planning frameworks and tools, and the linkages between information systems, organizational structure and organizational strategy. A survey of the various issues associated with managing information as a resource. Explores MIS planning frameworks and tools, and the linkages between information systems, organizational structure and organizational strategy. Prerequisites: at least two of the following: ACC 3530 (D), MIS 3500 (D), MIS 3510 (D), MIS 3520 (D), MIS 4250 (D).

SECTION 5.11 Warren Centre for Actuarial Studies
Course Descriptions 2000 Level (ACT)

ACT 2020 Economic and Financial Applications  Cr. Hrs. 3
A synthesis of macroeconomic issues, quantitative aspects of finance using interest theory, and insurance economics.

ACT 2120 Interest Theory  Cr. Hrs. 3
The application of calculus and probability to discrete and continuous interest functions. Key topics are the measurement of interest, present and accumulated values, and annuities. May not be held with the former ACT 3320. Prerequisite: MATH 1232 (C) or MATH 1690 (C) or MATH 1700 (B) or MATH 1710 (B). Prerequisite or co-requisite: [MATH 2720 or MATH 2721 (D)] or [MATH 2731 or the former MATH 2750 or MATH 2730 (D)] and STAT 2400 (D).

ACT 2210 Introduction to Risk Management  Cr. Hrs. 3
Mathematical tools for the quantitative assessment of risk and their application to problems encountered in risk management. Prerequisite or co-requisite: STAT 2400 (D) or consent of instructor.

SECTION 5.12 Warren Centre for Actuarial Studies
Course Descriptions 3000 Level (ACT)

ACT 3130 Actuarial Models 1  Cr. Hrs. 3
Elementary concepts respecting the quantification of the financial impact of contingent payments. May not be held with ACT 3630. Prerequisites: ACT 2120 (C+) and [STAT 3400 (D) (or the former STAT 3500 (D)).

**ACT 3230 Actuarial Models 2**  
Cr. Hrs. 3  
Intermediate and advanced concepts respecting the quantification of the financial impact of contingent payments. Not to be held with ACT 3630. Prerequisite: ACT 3130 (C+).

**ACT 3340 Financial Derivatives for Actuarial Practice**  
Cr. Hrs. 3  
Introduction of interest rate models and rational valuation of derivative securities. Prerequisite: ACT 2020 (C+) or consent of instructor.

**ACT 3530 Actuarial Models 4**  
Cr. Hrs. 3  
Survival Models, Stochastic Process Models, and Simulation Models. May not be held with the former 010.447. Prerequisite: ACT 3130 (C+). Prerequisite or Concurrent Requirement: ACT 3230 (D).

**ACT 3630 Models for Life Contingencies**  
Cr. Hrs. 6  
Knowledge of the theoretical basis of contingent payment models and the application of those models to insurance and other financial risks. Not to be held with ACT 3130 and ACT 3230. Prerequisite or co-requisite: ACT 2120 (C+); and STAT 3400 (formerly STAT 3500) (C).

**SECTION 5.13 Warren Centre for Actuarial Studies Course Descriptions 4000 Level (ACT)**

**ACT 4000 Advanced Actuarial Topics**  
Cr. Hrs. 3  
A selection of advanced topics of current actuarial interest. Prerequisite: ACT 3230 (D).

**ACT 4010 Regression Modeling in Actuarial Science**  
Cr. Hrs. 3  
Construction of generalized linear models and regression-based time series models with actuarial applications. May not be held with IDM 4050 when titled "Time Series and Regression Analysis for Management". Pre- or co-requisite: STAT 3400 (D) (or the former STAT 3500).

**ACT 4020 Short Term Actuarial Mathematics I**  
Cr. Hrs. 3  
Introduction to useful frequency and severity models, aggregate models, coverage modifications, risk measures and construction and selection of parametric models. This course covers part of the learning objectives of Short-Term Actuarial Mathematics Exam by the Society of Actuaries (SoA). May not be held with the former ACT 4140 or the former ACT 4630 Pre- or co-requisite: STAT 3400 (D) (or the former STAT 3500(D)).

**ACT 4030 Short Term Actuarial Mathematics II**  
Cr. Hrs. 3  
Introduction to useful credibility theory, insurance and reinsurance coverage, and pricing and reserving for short term insurance coverages. This course covers part of the learning objectives of Short-Term Actuarial Mathematics Exam by the Society of Actuaries (SoA). May not be held with the former ACT 4240 or the former ACT 4630. Prerequisite: ACT 4020 (C+) (or the former ACT 4140(C+)).

**ACT 4060 Actuarial Aspects of Investment Practice**  
Cr. Hrs. 3  
This course examines stochastic interest rates and tools and techniques for coping with general product issues in asset/liability management. May not be offered every year. Students may not hold credit for both ACT 4060. Prerequisites: FIN 2200 Corporate Finance (C+).

**ACT 4150 Pension Mathematics**  
Cr. Hrs. 3  
Actuarial applications for defined benefit pension plans. Actuarial cost methods, funding levels, operation of pension plans from an actuarial perspective. Students may not hold credit with ACT 7550. May not be offered every year. Prerequisite: ACT 3230 (D).

**ACT 4160 Introduction to Property and Casualty Insurance Industry**  
Cr. Hrs. 3  
The introduction to the Property and Casualty Insurance Industry and the discussion of relevant topics. Pre- or Corequisite: ACT 2120 (C+) or consent of instructor.

**ACT 4250 Managing Insurance Operations in the International Business Environment**  
Cr. Hrs. 3  
Introduction of the risks inherent in insurance products and assets, as well as the relationships between assets and liabilities across the entire operations of the global insurance enterprise. Prerequisites: FIN 2200 (C+) or consent of instructor.

**ACT 4340 Actuarial Modeling Methods 3**  
Cr. Hrs. 3  
Classical, Bayesian and Buhlmann Credibility Models. The connection between Credibility Theory and Experience Rating. Underlying assumptions for the different methods. Simulation in Estimating and Fitting Actuarial Models. May not be offered every year. Prerequisite: ACT 4020 (C+) (or the former ACT 4140(C+)).

**SECTION 5.14 Business Administration-Entrepreneurship/Small Business Course Descriptions 2000 Level (ENTR).**

**ENTR 2010 Managing the Smaller Business**  
Cr. Hrs. 3  
Small firms dominated the Canadian economic scene and contribute to the nations’ economic welfare in a major way but pose different managerial issues and problems for their owner/managers than larger organizations. This course will focus specifically on how to effectively manage and grow the smaller firm. Students may not hold credit for both ENTR 2010 and ENTR 3100. This course is not open to students in the Asper School of Business. This course is not for students who will pursue a major in Entrepreneurship/Small Business. U1 students may take this course.

**ENTR 2020 Starting a New Business**  
Cr. Hrs. 3  
This is a course for students in all Faculties who may wish to start a business of their own at some time or assess their potential for such an option. It will cover a broad range of topics to increase your understanding of what it takes to succeed in an entrepreneurial career. Students may not hold credit for both ENTR 2020 and ENTR 4100. This course is not open to students in the Asper School of Business. This course is not for students who will pursue a major in Entrepreneurship/Small Business. U1 students may take this course.

**SECTION 5.15 Business Administration-Entrepreneurship/Small Business Course Descriptions 3000 Level (ENTR).**

**ENTR 3100 Small Business Management**  
Cr. Hrs. 3  
An appreciation of the primary issues that should be considered in starting and managing a small business within the Canadian context. Students may not hold credit for both ENTR 3100 and ENTR 2010. Prerequisites: ACC 1100 (D), and MKT 2210 (D), and GMGT 2060 (formerly GMGT 2080) (D)).

**ENTR 3102 Technological Entrepreneurship**  
Cr. Hrs. 3  
An overview of the inter-relationship between technology and entrepreneurship. An appreciation of the role of technical entrepreneurship in the economy, how a technology strategy is developed, implemented and
ENTR 3104 Selected Topics in Small Business/Entrepreneurship  Cr. Hrs. 3
A study of selected areas of recent development related to small business/entrepreneurship. Topics may include innovation and creativity, venture financing, opportunity identification and recognition, franchising and entry strategies of new business, social entrepreneurship, international entrepreneurship and entrepreneurial histories (e.g. IDEA recipients). Prerequisites: none

ENTR 3106 Family Business Management  Cr. Hrs. 3
An examination of the unique challenges inherent in the management of a family business. Topics include founder relinquishment, the need for succession planning and firm regeneration, the core actors and their issues, ownership structure and estate planning. Prerequisite: GMGT 2060 (D) or GMGT 2080 (D).

SECTION 5.16 Business Administration-Entrepreneurship/Small Business Course Descriptions 4000 Level (ENTR)

ENTR 4100 New Venture Analysis  Cr. Hrs. 3
A project oriented course focusing on the identification and evaluation of viable new venture concepts and their associated risks, problems, and opportunities. Students may not hold credit for both ENTR 4100 and ENTR 2020. Students are strongly encouraged to take FIN 3240 prior to ENTR 4100. Prerequisites: MKT 2210 (D) and ACC 1110 (D) and GMGT 2060 (D) or GMGT 2080 (D).

SECTION 5.17 Business Administration-General Management Course Descriptions 1000 Level (GMGT)

GMGT 1010 Business and Society  Cr. Hrs. 3
The course will provide overarching frameworks to examine the nature, role, and importance of business in society. Key internal operations of business organizations will be discussed (e.g. finance, marketing, operations), but the majority of the course examines the relationships that business firms must balance among key stakeholders in their external environment (i.e. government, owners, customers, communities, suppliers, future generations, etc.). Students will examine various institutional contexts (e.g. economic, political-legal, and socio-cultural) and critically think about relationships between business and society, mindful considering alternative approaches to management. Special emphasis will be placed on contemporary social issues in business (e.g. sustainable development, corporate social responsibility).

SECTION 5.18 Business Administration-General Management Course Descriptions 2000 Level (GMGT)

GMGT 2010 Business Communications  Cr. Hrs. 3
The course provides an introduction to theoretical, cultural, and ethical bases of effective communication. Another goal is to develop students’ interpersonal, oral, and written communication skills at individual, group, and organizational levels. The students will also develop analytical, problem-solving, rhetorical, and critical thinking abilities required in organizational and business settings. Students are strongly recommended to take GMGT 2010 in their first 45 credit hours. Not to be held for credit with the former GMGT 2000.

GMGT 2060 Management and Organizational Theory  Cr. Hrs. 3
Examination of the underlying principles concerning the formation of organizations and their internal management. Emphasis on the study and analysis of various theoretical approaches to organization theory and management. Prerequisite: GMGT 1010 (D). Students may not hold for credit with either GMGT 2080 or GMGT 2030.

GMGT 2070 Introduction to Organizational Behaviour  Cr. Hrs. 3
Examination of the impact of human behaviour on the formal and informal organization. Topics include leadership, work groups, organizational conflict, and communications.

GMGT 2120 Business/Government Relations  Cr. Hrs. 3
Analysis of the interaction between business firms and government in the creation, modification, and implementation of government policies that affect business. Study of the ways business can influence government decision-making. Prerequisite: [ECON 1010 (D) and ECON 1020 (D)] or ECON 1200 (D).

SECTION 5.19 Business Administration-General Management Course Descriptions 3000 Level (GMGT)

GMGT 3010 Management Decision-Making  Cr. Hrs. 3
Introduces students to the decision-making process and factors that enter into making decisions, including the objectives and approaches to decision-making, the basic type of managerial decisions, and exemplifications of decision in operations. Decision making will be viewed as a multi-dimensional process involving values, psychology, sociology, social psychology, and politics. The course presents a variety of perspectives useful for making and evaluating decisions in all kinds of organizations. Prerequisites: GMGT 2070 (D).

GMGT 3030 Contemporary Social Issues in Business  Cr. Hrs. 3
Study of key issues in the relationship of business organizations and society with emphasis on the impact of management. Prerequisites: GMGT 2060 (D) or former GMGT 2080 (D) and GMGT 2070 (D).

GMGT 3160 Managerial Economics  Cr. Hrs. 3
An introduction to the economic foundation of managerial decision making, which includes pricing strategies, boundaries of the firm, investment in human capital and incentive contract design. Also offered by the Faculty of Arts as ECON 3160. May not be held with ECON 3160. Prerequisite: [a grade of “C” or better in both ECON 1010 (or ECON 1011) and ECON 1020 (or ECON 1021), or the former ECON 1200, or the former ECON 1201] and [a grade of “C” or better in MATH 1230 or MATH 1500 (or MATH 1501) or MATH 1510 or MATH 1520].

GMGT 3300 Commercial Law  Cr. Hrs. 3
General history of law, the organization of courts, the Canadian Constitution, federal and provincial legislative functions. Legal concepts and problems relating to business organization, contracts, principal and agent, negotiable instruments, common torts, and bankruptcy proceedings.

SECTION 5.20 Business Administration-General Management Course Descriptions 4000 Level (GMGT)
GMGT 4010 Administrative Policy  Cr. Hrs. 3
Studies of policies available to business enterprise; with case studies to focus attention on problems involved in formulating and administering policies with interdisciplinary considerations. Take only in final term of program or with consent of department head. Prerequisite: prior to being admitted to GMGT 4010, students must be in Year 4, in the final term prior to graduation in the Asper School and have successfully completed (with a minimum grade of (D) in each course) all 30 credit hours of courses specified in Year 2 of the 4-Year Program. Prerequisite or Concurrent Requirement: all remaining core courses specified in Year 3 and 4 of the 4-Year Program (with a minimum grade of (D) in each course).

GMGT 4110 Commercial Law 2  Cr. Hrs. 3
Aspects of the law relating to business units, including a study of the law relating to proprietorships, partnerships and corporations, and secured transactions. Not taught every year. Prerequisite: GMGT 3300 (D).

GMGT 4210 Seminar in Management and Capitalism  Cr. Hrs. 3
This course provides students with an understanding of the institutions, developments, and debates associated with modern capitalism and their implications for management. Students will explore alternative management perspectives and bi-directional interactions within the context of larger issues. It is designed to ensure that students are introduced to a variety of different perspectives, and that no single perspective is unduly privileged over others. Prerequisite: GMGT 1010 (D) or GMGT 2120 (D).

SECTION 5.21 Business Administration-Human Resources/Industrial Relations Course Descriptions 2000 Level (HRIR)

HRIR 2440 Human Resource Management  Cr. Hrs. 3
Introduction to principles and procedures in the management of human resources. Topics include diversity management, conflict resolution, employment, law, planning, job analysis, performance appraisal, staffing, compensation, union-management relations, and current issues.

SECTION 5.22 Business Administration-Human Resource/Industrial Relations Course Descriptions 3000 Level (HRIR)

HRIR 3430 Selected Topics in Industrial Relations  Cr. Hrs. 3
Analysis of specific topics or issues in the employment relationships in an industrial society. Prerequisites: [HRIR 2440 (D)] and [HRIR 3450 (D)] or consent of instructor.

HRIR 3450 Labour and Employment Relations  Cr. Hrs. 3
This course is to enhance knowledge and understanding of labour and employment relations in Canada and beyond. It addresses various issues and debates about these relations; their history, structure, and functioning; management employment relations practices; the role of labour unions; collective bargaining; and contemporary developments and alternatives.

SECTION 5.23 Business Administration-Human Resources/Industrial Relations Course Descriptions 4000 Level (HRIR)

HRIR 4410 Staffing and Management Development  Cr. Hrs. 3
A review of; employment planning; recruitment and selection; internal placement; out placement; performance appraisal; career development.

Training needs analysis, methods and evaluation. Prerequisite: HRIR 2440 (D).

HRIR 4420 Compensation  Cr. Hrs. 3
A review of the major concepts and design of compensation systems including; strategy, internal equity, external competitiveness, rewarding individual contributions, performance incentives, employee benefits, government regulations, union role in compensation; budgets and administration. Prerequisite: HRIR 2440 (D).

HRIR 4480 Collective Bargaining and Administration  Cr. Hrs. 3
Focuses on the legal framework, processes and issues pertaining to the negotiation and administration of collective agreements, building on the foundation provided by HRIR 3450. Students will learn practical strategies for collective bargaining by participating in mock collective bargaining and how to conduct in-depth analysis of grievance arbitration cases. May not be held with HRIR 4481. Prerequisites: HRIR 3450 (D) or HRIR 3451 (D).

HRIR 4520 Comparative Industrial Relations and Human Resource Management  Cr. Hrs. 3
To provide an international perspective on industrial relations (IR) and human resource management (HRM) through analysis and comparison of IR systems and HRM practice across selected countries and of current developments therein. Also covers theories and issues relevant to these topics. Students are encouraged, but not required, to complete HRIR 3450 (D) prior to taking this course.

SECTION 5.24 Business Administration-International Business Course Descriptions 2000 Level (INTB)

INTB 2200 International Management  Cr. Hrs. 3
Analysis of the practice of management in an international setting. Examines the cultural, political, and economic environments which influence managerial decision-making in an international context.

SECTION 5.25 Business Administration-Leadership Course Descriptions (LEAD)

LEAD 2010 Learning to Lead  Cr. Hrs. 3
This seminar provides students with an introduction to and understanding of effective leadership and its application to a variety of group and organizational contexts. The classes encourage interdisciplinary discussions of theoretical, philosophical, historical, and technical elements of effective leadership. The course allows students to reflect on and develop their own leadership style through interactive lectures, experiential activities, and action learning in groups and organizations in which students want to lead and be led. This seminar is intended for all students that have an interest in leadership theory and effective leadership practices. Students may not hold credit for both LEAD 2010 and ARTS 1160. Prerequisite: Students must have completed 15 credit hours of passed courses to register in LEAD 2010.

LEAD 3010 Negotiation and Conflict Management  Cr. Hrs. 3
Leaders are regularly called upon to manage conflict, promote cooperation, and resolve competing interests. With a focus on negotiation as a means of conflict resolution, this course blends contemporary research and theory with practical, first-hand experience. Students’ effectiveness as negotiators will be developed with readings and class discussions focused on the social and psychological underpinnings of negotiation, and applied with weekly hands-on experiences, ranging from bilateral bargaining games to complex, multi-issue, multilateral negotiation scenarios. Prerequisites: Year three standing (or by permission of instructor).
LEAD 3020 Team Building and Diversity  Cr. Hrs. 3
The ability to work effectively with team members is crucial to individual functioning and promotion within organizations. This course examines the structure and dynamics of teams with an aim to understanding team-building, team dynamics, diversity, and managing team conflict. Part of working effectively in teams is understanding diversity and how to encourage collaboration in diverse teams. This course will therefore cover topics related to diversity and cross-cultural awareness. Equivalent to but students may not hold credit for LEAD 3020 and GMGT 3020 with topics Diversity Management and Team Building or Diversity Management or Team Building. Prerequisites: GMGT 2060 (D) [or GMGT 2080 (D)] and GMGT 2070 (D).

LEAD 3030 Corporate, Social, and Environmental Responsibility  Cr. Hrs. 3
This course examines the responsibilities of business that accompany maximizing shareholder wealth. This includes balancing the needs of a variety of stakeholders (including owners, employees, customers, suppliers, competitors, neighbours, future generations) among a variety of forms of well-being (e.g. financial, ecological, environmental, social, spiritual, physical). Students will learn theory and best practices. Students are encouraged to take this course in the final two years of their program of studies at the I.H. Asper School of Business. Prerequisites: GMGT 1010 (D) and GMGT 2060 (D) [or GMGT 2080 (D)] (D).

LEAD 3040 Special Topics in Leadership and Organization  Cr. Hrs. 3
The content of this course will change from year to year based on: cutting edge topics, research innovations, and trends in leadership. Example topics might include: Organizational Health and Safety; Organizational Justice; Women and Leadership; Advanced Organizational Behaviour; Advanced Organizational Theory. Prerequisites: GMGT 2060 (D) [or GMGT 2080 (D)] and GMGT 2070 (D), or by permission of instructor.

LEAD 4010 Leading Change  Cr. Hrs. 3
Organizations regularly face change due to market demands, competition, and economic pressures. The ability to lead change effectively is crucial to organizational success. This course will focus on how to: understand resistance to change, manage change processes, and support employees in times of uncertainty. Prerequisites: GMGT 2060 (D) [or GMGT 2080 (D)] and GMGT 2070 (D).

LEAD 4020 Leadership, Power and Politics in Organizations  Cr. Hrs. 3
This course provides students with an introduction to and understanding of effective leadership and its application to a variety of group and organizational contexts. The course will also describe and enable students to make sense of organizations as political entities and understanding the use of power and social influence. The classes encourage interdisciplinary discussions of theoretical, historical, and practical elements of effective leadership and power. Through interactive lectures and experiential activities, students will have the opportunity to reflect on and develop their own leadership style, to understand how to use and manage power, and to recognize and apply social influence tactics. Students entering second year are strongly recommended to take LEAD 2010 prior to taking LEAD 4020. Prerequisite: GMGT 2070 (D).

SECTION 5.26 Interdepartmental Courses 2000 Level (IDM)

IDM 2980 Work Term 1  Cr. Hrs. 0
Work assignment in business, industry, or government for students registered in the Asper School of Business Co-operative option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail).

IDM 2982 Co-op Work Term 1  Cr. Hrs. 1
Work assignment in business, industry, or government for students registered in the Asper School of Business co-operative option. Prerequisite: Written permission from the Asper School of Business Co-operative Education Office. May not be held with IDM 2980.

SECTION 5.27 Interdepartmental Course Descriptions 3000 Level (IDM)

IDM 3980 Work Term 2  Cr. Hrs. 0
Work assignment in business, industry, or government for students registered in the Asper School of Business Cooperative option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail).

IDM 3982 Co-op Work Term 2  Cr. Hrs. 1
Work assignment in business, industry, or government for students registered in the Asper School of Business co-operative option. Prerequisite: IDM 2980 with a grade of P or IDM 2982 with a grade of C and written permission from the Asper School of Business Cooperative Education Office. May not be held with IDM 3980.

SECTION 5.28 Interdepartmental Courses 4000 Level (IDM)

IDM 4050 Readings in Management  Cr. Hrs. 3
Supervised readings in one of the areas of Management. Students are limited to a maximum of six hours of readings and research courses.

IDM 4070 Management Research 1  Cr. Hrs. 3
Individually supervised preparation of a detailed research proposal for an advanced study in one of the areas of Management. Students are limited to a maximum of six hours of readings and research courses.

IDM 4080 Management Research 2  Cr. Hrs. 3
Individually supervised research and preparation of a paper in one of the areas of Management based on the proposal developed in IDM 4070. Students are limited to a maximum of six hours of readings and research courses.

IDM 4980 Work Term 3  Cr. Hrs. 0
Work assignment in business, industry, or government for students registered in the Asper School of Business Co-operative option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail).

IDM 4982 Co-op Work Term 3  Cr. Hrs. 1
Work assignment in business, industry, or government for students registered in the Asper School of Business co-operative option. Prerequisite: IDM 3980 with a grade of P or IDM 3982 with a grade of C and written permission from the Asper School of Business Co-operative Education Office. Not to be held with IDM 4980.

SECTION 5.29 Marketing Course Descriptions 2000 Level (MKT)

MKT 2210 Fundamentals of Marketing  Cr. Hrs. 3
Analysis of marketing problems, emphasizing various alternatives available for achieving economic efficiency in the distribution process; public policy with respect to marketing.
### SECTION 5.30 Marketing Course Descriptions 3000 Level (MKT)

CPM methods computer applications. Prerequisite 3260 or consent of instructor.

**OPM 3650 Management of Quality and Reliability**  
Cr. Hrs. 3  
This course offers a practical introduction to modern quality assurance and reliability management concepts, methods and practices. It builds upon the relevant subject matter in basic courses in production management and prepares for positions in the field of quality and reliability management. Prerequisite: SCM 2160 (or the former OPM 2600 (D)) and STAT 1000 (C).

**OPM 3660 Operations Management in Service Organizations**  
Cr. Hrs. 3  
This course explores the applications of operations management concepts to the management of service operations. The characteristics of a service operation, while generally comparable to manufacturing a product, often place a unique demand upon the service manager. These demands, along with the analysis of actual company situations through case study applications, are emphasized. Prerequisite: SCM 2160 (or former OPM 2600) (D) and STAT 1000 (C).

**OPM 3670 POM Project in Industry**  
Cr. Hrs. 3  
An applied course, designed to bridge the gap between theoretical concepts developed in previous POM courses and current industrial practices by means of an industrial project. Prerequisites: [SCM 2160 or former OPM 2600 (D)] and STAT 1000 (C) or consent of instructor.

**SECTION 5.36 Supply Chain Management-Operations Course Descriptions 4000 Level (OPM)**

**OPM 4620 Production Management Seminar**  
Cr. Hrs. 3  
Problems, development, and application of analytical methods in production and operations management with emphasis on planning and control. Prerequisite: MSCJ 2150 (D) and SCM 2160 or OPM 2600 (D).

**SECTION 5.37 Supply Chain Management-Supply Chain Management Course Descriptions 2000 Level (SCM)**

**SCM 2160 Supply Chain and Operations Management**  
Cr. Hrs. 3  
Study of supply chain management (SCM) and operations management. Positions operations management as a critical area of study within SCM. Focuses on process approach and system design. May not hold credit for both SCM 2160 and the former OPM 2600. Prerequisites: None.

**SCM 2210 Transportation Principles**  
Cr. Hrs. 3  
Demand forecasting, cost analysis, regulation of carriers, role of transport in economic development, project appraisal and transport planning. Also offered as ABIZ 2210 by the Department of Agribusiness and Agricultural Economics. May not be held with ABIZ 2210. Prerequisite: [ECON 1010 and ECON 1020 (C)] or former ECON 1200 (D).

**SCM 2220 Selected Topics in Logistics and Transportation**  
Cr. Hrs. 3  
This course provides coverage on a number of critical topics in Supply Chain Logistics and Transportation. Areas of emphasis are based on current issues confronting managers and regulators/policy makers such as global supply chain logistics and transportation policy.

**SCM 2230 Introduction to Supply Chain Management**  
Cr. Hrs. 3  
An examination of the management activities that are necessary to ensure an efficient flow of materials, funds, and information among the various organizations in supply chains, from the acquisition of raw materials to the delivery of the finished product to the end user.

**SCM 2240 Purchasing and Supply Management**  
Cr. Hrs. 3  
Purchasing and supply management is an increasingly important element of corporate strategy as global supply chains become longer and more complex. In this course, students will learn about a major paradigm shift in purchasing, from a clerical activity to a strategic corporate function. The course covers strategic supply management, inter-organizational relationships, product and service specifications, price and cost analysis, negotiation, quality management, supply chain information technology, and other important purchasing topics, from a supply chain management perspective. Students may not hold credit for both SCM 2240 and SCM 2220 Topic: Purchasing Management.

**SCM 2250 Transportation Infrastructure Planning and Management**  
Cr. Hrs. 3  
This course introduces students to the basic principles and practices of transportation infrastructure planning and management, providing students with adequate knowledge on the nature of transportation infrastructure, its development, management structures, and policies. Through different teaching methods, this course aims to enable students to understand the major issues and challenges that transport planners, managers and policy makers are facing, and enable them to develop the ability of applying theoretical knowledge into practice. May not be held with SCM 2220 when titled “Transportation Infrastructure Planning and Management”.

**SCM 2260 Transportation Strategy and Policy**  
Cr. Hrs. 3  
This course provides students relevant fundamental knowledge on the major concepts of competitive strategies, governance and policies, as well as their application in the transportation sector. Through different teaching methods, this course aims to enable students to develop the ability to put strategic theories and policy concepts into practice within the transportation sector, both in Canada and the world. May not be held with SCM 2220 when titled “Transportation Strategy and Policy”.

**SECTION 5.38 Supply Chain Management-Supply Chain Management Course Descriptions 3000 Level (SCM)**

**SCM 3230 Global Supply Chains**  
Cr. Hrs. 3  
The course provides a global orientation to supply chain management, with a particular emphasis on the global linkages between organizations in international supply chains. Supply chain management practices in selected countries are also examined. Prerequisite: SCM 2230 (D) or SCM 3360 (D); or consent of instructor.

**SCM 3250 Airline Business**  
Cr. Hrs. 3  
This course provides a practical overview of the modern airline business from a global perspective. Topics such as airline pricing, airline alliance and airline-airport interaction will be included. May not be held with SCM 2220 when titled “Airline Business”. Prerequisite: SCM 2230 (D) or consent of instructor.

**SCM 3260 Supply Chain Sustainability**  
Cr. Hrs. 3  
This course covers supply chain sustainability. From a functional viewpoint, supply chain management (SCM) includes logistics/transportation, purchasing and certain elements of marketing. Sustainability is a multi-dimensional concept, spanning ecological, social, cultural and economic issues. The course includes a special focus on sustainable transportation. May not be held with SCM 2220 when titled “Supply Chain Sustainability”. Prerequisite: GMGT 2010 (D) or consent of instructor.

**SCM 3270 Lean Management**  
Cr. Hrs. 3

Faculty of Management 568 Undergraduate Calendar 2018-2019
Lean Management will provide students with a basic understanding of the components of Lean Management and the opportunity to practically apply the principles, methods and tools of Lean Management to real problems. Students will learn how to analyze case studies and apply course material in real-world situations. May not be held with SCM 2220 when titled "Lean Management". Prerequisites: a grade of "D" or better in SCM 2160 (or SCM 2161) or SCM 2230 or ABIZ 2520 or MSCI 2150 (or MSCI 2151) or the former OPM 2600 (or OPM 2601) or consent of the instructor.

SCM 3280 Project Management in Supply Chain  Cr. Hrs. 3
Topics covered in this course will include project initiating, planning, executing, monitoring and controlling, and closing. Following the PMI methodology, all ten knowledge areas will be covered, including: integration, scope, schedule, cost, HR, quality, risk, communication, procurement and stakeholder management. Students will learn how to analyze case studies and effectively use team work to develop strong planning and an analytical approach pertinent to project management. May not be held with SCM 2220 when titled "Project Management in Supply Chain". Prerequisites: a grade of "D" or better in SCM 2160 (or SCM 2161) or SCM 2230 or ABIZ 2520 or GMGT 1010 (or GMGT 1011) or MIS 2000 (or MIS 2001) or MSCI 2150 (or MSCI 2151) or the former OPM 2600 (or OPM 2601) or consent of instructor.

SCM 3360 Supply Chain Logistics  Cr. Hrs. 3
The course provides an international/global orientation to logistics and supply chain management. Prerequisite: MKT 2210 (D).

SECTION 5.39 Supply Chain Management-Supply Chain Management Course Descriptions 4000 Level (SCM)

SCM 4250 Beyond Business: Advanced Issues in Supply Chain Management  Cr. Hrs. 3
The material covered in this course moves beyond a business perspective and analyzes the relationship between supply chain management (SCM) and other parts of society as a whole. It examines the issues that arise as supply chain management interests with government and society. May not be held with the former SCM 4240. Prerequisite: SCM 2230 (D); or consent of instructor.

* Minimum time to graduation: Four years if admission is directly from high school and five years if admission is via University 1.

** An integrated degree that combines Music with Education; minimum time to graduation: five years in Music and Education if admission is directly from high school and six years if admission is via University 1.

SECTION 2: Admission to Music

2.1 Course Requirements for Admission from High School

Admission to the Faculty is directly from high school, although admission from University 1 is an option.

Other requirements

High school prerequisites: Music 40S is strongly recommended, while a second 40S language is recommended. Private lessons in your instrument and formal instruction in music theory and keyboard study are strongly recommended. Good academic performance in subject areas other than music is also strongly recommended. Refer to:umanitoba.ca/faculties/music/prospective/Undergraduate.html for audition information or musicadmissions@umanitoba.ca

SECTION 3: Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty has regulations and requirements, published below, which apply specifically to its students. Detailed information regarding regulations is available in the general office of the Faculty. The aim of the Bachelor of Music and Bachelor of Jazz Studies programs is to provide a basic framework of knowledge and ability; both theoretical and practical, from which either professional activities or graduate specialization can start. The Bachelor of Music four-year program contains concentrations in specified areas in the third and fourth years. After their first two years, students select the area in which their interests and abilities are strongest. The faculty offers four-year programs leading to the degree of either Bachelor of Music, with the following concentrations: Performance, Composition, History, and General Music and the five-year Integrated Bachelor of Music/Bachelor of Education, The four-year Bachelor of Jazz Studies is a direct entry program from high school. Practical study is offered in standard classical and jazz instruments and voice. Ensemble work is included in all years of the program. Music courses are available to students in other faculties and schools. Consult section 7.0 or the appropriate section of this Calendar for regulations.

3.1 Written English Requirement and Mathematics Requirement

The University's written requirement is met through any three credit hour course that fulfills the "W" requirement. The University’s mathematics requirement is met through MUSC 3230 Acoustics of Music or a three credit hour MATH 1XXX or STAT 1XXX course. These courses are listed as requirements to complete the first year of all Bachelor of Music programs and Bachelor of Jazz Studies.

3.2 Electives (Non-Music)

Students are required to take course(s) in a subject other than music for each year of the Bachelor of Music and Bachelor of Jazz Studies program to a total of 18 credit hours. With the exception of the University’s written English and Mathematics Requirements in the first year, the student is free to choose any subject but is advised to seek the advice of faculty.

3.3 Ensembles

The Faculty offers a wide variety of opportunities for participation in ensembles such as the Women’s Choir, Concert Choir, University Concert Band, University Singers, University Symphony Orchestra, University Wind Ensemble, University Jazz Orchestra, Jazz Ensembles, Opera Theatre, Chamber Ensembles, Percussion Ensemble, Musical Theatre, XIE (eXperimental Improv Ensemble), and other wind, string and keyboard combinations. Bachelor of Music students are required to participate in two ensembles each year for four years. Bachelor of Jazz Studies students are required to participate in one ensemble each year for four years. The Ensemble Committee determines placement in credit ensembles; such participation will normally be in ensembles directly relevant to the student’s major practical study area. Students from other faculties and non-university musicians are welcome to participate as space and instrumental balance allow, but all participation is at the discretion of the conductor or coach of the ensemble. Some ensembles are offered for credit in other faculties.

3.4 Scholarships

Entrance and continuing scholarships are available for Faculty students. Details may be obtained from Financial Aid and Awards or the Marcel A. Desautels Faculty of Music.
3.5 Scholastic Progress

Within the first week of the term, students will be informed of the organization of materials, the nature and timing of testing, and the proportionate weighting of marks that contribute to the final grade in all academic courses at the Marcel A. Desautels Faculty of Music. Regulations regarding the grading of all practical courses at the Faculty are contained in the Student Handbook; special attention is called to the Concert Credit and Master Class Attendance Policy which is an integral part of the grading system for Major Practical Study in each year of the program. A grade of “C” or better is required in each Music course throughout the Bachelor of Music and Bachelor of Jazz Studies programs, except where the Faculty Student Handbook states otherwise. Students who take Music elective courses and fail to achieve a minimum grade of “C” in them should repeat these courses. Due to the system of rotating electives, this may not be possible and in such a case another approved Music elective may be substituted. Supplemental examinations are not normally given in the Faculty, with the following exception; where a jury mark of “D” has been assigned in Major Practical Study, the juried examination may be reheard prior to the next registration. A sessional (September to April) Grade Point Average of less than 2.0 (C), or failure to achieve a grade of “C” or better in two Music courses will result in a student being placed on probation. While on probation, the student remains in the program but is subject to a set of conditions that are established by the Faculty of Music. A student failing to meet these conditions may be placed on suspension. Each student is permitted a maximum 21 credit hours of failed Music courses in the Bachelor of Music and Bachelor of Jazz Studies programs. Students will not be permitted to register for a required music course more than twice without the permission of the Dean.

3.6 Dean’s Honour List

Bachelor of Music and Bachelor of Jazz Studies students who achieve a sessional (September to April) Grade Point Average of 3.5 and are registered in a minimum of 80% of a full-time program in both fall and winter terms will be eligible for the Dean’s Honour List. Students who are granted incomplete or deferred status will not be eligible.

3.7 Attendance

Regular attendance is expected of all students in all courses. Any unexcused absences from ensemble or practical study courses or three unexcused absences from any other music course may result in the student being required to withdraw from the course or ensemble, or may result in a failing grade being assigned. Students absent from a class for three or more consecutive meetings due to illness may be required to present a certificate from a physician. Prior approval for extended absences from class for reasons other than illness must be obtained from the instructor and the Dean. Unexcused absence from a class test may result in a grade of zero for the test. Make-up tests may be allowed in special circumstances.

SECTION 4: Program Requirements –

Bachelor of Music, Bachelor of Jazz Studies, Years 1-4

These programs are in effect for students admitted since 1997-98. Students who entered in previous years should consult earlier calendars.

<td>3</td>
</tr>
</tbody>
</table>
Most electives are not offered every year; some are offered every other year and some are offered less frequently. The listing of a subject as an elective does not guarantee that it will always be available or that it will be possible to fit it into all of the many varied timetable combinations of full- and part-time students. There may be a maximum limit set on the number of students permitted to take an elective in a particular session. Similarly, there will be a minimum limit. If registration is below the minimum, the elective will be cancelled for the session, and those registered will be required to transfer to another elective before the course change deadline date. Students are urged to discuss their elective program with members of the faculty toward the end of their second and third years to obtain advice concerning the best choice of electives for their needs.

4.4 Core Music History Electives

Core Music History Electives

In addition to the required first-year History courses (MUSC 1004 and MUSC 1014) Bachelor of Music students must choose four additional courses (12 credit hours) from the chart below- two from column A and two from column B.

<table>
<thead>
<tr>
<th>A</th>
<th>B</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSC 3034 Medieval Music History</td>
<td>MUSC 2072 Jazz History 1</td>
</tr>
<tr>
<td>MUSC 3044 Renaissance Music History</td>
<td>MUSC 2082 Jazz History 2</td>
</tr>
<tr>
<td>MUSC 3064 Baroque Music History</td>
<td>MUSC 3090 Introduction to Ethnomusicology</td>
</tr>
<tr>
<td>MUSC 3074 Classical Music History</td>
<td>MUSC 3104 History of Opera 1: From Monteverdi to Mozart</td>
</tr>
<tr>
<td>MUSC 3084 Romantic Music History</td>
<td>MUSC 3114 History of Opera 2: From Mozart to the Modern Era</td>
</tr>
<tr>
<td>MUSC 3964 History of Western Art Music after 1900</td>
<td>MUSC 3380 From Rock to Rap and Beyond: A History of Popular Music in the 20th Century</td>
</tr>
<tr>
<td>MUSC 3974 History of Western Art Music after 1900</td>
<td>MUSC 3390: From Ragtime to Rock ‘n ’Roll: A History of Popular Music in the 20th Century</td>
</tr>
<tr>
<td>MUSC 3984 History of Western Art Music after 1900</td>
<td>MUSC 3404: From New Wave to Rave: A History of Popular Music in the Late 20th Century</td>
</tr>
<tr>
<td>MUSC 4154 History of Western Art Music after 1900</td>
<td>MUSC 4140: History of Canadian Music</td>
</tr>
<tr>
<td>MUSC 4154 History of Western Art Music after 1900</td>
<td>MUSC 4130: History of Women in Music</td>
</tr>
<tr>
<td>MUSC 4154 History of Western Art Music after 1900</td>
<td>MUSC XXXX: Topics Courses in Music History</td>
</tr>
</tbody>
</table>

Note: Not all of the above listed courses will be offered every year.

4.5 Music Minors

Music Minor for Students in Faculties other than the Faculty of Music

The music minor requires 18 credit hours of MUSC courses as follows:

<table>
<thead>
<tr>
<th>Course Number</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSC 1280</td>
<td>Musical Style &amp; Structure 1</td>
<td>3</td>
</tr>
<tr>
<td>MUSC 1290</td>
<td>Musical Style &amp; Structure 2</td>
<td>3</td>
</tr>
<tr>
<td>Music courses from List A below</td>
<td></td>
<td>12</td>
</tr>
</tbody>
</table>

Note: Acceptance into all MUSC courses is subject to space availability, consent of the instructor, and prerequisite requirements.
For a minor in music, it is recommended that MUSC 1280 (Musical Style & Structure 1) and MUSC 1290 (Musical Style & Structure 2) be taken before all other courses in List A.

**Note:** Completion of a minor in music does not satisfy the “teachable minor” required for admission to the After Degree B.Ed. Program in middle years and senior years.

### List A

</tr>
</tbody>
</table>
MUSC 4182  Jazz Ensemble 4  2
MUSC 4190  Ensemble  2

**NOTES:**
1. All Ensemble courses are 2 credit hours each.
2. Students may take a maximum of three ensemble courses as part of a minor in music.
3. Participation in ensembles is determined by audition.

### 4.6 Voluntary Minors

**Effective Fall 2015:**

All undergraduate Faculty of Music students may declare and complete a minor from faculties, schools, departments and interdisciplinary programs in which a minor is offered, provided the minor constitutes a minimum of 18 credit hours. Please contact a Faculty Advisor for more information and program planning.

### SECTION 5: Bachelor of Music (Music Education)

#### 5.1a. Early/Middle Years Concentration

Total Credit Hours: 30

Further information about the integrated program is in the chapter for the Faculty of Education.

6.6 Teachable Minors

Currently under review.

SECTION 7: Post-Baccalaureate Diploma in Performance

The Marcel A. Desautels Faculty of Music offers a Post-Baccalaureate Diploma in Performance designed for musicians who wish to further their performance skills in preparation for further study or professional activity. The unique features of the PBDP program are that students can design their own program of study and tailor it to their own areas of interest. They may take courses at the Faculty as well as in other faculties and schools at the University of Manitoba.

7.1 Admission Requirements

Applicants for Admission must submit the completed application form and fee, and must possess a Bachelor of Music degree or a Conservatory Diploma taken in residence. They must also pass an entrance audition, which requires the performance of three works of contrasting styles and/or historical periods appropriate to the audition medium. This audition would normally be held in person, but video auditions may be accepted where distance is a prohibitive factor. Application materials which misrepresent the level of performance ability will be treated as fraudulent, resulting in dismissal from the program. Admission may not be possible for all qualified applicants, as it is dependent on the number of spaces available, the major practical study area, and instructor availability. Applicants who hold the Post-Baccalaureate Diploma in Performance from the University of Manitoba (or an equivalent Post-Baccalaureate one-year program from another institution) may apply for a second PBDP if studying a different applied instrument than that of their first PBDP in their Major Practical Study, and Recital courses, and if the remaining course credits taken do not duplicate those of the first PBDP.

7.2 Admission Procedures

Applications are made through the University’s “Apply Yourself” system and creation of a UMConnect profile. Application deadlines are: February 15 to begin a program in September (Fall Term), or June 15 to begin a program in January (Winter Term).

All those who complete the application and provide the required documentation are granted an audition. Audition dates are scheduled as required.

It is recommended that students be admitted for a program start in Fall Term.

7.3 Program Requirements

MUSC 5400 Major Practical Study, 6 credit hours
MUSC 5560 Recital, 6 credit hours
MUSC 5180 Ensemble, 3 credit hours
Electives: chosen from available 3000 and 4000 level courses recommended by the advisor and approved by the Faculty, 15 credit hours

Total Credit Hours: 30

Note: A minimum of 18 credit hours must be taken in the Marcel A. Desautels Faculty of Music (although all 30 may be taken within the Faculty).

Reminder: While Faculty staff and faculty are available to clarify Faculty and university regulations and degree requirements, it is the student's responsibility to ensure that diploma and program requirements are met.

7.4 Academic Standing

Regulations for the Post-Baccalaureate Diploma program regarding academic standing, scholastic progress, attendance, required GPA, probation and suspension will follow those governing the Bachelor of Music and Bachelor of Jazz Studies programs as outlined in the Faculty Student Handbook.

7.5 Maximum Time Limits

Expected time to complete program: 1 year. The maximum time allowed for completing the Post-Baccalaureate Diploma program is 3 years. The Dean may grant extensions for medical or compassionate reasons. Medical: A letter from the student’s physician stating the diagnosis and treatment with projected recovery. Compassionate: A letter from the student outlining the reasons for the extension showing that extenuating circumstances beyond the student’s control have contributed to the need for an extension. Students will not be permitted to transfer for credit any
7.6 Courses Available

Undergraduate 3000 and 4000 level courses approved by the Dean may be used as electives in designing the program of study. Students will register for their courses after their program has been determined in consultation with their major practical study teacher who will act as academic advisor during the Post-Baccalaureate Diploma program. Students may not count toward the PBDP any courses that counted for credit in a previous degree.

7.7 Credit Transfer

The Student Advisor in the faculty will process transfer of credits into the PBDP program. A maximum of 12 credit hours of courses may be transferred into the PBDP program provided that they have not counted toward any previous degree. A minimum of 18 credit hours must be taken within the Faculty, although up to the full 30 credit hours of the diploma program may be taken within the Faculty. Transfer of credits from the PBDP program into the Master of Music processed through the Faculty of Graduate Studies. Courses may not be counted for more than one degree, and may be transferred from the PBDP to the Master of Music only if they have not been counted toward the PBDP, or more than the minimum credit hours have been taken.

7.8 Assessment

Student Assessment: Type of evaluation: Academic freedom dictates that there will be variation between classes according to the professor’s preferred systems, approaches, materials, readings, and assignments. However, the University of Manitoba regulations as outlined in the General Calendar state that within the first week of lectures, instructors must inform the class of the method of evaluation to be used in each course. Minimum Grade Requirements: In the Faculty students must attain a grade of “C” or higher for a course to count toward a degree, except in the case of Recital where a minimum of “B” is required. The PBDP program will be governed by these regulations, as outlined in the Student Handbook. Should the student transfer to another faculty in the university that faculty’s regulations would apply relating to transfer of credit. Successful completion of the program will be achieved by receiving a “C” or higher in 30 credit hours. Teacher Assessment: The SEEQ course evaluations will be used in the PBDP program for academic courses, and the Faculty’s specialized forms will be used for the performance-related courses.

SECTION 8: Offerings for Non-Music Students

8.1 Courses Offered in the Bachelor of Music and Bachelor of Jazz Studies Program for Students in Other Faculties

Some courses are offered outside the Bachelor of Music and Bachelor of Jazz Studies programs for students in other faculties. For information, contact the Faculty of Music Student Advisor.

Two courses are available without prerequisites or special permission from Music, for non-music students:

MUSC 1050 - Well-Tempered Concert-Goer, 3 credit hours, may be used towards a Music Minor
MUSC 1930 - Rudiments of Music, 3 credit hours, is not applicable to a Music Minor

For information on completing a Music Minor in another faculty, please refer to Section 4.5 in the Faculty of Music calendar.

SECTION 9: Music Course Descriptions 1000 Level

MUSC 1004 Introduction to Music in History 1 Cr. Hrs. 3

A survey of Western music from early monophony to c. 1750 through an examination of genres and aesthetic foundations. The course will include comparison to non-Western musical traditions.

MUSC 1014 Introduction to Music in History 2 Cr. Hrs. 3

A continuation of MUSC 1004, covering the eras from c. 1750 to the present. A survey of Western music from c. 1750 to the present through an examination of genres and aesthetic foundations. The course will include contemporary art music and comparison to non-Western musical traditions. Prerequisite: MUSC 1004 or consent of the Faculty of Music.

MUSC 1050 The Well-Tempered Concert-Goer Cr. Hrs. 3

This course is an introduction to the art of music with the listening component based on attendance at live performances by Winnipeg's superior performing ensembles. Topics include instruments of the orchestra, musical materials, forms and structures, historical periods and biographical information on composers. This course may not be used for credit towards the Bachelor of Music or Bachelor of Jazz Studies degree.

MUSC 1110 Music Theory 1 Cr. Hrs. 3

This course is designed to develop fluency in the writing and recognition of the elements of music: melodic and harmonic intervals, modes and scales, rhythm and metre, triads and inversions, and the principles of melodic and homophonic design. This course is normally restricted to students admitted to the Bachelor of Music or Bachelor of Jazz Studies program. Non-Music students will only be admitted if there is sufficient room in the class. Prerequisite: MUSC 1930 with a grade of “C” or better, or knowledge of music rudiments demonstrated by a rudiments test administered by the Faculty of Music before the first day of classes.

MUSC 1120 Music Theory 2 Cr. Hrs. 3

An examination of the idioms of vocal melody through the writing and analysis of duple paraphrase, duple- and syncopated-rhythm counter-point in two parts, and tonal homophony leading to the Chorale phrase and Bar form. Prerequisite: a grade of “C” or better in MUSC 1110.

MUSC 1180 Ensemble Cr. Hrs. 2

Participation in University Symphony Orchestra, University Wind Ensemble, Women’s Choir, Concert Choir, University Jazz Orchestra, University Concert Band or University Singers, as is appropriate to the student’s background and/or major applied area (placement to be determined by ensemble committee).

MUSC 1182 Jazz Ensemble 1 Cr. Hrs. 2

Participation in jazz ensemble(s) as assigned by the ensemble committee.

MUSC 1190 Ensemble Cr. Hrs. 2

Participation in a Faculty of Music Ensemble other than the one designated in MUSC 1180 (placement to be determined by the Ensemble Committee).

MUSC 1192 Jazz Rhythm Performance Techniques Cr. Hrs. 2

A practical approach to rhythmic proficiency in jazz, including emphasis on rhythmic and harmonic etudes, standard song form interpretation, interaction, call and response language for jazz performance.

MUSC 1280 Musical Style and Structure 1 Cr. Hrs. 3

An integrated study of the history and theory of Western music to 1750. Prerequisite: MUSC 1930 or Conservatory Canada Grade 4 Theory or RCM Advanced Rudiments or consent of the Faculty of Music. Continuation in the Music Minor requires a grade “C” or better in this course. This course may not be used as credit towards the Bachelor of Music or the bachelor of Jazz Studies degree.

MUSC 1290 Musical Style and Structure 2 Cr. Hrs. 3

An integrated study of the history and theory of Western music from 1750 to the present. Prerequisite: MUSC 1280 (or 033, 128) or consent of the Faculty of Music. Continuation in the Music Minor requires a grade of “C” or
This course may not be used for credit towards the Bachelor of Music or the Bachelor of Jazz Studies degree.

**MUSC 1384 Musicianship 1**  
A practical approach to the cultivation of critical aural perception, specifically, to develop the student’s sight-singing, transcription and keyboard skills. Not to be held with MUSC 1380. For music students only.

**MUSC 1394 Musicianship 2**  
A continuation of MUSC 1384. Prerequisite: MUSC 1384. Not to be held with MUSC 1390. For music students only.

**MUSC 1400 Major Practical Study**  
Individual instruction in one of the following: any of the standard orchestral instruments (strings, woodwinds, brasses, percussion), classical guitar, harp, harpsichord, lute, organ, piano, recorder composition or voice. An important constituent of the grading procedure for this course is performance in, and attendance at, the recitals/concerts of the Faculty of Music. For Music students only.

**MUSC 1404 Introduction to Composition 1**  
A study of contemporary theoretical and practical approaches to rhythm, pitch, timbre, texture and form. For Music students only or with permission from the Faculty of Music.

**MUSC 1414 Introduction to Composition 2**  
A continuation of MUSC 1404 Introduction to Composition 1. Prerequisite: MUSC 1404. For Music students only or with permission from the faculty of Music.

**MUSC 1460 Minor Practical Study**  
Individual instruction in an area other than that selected for MUSC 1400 or in composition by special permission. Written consent of the director is required prior to registration.

**MUSC 1930 Rudiments of Music**  
An introduction to fundamental aspects of music such as sound generation, notation, melodic and harmonic construction, with emphasis on an aural approach. This course may not be used for credit towards the Bachelor of Music or the Bachelor of Jazz Studies degree.

**SECTION 9: Music Course Descriptions-2000 Level**

**MUSC 2072 Jazz History 1**  
A broad survey of the development of jazz and early popular styles of the 20th Century up until the early 1950s. This course is designed to reveal the origins of modern jazz and conventional jazz performance practices. Prerequisite: MUSC 1014 or consent of the Faculty of Music.

**MUSC 2082 Jazz History 2**  
A broad survey of jazz styles from 1950 to the present, with an emphasis on the development of contemporary performance practices. Prerequisite: MUSC 2072 or consent of the Faculty of Music.

**MUSC 2100 Introduction to Music Teaching and Learning**  
This course provides an introduction to philosophical, sociological, and psychological perspectives relevant to music teaching and learning, including reflective practice, development of music teacher identity, and critical analysis of pedagogical principles.

**MUSC 2110 Music Theory 3**  
An examination of the idioms of instrumental melody through the writing and analysis of triple paraphrase, triple- and quadruple-rhythm counterpoint in two parts, and chromatic homophony leading to the Minuet and binary form. Prerequisite: MUSC 1120 or the consent of the Faculty of Music.

**MUSC 2112 Jazz Theory 1**  
Cr. Hrs. 3  
This course is designed to develop fluency in the writing and recognition of the elements of jazz: melodic and harmonic intervals, modes and scales, rhythm and meter, harmonic structure, and the principles of melodic and homophonic design. Prerequisite: MUSC 1120 or consent of the Faculty of Music.

**MUSC 2120 Music Theory 4**  
Cr. Hrs. 3  
An examination of the diffusion of tonality in instrumental textures through the writing and analysis of chromatic paraphrase, florid counterpoint in two parts and chromatically-extended homophony leading to the Cavatina and ternary form. Prerequisite: MUSC 2110 or consent of the Faculty of Music.

**MUSC 2122 Jazz Theory 2**  
Cr. Hrs. 3  
A continuation of Jazz Theory 1. New topics will include transcription analysis, transposition of lead sheets, modal and substitute harmony. Prerequisite: MUSC 2112 or consent of the Faculty of Music.

**MUSC 2180 Ensemble**  
Cr. Hrs. 2  
Participation in a University Symphony Orchestra, University Wind Ensemble, Women's Choir, Concert Choir, University Jazz Orchestra, University Concert Band or University Singers, as is appropriate to the student's background and/or major applied area (placement to be determined by ensemble committee). Prerequisite: MUSC 1180 or consent of the Faculty of Music.

**MUSC 2182 Jazz Ensemble 2**  
Cr. Hrs. 2  
Participation in jazz ensemble(s) as assigned by the ensemble committee. Prerequisite: MUSC 1182 or consent of the Faculty of Music.

**MUSC 2190 Ensemble**  
Cr. Hrs. 2  
Participation in a Faculty of Music Ensemble other than the one designated in MUSC 2180 (placement to be determined by Ensemble Committee). Prerequisite: MUSC 1190 or consent of the Faculty of Music.

**MUSC 2192 Jazz Improvisation 1**  
Cr. Hrs. 2  
A course designed to give the student practical application of rhythmic devices, rhythmic modes, melodic and harmonic devices, scales, chords, and substitutions in the context of song forms, song fragments, repertoire. The student will be required to keep a journal of melodic devices and original jazz compositions. Prerequisite: MUSC 1120 or consent of the Faculty of Music.

**MUSC 2384 Musicianship 3**  
Cr. Hrs. 3  
A continuation of MUSC 1394. Prerequisite: MUSC 1394. Not to be held with MUSC 2380. For music students only.

**MUSC 2394 Musicianship 4**  
Cr. Hrs. 3  
A continuation of MUSC 2384. Prerequisite: MUSC 2384. Not to be held with MUSC 2390. For music students only.

**MUSC 2400 Major Practical Study**  
Cr. Hrs. 6  
Individual instruction, normally in the area chosen in MUSC 1400. An important constituent of the grading procedure for this course is performance in and attendance at the recitals/concerts of the Faculty of Music. For Music students only. Prerequisite: MUSC 1400 or MUSC 1414.

**MUSC 2460 Conducting**  
Cr. Hrs. 3  
The principles and development of baton technique and expressive gestures. Fundamentals of vocal and instrumental score reading, preparation and interpretation. Prerequisites: MUSC 1120 or equivalent, or consent of the Faculty of Music.

**MUSC 2480 Minor Practical Study**  
Cr. Hrs. 3  
Individual instruction in an area other than that selected for MUSC 2400. Normally a continuation of MUSC 1460. Written consent of the director is required to register.
SECTION 9: Music Course Descriptions-3000 Level

MUSC 3034 Medieval Music History Cr. Hrs. 3
A study of music history with emphasis on historical, stylistic, and cultural developments and issues of the Middle Ages. May not be held with the former MUSC 1070 or the former MUSC 3054. Prerequisite: MUSC 1014 or consent of the Faculty of Music.

MUSC 3044 Renaissance Music History Cr. Hrs. 3
A study of music history with emphasis on historical, stylistic, and cultural developments and issues of the Renaissance. May not be held with the former MUSC 1070 or the former MUSC 3054. Prerequisite: MUSC 1014 or consent of the Faculty of Music.

MUSC 3050 Research Methods Cr. Hrs. 3
Techniques of bibliography and expository writing in music. Minor research projects in selected areas; the use of primary and secondary sources.

MUSC 3064 Baroque Music History Cr. Hrs. 3
A history of European art music from the late 16th to the early 18th centuries (the so-called Baroque period) beginning with the invention of opera and the monodic and concerted styles in Italy and their subsequent adoption in the rest of Europe and the emergence of national schools and culminating in the works of Bach and Handel. Prerequisites: MUSC 1014 or consent of the Faculty of Music. Not to be held with MUSC 1080.

MUSC 3074 Classical Music History Cr. Hrs. 3
A history of European art music from the early-18th to the early-19th centuries (the so-called Classical period) beginning with the innovations of Neapolitan opera and sinfonia their subsequent adoption in the rest of Europe, culminating in the Viennese school of Haydn, Mozart and Beethoven. Prerequisites: MUSC 1014 or consent of the faculty of Music. Not to be held with MUSC 2070.

MUSC 3084 Romantic Music History Cr. Hrs. 3
A study of the changing styles, forms and contexts of music from the late 18th century to 1915 (the Romantic Period). Prerequisites: MUSC 1014 or consent of the Faculty of Music. Not to be held with MUSC 2080.

MUSC 3090 Introduction to Ethnomusicology Cr. Hrs. 3
A study of style, performance methods and social role of selected non-Western and indigenous Western music, with particular emphasis on native Canadian music, through readings in field studies and methodology. Prerequisite: MUSC 1014.

MUSC 3100 Opera Repertoire Cr. Hrs. 3
The nature of the opera, its beginnings and development to modern times.

MUSC 3102 Composition, Technology and Improvisation for Music Educators Cr. Hrs. 3
This course explores the development of musical creativity through active participation in composition, improvisation, and informal music learning. Students will engage with a variety of activities, strategies and tools appropriate for numerous music education contexts.

MUSC 3104 History of Opera I: from Monteverdi to Mozart Cr. Hrs. 3
A history of opera from its origins to the late eighteenth century, tracing various styles, genres and composers through representative works. Prerequisite: MUSC 1014 or consent of the Faculty of Music. Not to be held with MUSC 3130. Prerequisite: A grade of “C” or better in MUSC 1930, or consent of the Faculty of Music.

MUSC 3108 Kodály Music Education 1 Cr. Hrs. 3
An introduction to contemporary Kodály-inspired pedagogy for preschool and early years contexts. In addition to exploring philosophy, practice, and materials for music teaching and learning course participants will have opportunities to develop their personal vocal, musicianship, and conducting skills. Prerequisite: a grade of “C” or better in MUSC 1930, or consent of the Faculty of Music.

MUSC 3112 Jazz Composition and Arranging 1 Cr. Hrs. 3
A study of the fundamentals of part writing such as instrument range and transposition, various styles of unison writing, simple harmonic writing, melodic, harmonic and rhythmic devices along with standard and non-standard song structures. Course will culminate in a recital of student compositions and arrangements. Prerequisite: MUSC 2122 or consent of the Faculty of Music.

MUSC 3114 History of Opera II: from Mozart to the Modern Era Cr. Hrs. 3
A history of opera from the late 18th century and the masterpieces of Mozart to the present, tracing the various styles, genres and composers through representative works. Prerequisite: MUSC 1014 or consent of the faculty of Music.

MUSC 3150 Orchestration Cr. Hrs. 3
A study of the technical capabilities and tonal characteristics of orchestral instruments, as well as practical scoring and arranging for various groups, from chamber to full orchestra and band. Prerequisite: MUSC 2120 or MUSC 2122 or consent of the Faculty of Music.

MUSC 3180 Ensemble Cr. Hrs. 2
Participation in University Symphony Orchestra, University Wind Ensemble, Women’s Choir, Concert Choir, University Jazz Orchestra, University Concert Band or University Singers, as is appropriate to the student’s background and/or major applied area (placement to be determined by ensemble committee). Prerequisite: MUSC 2180 or consent of the Faculty of Music.

MUSC 3182 Jazz Ensemble 3 Cr. Hrs. 2
Participation in jazz ensemble(s) as assigned by the ensemble committee. Prerequisite: MUSC 2182 or consent of the Faculty of Music.

MUSC 3190 Ensemble Cr. Hrs. 2
Participation in a Faculty of Music Ensemble other than the one designated as appropriate to MUSC 3180 (placement to be determined by Ensemble Committee). Prerequisite: MUSC 2190 or consent of the Faculty of Music.

MUSC 3192 Jazz Improvisation 2 Cr. Hrs. 2
A continuation of Jazz Improvisation 1. Rhythmic devices, rhythmic modes, melodic and harmonic devices, scales, chords and substitutions in the context of song form, song fragments, repertoire. The student will be required to keep a journal of melodic devices and original jazz compositions. Prerequisite MUSC 2192 or consent of the Faculty of Music.

MUSC 3230 Acoustics of Music Cr. Hrs. 3
A study of the physical basis of music; consideration of the nature of musical sound, tone production of typical musical instruments, scales, and temperaments, and architectural acoustics. Experiments and projects.

MUSC 3270 Performance Skills Cr. Hrs. 3
For performance majors in the Faculty of Music. Provides training in performance-related skills of the music profession, including such topics as acting, body awareness, self-promotion, career management, master classes, concert organizing, concert promotion and participation.

MUSC 3272 Jazz Performance Skills Cr. Hrs. 3
A course designed to equip the student with the techniques necessary to rehearse, interact and perform effectively with an ensemble in various situations.

**MUSC 3360 Topics in Music Education**  
Cr. Hrs. 3  
This course may vary from year to year depending on the needs and interests of instructors and students.

**MUSC 3380 From Rock to Rap and Beyond: A History of Popular Music in the Later 20th Century**  
Cr. Hrs. 3  
A survey of popular music in North America and Britain from the mid-sixties to the present, beginning with the two foremost bands of the British Invasion, the Beatles and Stones, and the development of folk rock. The nineties focuses on the continual mainstreaming of music on the edge of rap, alternative and world beat. Prerequisite: MUSC 1014 or consent of the Faculty of Music.

**MUSC 3390 From Ragtime to Rock 'n' Roll: A History of Popular Music in the 20th Century**  
Cr. Hrs. 3  
A survey of popular music in North America from the ragtime craze and Tin Pan Alley tradition, through the development of blues and country to the emergence of Rhythm and Blues and Rock 'n' Roll to the beginnings of the British Invasion. Prerequisite: MUSC 1014 or consent of the Faculty of Music.

**MUSC 3404 From New Wave to Rave: A History of Popular Music in the Late 20th Century**  
Cr. Hrs. 3  
A survey of popular music from the end of twentieth century, beginning with the revolutions that occurred during the late seventies and early eighties (disco and rap, punk and hardcore) that transformed pop music, setting the course for music of the two final decades of the century. Prerequisite: MUSC 1014 or consent of the Faculty of Music.

**MUSC 3442 Jazz Pedagogy 1**  
Cr. Hrs. 3  
A course designed to instruct jazz musicians on procedure and methodology for teaching jazz song form, rhythmic concepts, repertoire and history to K-8 students. Class members will teach and perform with students from the Faculty of Music Preparatory Division.

**MUSC 3470 Major Practical Study**  
Cr. Hrs. 6  
Individual instruction, normally in the area chosen in MUSC 2400. An important component of the grading procedure for this course is performance in and attendance at the recitals/concerts of the Faculty of Music. Prerequisite: MUSC 1014, MUSC 1120, MUSC 1394, and MUSC 2400. For Music students only.

**MUSC 3480 Minor Practical Study**  
Cr. Hrs. 3  
Individual instruction in an area other than that selected for Major Practical Study. Normally a continuation of MUSC 2480. Written consent from the Faculty of Music is required prior to registration.

**MUSC 3550 Recital 1**  
Cr. Hrs. 3  
The program must be approved by the applied instructor and the jury members. Prerequisite: MUSC 1014, MUSC 1120, MUSC 1394, and MUSC 2400, or consent of the Faculty of Music. For Music students only.

**MUSC 3554 Jazz Recital 1**  
Cr. Hrs. 3  
Preparation and performance of a public recital. The program must be approved by the applied instructor and jury members. Prerequisite: MUSC 1014, MUSC 1120, MUSC 1394, and MUSC 2400 or consent of the Faculty of Music. For Music students only.

**MUSC 3620 Independent Study 1**  
Cr. Hrs. 3  
Individual project designed by the student and a supervising faculty member. This study may be in an academic or applied area. Approval from the Faculty of Music is required.

**MUSC 3650 Electroacoustic Music**  
Cr. Hrs. 3  
An introduction to electroacoustic music composition with the focus on acousmatic music. The course covers sound aesthetics, historical perspective of electro-acoustic music, repertoire and basic studio techniques such as sound editing, digital signal processing, multi-channel techniques and sound mixing.

**MUSC 3690 Percussion Techniques**  
Cr. Hrs. 3  
Class instruction in percussion instruments. Development of basic playing techniques and examination of materials and procedures for individual and group instruction. Prerequisite: MUSC 2460 or consent of the Faculty of Music.

**MUSC 3730 Early Music Development**  
Cr. Hrs. 3  
Procedures and materials for the development of musicality in children through listening activities, movement, creativity, singing and classroom instruments. Prerequisite: MUSC 2460 and MUSC 3770 or consent of the Faculty of Music.

**MUSC 3770 Vocal Techniques**  
Cr. Hrs. 3  
Class instruction in vocal technique. Development of good vocal and choral sound and examination of materials and procedures for individual and group instruction. Prerequisite or Co-requisite: MUSC 2460 or the consent of Faculty of Music.

**MUSC 3780 Woodwind Techniques**  
Cr. Hrs. 3  
Class instruction in woodwind instruments. Development of basic playing techniques and examination of materials and procedures for individual and group instruction. Prerequisite: MUSC 2460 or consent of the Faculty of Music.

**MUSC 3790 Brass Techniques**  
Cr. Hrs. 3  
Class instruction in brass instruments. Development of basic playing techniques and examination of materials and procedures for individual and group instruction. Prerequisite: MUSC 2460 or consent of the Faculty of Music.

**MUSC 3800 String Techniques**  
Cr. Hrs. 3  
Class instruction in string instruments. Development of basic playing techniques and examination of materials and procedures for individual and group instruction. Prerequisite: MUSC 2460 or consent of the Faculty of Music.

**MUSC 3820 Topics in Music**  
Cr. Hrs. 3  
This course may vary from year to year depending on the needs and interests of instructors and students.

**MUSC 3830 Topics in Music**  
Cr. Hrs. 3  
This course may vary from year to year depending on the needs and interests of instructors and students.

**MUSC 3884 Introduction to Jazz for Music Educators**  
Cr. Hrs. 3  
Procedures for organizing, rehearsing, and directing small and large group jazz ensembles. Study of repertoire and performance materials, with emphasis on personal understanding of jazz improvisation and style. Prerequisites: MUSC 2460 or consent of the Faculty of Music. Not to be held with MUSC 3880.

**MUSC 3894 Guitar Techniques**  
Cr. Hrs. 3  
Class instruction in guitar technique. Development of basic techniques and examination of materials and procedures for individual and group instruction. Prerequisite: MUSC 2460 or consent of the Faculty of Music.

**MUSC 3964 History of Western Art Music After 1900**  
Cr. Hrs. 3  
A survey of the processes, contexts and conceptual constructs of Western art music from 1900 to present. Prerequisites: MUSC 1014 or consent of the Faculty of Music.
MUSC 3974 Music Theory After 1900  
A survey of music theoretical approaches, analytical techniques and compositional trends in Western art music from 1900 to the present. Prerequisite: MUSC 2120 or MUSC 2122, or consent of the Faculty of Music.

SECTION 9: Music Course Descriptions-4000 Level

MUSC 4010 French Diction and Repertoire  
Specialized instruction in French diction, translation and transcription using the International Phonetic Alphabet, with direct application to performance activities in French vocal repertoire. This course will be rotated on a three-year cycle with MUSC 4020 and MUSC 4030.

MUSC 4020 Italian Diction and Repertoire  
Specialized instruction in Italian diction, translation and transcription using the International Phonetic Alphabet, with direct application to performance activities in Italian vocal repertoire. This course will be rotated on a three-year cycle with MUSC 4010 and MUSC 4030.

MUSC 4030 German Diction and Repertoire  
Specialized instruction in German diction, translation and transcription using the International Phonetic Alphabet, with direct application to performance activities in German vocal repertoire. This course will be rotated on a three-year cycle with MUSC 4010 and MUSC 4020.

MUSC 4110 Special Area Paper  
The student will select a particular area of special interest or significance, work under supervision of a faculty member, and present results in an extended paper. Prerequisites: (MUSC 2120 or MUSC 2122), MUSC 2394 and MUSC 3470. For Music students only.

MUSC 4112 Jazz Composition and Arranging 2  
A continuation of Jazz Composition and Arranging 1. The student will write for larger ensembles, including jazz orchestra. Course will culminate in a recital of student compositions and arrangements. Prerequisite: MUSC 3112 or consent of the Faculty of Music.

MUSC 4130 History of Women in Music  
A study of the female contribution to the art of music from the Middle Ages to the present; emphasis on the changing roles of, and attitudes towards, women as composers and performers. Prerequisite: MUSC 1014 or consent of the Faculty of Music.

MUSC 4140 History of Canadian Music  
A survey of music in Canada from Colonial times to the present, encompassing both folk, popular and classical traditions.

MUSC 4154 Choral Repertoire  
A study and examination of choral repertoire for various types of choral ensembles. Prerequisites: MUSC 2460 or consent of the Faculty of Music. Not to be held with MUSC 4150.

MUSC 4160 Major Practical Study  
Individual instruction, normally in the area chosen in MUSC 3470. An important constituent of the grading procedure for this course is performance in and attendance at the recitals/concerts of the Faculty of Music. For Music students only.

MUSC 4180 Ensemble  
Participation in University Symphony Orchestra, University Wind Ensemble, Women’s Choir, Concert Choir, University Jazz Orchestra, University Concert Band or University Singers, as is appropriate to the student’s background and/or major applied area (placement to be determined by ensemble committee). Prerequisite: MUSC 3180 or consent of the Faculty of Music.

MUSC 4182 Jazz Ensemble 4  
Participation in jazz ensemble(s) as assigned by the ensemble committee. Prerequisite: MUSC 3182 or consent of the Faculty of Music.

MUSC 4190 Ensemble  
Participation in a Faculty of Music Ensemble other than the one designated in MUSC 4180 (placement to be determined by Ensemble Committee). Prerequisite: MUSC 3190 or consent of the Faculty of Music.

MUSC 4192 Jazz Improvisation 3  
A continuation of Jazz Improvisation 1 and 2. Rhythmic devices, rhythmic modes, melodic and harmonic devices, scales, intervallic devices, chords, and substitutions in the context of song forms, song fragments, repertoire. The student will be required to keep a journal of melodic devices and original jazz compositions. Prerequisite: MUSC 3192 or consent of the Faculty of Music.

MUSC 4330 Advanced Analysis  
A survey of analytical approaches to tonal and post-tonal music. Aspects of musical structure, perception and performance will be explored through readings and the analysis of major works from the core repertoire. Prerequisite: MUSC 2120 or MUSC 2122 or consent of the Faculty of Music.

MUSC 4360 Wind Repertoire  
A selected survey of wind literature from 1500 to the present. Prerequisite: MUSC 4770 and MUSC 4780, or consent of the Faculty of Music.

MUSC 4370 Wind Conducting Techniques  
A study of the psychological, philosophical and practical aspects of conducting wind ensembles at all levels. (entry to professional). Prerequisite: MUSC 4770 and MUSC 4780, or consent of the Faculty of Music.

MUSC 4380 Piano Repertoire  
A comprehensive survey of major composers and their compositions for solo Piano. (Required course for piano Performance majors)

MUSC 4390 Piano Chamber Music Literature Seminar  
A selected survey of piano chamber music.

MUSC 4430 Pedagogy and Repertoire  
A consideration of approaches to the teaching of style and technique, through an examination of the repertoire for the student's major practical study.

MUSC 4440 Vocal Pedagogy  
An exploration of the foundations of the singer’s art and craft, including the physical nature of the singing voice, stages of development, and various national, historical and individual pedagogical approaches to the teaching of singing. Required course for voice majors in Performance and General concentrations.

MUSC 4442 Jazz Pedagogy  
A course designed to instruct jazz musicians on procedure and methodology for teaching jazz song form, rhythmic concepts, repertoire and history to K-12 students. May not be held with MUSC 3442.

MUSC 4470 Major Practical Study  
Individual instruction, normally in the area chosen in MUSC 3470. An important component of the grading procedure for this course is performance in and attendance at the recitals/concerts of the Faculty of Music. Prerequisites: (MUSC 2120 or MUSC 2122), MUSC 2394 and MUSC 3470 with a grade of "C" or better in each of the courses. For Music students only.

MUSC 4480 Minor Practical Study  
Cr. Hrs. 3
Individual instruction in an area other than that selected for Major Practical Study. Normally a continuation of MUSC 3480. Written consent of the director is required prior to registration.

MUSC 4490 Piano Pedagogy  
Cr. Hrs. 3
An introduction to teaching of styles and techniques through an examination of piano repertoire. (Required course for piano and organ majors in Performance and General Concentrations.)

MUSC 4520 Coaching Skills  
Cr. Hrs. 3
Introduction to and training in philosophies and techniques of vocal coaching including both song and operatic repertoire.

MUSC 4530 Operatic Piano  
Cr. Hrs. 3
Development of skills required of an operatic pianist, including standard arias, operatic scores, working with conductors and developing an orchestral sound. May include participation in community opera events. (by audition only)

MUSC 4560 Recital 2  
Cr. Hrs. 6
Preparation and performance of a public graduation recital. The program, which must be approved by the applied instructor and jury members. Prerequisite: MUSC 2120, MUSC 2394 and MUSC 3550 or consent of the Faculty of Music. For Music Students only.

MUSC 4562 Jazz Recital 2  
Cr. Hrs. 6
Preparation and performance of a public graduation recital. The program must be approved by the applied instructor and the jury members. Prerequisite: MUSC 2082, MUSC 2122, MUSC 2394 and MUSC 3554 or consent of the Faculty of Music. For Music Students only.

MUSC 4630 20th to 21st Century Piano Repertoire  
Cr. Hrs. 3
Piano repertoire from 1900 to the present.

MUSC 4650 Interactive Computer Music  
Cr. Hrs. 3
An introduction to interactive computer music composition. The course covers different techniques for interaction between performers and a computer. Experiments will be done using major software for live MIDI and audio processing. The course also covers sound synthesis. Possibilities are given to write with either projects involving performers or multi-disciplinary projects (e.g., installation including visual elements). Prerequisite: MUSC 3650 or consent of the Faculty of Music.

MUSC 4660 Computer Assisted Composition  
Cr. Hrs. 3
An introduction to Computer Assisted Composition. The course covers a variety of mathematical models for structuring musical parameters, such as probability, iterative functions, spectral pitch organization, rule-based systems and morphological models. Different environments using the Lisp language are used as a base for experiments. Prerequisite: MUSC 1414 or consent of the Faculty of Music.

MUSC 4750 Choral Techniques 1  
Cr. Hrs. 3
Procedures for organizing, rehearsing and conducting various types of choral ensembles. Examination of performance materials. Prerequisite: MUSC 2460 and MUSC 3770 or consent of the Faculty of Music.

MUSC 4760 Choral Techniques 2  
Cr. Hrs. 3
Continued study in rehearsing and conducting standard choral ensembles. Study of repertoire and related literature. Prerequisite: MUSC 4750.

MUSC 4770 Band and Orchestral Techniques 1  
Cr. Hrs. 3
The historical development and present instrumentation of standard instrumental ensembles. Procedures for organizing, rehearsing and conducting bands and orchestras. Examination of performance and instructional materials. Prerequisite: MUSC 2460, MUSC 3790, MUSC 3780 and MUSC 3690 or MUSC 3800 or MUSC 3894 or consent of the faculty of Music.

MUSC 4780 Band and Orchestral Techniques 2  
Cr. Hrs. 3
Continued study in rehearsing and conducting standard instrumental ensembles. Study of repertoire and related literature. Prerequisite: MUSC 4770.

MUSC 4894 Advanced Guitar Techniques  
Cr. Hrs. 3
This course is an extension of MUSC 3894 with a particular focus on developing curricular resources for creative composition, diverse musical styles, and informal music learning. This course provides a brief introduction to electric guitar and ukulele. Prerequisite: MUSC 3894 or consent of the Faculty of Music.

MUSC 4896 Cultural Perspectives for Music Educators  
Cr. Hrs. 3
A study of non-Western musical practices and approaches to learning music, and implications for music teaching. This course is intended to prepare students for the diversity of the 21st century music classroom and studio.

SECTION 9: Post-Baccalaureate Course Descriptions-5000 Level

MUSC 5180 Ensemble  
Cr. Hrs. 3
Participation in a Faculty of Music ensemble as is appropriate to the student’s background and/or major applied area. (To be decided by the Major Practical Study Teacher in consultation with the ensemble committee).

MUSC 5400 Major Practical Study  
Cr. Hrs. 6
Individual instruction in the instrument area of study at the Post-Baccalaureate level.

MUSC 5560 Recital  
Cr. Hrs. 6
Preparation and performance of a public, full-length recital at the Post-Baccalaureate level. The program must be approved by the applied instructor and the jury committee judging the recital. It should include an appropriate balance of solo and chamber repertoire.
SECTION 1: Degrees and Programs offered by the Faculty of Science

1.1 Degree Offerings

1.2 Program Offerings

SECTION 2: Admission to the Faculty of Science

2.1 Direct Entry Admissions Requirements

2.2 Entrance to Science From University 1: Transiting

2.3 Transfer Students

2.4 Second Degree Students

2.5 Special / Visiting Students

2.6 Auditing Students

2.7 Returning to Science from an Extended Leave

SECTION 3: Academic Regulations

3.1 Regulations Applicable to all Programs

3.2 B.Sc. (General) Degree Academic Regulations

3.3 B.Sc. (Major) Degree Academic Regulations

3.4 B.Sc. (Major) Cooperative Option Academic Regulations

3.5 B.Sc. and B.C.Sc. (Honours) Academic Regulations

3.6 B.Sc. and B.C.Sc. (Honours) Cooperative Option Academic Regulations

3.7 Minors: Academic Regulations for Science Students

3.8 Dean’s Honour List, Degree with Distinction, First Class Honours

3.9 Faculty of Science Awards

3.10 Academic Advising

SECTION 4: Program Charts and Course Descriptions

4.1 Actuarial Mathematics

4.2 Biochemistry

4.3 Department of Biological Sciences

4.4 Biotechnology

4.5 Department of Chemistry

4.6 Department of Computer Science

4.7 Interdisciplinary Courses in Forensic Science and Science

4.8 Genetics Program

4.9 Department of Mathematics

4.10 Department of Microbiology

4.11 Department of Physics and Astronomy

4.12 Psychology Program

4.13 Department of Statistics

4.14 Courses offered in other Faculties and Schools

4.15 Resources for students interested in related fields of study / occupations

SECTION 1: Degrees and Programs offered by the Faculty of Science

1.1 Degree Offerings

<table>

### SECTION 2: Admission to the Faculty of Science

#### 2.1 Direct Entry Admissions Requirements
To enter the Faculty of Science directly from high school, a student must have:

1. Manitoba high school graduation with five full credits at the Grade 12 level in courses designate S, G, or U.

2. A minimum 85% average over the following, with no less than 60% in each course:
   a. English 40S
   b. Pre-Calculus Mathematics 40S (recommended) or Applied Mathematics 40S; AND,
   c. One of Biology 40S, Chemistry 40S, Computer Science 40S, or Physics 40S

Students admitted Direct Entry, enter a 4-Year undeclared Major. See Section 3.3 for details.

2.2 Entrance to Science from University 1: Transiting

To transit from University 1 to the Faculty of Science a student must have completed a minimum of 24 credit hours of courses. If a student has satisfied the minimum requirements for entry to Science, they simply perform the transit function on AURORA Student to enter the Faculty of Science. There are no fees for transiting and there is no application form required. Students who require assistance with transiting to Science from University 1, should contact the Faculty of Science office.

When a student transits from University 1 to the Faculty of Science, they may choose to transit to a 4-year Major program for which they qualify, or they may choose to transit to the General Degree. If a student wishes to enter an Honours program in the Faculty of Science they should contact the Faculty of Science office for further information or advice. Students intending to enter a four year Major or Honours program should refer to the program charts in Section 4, Programs and Courses Offered by the Faculty of Science, for courses required for entry into each program. Completion of these courses in University 1 will prepare a student to complete a four year Major or Honours program in four calendar years.

For further information please contact a Faculty of Science Academic Advisor and/or refer to the Faculty of Science applicant information brochure and the University Admissions website: www.umanitoba.ca/admissions.

Note: Students who have exceeded 36 credit hours of “F” grades will not normally be admissible until a suspension has been served. Students may contact the Faculty of Science for further information or advice.

2.3 Transfer Students

Students who wish to transfer to the Faculty of Science must have completed a minimum of 24 credit hours of post-secondary courses and have achieved a minimum cumulative grade point average of at least 2.00 to be eligible for consideration. Students who do not meet this minimum may appeal to be considered for admission on the recommendation of the Dean. Please see a Science Academic Advisor for information. External transfer students with 24 credit hours or more of transfer credit are assessed upon admission to the Faculty of Science.

Students on academic suspension as a result of work completed at another post-secondary institution will not normally be considered for admission to the University of Manitoba until the suspension has been served.

Transfer of Credit

External: Please refer to the Admissions website at umanitoba.ca/admissions or the Admissions section at the front of this Calendar. Courses completed at an external institution ten years prior to registration in the Faculty of Science are not considered for transfer credit. Students should contact a Science Academic Advisor regarding departmental transfer credit policies. All courses acceptable to the Faculty of Science must be transferred.

2.4 Second Degree Students

Students possessing a first degree from a recognized university program and who have a minimum Cumulative Grade Point Average of 2.00 (or a 2.30 adjusted grade point average – see applicant information bulletin for details on AGPA) on all previous university work are eligible for admission as Second Degree students.

Second degree requirements may be shortened by up to 60 credit hours, and once admitted to a Second Degree Program, students will be expected to conform to all continuation, residency and graduation requirements as described in Section 3.

Specific information on requirements for a Bachelor of Science degree following the completion of a degree in another faculty or school, or at another university, is available in the general office.

2.5 Special / Visiting Students

After Degree Special Students

Students who have successfully completed a first degree from a recognized university program with a Cumulative Grade Point Average of 2.00 or better are eligible for admission as Special Students.

2.6 Auditing Students

Students who wish to audit courses must have written permission from the instructor of the desired course before they can register. Auditing students must register in person in the Faculty of Science general office. The Faculty of Arts will prohibit auditors from registering in their courses until after the initial access period for registration.

2.7 Returning to Science after an Extended Leave

Students who have been away from Science for more than a year are blocked from using AURORA STUDENT. They must consult with a Science Academic Advisor. If the student has not attended another post-secondary institution, they are eligible to return. The advisor will determine academic progress, registration date and time, and discuss degree plans. Students planning a return to studies are strongly urged to contact an Advisor well in advance of the start of registration. Students who have attended elsewhere since their last registration in Science must normally re-apply for admission and be academically competitive for admission on all of their previous academic work. June 1 is the application deadline for Fall term.

Students who have graduated must re-apply (June 1 for Fall Term – Other deadlines may be found at umanitoba.ca/admissions) and be academically competitive for admission

SECTION 3: Academic Regulations

3.1 Regulations Applicable to All Programs

The provisions of the chapters: “General Academic Regulations and Requirements” and “University Policies” apply to all students. In addition,
Repeating a Course
Permission to repeat a course or a direct equivalent is no longer required. To take a course that is "not to be held" with a previously completed course still requires a registration override. Please contact the Faculty of Science General Office prior to registration.

Science students are subject to the University of Manitoba regulations (see General Academic Regulations and Policy, Repeating a Course) and the Faculty of Science degree regulations regarding eligibility to repeat a course. See below for information on Limited Access.

Repeating a course will not result in the removal of the first attempt and grade in that course from the student’s record. The course will appear on the transcript as many times as it has been repeated. The grade in all attempts of a course will be calculated as part of the student’s GPA.

There is a limit on the number of “F” grades permitted in any degree. All courses with "F" grades that are repeated count towards the limit of “F” grades permitted in a Science degree. See Academic Assessment below and B.Sc. Major and B.Sc. Honours Academic Regulations.

Students who wish to repeat a course for which they have obtained a grade of “C” or better are encouraged to discuss their choice to do so with a Science Academic Advisor prior to registration.

NOTE: In most cases, professional Faculties and Schools have specific rules governing the way repeated courses are treated in their admission process. Check the applicant information bulletin of the appropriate Faculty or School, or with the Admissions Office (424 University Centre), or with a Science Academic Advisor for information regarding how different professional programs treat repeated courses in determining admission.

Voluntary Withdrawals
The responsibility for initiating withdrawals rests solely with the student. When eligible to do so, Voluntary Withdrawals must be done through Aurora Student. No withdrawals will be permitted after the deadlines posted in the Academic Schedule. See below information on Limited Access.

There is no limit on the number of Voluntary Withdrawal hours a student can accumulate.

In exceptional circumstances, Authorized Withdrawals may be permitted on presentation of appropriate documentation. See the chapter, General Academic Regulations and Policy, section Voluntary Withdrawal from Programs and Courses or consult a Science Academic Advisor for information.

Limited Access
Effective 2018 Winter Term - Limited Access Policy in Effect

Limited Access is a registration rule that allows students who have never before completed, or voluntarily withdrawn, from a course (or its equivalent) the opportunity to register for the course before students who are repeating or have previously withdrawn from the course.

If a student has previously taken a course and received a final grade, or voluntarily withdrawn from the course (VW)*, any future attempt to take that course or its equivalent is considered a repeated course.

*A previous VW is only considered a repeat if the student voluntarily withdrew in Winter 2017 or later.

Effective Winter 2018, Limited Access will prevent a student from registering or placing themselves on the waitlist for a course (or equivalent) being repeated until the "Limited Access Term Expiry Date" has passed.

Limited Access applies for three consecutive terms following the term that the course in question was last completed or voluntarily withdrawn (VW).

During these three terms of Limited Access, a student may register to repeat a course, without permission, only when the Limited Access Term Expiry Date has passed.

Once the three terms of Limited Access has expired, any student wishing to repeat a course must request permission to do so from the Faculty of Science General Office prior to registration.

Attendance at other Institutions
Students who attend other post-secondary institutions without a Letter of Permission must reapply for admission to the Faculty of Science before the application deadline and be academically competitive for admission. Similarly, students registered in the Faculty of Science may not be registered at another academic institution at the same time unless they are registered elsewhere on a Letter of Permission. The penalty for unauthorized or undisclosed attendance may be disciplinary withdrawal or academic suspension.

For more information on Letters of Permission, refer to the Registration Information section of this calendar or to the Registrar’s Office website at: umanitoba.ca/registrar.

Academic Dishonesty
Academic dishonesty is intentional cheating, fabrication, impersonation, or plagiarism. It is also knowingly or inadvertently helping or attempting to help others to be dishonest. Academic dishonesty lowers scholastic quality and defrauds others who will eventually depend on their own knowledge and integrity.

Plagiarism or any other form of cheating on examinations, term tests, or assignments is subject to academic penalty as serious as suspension or expulsion from the faculty or university.

Students who are unsure of what constitutes academic dishonesty should refer to the regulations in General Academic Regulations and Policy, Plagiarism and Cheating, and consult with a Science Academic Advisor or a faculty member. Information about academic penalties for academic dishonesty is available on the Faculty of Science website.

Academic Assessment
Effective September 2013, each student in the Faculty of Science will be placed on academic suspension for one year, regardless if there has been evidence of improved performance, if they have more than 36 credit hours of “F” grades.

Following a one year suspension, the student may return upon application to the Faculty of Science by selecting one of the following irreversible options:

(a) to continue with no possibility of further “F” grades. Any further “F” grades will result in academic suspension for two years. (Following the two year suspension, the student may apply to the Faculty of Science to return to start afresh.)

Or

(b) start afresh, with their previous work not counting towards satisfying degree requirements. Students may appeal to transfer in up to 30 credit hours of previously completed coursework with a grade of “C” or better.
(In either case this does not mean that the previous coursework will be removed from the student history or transcript.)

**Required to Withdraw from Major or Honours**

If a student's last assessment was “Required to Withdraw from the Honours or the Major program,” they must consult a Science Academic Advisor prior to registration. An advisor will review new degree plans, determine eligibility for a desired program, and update any affected university records.

**Students on “Hold”**

If a student is on “Hold”, they are prevented from any registration transaction (including Voluntary Withdrawals) until they have cleared this status. The student must contact the Faculty of Science within the normal deadline to withdraw from a course while on “Hold”.

**Term work and Debarment**

A student is responsible for the completion of laboratory work, assignments, tests and other course work as prescribed by departments. A student who does not meet term work requirements to the satisfaction of a department may receive a warning to this effect from the department or the general office. If this warning is ignored, a student may be debarred from the course. Any student debarred from a course receives an automatic grade of “F” in that course.

**Deferred Examinations**

Students unable to write a final examination because of illness, disability, or for compassionate reasons, must file an application in the Faculty of Science general office for a deferred examination. The application must be filed within 48 hours of the examination. Appropriate documentation must be provided that verifies that the incapacity existed at the time the examination was to be written.

A deferred examination is offered in a manner prescribed by the head of the department concerned. This would normally be written within 30 working days of the last examination in that series. Any other consideration would be determined by the department head.

Students requesting deferred examinations on the grounds that the examinations conflict with vacation or holiday plans shall not be granted deferrals.

A deferred examination is not granted to a student who has written the final examination.

Deferred examinations that need to be re-deferred, and/or requests where a student is seeking a deferral in a third examination series (i.e. Fall 2008, Winter 2009, Winter 2010 – any course) must be approved by the Faculty of Science Committee on Student Standing. Students must appeal, in writing, to the Committee on Student Standing and provide precise documentation that outlines why a deferral request should be granted in their case.

**Appeals Involving Academic Regulations**

The Committee on Student Standing in Science considers appeals from students who request special consideration in respect of rules and regulations governing their programs of study and qualification for graduation.

Appeals should be addressed to: The Secretary, Committee on Student Standing, General Office, Faculty of Science, 239 Machray Hall.

**Appeal for Authorized Withdrawal**

Students who have valid and documented reasons for withdrawal, such as medical illness or compassionate circumstances, may be authorized to withdraw without penalty. Requests for authorized withdrawals must be submitted in writing to a Faculty of Science Academic Advisor. The Office of Student Advocacy located at 519 University Centre (204-474-7423, student_advocacy@umanitoba.ca) is available to provide information and assistance.

**Statute of Limitations**

Students who intend to appeal matters concerning regulations or decisions of the Faculty which may affect their registration must arrange to submit a written appeal, including pertinent documentation to the Secretary of the Faculty of Science CSS, normally within three months following the term in which the course was taken or from the date of the academic decision. Appeals will not be considered beyond three years after the end of the course, or from the date of the academic decision.

**Appeal for other Academic Concessions**

Students who believe they have grounds for academic concessions based on their personal circumstances should consult with a Science Academic Advisor. The Office of Student Advocacy located at 519 University Centre (204-474-7423, student_advocacy@umanitoba.ca) is available to provide information and assistance.

**Laboratory Registration**

If a course requires registration in both a lecture and a separate appropriate laboratory section, AURORA STUDENT will not permit you to register in that course unless you register for both.

**Laboratory Exemptions**

Students who think they are eligible for a laboratory exemption must check with the department offering the course to obtain formal consent of this. Once received, deliver the written permission to their faculty or school office, as an override may be required on their academic record. They must register for the laboratory exempt section.

It is the student's responsibility to ensure that they are eligible for a laboratory exemption. If they register for one of these courses and it is subsequently determined that they are not entitled to exemption, they will be required to register for a laboratory section. If no space remains available in the laboratory, they will be required to withdraw from the course.

**Laboratory release**

Certain Chemistry and Microbiology courses require that students check out of the laboratory before they withdraw or change lab sections. It is the students responsibility to check with the departmental office prior to making any changes to their laboratory registration. Failure to check out of the laboratory may result in the students academic records being placed on HOLD.

**3.2 B.Sc. (General) Degree Academic Regulations**

**B.Sc. (General) – Three Year Degree**

The three year General program is intended to provide diversified training in Science. The design of the program is such that a student is exposed to several areas of science at an introductory level together with a requirement for more advanced study in at least two Science areas. These requirements will ensure that a student’s program of study will have elements of breadth and depth.

This program is not intended for students who desire to practice in some field of specialization in the Sciences. Students with that intent are recommended to pursue the Honours or the four year Major program. However, the three year General program is flexible enough in most departments to allow a student to choose courses that would facilitate transferring to the four year Major program should that become desirable.
B.Sc. General Academic Regulations
A student must complete 90 credit hours with passing grades ("D" or better) in each course. Please note higher grades are usually required for prerequisite purposes. See course descriptions for details. A student must obtain a minimum grade point average of 2.00 on the 90 credit hours which constitute the degree to qualify for the degree of Bachelor of Science (General).

Students may not exceed 36 credit hours of failures.

Introductory Level Science courses (24 credit hours): Students must select 6 credit hours from each of 3 areas listed below (18 credit hours) in Group A. Additionally, students must select 6 credit hours from any courses listed in Group A and/or Group B.

NOTE: No more than 6 credit hours may be selected from any single subject area for use toward the 24 credit hours of introductory course requirements.

Group A:

Astronomy: ASTR 1810 and ASTR 1830
Biology: BIOL 1020 and BIOL 1030
Chemistry: CHEM 1300 and CHEM 1310
Computer Science: COMP 1010 (or COMP 10122) and COMP 1020
Mathematics: six credit hours chosen from:
- MATH 1200
- 3 credit hours from MATH 12101 MATH 12201 or MATH 13001 (or equivalent),
- 3 credit hours from MATH 1230 or MATH 1500 (or equivalent),
- 3 credit hours from MATH 1232 or MATH 1700 (or equivalent),
- MATH 1240

Microbiology: MBIO 1010 and MBIO 2020
Physics: PHYS 1020 or PHYS 1050; and PHYS 1030 or PHYS 1070
Statistics: STAT 10004 (or STAT 22203) and STAT 20004 or STAT 11504 and STAT 2150

Group B:

BIOL 1410, FORS 2000.

Notes:
1. MATH 1210 is intended for Engineering students and may not be held for credit with MATH 1200, MATH 1220 or MATH 1300.
2. COMP 1012 is intended for Engineering students and may not be held for credit with COMP 1010.
3. STAT 2220 is intended for Engineering students and may not to be held for credit with STAT 1000 or STAT 1150.
4. It is recommended that students intending to complete their advanced level Science subjects in Statistics or Mathematics choose STAT 1150 and STAT 2150, rather than STAT 1000 and STAT 2000. STAT 1000 and STAT 2000 may not be held for credit with STAT 1150.

Advanced Level Science Courses (36 credit hours): Effective for students entering Science September 2008 or later, to satisfy the advanced level requirements of the 3-year General Degree program, eighteen (18) credit hours at the 2000, 3000, and (or) 4000 level must be chosen from each of two of the following Science departments: Biological Sciences, Chemistry, Computer Science, Mathematics, Microbiology, Physics and Astronomy, and (or) Statistics.

Of the 36 credit hours (total) from the advanced areas of study, at least 6 credit hours must be chosen from 3000 or 4000 level courses. Students should note prerequisite requirements for upper level courses when planning their program. Appropriate courses and combinations of courses are detailed in each departmental section. Substitute courses from a department may be taken by obtaining written authorization from the chosen department.

Other Faculty Courses (12 credit hours): a minimum of 12 credit hours must be taken from outside the Faculty of Science, of which at least six credit hours must be from the Faculty of Arts. A maximum of 30 credit hours may be taken from outside the Faculty of Science for use in the General Degree program.

Elective Courses (18 credit hours): 18 credit hours of the B.Sc. General Degree are open electives.

Biological Sciences Option: Students may elect to choose all 36 credit hours of advanced level course requirements from the Department of Biological Sciences (formerly Botany and Zoology) provided they follow the specified course selections prescribed in the Biological Sciences Focus Chart - B.Sc. General.

Chemistry Option: Students may elect to choose a specific set of introductory courses, plus all 36 credit hours of the advanced level course requirements from the Department of Chemistry provided they follow the specified course selections (introductory and advanced levels) prescribed in Chemistry Focus Chart - B.Sc. General.

NOTES:
1. Students having difficulty with the interpretation of these regulations or the way in which they are applied, are urged to contact a Science Academic Advisor in the general office. Students are responsible for their own degree progress and completion.

2. Students admitted to the Faculty of Science prior to September 2008 should consult with a Science Academic Advisor about degree requirements.

B.Sc. General Degree Minimum Performance Requirements
Effective September 2013, each student in the Faculty of Science will be placed on academic suspension for one year, regardless if there has been evidence of improved performance, if they have more than 36 credit hours of "F" grades.

Following a one year suspension, the student may return upon application to the Faculty of Science by selecting one of the following irreversible options:

(a) to continue with no possibility of further "F" grades. Any further "F" grades will result in academic suspension for two years. (Following the two year suspension, the student may apply to the Faculty of Science to return to start afresh.)

Or
(b) start afresh, with their previous work not counting towards satisfying degree requirements. Students may appeal to transfer in up to 30 credit hours of coursework previously completed with a grade of "C" or better.
(In either case this does not mean that the previous coursework will be removed from the student history or transcript.)

**B.Sc. General Degree Residence Requirements**

There are two ways in which students may fulfill the minimum requirement of credit hours that must be taken at the University of Manitoba: by taking at least 48 credit hours at the University of Manitoba; or by taking at least the final 30 credit hours at the University of Manitoba. The courses used to satisfy the residence requirement must be acceptable for credit in the Faculty of Science. Residency requirements apply to both first and second degree students.

### 3.3 B.Sc. Major (Degree) Academic Regulations

Faculty of Science Direct Entry students are admitted to a 4-Year undeclared Major program. While in the undeclared Major, students will take courses to allow them to declare a specific Major or enter an Honours program. To declare a specific Major or enter an Honours program students will need to satisfy the entry requirements as outlined in Section 4, Programs and Courses Offered by the Faculty of Science.

Following the completion of 24-30 credit hours students will declare their Major program, or enter the Honours program, or they may choose to enter the 3-Year General degree. Students who do not qualify for a specific Major or Honours program will be required to move into the 3-Year General degree. Students who wish to be in a Major or Honours program but did not qualify can complete the outstanding requirements while in the General degree program and enter the program upon completion of the requirements.

**B.Sc. (Major) – Four-Year Degree**

The four-year Major programs provide in-depth study in a specific discipline and enable graduates to function competently in a career in their chosen subject area.

While this program is not intended for students pursuing graduate studies, most programs allow students to do so with a minimum of difficulty.

The four-year Major program may be pursued on a part-time basis, although it must be recognized that under those conditions students would require more than four years to complete degree requirements.

**B.Sc. (Major): Academic Regulations**

To qualify for the degree Bachelor of Science (Major), a student must complete 120 credit hours or more, with minimum grades of “C” on Major Program Specific courses (as specified by the department), “D” or better on the remaining courses, and a minimum Degree Grade Point Average of 2.00.

Program Specific courses are those identified by the department as being core to the given degree. See the Calendar entry for these departments for clarification.

At least six credit hours must be taken from outside the Faculty of Science. Students admitted to a Major program must complete six credit hours of courses from the Faculty of Arts. Students in the Major degree programs may take a maximum of 36 credit hours from outside the Faculty of Science.

**B.Sc. (Major): Entrance Requirements**

To enter a specific four-year Major program, a student must normally have achieved a minimum grade of “C+” in at least one introductory course designated by the department(s). One of the entry routes to the Physics & Astronomy Major program, has a more rigorous entry requirement than listed above; please see the calendar entry for more details. In addition, to enter a four-year Major program a student shall normally have completed at least 30 credit hours, although a student may enter on the recommendation of the department with only 24 credit hours completed.

Any student who, prior to being admitted to a four-year Major program that has completed more than 30 credit hours will be allowed to apply those excess credit hours which meet the specifications of the program to the four year Major program.

Students must attain a Degree Grade Point Average of at least 2.00 regardless of the point of entry, and must meet continuation requirements as outlined below.

**B.Sc. (Major): Continuation Requirements**

To continue in the program, a student must maintain a Degree Grade Point Average of 2.00 at each point of assessment. Students who do not meet this minimum will be required to withdraw from the Major program.

There is no minimum term course load requirement for the Major program.

**Failed courses:** Any student that exceeds 18 credit hours of failing grades after entering a Major program will be required to withdraw from that program. **Students are also subject to the academic assessment policy found in 3.1 Regulations Applicable to all Students.**

A student will be required to repeat those failed courses specified as required courses for the program; however, with the approval of the department the student may be allowed to substitute a new course for any elective course failed.

Major students reverting to the General program must fulfill all academic requirements of that degree.

**B.Sc. (Major): Residence Requirement**

To satisfy the Faculty of Science residency requirements, a student must successfully complete at least 60 credit hours at the University of Manitoba. The courses used to satisfy the requirement must be acceptable for credit in the Faculty of Science. Residency requirements apply to both first and second degree students.

**B.Sc. Double Major Programs**

Students may wish to pursue a Double-Major program in the Faculty of Science. Consultation with, in addition to specific course selection and approval from, the departments involved must occur prior to the commencement of any Double-Major program. Students must also consult with a Faculty of Science Academic Advisor prior to the start of any Double-Major program.

### 3.4 B.Sc. (Major) Cooperative Option Academic Regulations

The Major programs that offer a Cooperative Option are: Biochemistry, Biological Sciences, Biotechnology*, Chemistry, Computer Science, Genetics, Microbiology, and Statistics.

(*As of Fall 2018, admission to the Biotechnology programs has been temporarily suspended. For further information, see the Faculty of Science office.)

A cooperative education program is an arrangement whereby a student spends alternating periods in university and employment. There are several advantages to cooperative education programs for students. One benefit is that students are able to acquire both theoretical knowledge and practical experience. This experience assists them in selecting areas of specialization for their senior courses. During an employment period students can also typically earn enough to defray the cost of their university education. The
contacts developed with potential employers are also valuable to graduating students.

All regulations governing regular Major programs apply to the Cooperative Option. In addition, the following variations apply:

**Entrance**
To enter the Cooperative Option a student must be eligible to enter the Major program offered by the department.

The normal point of entry to a Major Cooperative Option is following the completion of second year in the Faculty of Science.

Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option in those departments where the demand for places exceeds the number of places available. In such situations the department reserves the right to determine and select the best qualified applicants.

**Structure and Sequencing**
The Cooperative Option consists of both academic terms and employment terms.

Each academic term can be either four months in duration or eight months in duration, as designated by the Major department.

Each employment term can be either four months in duration or eight months in duration, as designated by the Major department.

Each academic term and each employment term will commence in January, May or September.

The sequence of academic terms and employment terms is variable to suit the needs of each department, and is designated by each department.

Students are expected to follow the academic/employment term sequence defined by their department from admission through to graduation.

**Employment Term Requirements**
All Cooperative Options will include at least 12 months spent in employment terms with a department-approved employer. Normally, each employment term will be completed with one employer.

Students are required to register in the appropriate employment term course and pay the fee prior to starting their employment term. Cooperative Option students are required to submit three written employment reports on their employment term activities. These reports are due at times designated by the Major department. In order to stay in the Cooperative program, a student must obtain a grade of "Pass" for each work term report. Each Major department will provide students with instructions regarding the content and format requirements of the employment reports.

Indications of unsatisfactory performance by a student on an employment term will be thoroughly investigated by the Major department. As a result of the investigation, if benefits from further professional training are questionable, the student may be required to withdraw from the Cooperative Option. The student would then be eligible to enter the regular four year Major program or the General program.

While on an employment term, a Cooperative Option student is not permitted to take more than six hours of academic credit, and may not take more than one course at a time.

**Academic Term Requirements**
Coursework requirements of the Cooperative Option are equivalent to the coursework requirements of the four year Major program.

Cooperative Option students are expected (but are not required) to maintain a full-time course load while registered for an academic term. The “normal full load” per four-month term is three half courses (9 credit hours).

To continue in a four year Major Cooperative Option a student must attain a minimum Degree Grade Point Average of 2.00 at each point of assessment. Departments may designate courses within the four year Major Cooperative Option in which students are required to attain a grade above ‘C’. Continuation in a four year Major Cooperative Option is also contingent upon satisfactory performance in employment terms.

A student who does not meet the academic requirements for continuation in a four year Major Cooperative Option will be required to withdraw from it.

A student who receives failing grades in more than 18 credit hours following admission to the four year Major program will be required to withdraw from the Major program. Students are also subject to the academic assessment policy found in 3.1 Regulations Applicable to all Students.

Four year Major Cooperative Option students who are required to withdraw, or voluntarily revert to an alternative degree program must fulfil all academic requirements of that degree.

**3.5 B.Sc. and B.C.Sc. (Honours) Academic Regulations**

The Honours programs in the Faculty of Science are study in specific disciplines and the most heavily concentrated programs offered in the faculty. These programs lead most directly to graduate study and are in most cases prescribed extensively by the departments. A student is required to pursue this degree full-time and may be required to achieve higher grade standards than in other degree programs. The programs are regarded as professional training.

Students graduating from the Honours program in Computer Science receive the degree designation Bachelor of Computer Science (Honours), also noted as B.C.Sc. (Honours).

A student electing an Honours program will normally begin Honours work in second year and must meet the entrance requirements set out below. Honours work will consist of three years of study in prescribed courses beyond the first year and will lead to the B.Sc. (Honours) or the B.C.Sc. (Honours).

Students must complete the university written English and Mathematics requirements as described in the chapter, General Academic Regulations and Policy, of this Calendar.

Students admitted to Honours programs must complete six credit hours from the Faculty of Arts. Because many Honours programs in the Faculty of Science do not have room for electives in Years 2, 3 and 4, these six credit hours, including the three credit hours of written English, should be completed in Year 1.

**Honours Entrance Requirements**
To enter an Honours degree program, a student must have completed at least 24 credit hours, have a minimum DGPA of 3.00 (3.5 for entry to Psychology), and a grade of "B" or better in at least one course designated by the department(s). See Calendar entry for each department for specific information on entrance requirements.
Another way to gain entry to the many Faculty of Science Honours programs is through the Second Year Entry Route. If a student finds himself/herself ineligible to enter a desired Honours program following the completion of 24 or more credit hours, eligibility to enter Honours via the second year entry route can be established by taking a minimum of 18 credit hours over consecutive Fall and Winter Terms with a minimum of 9 credit hours in each term. The 18 credit hours chosen must be applicable to the program the student wishes to enter, and the student must achieve at least a "B" average on those 18 credit hours. If a student chooses to attempt more than 18 credit hours over the consecutive Fall and Winter terms, the best applicable 18 credit hours will be used to calculate whether or not the "B" average has been achieved for the purpose of assessing eligibility for entrance to the Honours program of choice. Note: Students wishing to enter an Honours program using the Second Year Entry Route must also have an overall DGPA of at least 3.00 (a 3.5 for Psychology).

Honours Continuation Requirements
To continue in an Honours degree a minimum Degree Grade Point Average of 3.00 (a minimum 3.5 is required for Psychology) is required at each point of assessment.

Students must complete a minimum of 9 credit hours in each Fall and Winter Term (or equivalent for students in the Co-operative option).

Students who do not meet the above minimum requirement will be required to withdraw from the Honours program and may be eligible to pursue the B.Sc. Major program or the B.Sc. General degree program.

Students who accumulate more than 15 credit hours of failed courses after entering the Honours degree program (regardless of the origin of the grade or if the course has been repeated) will be required to withdraw from the program. Students required to withdraw from the Honours program may be eligible to pursue the B.Sc. Major program or the B.Sc. General degree program. Students are also subject to the academic assessment policy found in 3.1 Regulations Applicable to all Students.

Honours Graduation Requirements
To qualify for the degree, Bachelor of Science (Honours), a student must complete a minimum of 120 credit hours or more with a minimum grade of C on all courses contributing to the credit hours that satisfy the program requirements. The Actuarial Mathematics, the Joint Honours in Statistics and Actuarial Mathematics, and the Joint Honours in Mathematics and Physics & Astronomy have more rigorous requirements; please see the calendar entries for more details.

Additionally, students must have a minimum degree grade point average of 3.00.

Honours Residence Requirement
A student must successfully complete a minimum of 60 credit hours at the University of Manitoba. The courses used to satisfy the requirement must be acceptable for credit in the Faculty of Science. Residency requirements apply to both first and second degree students.

Withdrawal from Honours
Honours students reverting to an alternate degree program must fulfill all academic requirements of that degree.

Double Honours Programs
Double Honours programs may be available as specified under departmental headings. Other programs may be arranged in consultation with the departments concerned.

3.6 B.Sc. and B.C.Sc. (Honours) Cooperative Option Academic Regulations

The Honours programs offering a Cooperative Option are: Biochemistry, Biological Sciences, Biotechnology*, Chemistry, Computer Science, Genetics, Microbiology, Statistics, Joint Computer Science - Mathematics, Joint Computer Science – Physics and Astronomy, and the Joint Computer Science – Statistics program.

(*As of Fall 2018, admission to the Biotechnology programs has been temporarily suspended. For further information, see the Faculty of Science office.)

A cooperative education program is an arrangement whereby a student spends alternating periods in university and employment. There are several advantages to cooperative education programs for students. One benefit is that students are able to acquire both theoretical knowledge and practical experience. This experience assists them in selecting areas of specialization for their senior courses. During an employment period students can also typically earn enough to defray the cost of their university education. The contacts developed with potential employers are also valuable to graduating students. The Honours Cooperative Option therefore offers valuable work experience and simultaneously ensures an academic program of Honours calibre.

All regulations governing regular Honours programs apply to the Cooperative Option. In addition, the following variations apply:

Entrance
To enter the Cooperative Option a student must be eligible to enter the Honours program offered by the department.

The normal point of entry to an Honours Cooperative Option is following the completion of second year in the Faculty of Science. Following that point of entry all requirements of the Cooperative Option must normally be completed in no more than four years (48 months).

Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option in those departments where the demand for placements exceeds the number of places available. In such situations the department reserves the right to determine and select the best qualified applicants.

Structure and Sequencing
The Cooperative Option consists of both academic terms and employment terms.

Each academic term can be either four months in duration or eight months in duration, as designated by the Honours department.

Each employment term can be either four months in duration or eight months in duration, as designated by the Honours department.

Each academic term and each employment term will commence in January, May or September.

The sequence of academic terms and employment terms is variable to suit the needs of each department, and is designated by each department.

Students are expected to follow the academic/employment term sequence defined by their department from admission through to graduation.

Employment Term Requirements
All Cooperative Options will include at least 12 months spent in
employment terms with a department-approved employer. Normally, each employment term will be completed with one employer.

Cooperative Option students are required to submit at least three written employment reports on their employment term activities. These reports are due at times designated by the Honours department. In order to stay in the Cooperative program, a student must obtain a grade of “Pass” for each work term report. Each Honours department will provide students with instructions regarding the content and format requirements of the employment reports.

Indications of unsatisfactory performance by a student on an employment term will be thoroughly investigated by the Honours department. As a result of the investigation, if benefits from further professional training are questionable, the student may be required to withdraw from the Cooperative Option. The student would then be eligible to enter the regular Honours program, the four year Major program or the General program.

While on an employment term, a Cooperative Option student is not permitted to take more than six hours of academic credit, and may not take more than one course at a time.

**Academic Term Requirements**

Coursework requirements of the Cooperative Option are equivalent to the coursework requirements of the Honours program with the exception of the Biochemistry, Biotechnology*, Genetics and Microbiology programs.

(*As of Fall 2018, admission to the Biotechnology programs has been temporarily suspended. For further information, see the Faculty of Science office.)

Cooperative Option students must maintain a full-time course load while registered for an academic term. The “normal full load” per four-month term is three half courses (9 credit hours).

To continue in an Honours Cooperative Option a student must attain a Degree Grade Point Average of 3.00 or higher at each point of assessment. A student’s performance will be evaluated following each academic term. In addition, the student must meet all individual course prerequisites for further study and departmental continuation and graduation requirements.

Students who accumulate more than 15 credit hours of failed courses after entering the Honours Co-op degree program (regardless of the origin of the grade or if the course has been repeated) will be required to withdraw from the program. Students required to withdraw from the Honours program may be eligible to pursue the B. Sc. Major program or the B. Sc. General degree program. Students are also subject to the academic assessment policy found in 3.1 Regulations Applicable to all Students.

Continuation in an Honours Cooperative Option is contingent upon satisfactory performance on Employment Terms.

Honours Cooperative Option students who are required to withdraw or voluntarily revert to an alternative degree program must fulfill all academic requirements of that degree.

**3.7 Minors: Academic Regulations for Science Students**

Students in B.Sc. Major and Honours programs may, if they wish, declare and complete a Minor from any department or interdisciplinary program at the University of Manitoba which offers a listed Minor. In the Faculty of Science Minors are listed in the program charts for each department and interdisciplinary program. Other available Minor requirements can be found within the appropriate sections of the departmental/school/faculty offerings. Completion of a Minor in a B.Sc. Major or Honours program is entirely optional. Students may not, however, declare both their Major and Minor from the same department/interdisciplinary program. It should be noted that for Honours students any consideration of completing a Minor should be made early on, due to restricted opportunities in later years of their programs. Completion of a Minor may require that a student take more than the minimum number of credit hours required for graduation. If they wish, students may choose to complete and declare multiple Minors in the four year Major and Honours degree programs.

The Minor is not available to students in the B.Sc. General Degree program.

A Minor will normally consist of a minimum of 18 credit hours specified by the department(s) offering the Minor. Courses required in a student’s specific Honours or Major degree program are acceptable for use in a chosen Minor, subject to the Faculty of Science regulation stating that students may not declare both their Major and Minor from the same department or interdisciplinary program.

Minors not offered by the Faculty of Science can be selected from the following list. For further information about courses required for the completion of a specific Minor, please refer to the section of the calendar that relates to the chosen area.

*Faculty of Management/Asper School of Business: For entry to the Minor, the prerequisite is a grade of “C” or better in the first 6 hours of Business courses. The Management Minor will consist of any 18 hours of credit in courses offered by the Asper School of Business. Enrolment in this program will be limited to 20 students annually. Students planning to enrol in this minor must consult a Faculty of Science Academic Advisor.

**3.8 Dean’s Honour List, Degree with Distinction, First Class Honours**

**Dean’s Honour List (all programs)**

Students who complete 12 credit hours or more, who achieve a Term Grade Point Average of 3.75 or higher will be placed on the Dean’s Honour List. The Dean’s Honour List will be calculated after each term.

**Degree with Distinction (4-Year Major Degree and 3-Year General Degree)**

To obtain a Degree with Distinction a student must achieve a final minimum Degree Grade Point Average of 3.80. The term “Degree with Distinction” will appear on the student’s parchment and the student’s transcript of marks.

**First Class Honours (Honours Degree Only)**

To graduate with First Class Honours the student must achieve a final minimum Degree Grade Point Average of 3.80. The term “First Class Honours” will appear on the student’s parchment and on the student’s transcript of marks.
### 3.9 Faculty of Science Academic Awards

Refer to the University’s Award Database for information on awards available to Faculty of Science Students:

http://umanitoba.ca/student/fin-awards/scholarships/1507.html

To be eligible for any award granted exclusively on the basis of academic performance, a student must be enrolled in 100% of a full program as defined by the department.

### 3.10 Academic Advising

Science General Office: 239 Machray Hall
Telephone: (204) 474 8256
Toll-Free: 1 800 432 1960, extension 8256
E-mail: science_advisor@umanitoba.ca
Website: www.umanitoba.ca/science
Science Advisor Availability: www.sci.umanitoba.ca/undergraduate-students/academic-resources/academic-advisors

Student Responsibility

Students must ensure that they are selecting the correct courses that will enable them to satisfy their degree requirements. Specific degree requirements are listed in the program charts found in the departmental/program sections of this chapter. Final completion of specific degree requirements is the student’s responsibility. Academic Advisors are available to answer any questions regarding a student’s academic progress.

AURORA STUDENT will not check degree requirements. Students are responsible for knowing the requirements of their degree. Consult with a Science Academic Advisor for advice and assistance if uncertain about degree requirements.

AURORA STUDENT will not prevent a student from registering in two (or more) courses that are designated as not to be held for credit with one another. It is the student’s responsibility to ensure that they are not registered for courses that are ineligible to be held for credit with one another. Read the course descriptions carefully. If unsure about a course you have selected, check with a Science Academic Advisor prior to the revision deadline. No academic concessions will be granted in this regard.

Students cannot add or change a course classification through AURORA STUDENT. Therefore, if an undergraduate student wishes to take a course as a Special Student in their degree, as an Auditor, or as a Challenge for Credit, they must add this course in person in the Science General Office within the normal deadlines for such activity.

**General Degree Program**

Students’ in the B.SC. General program are not required to contact a Science Academic Advisor before registration; however, they are strongly advised to do so. A Science Academic Advisor can answer any questions about degree progress and entry to professional faculties that may affect registration.

Students reverting from a Major or Honours program to the B.Sc. General program must consult a Science Academic Advisor prior to registration, so that their university records may be changed.

Science Academic Advisors may check students degree progress periodically. These checks are completed after registration. Reminder: It is the student’s responsibility to know and satisfy all degree requirements.

**Honours, Major, and Cooperative Options**

Honours students are required to register in a minimum of 9 credit hours during each Fall and Winter Term in which they are registered. Prior to declaring graduation, Honours, Major, and Co-op students are encouraged to have their programs checked by Science Academic Advisors on a regular basis. However, at the minimum, students must have their program checked and approved by a Science Academic Advisor prior to the start of the term they enter their program and again prior to the term they plan on completing their degree.

Students entering or changing a program must see a Science Academic Advisor so that eligibility can be checked and university records updated.

## SECTION 4: Programs and Courses offered by the Faculty of Science

### Important Course Selection Information

The courses required to complete the specific Honours, Major, and Minor programs in Science are listed in the program charts found below.

Not all courses included in the course description sections below are currently offered. The course schedule for the current academic year is available through AURORA Student. Students should note that space in Honours and Major specific courses may be reserved for students in those programs.

All Honours and Major Degree Programs (4-year degrees) offered by the Faculty of Science satisfy the University’s “M” (Mathematics) requirement.

Students registered in the 3-Year General Degree programs are responsible for ensuring that they successfully complete a course that will satisfy the University’s “M” (Mathematics) requirement.

Students in all programs are responsible for ensuring that they successfully complete a course that will satisfy the University’s “W” (Written English) requirement. It is strongly recommended that this requirement be completed in Year 1.

For a complete listing of courses that satisfy the University’s “W” and “M” requirements refer to appendix A of the General Academic Regulations and Requirements section of this Calendar.

In the Faculty of Science, unless otherwise noted, a minimum grade of “C” is required in any course listed as a prerequisite. See course descriptions.

**NOTE**: Course prerequisites may be waived with written consent of the department.

### 4.1 Actuarial Mathematics

Campus Address/General Office: 640 Drake Centre
Telephone: 204 474 6412
Email Address: warrencentre@umanitoba.ca
Website: www.umanitoba.ca/actuarial

#### 4.1.1 Program Information

This is an interdisciplinary program leading to a Bachelor of Science (Honours) degree in Actuarial Mathematics offered in collaboration with the Warren Centre for Actuarial Studies and Research of the I.H. Asper School of Business. The program covers mathematical, statistical, financial and economic concepts required to develop skills in the modelling and management of financial risk and contingent events. In the Faculty of Science the program has a greater emphasis on the mathematical and statistical courses than does the Actuarial Mathematics program offered by the I.H Asper School of Business.

The Warren Centre, with the department of Statistics, offers a joint Honours program (see Section 4.13.3).
To enter the program, a student must have completed a minimum of 24 credit hours with a minimum DGPA of 3.00, and also obtained a minimum grade of "B" in one of the courses listed in Year 1 of the program chart. All of the courses listed in Year 1 of the program chart are program requirements and students are strongly urged to take them in the first year.

To continue in the Actuarial Mathematics Honours program, students must maintain a minimum DGPA of 3.00 and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and a minimum grade of "C+" in each of the Honours Program Specific courses (see below), and a minimum grade of "C" on all remaining courses that contribute to the 120 credit hours of the degree.

Honours Program Specific Courses

Students must achieve a minimum grade of "C+" in each of the following for both prerequisite purposes and graduation requirements:

ACT 2020, ACT 2120, ACT 2210, ACT 3130, ACT 3230, ACT 3340, ACT 3630 (or both ACT 3130 and ACT 3230), ACT 4020, ACT 4030, ACT 4060, ACT 4160.

**JOINT STATISTICS - ACTUARIAL MATHEMATICS HONOURS:** See Section 4.13.3

**NOTES:**
1. The following substitutions are allowed: MATH 1300 (C) or MATH 1310 in place of MATH 1220 (C), MATH 1500 (B) or MATH 1510 (B) in place of MATH 1230 (C), MATH 1700 (B) or MATH 1710 (B) in place of MATH 1232 (C), STAT 1000 (C) and Stat 2000 (B) in place of STAT 1150.
2. Students are strongly urged to complete ACC 1100 in Year 1 when possible. FIN 2200 may be taken in Year 2, 3 or 4; however, it is strongly recommended that it be completed in Year 2. Note that ACC 1100 is a prerequisite for FIN 2200.
3. STAT 3470, STAT 3490, ACT 4020 and ACT 4030 may be taken in Year 3 only. ACT 4020 fulfills the written English requirement.
4. GMRT 2010 fulfills the first parts of the 120 credit hours.
5. It is recommended that electives in Year 3 and Year 4 be chosen from Actuarial Mathematics, Business courses, Computer Science, Economics, Mathematics (3000 or 4000 level) and Statistics (4000 level courses). Other electives may be selected through consultation with the program director.

4.2 Biochemistry

Head: Deborah Court - Department of Microbiology; Viktor Nemykin - Department of Chemistry

C Campus Address/General Office: 213 Bulle Building / 360 Parker Building

4.2.1 Program Information

Biochemistry Honours Degree Requirements

To enter the joint Honours program in Biochemistry, a student must have completed at least 24 credit hours with a minimum DGPA of 3.00 and also obtained a minimum grade of "B" in CHEM 1310 and a minimum grade of "C+" in BIOL 1020, BIOL 1030, PHYS 1020 (or PHYS 1050), PHYS 1030 (or PHYS 1070), MATH 1500 and MATH 1700 are required courses in the program and students are strongly encouraged to complete them in first year.

To continue in the Biochemistry Joint Honours program, students must maintain a minimum DGPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the Biochemistry Joint Honours degree, a student must achieve a minimum DGPA of 3.00 and obtain a minimum grade of "C" on the courses that make up the 120 credit hours of the degree.

Chemistry and Microbiology Option Courses for Biochemistry Honours Students:

Chemistry: CHEM 2290, CHEM 3360, CHEM 3370, CHEM 3390, CHEM 3400, CHEM 3490, CHEM 3580, CHEM 3590, CHEM 4370, CHEM 4570, CHEM 4580, CHEM 4590, CHEM 4610 (6), CHEM 4640, CHEM 4650, CHEM 4670, CHEM 4680, CHEM 4690

Microbiology: MBIO 3000, MBIO 3010, MBIO 3030, MBIO 3280, MBIO 3430, MBIO 3470, MBIO 4010, MBIO 4020, MBIO 4410, MBIO 4440, MBIO 4480, MBIO 4520, MBIO 4570, MBIO 4580, MBIO 4600, MBIO 4610, MBIO 4670 (or MBIO 4672)

Option courses no longer offered that may be used if taken prior to their deletion: CHEM 3380, CHEM 4600, MBIO 2280, MBIO 3440, MBIO 3480, MBIO 4320, MBIO 4470, and MBIO 4510. NOTE: Several of these courses may not be held with current course offerings found on the above option lists. Please refer to the calendar descriptions for more information about specific course restrictions.

Other options may be considered and approved by the program advisor.

Biochemistry Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Biochemistry program may enter the Cooperative Option in April of their second year. The five year program provides students with a minimum 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for entry and continuation in the Cooperative Option are the same as that for regular Honours program. Each academic term in the third and subsequent years must comprise a
minimum of nine (9) credit hours. Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B. Sc. (Honours) Cooperative Options in Section 3.6.

To graduate with the B. Sc. Honours (Cooperative Option) degree, a student must achieve a minimum DGPA of 3.00 and a minimum grade of “C” on all courses that contribute to the 120 credit hours of the degree.

In addition to the program specific courses, in years 3 and 4 students will select 21 credit hours from the list of optional Microbiology and Chemistry courses found below. Additionally, students will select 12 credit hours of Science electives (see note 5).

Chemistry and Microbiology Option Courses for Biochemistry Honours Co-op Students:

**Chemistry:***
- CHEM 2290, CHEM 3360, CHEM 3370, CHEM 3390, CHEM 3400, CHEM 3490, CHEM 3580, CHEM 3590, CHEM 4370, CHEM 4570, CHEM 4580, CHEM 4590, CHEM 4610 (6), CHEM 4640, CHEM 4650, CHEM 4670, CHEM 4680, CHEM 4690, CHEM 4710 (6)

**Microbiology:***
- MBIO 3000, MBIO 3010, MBIO 3030, MBIO 3280, MBIO 3430, MBIO 3470, MBIO 4010, MBIO 4020, MBIO 4410, MBIO 4440, MBIO 4480, MBIO 4520, MBIO 4530 (6), MBIO 4570, MBIO 4580, MBIO 4600, MBIO 4610, MBIO 4670 (or MBIO 4672)

Option courses no longer offered that may be used if taken prior to their deletion: CHEM 3380, CHEM 4600, MBIO 2280, MBIO 3440, MBIO 3480, MBIO 4430, MBIO 4470, and MBIO 4510. NOTE: Several of these courses may not be held with current course offerings found on the above option lists. Please refer to the calendar descriptions for more information about specific course restrictions.

Other options may be considered and approved by the program advisor.

Students must check with the Co-op office for the April application deadline information. Students will be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement.

Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term. In order to stay in the Cooperative program, a student must obtain a grade of “pass” for each work term report.

**Biochemistry Four Year Major Degree Requirements**

To enter the joint four year Major program, a student must have completed a minimum of 24 credit hours with a minimum DGPA of 2.00, and also obtained a minimum grade of “C+” in CHEM 1310, and a minimum grade of “C” in BIOL 1020. BIOL 1030, PHYS 1020 (or PHYS 1050), PHYS 1030 (or PHYS 1070), MATH 1500, and MATH 1700 are required courses in the program and students are strongly encouraged to complete these courses in first year.

To continue in the Bachelor of Science Major degree program, students must maintain a minimum DGPA of 2.00.

To graduate with the Bachelor of Science Major in Biochemistry, a student must complete 120 credit hours or more, with minimum grades of “C” on all Major Program Specific courses (see below), passing grades (“D” or better) on the remaining courses, and a minimum DGPA of 2.00.

**Major Program Specific Courses:**

Chemistry: CHEM 2210, CHEM 2220, CHEM 2260, (CHEM 2280), CHEM 2360 (MBIO 2360), CHEM 2370 (MBIO 2370), CHEM 2400 (CHEM 2380), CHEM 2470, CHEM 3570, CHEM 4630 and whichever one of CHEM 4620, CHEM 4360, CHEM 4370 is selected.

Microbiology: MBIO 1010, MBIO 2020, MBIO 3410, and whichever one of MBIO 3450, MBIO 3460 or MBIO 4540 is selected.

Students in this program should note the following:

Students must satisfy any course prerequisites and co-requisites for courses selected. Care should be taken to select courses in their proper sequence, e.g. CHEM 2370 (MBIO 2370) and MBIO 2020 should be taken in Year 2 as they are prerequisite to a number of subsequent required or optional courses.

Normally 4000 level courses are available only to students in their fourth year. MBIO 4530 and CHEM 4670 are not available to Major students.

Students are encouraged to elect other courses pertinent to the study of biochemistry although this is not required for completion of the degree. The departments of Microbiology and Chemistry will be glad to suggest such supplementary courses upon request.

Students who may wish to transfer to the Honours program in Biochemistry following Year 2 should be sure to complete all courses recommended in Year 2 (see chart below).

**Biochemistry Major Cooperative Option**

Students interested in alternating academic terms and terms of paid employment as part of their program may enter the Biochemistry Major Cooperative Option in April of their second year. The five year program provides students with a minimum 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for entry and continuation in the Cooperative Option are the same as those required for the regular Major program. Students are encouraged, but not required, to take 15 credit hours in each academic term in the third and subsequent years. Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B. Sc. (Major) Cooperative Options in Section 3.4.

To graduate with the degree Bachelor of Science Major (Cooperative Option), a student must complete the equivalent of 120 credit hours or more, with minimum grades of “C” on Major Program Specific courses (see below), passing grades (“D” or better) on the remaining courses, and a minimum DGPA of 2.00.

**Major Program Specific Courses**
CHEM 2210, CHEM 2220, CHEM 2260, (CHEM 2280), CHEM 2360 (MBIO 2360), CHEM 2370 (MBIO 2370), CHEM 2400 (CHEM 2380), CHEM 2470, CHEM 3570, CHEM 4630 and whichever of CHEM 4620, CHEM 4360, CHEM 4370 is selected.

MBIO 1010, MBIO 2020, MBIO 3410, and whichever one of MBIO 3450, MBIO 2360), CHEM 2370 (MBIO 2370), CHEM 2400, CHEM 2470, CHEM 3570, CHEM 4630 and whichever one of MBIO 3450, MBIO 2360, CHEM 2370, CHEM 2400, CHEM 2470, CHEM 3570, CHEM 4630 and whichever of CHEM 4620, CHEM 4360, CHEM 4370 is selected.

Students must check with the Co-op office for the April application deadline information. Students will be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term. In order to stay in the Cooperative program, a student is required to submit an employment report upon the completion of each employment term.

### 4.2.2 Biochemistry Programs (offered Jointly by the Departments of Chemistry and Microbiology)

#### TABLE: Joint Honours Cooperative Option

| CHEM 1300, CHEM 1310 | CHEM 2210, CHEM 2220, CHEM 2260, (CHEM 2280), CHEM 2360 (MBIO 2360), CHEM 2370 (MBIO 2370), CHEM 2400, CHEM 2470, CHEM 3570 | CHEM 4360, CHEM 4620, CHEM 4630, CHEM 4710 (6) or MBIO 4530 (6) | CHEM 4630 |
| BIOL 1020, BIOL 1030 | MBIO 4540 | MBIO 3410, MBIO 3450, MBIO 4540 |
| PHYS 1050 (or PHYS 1020), PHYS 1070 (or PHYS 1030) | MBIO 1010, MBIO 2020 | |
| CHEM 2210, CHEM 2220, CHEM 2260, (CHEM 2280), CHEM 2360 (MBIO 2360), CHEM 2370, CHEM 2400, CHEM 2470, CHEM 3570 | CHEM 3570 |
| MATH 1500, MATH 1700 | 24 credit hours of Microbiology and Chemistry (minimum 6 credit hours from each dept.). Of these 24 credit hours, at least 12 hours must be 4000 level courses. |
| In Year 1 or Year 2 the following must be completed: | 21 credit hours of approved electives. |
| 6 credit hours from the Faculty of Arts including the University Written English “W” requirement | 30 Hours |
| 3 credit hours chosen from COMP, MATH, or STAT. | 30 Hours |
| 80 Hours | 30 Hours |
| 30 Hours |

### Notes:

1. MATH 1230 or MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1232 or MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of MATH 1500 and MATH 1700.

2. As there are no open electives in Year 2 of the program, students should complete the university written English requirement in Year 1. If not completed in Year 1, a “W” course must be completed prior to Year 3 in addition to the required Year 2 courses.

3. IMPORTANT: Students in the cooperative programs must ensure that they are able to satisfy the prerequisites for all 3000 and 4000 level courses they plan to take.

4. The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.

5. MATH 1010, MATH 1020, the former MATH 1190, the former COMP 1260, the former COMP 1270, COMP 1500 and COMP 1600 may not be chosen to satisfy this requirement.

6. MBIO 1010 can be taken in Year 1 after BIOL 1020.

(The number 6 in brackets indicates a six credit hour course.)
4.3 Department of Biological Sciences

Head: Steven Harris
Campus Address/General Office: 212 Biological Sciences Building
Telephone: (204) 474 9610
Email Address: Steven.Harris@umanitoba.ca
Website: http://umanitoba.ca/science/biological_sciences/

4.3.1 Biological Sciences

Biology is one of the most rapidly evolving and diverse sciences in the modern world, exploring all aspects of life from biomolecules to ecosystems. The Department of Biological Sciences is committed to advancing our understanding of biological structure and function, and developing new tools and technologies to address current and emerging problems facing all living organisms. Connections will be forged between molecules, cells, tissues, organs, organisms, populations, communities, and ecosystems, highlighting the need to explore all levels of biological interactions. Programs emphasize the organism as the key element in studies of the development and evolution of form and function, and the role in adaptations to the environment. Based on a core of fundamental biological principles, our programs explore diverse areas such as organismal biology, environmental biology, genetics, cell biology and development, physiology, ecology, behaviour, and systematics and evolution. The Department focuses on the integration of research and teaching expertise to create opportunities for growth and novel synergisms in the training of future leaders in the field.

4.3.2 B.Sc. Honours: Biological Sciences

The Honours program is designed for students planning a professional career in Biological Sciences at the graduate level. Such students are strongly advised to enter the Honours program at the beginning of second year.

Appropriate courses will be arranged in consultation with the Theme Advisor who may be contacted through the Biological Sciences Office (212 Biological Sciences Building). Students must select a specific theme area of study as part of their Biological Sciences program. See the information below outlining the different theme areas offered by the Department of Biological Sciences.

To enter the Biological Sciences Honours program a student must have completed at least 24 credit hours with a minimum DGPA of 3.00, and obtained a minimum grade of "B" in BIOL 1030. CHEM 1300, CHEM 1310, STAT 1000 and the 3 credit hours of specified Mathematics or Physics are program requirements and students are strongly urged to complete these courses in first year.

To continue in the Biological Sciences Honours program, students must maintain a minimum DGPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00, and obtain a minimum grade of “C” on the courses that make up the 120 credit hours of the degree.

Four Year Honours Cooperative Option

Students interested in alternating academic terms and work terms of paid employment as part of their Honours Biological Sciences program may apply to enter the Cooperative Option in April of their second year in Honours Biological Sciences. This program provides students with 12 months of paid employment by the time they graduate. It enables them to obtain work experience with participating firms, government agencies and University units.

There are several themes offered within the Biological Sciences Program and the Cooperative Option can be completed within any of these areas of study. See below for a description of the different themes and the course requirements of those themes offered by the Department of Biological Sciences.

Students may apply for openings in the Biological Sciences Honours Cooperative Option after completing at least two years (60 credit hours) in the Honours program, usually in April of their second year. Before the first employment term begins, the prerequisite courses listed below must be completed. Acceptance and continuation in the program is dependent upon the student receiving employment placements. Students are encouraged to check with the Co-op office (E2-483 EITC-E2 Building) for application deadlines.

Prerequisite courses to be completed before employment terms begin: BIOL 1020, BIOL 1030, CHEM 1300, CHEM 1310, STAT 1000, 3 credit hours of specified Mathematics or Physics, BIOL 2300, BIOL 2500, BIOL 2520 and BIOL 3100*. In addition, students must complete 9 credit hours from program core courses as follows: students must select one course from Group A (BIOL 2200, BIOL 2210), plus one course from Group B (BIOL 2240, BIOL 2242, BIOL 2260, BIOL 2262), plus one additional course from either Group A or Group B. [*A Pre-Coop Workshop may be substituted for BIOL 3100 only to permit an employment term in September of Year 3, but BIOL 3100 must still be taken.]

Students should note that the course and grade requirements for the Biological Sciences Honours Cooperative Option are the same as those for the regular Honours program, with the addition of the Work Term courses (see above). To continue in the Biological Sciences Honours Cooperative program a student must maintain a minimum DGPA of 3.00, and successfully complete all work term courses.

Students should refer to the general faculty regulations for B. Sc. (Honours) Cooperative Options in Section 3.6.

Work term positions available to the students will be approved by the department and may include positions within Biological Sciences, other University departments or positions with employers outside the University. Employers will select the students they wish to employ. The first employment term will preferably be taken in January or May of the third year, but may under exceptional circumstances begin in the preceding September. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

The program will include three employment terms, each of 4-months duration, two of which may be consecutive. A fourth work term is optional. Students are required to register in and pay tuition for each employment term prior to its commencement. Students will be required to submit an employment report upon the completion of each employment term. In order to stay in the Cooperative program, a student must obtain a grade of “pass” for each work term report.

4.3.3 B.Sc. (Major): Biological Sciences

The four year Major program is also designed for students planning a professional career in the Biological Sciences, but who may not be considering graduate training. It will provide intensive training in all areas of Biology comparable to that of the Honours program, but has less demanding performance requirements. Additionally, students may complete the Major degree requirements on a part-time basis if they so choose. Students who so wish, and have appropriate standing and course selection, may transfer to the Honours program at any time up to the commencement of Year 4.

Appropriate courses will be arranged in consultation with the Theme Advisor who may be contacted through the Biological Sciences Office, 212 Biological Sciences Building. Students must select a specific theme area of study as part of their Biological Sciences program. See the information...
below outlining the different theme areas offered by the Department of Biological Sciences.

Course BIOL 4100 is not available to students in this program.

**To enter** the Biological Sciences four-year Major program a student must have completed a minimum of 24 credit hours with a minimum DGPA of 2.00, and obtained a minimum grade of “C+” in BIOL 1030, CHEM 1300, CHEM 1310, STAT 1000 and the 3 credit hours of specified Mathematics or Physics are program requirements and students are strongly encouraged to complete these courses in first year.

**To continue** in the Bachelor of Science Major degree, a student must maintain a minimum DGPA of 2.00.

**To graduate** with the Bachelor of Science (Major) in Biological Sciences, a student must obtain a minimum DGPA of 2.00 and a minimum grade of “C” or better in all required courses and required option courses.

**Four Year Major Cooperative Option**

Students interested in alternating academic terms and work terms as part of their Major Biological Sciences program may apply to enter the Cooperative Option in April of their second year in the Biological Sciences Major. This program provides students with 12 months of paid employment by the time they graduate. It enables them to obtain work experience with participating firms, government agencies, and university units.

Students may apply for openings in the Biological Sciences Major Cooperative Option after completing at least two years (60 credit hours) in the Major program, usually in April of their second year. Before the first employment term begins, the prerequisite courses listed below must be completed. Acceptance and continuation in the program is dependent upon the student receiving employment placements. Students are encouraged to check application deadlines with the Co-op program office (E2-483 EITC-E2 Building).

Prerequisite courses to be completed before employment terms begin: BIOL 1020, BIOL 1030, CHEM 1300, CHEM 1310, STAT 1000, 3 credit–it hours of specified Mathematics or Physics, BIOL 2300, BIOL 2500, and BIOL 2520. In addition, students must complete 9 credit hours from program core courses as follows: students must select one course from Group A (BIOL 2200, BIOL 2210), plus one course from Group B (BIOL 2240, BIOL 2242, BIOL 2260, BIOL 2262), plus one additional course from either Group A or Group B.

Students should note that the course and grade requirements for the Biological Sciences Major Cooperative Option are the same as those for the regular Major program (see above), with the addition of the Work Term courses. **To continue** in the Biological Sciences Major Cooperative program, a student must have a Degree Grade Point Average of 2.00, and a “pass” on all work term courses.

Students should also refer to the general faculty regulations for B. Sc. (Major) Cooperative Options in Section 3.4.

Work term positions available to the students will be approved by the department and may include positions within Biological Sciences, other University departments or positions with employers outside the University. Employers will select the students they wish to employ. The first employment term will preferably be taken in January or May of the third year, but may under exceptional circumstances begin in the preceding September. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

The program will include three employment terms, each of 4-months duration, two of which may be consecutive. A fourth work term is optional. Students are required to register in and pay fees for each employment term prior to its commencement. Students will be required to submit an employment report upon the completion of each employment term. In order to stay in the Cooperative program, a student must obtain a grade of “pass” for each work term report.

4.3.4 Biological Sciences Theme Areas

I. **Cell, Molecular, and Developmental Biology:** Students in the Department of Biological Sciences with an interest in the exciting field of cell and developmental biology can select the Cell, Molecular, and Developmental Biology theme for focus. This theme will provide students a selection of courses that highlight fundamental principles and many important advances in this rapidly growing area of contemporary biology. Students can concentrate on aspects that deal with the molecular structures and processes of cellular life and their roles in the function, reproduction, and development of living organisms. The theme is structured such that students can choose from a broad range of disciplines, including biochemistry, molecular biology, morphology, genetics, cell biology, and developmental biology. The organisms under study in this theme are equally diverse, ranging from microbes through to invertebrates, vertebrates, plants, and fungi. The Department collaborates with many other life sciences departments and this theme allows students to develop a highly flexibly course portfolio that includes courses from the Departments of Biological Sciences, Chemistry, Microbiology, or Plant Science.

Specific courses required for the Cell, Molecular, and Developmental Biology Theme in addition to the core course requirements: BIOL 3542; Plus a minimum of 6 credit hours of Biochemistry: CHEM 2770 (MBIO 2770) and CHEM 2780 (MBIO 2780); or CHEM 2210 and CHEM 2360 (MBIO 2360) and CHEM 2370 (MBIO 2370).

II. **Ecology and Environmental Biology:** Ecology is the study of interactions between organisms and their environment, both in natural settings and human-influenced habitats. In our society ecology and environmental biology provides a scientific link to the living world. Ecologists study the lives of many organisms including animals, plants, fungi, protists, and bacteria. Interactions among these organisms are investigated at many scales ranging from the microscopic to the global. At the individual level, ecology investigates the impact of environmental factors on organisms through their physiology and behaviour. Ultimately, ecologists link these factors to survival and reproduction in variable environments. At the population level, ecology examines the causes of fluctuations in numbers and changes in distribution of a single species. This work is often the focus of agencies concerned with exploitation, extinction, and rehabilitation of both commercially and esthetically important species. At the community and ecosystem level, ecology considers many coexisting species. It examines the interactions between species within the communities (competition, predation, parasitism, mutualism, etc.) as well as broader investigations of community structure and composition. Ultimately, the skills developed within this theme prepare students for future careers in academia, government agencies, private consulting companies, or NGOs whose mandates encompass ecological and environmental concerns.

Specific courses required for the Ecology and Environmental Biology Theme in addition to the core course requirements: BIOL 3310, BIOL 3312, BIOL 3314, STAT 2000.

III. **Environmental and Integrative Physiology:** The Environmental and Integrative Physiology theme will be of interest to a wide array of students interested in pursuing employment opportunities in the Environmental,
Consulting, Pharmaceutical, Healthcare, and Professional job markets. Based on the suggested courses and sub themes within this program, students will be able to graduate with an all inclusive degree or specialize in particular disciplines ranging from molecular physiology to whole organism physiology and eco/environmental physiology, a subject area that is at the interface between ecology and physiology. Students will be exposed to modern research techniques in lab classes and will be taught by instructors and faculty with active research programs within the Department of Biological Sciences.

Specific courses required for the Environmental and Integrative Physiology Theme in addition to the core course requirements: 6 credit hours of Biochemistry CHEM 2770 (MBIO 2770) and CHEM 2780 (MBIO 2780); or CHEM 2210 and CHEM 2360 (MBIO 2360) and CHEM 2370 (MBIO 2370); Plus: two of the following courses (one of which is already required in the four-year Biological Sciences Degree program): BIOL 3470, BIOL 3472, BIOL 3400 (the former BIOL 3450), BIOL 3452.

IV. Evolution and Biodiversity: Evolution is broadly defined as “descent with modification” and is the process that generates the earth’s biodiversity. The theory of evolution provides a unifying framework for biology because all organisms are descended from a common ancestor. As a result, evolutionary principles permeate research and teaching throughout biology.

Evolutionary biology addresses two overarching questions. (1) What was the history of life? (2) What processes account for adaptation and diversification? Systematics reconstructs the history of life by studying relationships among species, and involves comparisons of physical appearance, development, biochemistry, genetics, behaviour, ecology and biogeography. Evolutionary Genetics investigates how processes such as natural selection, mutation, and migration interact to cause evolutionary change within populations. Evolutionary history, genetics, and ecological context are required to fully understand the evolution of traits; for example, body size, wing shape or leaf structure. Thus evolution integrates knowledge from a wide spectrum of sub-disciplines within biology.

Evolutionary biology has wide-ranging practical applications. Principles of evolution are required to understand: the evolution of pathogens such as HIV and avian influenza; domestication of wild species and consequences of genetic modifications; the identification of natural products; long-term responses to environmental change; and human biology. Courses from this theme will prepare students for academia, medicine, and government agencies or NGO’s that emphasize the cataloguing and conservation of biological diversity.

Specific courses required for the Evolution and Biodiversity Theme in addition to the core course requirements:

**List A:** One of the following: BIOL 3360, BIOL 4300, BIOL 4362, BIOL 4510.

**List B:** One of the following: BIOL 3200, BIOL 3242, BIOL 3250, BIOL 3270, BIOL 4212, BIOL 4214, BIOL 4216, BIOL 4218.

V. Integrative Biology: The Integrative Biology theme will be of interest to students planning to pursue careers in the various biology sub disciplines and who wish an undergraduate degree that is “interdisciplinary” within the life science departments that cuts across the traditional boundaries. This program will suit students who are interested in the “after degree” program in Education or who are intending to apply to a professional program (e.g. Medicine, Dentistry, Pharmacy, Medical Rehabilitation) and who would like a broad background in the Life Sciences. With the appropriate choice of Biological Science courses it would be possible to indicate the Integrative Biology theme along with a second theme from the department.

Specific courses required for the Integrative Biology Theme in addition to the core course requirements: All five of the following: BIOL 2200, BIOL 2210, BIOL 2240, BIOL 2242, MBIO 1010; One of the following: BIOL 3400 (the former BIOL 3450), BIOL 3470 or BIOL 3472; Plus: 24 credit hours in Biological Sciences (3000/4000 level courses) and 6 credit hours in Microbiology (3000/4000 level courses).

4.3.5. B. Sc. General Degree: Biological Sciences

Courses taken as part of a General degree program provide an introduction to the major fields of study in the Biological Sciences. Commencing in Fall Term 2009, students will have two options for the General Degree under the Department of Biological Sciences.

**Option A:** 18 credit hours of 2000, 3000, and (or) 4000 level Biological Sciences courses (subject to the Faculty requirement that of the 36 credit hours in the two chosen advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level);

**Option B:** Students may choose 36 credit hours from the Biological Sciences provided they select the following courses: each of BIOL 2300’, BIOL 2500, BIOL 2520; one of BIOL 2200 or BIOL 2210; one of BIOL 2240, BIOL 2242, BIOL 2260 or BIOL 2262; plus 21 additional credit hours (2000 level or higher) from the Biological Sciences including at least a minimum of 6 credit hours at the 3000 or 4000 level.

Students anticipating a transfer to either the four year Major or Honours program at the end of their second or third year should consult with the Departmental Program Advisor before registering.

**NOTE:**
1. BIOL 2300 has a prerequisite or concurrent requirement of STAT 1000. Students planning this option should consider taking STAT 1000 as part of their Introductory Science requirement.

The charts indicate one possible arrangement of the 120 credit hours that make up the degree and are meant to be a guide around which students can plan their programs with a view to satisfying the prerequisites of the required courses. These 120 credit hours are a combination of the courses outlined in the charts above and elective courses chosen by the student in consultation with the program advisors.

3 Courses from other departments or faculties may be acceptable for use towards the 24 credit hours of 3000/4000 level Biological Sciences courses required in the Honours and Major Degree programs. Please consult with the department for permission to use alternate courses.

(The number 6 in brackets indicates a six credit hour course.)
BIOL 1000 Biology: Foundations of Life  Cr. Hrs. 3
A course in unifying principles of biology including cell biology, bioenergetics, cell division, genetics and evolution. May not be used for credit in a Major or Honours program in the Biological Sciences. Not to be held with BIOL 1001, BIOL 1020, BIOL 1021. Prerequisite: Any grade 12 or 40S Mathematics course (50%), or equivalent.

BIOL 1010 Biology: Biological Diversity and Interaction  Cr. Hrs. 3
An introduction to biological diversity including prokaryotes, protists, fungi, plants and animals; the form and function of plants and animals and basic concepts of ecology. May not be used for credit in a Major or Honours program in the Biological Sciences. Not to be held with BIOL 1011, BIOL 1030, BIOL 1031. Prerequisite: Any grade 12 or 40S Mathematics course (50%), or equivalent.

BIOL 1020 Biology 1: Principles and Themes  Cr. Hrs. 3
(Lab Required) A laboratory-based course in unifying principles of biology including cell biology, bioenergetics, cell division, genetics and evolution. This course is intended for major and honors students in the Biological Sciences. Not to be held with BIOL 1021, BIOL 1000, BIOL 1001, BIOE 2590. Prerequisite: Biology 40S (or equivalent) and any 40S Mathematics (or equivalent); or BIOL 1000 (C). Students who complete BIOL 1000 as the prerequisite for BIOL 1020 will not be allowed to use both BIOL 1000 and BIOL 1020 towards their degree program as the two courses may not be held for credit with one another.

BIOL 1030 Biology 2: Biological Diversity, Function and Interactions  Cr. Hrs. 3
(Lab Required) A laboratory-based course introducing biological diversity including prokaryotes, protists, fungi, plants and animals; the form and function of plants and animals and basic concepts of ecology. This course is intended for major and honors students in the Biological Sciences. Not to be held with BIOL 1031, BIOL 1010 or BIOL 1011, BIOL 2590. Prerequisite: BIOL 1020 or BIOL 1021 (C). NOTE: BIOL 1030 is a prerequisite to further courses in Microbiology and to most courses in Biological Sciences. It is also intended for students proceeding to Agricultural and Food Sciences, Dentistry, Human Ecology, Medicine, Optometry, Pharmacy, Veterinary Science, Physical Education and Science.

BIOL 1300 Economic Plants  Cr. Hrs. 3
(Formerly BOTN 1010) A survey of economically important plants and their products. The history of plant use, plants in folklore and medicine, fermentation and viticulture, domestication of plants, and forestry are the major topics covered. Chemical, structural, and nutritional aspects of plant products are also discussed.

BIOL 1340 The State of the Earth's Environment: Contemporary Issues  Cr. Hrs. 3
A presentation of contemporary environmental issues focusing on the scientific basis of problems caused by the growth of human population, use and depletion of resources, pollution, and damage to the environment. The current state of our knowledge bases will be discussed, along with improvements in them that may be necessary. The course will consider needs for action, priorities, and opportunities. May not be used to meet a program requirement of an Honours or Major program in the Biological Sciences. Not to be held with ENVR 1000.

BIOL 1410 Anatomy of the Human Body  Cr. Hrs. 3
(Lab Required) (Formerly ZOOL 1320) Microanatomy and gross anatomy discussed including changes occurring from conception to old age. Although this course may be used as an elective in an Arts or Science program, it may not be used to meet a program requirement of an Honours or Major program in the Biological Sciences. May not be held with BIOL 1411. No prerequisite. High school Biology strongly recommended.

BIOL 1412 Physiology of the Human Body  Cr. Hrs. 3
(Lab Required) Function of all systems discussed with homeostatic regulatory mechanisms as foundation themes. Although this course may be used as an elective in an Arts or Science program, it may not be used to meet a program requirement of an Honours or Major program in the Biological Sciences. Not available to students who have previously obtained credit in, or are currently registered in both of BIOL 2410 (ZOOL 2530, BIOL 2411, ZOOL 2531) and BIOL 2420 (ZOOL 2540, BIOL 2421, ZOOL 2541) or BIOL 1413. Prerequisite: BIOL 1410 or BIOL 1411 (ZOOL 1320) (C); or one of BIOL 1030, BIOL 1031 (C). This prerequisite is waived for students in the Baccalaureate Program for Registered Nurses.

BIOL 2200 The Invertebrates  Cr. Hrs. 3
(Lab Required) (Formerly ZOOL 2600) Biology and phylogeny of invertebrates. Emphasis on common taxa and on those groups of particular phylogenetic significance. Not to be held with BIOL 2201 (ZOOL 2601). Prerequisite: one of BIOL 1030, BIOL 1031 (C).

BIOL 2210 The Chordates  Cr. Hrs. 3
(Lab Required) (Formerly ZOOL 2320) A study of the origin, evolutionary history and structure of the major groups of Chordates. Provides the foundation for more specialized courses such as Biology of Fishes, Ornithology, and Systematics and Biogeography of Fishes. Not to be held with BIOL 2231 (ZOOL 2501). Prerequisite: one of BIOL 1030, BIOL 1031 (C).

BIOL 2240 The Non-Flowering Plants  Cr. Hrs. 3
(Lab Required) (Formerly BOTN 2110) An introduction to the mosses and liverworts, ferns and their allies, and conifers, specifically treating their structure, reproduction, identification and ecological significance. Not to be held with the former BOTN 2110. Prerequisite: one of BIOL 1030, BIOL 1031 (C).

BIOL 2242 The Flowering Plants  Cr. Hrs. 3
(Lab Required) (Formerly BOTN 2010) A study of the structure and function of the flowering plants. Lecture topics are supplemented by laboratory exercises that focus on the anatomy and morphology of roots, stems, leaves and reproductive organs. Prerequisite: one of BIOL 1010 (B), BIOL 1011 (B), BIOL 1030 (C), BIOL 1031 (C).

BIOL 2260 Biology of Fungi and Lichens  Cr. Hrs. 3
(Lab Required)(Formerly BOTN 2210) An introduction to the fungi, both free living and lichenized, with emphasis on the major taxonomic groupings, their organization and structure, their life histories, identification and
general economic significance. Not to be held with BIOL 2261. Prerequisite: one of BIOL 1010 (B), BIOL 1011 (B), BIOL 1030 (C), BIOL 1031 (C).

BIOL 2262 Biology of Algae Cr. Hrs. 3
(Lab Required) (Formerly BOTN 2290, BIOL 3260) Lectures and laboratories dealing with the cellular features of major groups of algae and their phylogenetic and adaptive significance. The basics of algal taxonomy are also covered. Not to be held with the former BIOL 3260. Prerequisite: One of BIOL 1030, BIOL 1031 (C).

BIOL 2300 Principles of Ecology Cr. Hrs. 3
(Lab Required) (Formerly BOTN 2370, ZOOL 2370) Principles of ecology at the individual, population, community, and ecosystems levels. This course is also offered as AEGC 2370. It is the normal prerequisite to other courses in ecology. Not to be held with BIOL 2301 (BOTN 2371, ZOOL 2371), BIOL 2390 (BOTN 2280, ZOOL 2290), AEGC 2370. Prerequisite: one of BIOL 1030, BIOL 1031 (C). Prerequisite or concurrent requirement: STAT 1000 or STAT 1001 (D).

BIOL 2380 Introductory Toxicology Cr. Hrs. 3
(Formerly BOTN 2180, ZOOL 2180) A survey of general principles underlying the effects of toxic substances on biological systems, including consideration of the history, scope and applications of toxicology, the mechanisms of toxic action, and some major types of toxicants. This course is also taught in Environmental Science as ENV 2180 and in Agriculture as AGRI 2180. Not to be held with BIOL 2381, BIOL 2382 (BOTN 2190, ZOOL 2190), ENV 2190, or AGRI 2190. Prerequisites: one of BIOL 1030, BIOL 1031 (C); and one of CHEM 1310, CHEM 1311 or CHEM 1320 (C).

BIOL 2390 Introductory Ecology Cr. Hrs. 3
(Formerly BOTN 2280, ZOOL 2290) The course involves a study of the interrelationships of living organisms (including human) with each other and with their environment. It is not normally acceptable as a prerequisite to other courses in ecology. Not to be held with BIOL 2300 (BOTN 2370, ZOOL 2370), BIOL 2301 (BOTN 2371, ZOOL 2371), or AEGC 2370. Prerequisite: one of BIOL 1010, BIOL 1030, BIOL 1031 (C).

BIOL 2410 Human Physiology 1 Cr. Hrs. 3
(Formerly ZOO 2530) The mechanisms of action of the body's major control systems (nervous and endocrine) and of the muscular and reproductive systems are examined. Not to be held with BIOL 2411 (ZOOL 2531) or BIOL 3460 (ZOOL 3530). Prerequisite: a "C" or better in one of BIOL 1030, BIOL 1031 or BIOL 1412 (ZOOL 1330); or a "C+" or better in both BIOL 1000 (or equivalent - BIOL 1001) and BIOL 1010 (or equivalent - BIOL 1011).

BIOL 2420 Human Physiology 2 Cr. Hrs. 3
(Formerly ZOOL 2540) An examination of homeostatic regulation by the body's major effector organ systems (cardiovascular, respiratory, digestive, renal, and immune). Not to be held with BIOL 2421 (ZOOL 2541). Prerequisite: Completion of BIOL 2410 (ZOOL 2530) (D), or BIOL 2411 (ZOOL 2531), or BIOL 3460 (ZOOL 3530) (D); or consent of department.

BIOL 2440 Human Reproductive Physiology Cr. Hrs. 3
(Formerly ZOOL 2140) This course provides an in-depth understanding of human reproduction with particular emphasis on intrinsic control mechanisms and extrinsic methods of regulation of reproduction. This course also provides the basis for the understanding of alterations from normal mechanisms of reproductive processes. Prerequisites: BIOL 1410 (ZOOL 1320) (C) and BIOL 1412 (ZOOL 1330) (C); or consent of department.

Check with the Department of Biological Sciences for course availability.

BIOL 2500 Genetics 1 Cr. Hrs. 3
(Lab Required) (Formerly BOTN 2460) Principles of heredity, gametogenesis and the cytological basis of inheritance in plants and animals. The concepts of dominance and genetic interaction, sex and inheritance, linkage, chromosomal variations, quantitative and population genetics, the genetic code. Not to be held with BIOL 2501 (BOTN 2461), or PLNT 2520. Prerequisite: one of BIOL 1030, BIOL 1031 (C).

BIOL 2520 Cell Biology Cr. Hrs. 3
(Formerly ZOOL 2280) The microscopic and submicroscopic aspects of cellular structure and function are considered with emphasis on the living cell as a dynamic system. Not to be held with BIOL 2521 (ZOOL 2281). Prerequisite: one of BIOL 1030, BIOL 1031 (C).

4.3.7 Biological Sciences Course Descriptions-3000 Level

BIOL 3100 Skills in Biological Sciences Cr. Hrs. 3
This course will introduce students to the concepts and skills necessary to succeed in a research directed Biology-based career, including: communication skills (scientific writing and oral presentations), critical thinking, strategies for employment and graduate training, familiarization with the range of biological research, and exposure to a variety of Biology-based careers. This course may not be held with the former BOTN 3570 or ZOOL 3750. Prerequisite: This course is restricted to Honours students in the Biological Sciences or departmental permission.

BIOL 3200 Advanced Invertebrate Biology Cr. Hrs. 3
(Lab Required) (Formerly ZOOL 3610) Topics of current interest to be presented in lecture series given by staff. Students may undertake approved projects and may present reports and seminars. Prerequisite: BIOL 2200 (ZOOL 2600) or BIOL 2201 (ZOOL 2601) (C).

BIOL 3242 Vascular Flora of Manitoba Cr. Hrs. 3
(Lab Required) A survey of the vascular plants of Manitoba emphasizing identification, nomenclature and classification, and including brief accounts of the distribution and post-glacial history of the main floristic associations within the province. Students must submit a collection of at least 20 different vascular plants identified to species. A guide to the collection should be obtained from the Department of Biological Sciences office in the Spring/Summer prior to commencing the course. Not to be held with the former BOTN 3070. Prerequisite: BIOL 2240 (or the former BOTN 2110) or BIOL 2242 (or the former BOTN 2010) or permission of the department.

BIOL 3250 Lichens and Bryophytes Cr. Hrs. 3
(Formerly ZOOL 3460) The biology, evolution, and ecology of lichens and bryophytes. Emphasis is placed on the role of lichens and bryophytes in the ecosystem, gene flow, animal interactions, co-evolution, secondary compounds, and species identification. Not to be held with BIOL 3240 (BOTN 3260) or BIOL 4246 (BOTN 4050). Prerequisite: BIOL 1030 or BIOL 1031 (C).

BIOL 3270 Introductory Parasitology Cr. Hrs. 3
(Formerly ZOOL 3460) General course covering major parasitic phyla: namely, Protozoa, Platyhelminthes, Aschelminthes, Acanthocephala, and Arthropoda. Emphasis will be on principles of parasitology. Prerequisite or concurrent requirement: BIOL 2200 (ZOOL 2600) (C), or BIOL 2201 (ZOOL 2601), or consent of department.

BIOL 3280 Forest Botany Cr. Hrs. 3
(Formerly BOTN 3270) An examination of the structure and dynamics of plant communities in forested ecosystems. Topics include forest type classification, physiological and anatomical responses of representative forest species, decomposition and nutrient cycling, disturbance and forest succession. Prerequisites: BIOL 2242 (BOTN 2010) (C); and one of BIOL 2300 (BOTN 2370, ZOOL 2370), BIOL 2301 (BOTN 2371, ZOOL 2371) or AEGC 2370 (C); or consent of the department.
BIOL 3290 Medicinal and Hallucinogenic Plants  
(Formerly BOTN 3280) A botanical and historical survey of medicinal, hallucinogenic and poisonous plants used in various cultures. Not to be held with BIOL 3291. Prerequisite: a minimum of 30 hours of university credit, or consent of department.

BIOL 3300 Evolutionary Biology  
(Lab Required) (Formerly BOTN 3000, ZOOL 3000) Evolution is the ultimate cause of biological diversity. This course introduces the major questions and research methods in evolutionary biology. Topics include evolutionary genetics, adaptation, speciation, and the reconstruction of evolutionary history. May not be held with the former BOTN 3000, ZOOL 3000. Prerequisites: a "C" or better in one of BIOL 2500 (BOTN 2460), BIOL 2501 (BOTN 2461), or PLNT 2520; and any one of the following with a minimum grade of "C": BIOL 2200 (ZOOL 2600), BIOL 2210 (ZOOL 2320), BIOL 2231 (ZOOL 2501), BIOL 2240 (BOTN 2110), BIOL 2260 (BOTN 2210), BIOL 2261, BIOL 3260 (BOTN 2290); or consent of department.

BIOL 3305 Methods of Data Collection and Analysis in Ecology  
Cr. Hrs. 3
This course will consider methods of collection and analysis of ecological data, emphasizing experimental design of ecological studies, sampling, analysis of ecological data sets, and presentation techniques. This course may not be held with credit in BIOL 4320 (ZOOL 4200). Prerequisites: BIOL 2300 (C) and STAT 2000 or STAT 2001 (D); or consent of department.

BIOL 3360 Animal Behaviour  
(Lab Required) (Formerly ZOOL 3100) An introduction to the study of animal behaviour including key concepts from the parent disciplines of ethology and comparative psychology, the genetic and physiological bases of behaviour, and evolutionary aspects introducing optimality and game theoretical models characteristic of modern behavioural ecology. Laboratory work involves the design and execution of a behavioural project at the Assiniboine Park Zoo. Prerequisites: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370; and BIOL 2210 (ZOOL 2320) (C); or consent of department.

BIOL 3370 Limnology  
(Lab Required) (Formerly ZOOL 3500) Lectures and laboratories providing an introduction to the physics, chemistry and biology of lakes. Prerequisite: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370.

BIOL 3372 Wetland Ecology  
Cr. Hrs. 3
Lectures and field exercises examine the biotic (algae, macrophytes, invertebrates, and vertebrates) and abiotic (hydrology, nutrient cycling) properties of Manitoba’s wetlands. Various wetland types, including prairie potholes, peatlands, and coastal marshes will be considered in lectures and field work. The course is offered in Summer Session. May not be held with the former BOTN 3580, ZOOL 3580. Prerequisite: a C or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370; or consent of department.

BIOL 3400 Plant Physiology  
(Lab Required) (Formerly BOTN 2020, BIOL 3450, PLNT 3500) An integrative view of major physiological processes in plants, spanning the biochemical, cellular, tissue, organ and whole plant levels of organization. The focus will be on photosynthesis, respiration, plant water relations, plant mineral nutrition, and the role of hormonal and extrinsic factors in the regulation of plant growth. This course is taught together with PLNT 3400. Students may not hold credit for both BIOL 3400 and PLNT 3400. Prerequisites: BIOL 1030 (C); and BIOL 2242 (or equivalent)(C); and a grade of "C" or better in one of CHEM 2360, MBIO 2360, CHEM 2770 or MBIO 2770; or consent of the department.

BIOL 3452 Environmental Plant Physiology  
(Lab Required) A physiological study of plant-environment interactions with emphasis on the development of strategies to survive abiotic stresses including heat, cold, drought, flooding, shade, excess light and UV light. The unique mechanisms used by plants (including the fascinating carnivorous species) to obtain nutrients in deficient environments will also be covered. May not be held with the former BOTN 3010. Prerequisite: one of BIOL 3400, the former BIOL 3450, the former BOTN 2020, PLNT 3400, or the former PLNT 3500 (C) or consent of the department.

BIOL 3470 Environmental Physiology of Animals 1  
Cr. Hrs. 3
(Formerly ZOOL 3680) Lectures and laboratories providing an introduction to the animal physiology of animals. Prerequisites: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370; and STAT 2000 or STAT 2001 (D); or consent of department.

BIOL 3500 Environmental Physiology of Animals 2  
Cr. Hrs. 3
The focus will be on the physiology of animals living in aquatic environments; students will learn about the diversity of physiological solutions to these problems in aquatic and terrestrial organisms. Areas covered may include thermal biology, circulation, gas exchange and buoyancy regulation. Laboratories explore...
related subjects in various animals. This course may not be held for credit with the former BIOL 3462, ZOOL 3540. Prerequisite: BIOL 2200 (C) or BIOL 2210 (C); or consent of department.

**BIOL 3472 Environmental Physiology of Animals 2**  
Cr. Hrs. 3  
(Lab Required) This course is intended to acquaint students with the control and integration of organ systems and body functions of animals, and their biochemical and physiological adaptations to environmental perturbations. Areas covered may include neuroendocrinology, excretion, and water, salt, and acid-base balance. Laboratories explore related subjects in various animals. This course may not be held for credit with BIOL 3460, or the former ZOOL 3530. Prerequisites: BIOL 2200 (C) or BIOL 2210 (C) or consent of department.

**BIOL 3500 Genetics 2**  
Cr. Hrs. 3  
(Lab Required) (Formerly BOTN 3460) The course complements Genetics I (BIOL 2500, BOTN 2460, BIOL 2501, BOTN 2461) and deals with various aspects of linkage and crossing over, gene function, allelism, mutation and repair, the use of bacteria and viruses as genetic tools, basics of developmental genetics and extra-nuclear inheritance. May not be held with BIOL 3501. Prerequisite: BIOL 2500 (BOTN 2460) (C), or BIOL 2501 (BOTN 2461) or PLNT 2520 (C). Prerequisite or concurrent requirement: One of CHEM 2370, CHEM 2371, MBIO 2370, MBIO 2371, CHEM 2780, or MBIO 2780; or consent of department.

**BIOL 3542 Developmental Biology**  
Cr. Hrs. 3  
Principles and concepts of developmental biology will be presented including early embryo development, tissue patterning, morphogenesis, germ cell formation, stem cell biology, organ and nervous system development, growth and regeneration. Fundamental developmental concepts as well as the cellular, genetic and molecular mechanisms behind development will be covered utilizing invertebrate, vertebrate and plant examples. May not be held with the former BIOL 2540 or the former ZOOL 2150. Prerequisites: [A “C” or better in one of BIOL 2500, BIOL 2501, PLNT 2520 the former BOTN 2460, or the former BOTN 2461] and [a “C” or better in one of BIOL 2520, BIOL 2521, the former ZOOL 2280 or the former ZOOL 2281], or consent of the department.

**BIOL 3550 Plant Anatomy**  
Cr. Hrs. 3  
(Lab Required) (Formerly BOTN 3190) A study of the anatomical aspects of the growth and development of plants cells, tissues and organs. Laboratory exercises will complement material. Prerequisite: BIOL 2242 (BOTN 2010) (C).

**BIOL 3560 Comparative Animal Histology**  
Cr. Hrs. 3  
(Lab Required) (Formerly ZOOL 3060) This course focuses on the cell and tissue organization of animals. Cell morphology and specialization, tissue types and a survey of the cellular and tissue organization of all organ systems are covered. The primary focus is on mammals but comparative aspects of other animal groups are also included. Not to be held with BIOL 3561 (ZOOL 3061). Prerequisite: One of BIOL 1030, BIOL 1031 (C). Recommended prerequisite: one of BIOL 2210 (ZOOL 2320), BIOL 2231 (ZOOL 2501), BIOL 2520 (ZOOL 2280), or BIOL 2521 (ZOOL 2281).

**BIOL 3600 Biological Diversity and Sustainability**  
Cr. Hrs. 3  
Anthropogenic drivers of change of many components of biological diversity; the resulting impacts on ecosystem capacity to provide on-going goods and services that are essential constituents of well-being and ultimately sustainability. Prerequisites: BIOL 2300 (C); or BIOL 1030 (C) and BIOL 2390 (C).

**BIOL 3980 Work Term 1**  
Cr. Hrs. 0  
(Formerly ZOOL 3980, BOTN 3980) Work assignment in business, industry, or government for students registered in the Biological Sciences Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

**BIOL 3990 Work Term 2**  
Cr. Hrs. 0  
(Formerly ZOOL 3990, BOTN 3990) Work assignment in business, industry, or government for students registered in the Biological Sciences Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

**4.3.7 Biological Sciences Course Descriptions-4000 Level**

**BIOL 4100 Honours Thesis**  
Cr. Hrs. 6  
The student will conduct a research project, chosen in consultation with a Biological Sciences faculty member acting as an advisor, and produce a thesis in which the project, the results and conclusions are presented. The student will defend the thesis at an oral examination held on completion of the thesis. This course is restricted to 3rd and 4th year Honours Biological Science students. Not to be held with the former BOTN 4600 or the former ZOOL 4110. Prerequisite: BIOL 3100 or the former BOTN 3570 or the former ZOOL 3750, or consent of department.

**BIOL 4210 Biology of Fishes**  
Cr. Hrs. 3  
(Lab Required) (Formerly ZOOL 4170) Lectures survey organ systems, life history, and the population biology of fishes. The ecological analysis of fish communities is addressed through a field trip and a series of workshops on the analysis of field data. Evaluation is based upon work related to the field trip and examinations based upon the lecture material. Prerequisite: BIOL 2210 (ZOOL 2320) (C) or BIOL 2231 (ZOOL 2501) (C).

**BIOL 4212 Systematics and Biogeography of Fishes**  
Cr. Hrs. 3  
(Lab Required) (Formerly ZOOL 4220) A study of the evolutionary history, interrelationships and distribution patterns of the fish-like vertebrates. Laboratories will cover the identification of the major groups of fish-like vertebrae. Prerequisite: BIOL 2210 (ZOOL 2320) (C) or BIOL 2231 (ZOOL 2501) (C); or consent of department.

**BIOL 4214 Biology of Amphibians and Reptiles**  
Cr. Hrs. 3  
(Lab Required) (Formerly ZOOL 4230) Lectures consider the evolution, biology and adaptations of amphibians and reptiles. Laboratories and student presentations will deal with classification, structure, identification, and methods of field and laboratory study of these animals. Prerequisite: BIOL 2210 (ZOOL 2320) (C) or BIOL 2231 (ZOOL 2501) (C); or consent of department.

**BIOL 4216 Biology of Birds**  
Cr. Hrs. 3  
(Lab Required) (Formerly ZOOL 4240) Biology of birds including: morphology, systematics, evolution, life histories and breeding biology, ecology, migration, and distribution of birds. Prerequisite: BIOL 2210 (ZOOL 2320) (C) or BIOL 2231 (ZOOL 2501) (C). Prerequisite or concurrent requirement: BIOL 3360 (ZOOL 3100).

**BIOL 4218 Biology of Mammals**  
Cr. Hrs. 3  
(Lab Required) (Formerly ZOOL 4250) Structure, classification, evolution, life histories and distribution of mammals and their relation to human cultures. Techniques of studying mammals. Identification of the mammals of Manitoba. Offered in 2009-2010 and alternate years thereafter. Prerequisites: BIOL 2210 (ZOOL 2320) (C) or BIOL 2231 (ZOOL 2501) (C); and one of BIOL 2300 (BOTN 2370, ZOOL 2370), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370 (C); or consent of department.

**BIOL 4220 Marine Biodiversity**  
Cr. Hrs. 3
(Lab Required) (Formerly ZOOL 4260) Examines key ecological principles governing the maintenance of marine biodiversity, particularly in northern ecosystems. Topics include the definitions and global patterns of biodiversity and the ecological mechanisms influencing changes in these patterns in the context of applied population, community and ecosystem ecology. The course will also emphasize practical solutions, including fisheries’ harvest models and marine protected areas. Prerequisites: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370), BIOL 2301 (BOTN 2371, ZOOL 2371) AGEC 2370, or BIOL 2390 (BOTN 2280, ZOOL 2290); or consent of department.

BIOL 4262 Wildlife and Fisheries Parasitology Cr. Hrs. 3
(Formerly ZOOL 4720) Parasites of major vertebrate groups of economic importance in temperate regions. Emphasis on: identification, means of control, and how to evaluate the impact of parasites on animal populations. A major project is required. Prerequisite: BIOL 3270 (ZOOL 3460) (C).

BIOL 4300 Evolution and Adaptation Cr. Hrs. 3
Lectures and discussion on advances in evolutionary research. Topics will include systematics, evolutionary genetics, evolution and development, co-evolution, mating systems, species ranges, eco-evolutionary dynamics, and evolution in society. This course may not be held for credit with either of BIOL 4240 or BIOL 4242. Prerequisite: BIOL 3300.

BIOL 4310 Applications of Population Ecology in Fisheries and Wildlife Cr. Hrs. 3
(Formerly ZOOL 4850) The material introduced in BIOL 3310 (ZOOL 3680) is developed into the quantitative analyses of field data to form a basis for conservation and management. Topics covered include: surplus harvest models, virtual population analysis, spatial population modeling, bioeconomics, and quantitative adaptive management. Concepts are reinforced through tutorials. Prerequisite: BIOL 3310 (ZOOL 3680).

BIOL 4312 Analysis of Biological Communities Cr. Hrs. 3
(Formerly BOTN 4650) A survey of methods and approaches to the analysis of biological and environmental data containing many variables. Offered in alternate years. Not to be held with BIOL 7440 (BOTN 7440). Prerequisites: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370; and STAT 2000 or STAT 2001 (C).

BIOL 4330 Plant Interactions Cr. Hrs. 3
(Formerly BOTN 4150) This course examines the ecology of interactions between plants and their biotic environment - other plants, animals and soil microbes. This is a reading course. Students will participate in discussions of key papers, examine recent and historic literature, and write a term paper examining a selected topic. Prerequisite: a "C" or better in BIOL 2300; or consent of department.

BIOL 4362 Behavioural Ecology and Cognitive Ethology Cr. Hrs. 3
(Formerly ZOOL 4280) Examines proximate and ultimate questions relating to mating and parental behaviour, communication, social parasitism and animal intellect to provide insight into the intimate relationship between behavioural evolution and the environment. Laboratory and field exercises complement major topics considered in lectures. Prerequisite: BIOL 3360 (ZOOL 3100) (C); or consent of department.

BIOL 4374 Aquatic Botany Cr. Hrs. 3
(Formerly BOTN 4010) This course examines the relationship between algae, fungi and macrophytes, and the physical, chemical and biological properties of the aquatic environment. Specific adaptations to life in water, and patterns of distribution and succession in rivers, lakes and wetlands will be covered. Prerequisite: a "C" or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370; or consent of department.

BIOL 4380 Environmental Toxicology Cr. Hrs. 3
(Formerly ZOOL 4840) A survey of the principles governing the dynamics of chemicals in the environment, with emphasis on the biological systems, using case histories of known pollution problems. Prerequisites: a "C" or better in one of CHEM 2370, CHEM 2371, MBIO 2370, MBIO 2371, CHEM 2780, or MBIO 2780; plus a "C" or better in one of BIOL 2300 (BOTN 2370, ZOOL 2370), BIOL 2301 (BOTN 2371, ZOOL 2371) or AGEC 2370; plus a "C" or better in one of BIOL 2410 (ZOOL 2530), BIOL 2411 (ZOOL 2531) or BIOL 3460 (ZOOL 3530); and BIOL 3462 (ZOOL 3540) (C); or consent of department.

BIOL 4400 Revegetation of Disturbed Lands Cr. Hrs. 3
A physiological and ecological study of disturbed plant communities with emphasis on stresses associated with both mining activities and agricultural practices and processes of assisted recovery. Prerequisites: BIOL 3400 or PLNT 3400 (or the former BOTN 2020, BIOL 3450 or PLNT 3500) (C); and one of BIOL 2300, BIOL 2301 or AGEC 2370 (or the former BIOL 2370 or BOTN 2371 or ZOOL 2370 or ZOOL 2371) (C); or consent of instructor.

BIOL 4460 Comparative Animal Energetics Cr. Hrs. 3
(Formerly ZOOL 4830) Energetic strategies of animals living in ecologically diverse environments. Integration of physiological, morphological and behavioural adaptations with an emphasis on vertebrate species. Prerequisites: BIOL 2210 (ZOOL 2320) (C) or BIOL 2231 (ZOOL 2501) (C); and one of BIOL 2410 (ZOOL 2530) (C), BIOL 2411 (ZOOL 2531), BIOL 3470 (BIOL 3462, ZOOL 3530) (C), or BIOL 3472 (BIOL 3460, ZOOL 3540) (C); or consent of department.

BIOL 4470 Sensory-Motor Physiology Cr. Hrs. 3
(Formerly ZOOL 4160) Information flow in the nervous system and the control of behaviour. The diverse roles that ion channels and synaptic circuitry play in sensory reception, neuronal integration and motor control are emphasized. Prerequisite: a "C" or better in BIOL 2410 and BIOL 2420 (the former ZOOL 2530 and ZOOL 2540) or BIOL 2411 and BIOL 2421 or BIOL 3470 and BIOL 3472 (the former BIOL 4640 and BIOL 4642) or consent of department. This course is restricted to students in year 3 or 4 of a Major or Honours degree program in Biological Sciences or in Chemistry (Biopharmaceutical Focus Area), or in the B.Sc. in Biosystems Engineering.

BIOL 4480 Comparative Endocrinology Cr. Hrs. 3
(Formerly ZOOL 4600) The structure, control, and function of vertebrate endocrine systems. BIOL 2520 (or equivalent - ZOOL 2280, BIOL 2521, ZOOL 2281), and one of BIOL 2410 (or equivalent - ZOOL 2530, BIOL 2411, ZOOL 2531), BIOL 3460 (ZOOL 3530), and a course in biochemistry are strongly recommended as prerequisites. Prerequisite: one of BIOL 1030, BIOL 1031 (C).

BIOL 4500 Molecular Genetics of Plant Development Cr. Hrs. 3
(Formerly BOTN 4180) Analysis of plant development at the molecular level. Recent advances in model system genetics will be highlighted including seedling, root, shoot, and flower development as well as environmental responses. Prerequisite: BIOL 2500 (BOTN 2460) or BIOL 2501 (BOTN 2461) (C).

BIOL 4510 Evolutionary Genetics Cr. Hrs. 3
(Formerly BOTN 4180) Evolutionary genetic processes are the foundation upon which much of understanding of biology is built. This course uses lectures, discussions, and computer-based analyses of real data sets to introduce the core concepts of theoretical population genetics and the applications of these ideas for the study of evolution. May not be held with BIOL 4890 when the topic is "Evolutionary Genetics". Registration is restricted to
students in the B.Sc. Honours or Major programs, including Co-op programs, in Biological Sciences and Genetics. Prerequisites: (one of BIOL 3300, BIOL 3301, the former BOTN 3000, the former ZOOL 3000, the former ZOOL 3001, or consent of department) and (one of MATH 1200, MATH 1210, MATH 1211, MATH 1220, MATH 1230, MATH 1240, MATH 1241, MATH 1300, MATH 1301, MATH 1310, MATH 1500, MATH 1501, MATH 1510, MATH 1520, the former MATH 1530, or MATH 1690).

**BIOL 4540 Developmental Molecular Biology**  
(Cr. Hrs. 3)  
(Lab Required) An examination of early development with emphasis on the molecular events. Sex determination, gametogenesis and early embryogenesis will be discussed. May not be held with the former ZOOL 4150. Prerequisite: BIOL 3542 or the former BIOL 2540 or the former ZOOL 2150 (C); or consent of department.

**BIOL 4542 Genes and Development**  
(Cr. Hrs. 3)  
(Formerly ZOOL 4270) An in depth examination of selected topics in embryonic development, emphasizing the genetic control of the cell and molecular mechanisms that direct embryogenesis. The course emphasizes hypothesis testing and the evolution of development, including studies of both animal and plant development. Prerequisites: BIOL 2520 (or the former ZOOL 2280) or BIOL 2521 (or the former ZOOL 2281) (C); and BIOL 3542 (or the former BIOL 2540, ZOOL 2150) (C); or consent of department.

**BIOL 4544 Advanced Developmental and Cellular Biology**  
(Cr. Hrs. 3)  
(Lab Required) The course focuses on contemporary concepts and approaches in developmental biology, including theoretical and practical aspects. The emphasis is on the laboratory component. May not be held with the former BIOL 3540. Prerequisites: BIOL 2520 or BIOL 2521 and BIOL 3542 (or the former BIOL 2540, ZOOL 2150) (C); or consent of the department.

**BIOL 4554 Molecular Biology Techniques for Eukaryotes - DNA**  
(Cr. Hrs. 3)  
(Lab Required) A techniques intensive course focusing on the understanding of molecular biology techniques, troubleshooting problems, writing reproducible laboratory experiments for publications, accurate recording of procedures in lab journals, and bioinformatics exercises from a DNA perspective. This course is designed for 4th year undergraduate and graduate students interested in understanding the theory and application of molecular methods specifically focusing on eukaryotic DNA. Students will learn essential and cutting-edge molecular biology techniques involved in gene structure, amplification, transformation, and sequencing among others. This course may not be held for credit with BIOL 4552. Prerequisite: BIOL 2520.

**BIOL 4556 Molecular Biology Techniques for Eukaryotes - RNA**  
(Cr. Hrs. 3)  
(Lab Required) This is a "hands-on" techniques course designed for the 3rd and 4th year undergraduate level. The purpose of this course is to train students in the current molecular biology techniques dealing with highly sensitive RNA molecules. The students will learn all essential steps involved to identify the messenger RNA expression of a particular target protein in plant or animal (invertebrates) systems. This course may not be held for credit with BIOL 4552. Prerequisite: BIOL 2520.

**BIOL 4560 Microtechnique**  
(Cr. Hrs. 3)  
(Lab Required) This intensive course covers a spectrum of animal tissue and cell preparation techniques for microscopy and a survey of the variety of types of microscopy. These span all types of microscopy; live cell techniques, fixation and tissue processing methods for both paraffin embedding media and plastic media, sectioning and staining imaging and image processing, introduction to histochemistry and immunocytochemistry and electron microscopy. This is a practical course with a major hands-on laboratory emphasis. Prerequisites: BIOL 1030 or BIOL 1031 (C+); or consent of department. This course is restricted to students in year 3 or 4 of a Major or Honours degree program.

**BIOL 4650 Biology and Society**  
(Cr. Hrs. 3)  
(Lab Required) An exploration of the intersection of biology with society and the societal implications of research in areas such as genetics, biotechnology, ecology and evolution through lectures and tutorials. The course will examine how biological research is presented in the public sphere, and consider common public misunderstandings of the science. Students will examine some of the ethical issues that arise in the practice and application of biological sciences and develop skills in the communication and clarification of biological principles to the public. May not be held with BIOL 4890 when titled "Biology and Society". Prerequisites: One of BIOL 2500, BIOL 2501, PLNT 2520, the former BOTN 2460 or the former BOTN 2461 (C+), or permission of instructor. Students must be enrolled in third year (or higher) of a major or honours program in Biological Sciences, Biotechnology or Genetics.

**BIOL 4800 Special Topics in Field Biology**  
(Cr. Hrs. 3)  
(Formerly BOTN 4800, ZOOL 4800) Lectures, field studies and research projects on a selected topic. Course content to vary from year to year depending on instructor. Usually offered during the summer months. Prerequisite: consent of department.

**BIOL 4890 Special Topics in Biology**  
(Cr. Hrs. 3)  
(Formerly BOTN 4890, ZOOL 4890) Biology encompasses a broad array of ideas and special topic areas. In this course, students can pursue a specific topic in detail through lectures, seminars and research projects. Normally restricted to third and fourth year Honours and Major students. Prerequisite: Consent of department.

**BIOL 4980 Work Term 3**  
(Cr. Hrs. 0)  
(Formerly BOTN 4980, ZOOL 4980) Work assignment in business, industry, or government for students registered in the Biological Sciences Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only)

**BIOL 4990 Work Term 4**  
(Cr. Hrs. 0)  
(Formerly BOTN 4990, ZOOL 4990) Work assignment in business, industry, or government for students registered in the Biological Sciences Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only)

4.4.1 Program Information

NOTE: As of Fall 2018, admission to the Biotechnology programs has been temporarily suspended. For further information, see the Faculty of Science office.

Biotechnology Honours Degree Requirements

To enter the Biotechnology Joint Honours program a student must have completed at least 24 credit hours with a minimum DGPA of 3.00, and also obtained a minimum grade of “B” in CHEM 1310 and a minimum grade of “C+” in BIOL 1020, CHEM 1300, BIOL 1030, MATH 15001, PHYS 1020 (or PHYS 1050), and STAT 1000. These are required courses in the program and students are strongly encouraged to complete these courses in first year. Six credit hours of Arts electives, including the written English course should also be taken in Year 1.

Students will select one stream (Analytical or Molecular Biotechnology). Students are also encouraged to select a Minor in a complementary area. There are enough free electives to cover the 18 credit hours required for a Minor. All students must complete a Common Core of required courses plus required Stream Specific courses. The remaining courses can be selected from the list of Recommended Electives. This list is meant to give students some idea of appropriate electives; however, students have the option to choose courses not on the list in consultation with the Program Advisors.

To continue in the Biotechnology Joint Honours program, students must maintain a minimum DGPA of 3.00 and complete a minimum of 9 credit hours during each Fall and Winter Term. No more than 15 credit hours of F grades may be accumulated, regardless of whether any course has been repeated and a higher grade achieved. Research Project in Biotechnology (BTEC 4000) must be taken in the final year of the program.

To graduate from the Biotechnology Joint Honours program students must achieve a minimum DGPA of 3.00 and obtain minimum grade of “C” on the courses that contribute to the 120 credit hours that make up the degree.

Students who do not meet these minimum requirements will be required to withdraw from the program and may be eligible to enter the 4-Year Major program in Biotechnology. Depending on course selection students may also be eligible to enter other Major Programs (e.g., Biochemistry, Biological Sciences, Chemistry, or Microbiology) and/or the 3-year B.Sc. General Degree program.

Biotechnology Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Biotechnology program may enter the Cooperative Option in April of their second year in Honours Biotechnology. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and university units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Honours program, as indicated in the chart. Students are required to complete the first and second year requirements of the program; and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B.Sc. (Honours) Cooperative Options in Section 3.6.

To continue in the Honours Cooperative program a student must maintain a minimum DGPA of 3.00, successfully complete each work term, and complete a minimum of 9 credit hours during each academic term. Students should note that the grade requirements for the Cooperative Option are the same as that for the regular Honours program (see above).

Students must check with the Co-op office for the April application deadline information. They will normally be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

Biotechnology 4-Year Major Degree Requirements

To enter the Biotechnology Joint Major program a student must have completed at least 24 credit hours with a minimum DGPA of 2.00 and also obtained a minimum grade of “C+” in CHEM 1310 and a minimum grade of “C” in BIOL 1020, BIOL 1030, CHEM 1300, MATH 15001, PHYS 1020 or 1050, and STAT 1000. These are required courses in the program and students are strongly urged to complete these courses in first year. Six credit hours of Arts electives, including the written English course should also be taken in Year 1.

Students will select one stream (Analytical or Molecular Biotechnology). Students are also encouraged to select a Minor in a complementary area. There are enough free electives to cover the 18 credit hours required for a Minor. All students must complete a Common Core of required courses plus required Stream Specific courses. The remaining courses can be selected from the list of Recommended Electives. This list is meant to give students some idea of appropriate electives; however, students have the option to choose courses not on the list in consultation with the Program Advisors.

To continue in the Major program a student must maintain a minimum DGPA of 2.00. No more than 18 credit hours of F grades can be accumulated regardless of whether any course has been repeated and a higher grade achieved.

To graduate from the Biotechnology Joint Major program, students must achieve a minimum DGPA of 3.00 and obtain minimum grade of “C” on all common core and stream specific courses outlined below. There is no term registration load requirement in the Major degree.

Students who do not meet these minimum requirements will be required to withdraw from the program and will normally be eligible to enter the 3-Year B.Sc. General degree program.

Biotechnology 4 Year Major Cooperative Option
Students interested in alternating academic terms and terms of paid employment as part of their Major program in Biotechnology may enter the Cooperative Option in April of their second year in Biotechnology. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and university units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Major program. MBIO 3410 is required in Year 3. Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B.Sc. (Major) Cooperative Options in Section 3.4.

Students must check with the Co-op office for the April application deadline information. They will normally be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

**Common Core Courses:**

**Program Stream Courses:**

**Analytical Biotechnology:** MATH 17001, CHEM 4370, CHEM 4590, CHEM 4670, CHEM 4700

**Molecular Biotechnology:** MATH 17001, CHEM 4370, CHEM 4590, CHEM 4670, CHEM 4700

**Note:** In some instances pre-requisites will be waived upon approval by the appropriate department.

Complementary Existing Minors that could satisfy the Recommended Electives (Minors require 18 cr hrs of prescribed courses):

- Management, Animal Systems, Food Science, Plant Biotechnology, or Human Nutrition and Metabolism

**Recommended General Electives if not required in Program stream:**

All courses in above described Minors.

Appropriate pre-requisites must also be taken for all Electives.

#### Notes:

1. MATH 1230, MATH 1510 or MATH 1520 may be used in place of MATH 1500; MATH 1232 or MATH 1710 may be used in place of MATH 1700.
2. Optional courses and program stream courses requirements can be found above the Biotechnology program charts in section 4.4.1.
3. Refer to list of recommended elective courses and complementary Minor programs (listed above charts) prior to registration in your electives.
4. BTEC 4000 is required for students in the Honours program only. Students in the Honours Co-operative program will require 6 credit hours of approved electives.
5. Choice of BIOL 4554 or BIOL 4556 not already chosen for stream. (The number 6 in brackets indicates a 6 credit hour course.)

### 4.4.3 Biotechnology Course Descriptions

#### BTEC 3980 Work Term 1

- Work assignments in business, industry or government for students registered in the Biotechnology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

#### BTEC 3990 Work Term 2

- Work assignments in business, industry or government for students registered in the Biotechnology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

#### BTEC 4000 Research Project in Biotechnology

- (Lab Required) Students can carry out independent biotechnology based research in their area of interest under the supervision of a faculty member or an approved external biotechnology professional. Results will be presented as an interim oral report and a written journal style paper. Registration restricted to Year 4 Honours Biotechnology students. Not to be held with any other Research Project courses such as MBIO 4530 or CHEM 4710.
4.5 Department of Chemistry

Head: Viktor Nemykin
Campus Address/General Office: 360 Parker Building
Phone: (204) 474 9321
Fax: (204) 474 7608
Email: Chemistry_Dept@umanitoba.ca
Website: http://umanitoba.ca/chemistry

4.5.1 Department of Chemistry Program Information
Chemistry is the science concerned with the properties of atoms and molecules, of which all matter is composed. Chemistry is important for all aspects of the material world - food production; the manufacture of medicines, textiles, and plastics; energy production; identifying environmental problems and remedies; and understanding the workings of living organisms. The department offers study in analytical, inorganic, organic and physical chemistry, and in biochemistry.

Chemistry Club: The Chemistry Club is the University of Manitoba Student Chapter of the Chemical Institute of Canada. The aim of the organization is to advance interest in chemistry. All students engaged in chemical studies are eligible for membership in the chapter and are encouraged to apply. Regular meetings, tours, publications, etc., are planned by each year's membership.

Scholarships and Awards: Several scholarships and awards are granted each year to Honours and Major students in Chemistry, Biochemistry, and Biotechnology on the basis of outstanding academic performance. To be eligible for these awards for any regular session, students are normally required to have completed a full program with a minimum of 18 credit hours of Chemistry in that session. They must also be registered for a full program with a minimum of 18 credit hours of Chemistry in the next regular session. Additional information is available from the Chemistry general office.

The department must approve a student’s Honour or Major program each session. Students must also obtain departmental approval for any and all revisions to their program.

Honours Requirements

To enter the Honours program in Chemistry, a student must have completed at least 24 credit hours with a minimum DGPA of 3.00, and also obtained a minimum grade of “B” in CHEM 1310. CHEM 1300, MATH 1500, MATH 1700, PHYS 1020 (1050), and PHYS 1070 are required courses in this program and students are strongly encouraged to complete these courses in first year.

To continue in the Chemistry Honours program, students must maintain a minimum DGPA of 3.00 and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate from the Chemistry Honours program students must achieve a minimum DGPA of 3.00 and obtain a minimum grade of “C” on the courses that make up the 120 credit hours of the degree.

Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Chemistry program may enter the Cooperative Option in April of their second year in Honours Chemistry. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and university units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Honours program, as indicated in the chart. Students are required to complete 24 credit hours of Chemistry including CHEM 2470 and either CHEM 2260 or the former CHEM 2280 or CHEM 2290 before they begin their first employment term. Students should refer to the general faculty regulations for B.Sc. (Honours) Cooperative Options in Section 3.6.

Students should note that the grade requirements for the Cooperative Option are the same as that for the regular Honours program. To continue in and graduate from the Honours Cooperative program a student must have a DGPA of 3.00. Each academic term while registered in Honours must comprise a minimum of 9 credit hours. To graduate with the Honours degree (Cooperative Option), a student must also have a minimum grade of “C” in all courses that contribute to the degree.

To enter the Chemistry Major program a student must have completed at least 24 credit hours with a minimum DGPA of 2.00 and also obtained a minimum grade of “C+” in CHEM 1310. CHEM 1300, MATH 1500, MATH 1700, PHYS 1020 (1050), and PHYS 1070 are required courses in this program and students are strongly encouraged to complete these courses in first year.

To continue in the Major program, a student must have a DGPA of 2.00 at each point of assessment.

To graduate with the Bachelor of Science (Major) in Chemistry, a student must obtain a minimum DGPA of 2.00, and a minimum grade of “C+” or better in all required Chemistry and Focus Area courses.

Students who, at the end of Year 1, are undecided between the four year Major and Honours programs should note that the prescription for Honours Year 2 satisfies both the Honours and Major program requirements.

Four Year Major Requirements

Students interested in alternating employment terms and academic terms as part of their Major Chemistry program may enter the Cooperative Option in April of their second year in Chemistry. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.
The course and grade requirements for entry to this option are the same as those required for entry to the Chemistry Major program. Students are required to complete 24 credit hours of Chemistry (including CHEM 2470 and CHEM 2260 (the former CHEM 2280) or CHEM 2290) before they begin their first work term. To continue in the Major program, a student must have a DGPA of 2.00 at each point of assessment. To graduate with the Bachelor of Science (Major Cooperative Option) in Chemistry, a student must obtain a minimum DGPA of 2.00, and a minimum grade of “C” or better in all required Chemistry and Focus Area courses.

Students will apply for openings in the Cooperative Option in April of their second year in the Major program. They will be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

Chemistry Program Focus Areas

Students may elect to take courses that, in combination, make up a Chemistry focus area. Currently, there are nine Chemistry focus areas. They are: Bioanalytical, Biopharmaceutical, Biophysical, Environmental, Inorganic, Materials Science, Organic, Physical, and Quantum/Computational. Each focus area has specific course requirements that students will satisfy in order to graduate and receive the focus area notation on their transcripts. Other focus areas may be selected with approval from the Department Head.

Required Courses for each Chemistry Focus Area (Note: Students are responsible for completing all prerequisite courses required for the completion of a specific Focus Area). The below course listings are not meant to be limiting. Plausible substitutions will be reviewed and approved by the Department of Chemistry on an individual basis.

Bioanalytical: 18 credit hours chosen from: CHEM 2550, CHEM 2370, CHEM 3260, CHEM 3570, CHEM 4550, CHEM 4590, CHEM 4630; plus a minimum of 9 credit hours from: BGEN 3020 (6), MBIO 2020, MBIO 3410, PHYS 2600, PHYS 2610, PHYS 2260, STAT 2000.

Biopharmaceutical: Each of: CHEM 3390, CHEM 3580, CHEM 4580, CHEM 4590, CHEM 4670, CHEM 4690; plus 9 credit hours chosen from: BIOL 2380, BIOL 2410, BIOL 2420, BIOL 2520, BIOL 3290, BIOL 4470.

Biophysical: 18 credit hours chosen from: CHEM 2370, CHEM 3360, CHEM 3370, CHEM 3490, CHEM 4590, CHEM 4620, CHEM 4630, CHEM 4640, CHEM 4700; plus 9 credit hours chosen from: BIOL 2500, BIOL 2520, MBIO 1410 or MBIO 3410, MBIO 3460, MBIO 4540.

Environmental: Each of: CHEM 2370, CHEM 2550, CHEM 4550, CHEM 4590, and 6 credit hours of 3000 or 4000 level Chemistry courses; plus at least 9 credit hours chosen from: ENVR 1000, ENVR 2000, ENVR 2180 (BIOL 2380), ENVR 3180, BIOL 4380.

Inorganic: 18 credit hours chosen from: CHEM 3390, CHEM 4680, CHEM 4570 (Topics in Inorganic Chemistry: Catalysis and Small Molecule Activation), CHEM 4570 (Topics in Inorganic Chemistry: Bioinorganic Chemistry), CHEM 4570 (Topics in Inorganic Chemistry: Inorganic Materials), CHEM 4802 (Topics in Analytical Chemistry: Materials Characterization), CHEM 3360; plus 9 credit hours from: CHEM 3260, CHEM 3580, CHEM 4690, CHEM 3370, CHEM 3490, PHYS 2210 or PHYS 2600. (Note: The Inorganic Chemistry Focus Area does not include 9 hours of non-Chemistry courses.)

Materials Science: Each of: CHEM 3360, CHEM 3370, CHEM 3490, CHEM 4570, CHEM 4590, CHEM 4680; plus 9 credit hours from: BIOM 3320, ECE 3600, PHYS 2600, PHYS 2610. (MATH 1300 is highly recommended but does not count toward the 9 credit hour of non-Chemistry requirements).

Organic: 27 credit hours from: CHEM 2360, CHEM 3390, CHEM 3580, CHEM 4580, CHEM 4590, CHEM 4620, CHEM 4630, CHEM 4670, CHEM 4680, CHEM 4690. (Note: There are no non-Chemistry courses in the Organic Chemistry Focus Area)

Physical: 18 credit hours from: CHEM 2360, CHEM 3360, CHEM 3370, CHEM 3490, CHEM 3570, CHEM 3580, CHEM 4100, CHEM 4800 (Topics in Physical/Theoretical Chemistry); plus 9 credit hours from: MATH 2090, PHYS 2260, PHYS 2290, PHYS 2490 or PHYS 2496, PHYS 2600, PHYS 2610, the former PHYS 3680 or PHYS 4680. (MATH 1220 or MATH 1300 are highly recommended but will not count toward the 9 credit hours of non-Chemistry requirements.)

Quantum/Computational: Each of: CHEM 3260, CHEM 3360, CHEM 3370, CHEM 3490, CHEM 3580, CHEM 4460, CHEM 4670; plus 9 credit hours from: COMP 2160, COMP 2190, MATH 2090, MATH 2160, the former PHYS 2380 or PHYS 2386, PHYS 4250, PHYS 4520.

Three Year Requirements

Courses taken as part of a three-year degree program provide an introduction to the major fields of study in Chemistry. Students will have two options for a three year Degree under the Department of Chemistry.

Option A – Three Year General: As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000, and (or) 4000 level courses from each of two Science areas. To satisfy the requirement in the area of Chemistry, students must select a minimum of 18 credit hours from the following list of advanced level courses: CHEM 2210, CHEM 2220, CHEM 2260 (CHEM 2280), CHEM 2290, CHEM 2360, CHEM 2370, CHEM 2400 (CHEM 2380), CHEM 2470, CHEM 3260 (CHEM 4660), CHEM 3360, CHEM 3370, CHEM 3390, CHEM 3400 (CHEM 3380), CHEM 3570, CHEM 3580, CHEM 3590, CHEM 4100, CHEM 4360, CHEM 4370, CHEM 4570, CHEM 4580, CHEM 4590, CHEM 4620, CHEM 4630, CHEM 4640, CHEM 4660, CHEM 4670, CHEM 4680, CHEM 4690 (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level).

Courses not allowed for use as advanced level courses in the 3-Year General Degree are: CHEM 2240, CHEM 2550, CHEM 2560, CHEM 2770, CHEM 2780, CHEM 2860, CHEM 4550, the former CHEM 4600, CHEM 4610 (6), CHEM 4650, CHEM 4700, and CHEM 4710.

Option B – Three Year B.Sc. – Chemistry Focus: Students that choose this path for their three-year degree program will follow the program chart below. The 24 credit hours of introductory courses and 36 credit hours of advanced level requirements have been prescribed in such a way so that students that follow the chart can seamlessly transfer to a 4-year Chemistry Honours or Major degree program should they choose to do so after the completion of the 90 credit hours listed in the chart.

Students anticipating a transfer to either the four year Major or Honours program at the end of their second or third year should consult with the Departmental Program Advisor before registering.
Laboratory Exemption Regulations

- valid for two calendar years only
- lab exemption given only one time per course
- laboratory marks are carried forward to the next course attempt
- students are responsible for laboratory questions on tests and examinations
- students must earn a minimum of 60% on the laboratory to be eligible for an exemption.

Biochemistry and Biotechnology Programs

The Department of Chemistry, in conjunction with the Department of Microbiology, offers Joint Honours programs, Joint Honours Cooperative Options, Joint four year Major programs and a Joint four year Major Cooperative Options in Biochemistry and Biotechnology.* See sections 4.2 Biochemistry Program and 4.4 Biotechnology Program* for full details.

*As of Fall 2018, admission to the Biotechnology programs has been temporarily suspended. For further information, see the Faculty of Science office.

4.5.2 Chemistry Honours Degree Program Chart

<table>
<thead>
<tr>
<th>YEAR 1</th>
<th>YEAR 2</th>
<th>YEAR 3</th>
<th>YEAR 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>HONOURS3 (incl. Co-operative Option if selected) 120 CREDIT HOURS</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>CHEM 1300, CHEM 1310 (B)</td>
<td>CHEM 2210, CHEM 2220, CHEM 2260 (CHEM 2280), CHEM 2290, CHEM 2400, CHEM 2470, CHEM 2860, CHEM 2360</td>
<td>CHEM 3400, CHEM 3590</td>
<td>CHEM 4610 (6), CHEM 4710 (6)</td>
</tr>
</tbody>
</table>

In Year 1 or Year 2 the following must be completed:
- 6 credit hours from the Faculty of Arts, which should include the required "W" course
- 3 credit hours from Mathematics, Statistics or Computer Science courses
- 12 credit hours of approved electives in years one and two

Sufficient credit hours (18) from the 2000, 3000 and 4000 level Chemistry courses not yet taken to total a minimum of 63 credit hours of Chemistry courses at the 1000-4000 level. These credit hours may make up part of a focus area.

9 credit hours of non-Chemistry courses which are part of a designated focus area. If no Focus Area is selected, students must choose 9 credit hours of Chemistry courses.

15 credit hours of approved electives in years three and four

Work Terms (if Co-op selected):
- CHEM 3980, CHEM 3990
- CHEM 4980 and/or CHEM 4990

30 Hours

NOTES:

1 MATH 1230, MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1232 or MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of MATH 1500 and MATH 1700.

2 MATH 1010, MATH 1020, the former MATH 1190, MATH 1191, COMP 1500, COMP 1600, the former COMP 1260 and the former COMP 1270, may not be used to satisfy this requirement.

3 Students may elect to complete the requirements set out in one of the Chemistry focus areas. If a student opts for one of the focus areas, they should consult with the Department of Chemistry and a Science Academic Advisor for information regarding specific course requirements for each focus area.

4 Elective courses should be selected in consultation with the Department of Chemistry and/or a Faculty of Science Academic Advisor.

5 Not all Focus Areas include non-Chemistry courses. Some Focus Areas are all Chemistry courses. Refer to the description of each Focus Area for more information.

(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

4.5.3 Chemistry Major Degree Program Chart

<table>
<thead>

</tr>
</tbody>
</table>

In Year 1 or Year 2 the following must be completed:
- 6 credit hours from the Faculty of Arts, which should include the required "W" course
- 3 credit hours from Mathematics, Statistics or Computer Science courses
- 9 credit hours of non-Chemistry courses which are part of a designated focus area. If no Focus Area is selected, students must choose 9 credit hours of Chemistry courses.

Work Terms (if Co-op selected):
- CHEM 3980, CHEM 3990
- CHEM 4980 and/or CHEM 4990

NOTES:

1 MATH 1230, MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1232 or MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of MATH 1500 and MATH 1700.

2 MATH 1010, MATH 1020, the former MATH 1190, MATH 1191, COMP 1500, COMP 1600, the former COMP 1260 and the former COMP 1270, may not be used to satisfy this requirement.

3 Students may elect to complete the requirements set out in one of the Chemistry focus areas. If a student opts for one of the focus areas, they...
should consult with the Department of Chemistry and a Science Academic Advisor for information regarding specific course requirements for each focus area.

4 IMPORTANT: The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.

5 Elective courses should be selected in consultation with the Department of Chemistry and/or a Faculty of Science Academic Advisor.

6 Not all Focus Areas include non-Chemistry courses. Some Focus Areas are all Chemistry courses. Refer to the description of each Focus Area for more information.

(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

**NOTES:**
1. MATH 1220 may be taken in place of MATH 1300; MATH 1230 or MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1232 or MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of MATH 1500 and MATH 1700.
2. Students are advised to take PHYS 1050 and PHYS 1070.
3. The prerequisite of PHYS 3430 is waived for students in this program.

(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

### 4.5.6 Chemistry Course Descriptions-0 Level

**CHEM 0900 Preparatory Chemistry Cr. Hrs. 0**

A course designed for students with little, or no background in chemistry who wish to achieve the prerequisites for advanced courses, or for students who require a refresher course in basic chemistry. Concurrent registration in CHEM 0900 and any of CHEM 1300, CHEM 1301, CHEM 1311 or CHEM 1320 is not permitted. (Pass/Fail grade only.) Prerequisite or Concurrent Requirement: Any grade 12 or 40S Mathematics course or equivalent.

### 4.5.6 Chemistry Course Descriptions-1000 Level

**CHEM 1000 Understanding the World through Chemistry Cr. Hrs. 3**

This course introduces students to the principles of chemistry necessary for an understanding of contemporary issues in agriculture, the environment, industry, medicine, and the economy. High school chemistry is not required. May be used as a prerequisite (minimum grade “B”) for CHEM 1300 or CHEM 1301 (Developmental section). Not to be held with CHEM 1001. May not be used to fulfill chemistry requirements in a Chemistry Honours, Major, General or Minor program. Not available to students who have previously obtained credit in, or are concurrently registered in, any 2000 level university Chemistry course.
CHEM 1030 Carbon Chemistry in Nature and Society Cr. Hrs. 3
This course introduces organic molecules and illustrates the principles of organic chemistry with topics from cosmetics and personal care products, the petroleum industry, food preparation chemistry, polymers and plastics, poisons and biological toxins, and risk assessment. May not be used to fulfill chemistry requirements in a Chemistry Honours, Major, General or Minor program. Not available to students who have previously obtained credit in, or are concurrently registered in, any 2000 level university Chemistry course. Not to be held with CHEM 1031. Prerequisite: One of CHEM 1000, CHEM 1001 (C), CHEM 1300, CHEM 1301 (C), Chemistry 40S (or equivalent), or CHEM 0900.

CHEM 1300 University 1 Chemistry: Structure and Modelling in Chemistry Cr. Hrs. 3
(Lab Required) Atomic and molecular models and their applications to chemistry, including a discussion of solid, liquid, and gaseous states, and of mixtures. Not to be held with CHEM 1301. Prerequisites: (one of Chemistry 40S, CHEM 0900 (P), CSKL 0100 (P) offered by Extended Education, a grade of "B" or better in CHEM 1000 or the former CHEM 1001, or equivalent) and (one of Applied Mathematics 40S, Pre-calculus Mathematics 40S, the former Mathematics 40S (300), a grade of "C" or better in MSKL 0100 offered by Extended Education, or equivalent).

CHEM 1310 University 1 Chemistry: An Introduction to Physical Chemistry Cr. Hrs. 3
(Lab Required) Thermochemistry, chemical thermodynamics, and chemical kinetics. Prerequisite: CHEM 1300 or CHEM 1301 (C).

CHEM 1320 University 1 Chemistry: An Introduction to Organic Chemistry Cr. Hrs. 3
(Lab Required) Structures, properties and reactions of organic molecules. Not to be held with CHEM 2210 or CHEM 2211. Prerequisite: CHEM 1300 or CHEM 1301 (C).

4.5.6 Chemistry Course Descriptions—2000 Level

CHEM 2210 Introductory Organic Chemistry 1: Structure and Function Cr. Hrs. 3
(Lab Required) An introduction to the concepts of organic reactivity and bonding in organic molecules. Preparation and properties of functionalized organic molecules. Not to be held with CHEM 1320 or CHEM 2211. Prerequisite: CHEM 1310 or CHEM 1311 (C).

CHEM 2220 Introductory Organic Chemistry 2: Reactivity and Synthesis Cr. Hrs. 3
(Lab Required) An introduction to the reactivity of organic compounds and organic spectroscopy. The application of functional group interconversions to syntheses. Not to be held with CHEM 2221. Prerequisite: CHEM 2210 or CHEM 2211 (C).

CHEM 2240 Applied Chemistry for Engineers Cr. Hrs. 3
Bonding, surface chemistry, phase rule, electrochemistry, materials and descriptive inorganic chemistry of selected elements. Prerequisite: CHEM 1300 or CHEM 1301 (C).

CHEM 2260 Introduction to Spectroscopy Cr. Hrs. 3
(Lab Required) An exploration of the underlying principles of atomic and molecular spectroscopy and the application of such tools to probe chemical and physical properties of matter on a microscopic scale. Aspects of ultraviolet, visible, vibrational, rotational and nuclear magnetic resonance spectroscopies are explored. Not to be held with the former CHEM 2280 or CHEM 2281. Prerequisites: CHEM 1310 or CHEM 1311 (C); PHYS 1030 or PHYS 1031 (C) or PHYS 1070 or PHYS 1071 (C); plus six credit hours of 1000 level mathematics (preferably calculus) with the exception of MATH 1010, the former MATH 1190, MATH 1191, FA 1020, or MATH 1020.

CHEM 2290 Chemical Energetics and Dynamics: Macroscopic Descriptions Cr. Hrs. 3
(Lab Required) Chemical energetics, entropy and the second law of thermodynamics, chemical dynamics. May not be held with CHEM 2291. Prerequisites: CHEM 1310 or CHEM 1311 (C); PHYS 1030 or PHYS 1031 (C) or PHYS 1070 or PHYS 1071 (C); plus six credit hours of 1000 level mathematics (preferably calculus) with the exception of MATH 1010, MATH 1190, MATH 1191, MATH 1020, or FA 1020.

CHEM 2360 Biochemistry 1: Biomolecules and an Introduction to Metabolic Energy Cr. Hrs. 3
(Lab Required) An introductory course dealing with kinds of molecules encountered in biochemistry, and the concept of metabolic energy as a product of catabolism and a requirement for biosynthesis. This course is also given in Microbiology as MBIO 2360. May not be held with CHEM 2361, CHEM 2770, MBIO 2360, MBIO 2361, or MBIO 2770. Prerequisites: CHEM 1310 or CHEM 1311 (C+); and one of BIOL 1030, BIOL 1031 (C). NOTE: Students may hold this course for credit in the B.Sc. General Degree program, but may not use it to fulfill the minimum requirement of 12 credit hours in 2000 level Chemistry (pre-September 2008 regulations). Those students following the new General Degree regulations (effective 2008-09) are able to use this course as part of the 18 credit hours of advanced level Chemistry or Microbiology.

CHEM 2370 Biochemistry 2: Catabolism, Synthesis, and Information Pathways Cr. Hrs. 3
(Lab Required) An introductory course dealing with the basic metabolic processes that occur in living cells, including the production and use of metabolic energy, the breakdown and synthesis of biomolecules; the synthesis of DNA, RNA and proteins; and the regulation of these processes. This course is also given in Microbiology as MBIO 2370. May not be held with CHEM 2371, CHEM 2780, MBIO 2370, MBIO 2371, or MBIO 2780. Prerequisites: one of CHEM 2360, CHEM 2361, MBIO 2360, or MBIO 2361; and CHEM 2210 or CHEM 2211, both courses with a minimum grade of "C". NOTE: Students may hold this course for credit in the B.Sc. General Degree program, but may not use it to fulfill the minimum requirement of 12 credit hours in 2000 level Chemistry (pre-September 2008 regulations). Those students following the new General Degree regulations (effective 2008-09) are able to use this course as part of the 18 credit hours of advanced level Chemistry or Microbiology.

CHEM 2400 Inorganic chemistry: Structure and Applications Cr. Hrs. 3
(Lab Required) Overview of chemical bonding, structure and reactivity across the Periodic Table, illustrated by examples linking Inorganic Chemistry with e.g. materials science and biochemistry. The lab component involves synthesis and analysis of simple inorganic compounds. May not be held with CHEM 2380, CHEM 2381 or CHEM 2401. Prerequisite: CHEM 1310 or CHEM 1311 (C).

CHEM 2470 Introductory Analytical Chemistry Cr. Hrs. 3
(Lab Required) A course in quantitative analysis provides training useful for nearly all scientists. It equips the students with the theoretical principles on which the analytical methods are based, with the ability to plan and perform experimental work, to interpret the results. May not be held with CHEM 2471. Prerequisites: CHEM 1310 or CHEM 1311 (C); and three credit hours of mathematics with the exception of MATH 1010, MATH 1190, MATH 1191, MATH 1020, or FA 1020.

CHEM 2550 Environmental Chemistry Cr. Hrs. 3
An introduction to the chemistry of the environment. Emphasis will be on the composition of the natural environment and the processes of natural and human-introduced chemical species that take place within it. The course will provide students with the chemical basis for understanding the environment and environmental problems. This course is also taught in Environmental Science as ENVR 2550. Prerequisite: CHEM 1310 or CHEM 1311 (C).

Chemistry Course Descriptions-3000 Level

Academic Calendar 2018-2019

Faculty of Science

627 Undergraduate Calendar 2018-2019
CHEM 4360 Signalling and Regulation of Gene Expression Cr. Hrs. 3
The biochemistry of cell response to external stimuli, with emphasis on
animals. Cell surface receptors and ligands; signalling to the nucleus;
phosphorylation and proteolysis; transcription; gradients in cell patterning.
May not be held with CHEM 4361. Prerequisite: a "C" or better in one of
CHEM 2370, CHEM 2371, MBIO 2370, MBIO 2371.

CHEM 4370 Glycobiology and Protein Activation Cr. Hrs. 3
The role of carbohydrate containing biomolecules in biochemistry and their
importance for understanding some genetic diseases. The importance of
limited proteolysis in activation of biomolecules. May not be held with
CHEM 4371. Prerequisite: a "C" or better in one of CHEM 2370, CHEM 2371,
MBIO 2370, MBIO 2371.

CHEM 4550 Aquatic Chemistry Cr. Hrs. 3
An examination of biogeochemical processes affecting the distribution,
speciation and bioavailability of chemical substances in the aquatic
environment. The theoretical basis for the chemical behaviour of natural
water systems is discussed, as well as the description of processes involved
in wastewater treatment. This course is also taught in Environmental
Science as ENVR 4550. Prerequisite: A grade of "C" or better in one of CHEM
3590 or ENVR 3550; or permission of the department.

CHEM 4570 Topics in Inorganic Chemistry Cr. Hrs. 3
A variety of topics from recent literature. This is an advanced 4000 level
course. Registration requires departmental permission. This course may not
be offered every year - check with department for availability.

CHEM 4580 Topics in Organic Chemistry Cr. Hrs. 3
Selected topics dealing with the structure and reactivity of organic
compounds. This is an advanced 4000 level course. Registration requires
departmental permission. This course may not be offered every year - check
with department for availability.

CHEM 4590 Bioanalytical Methods Cr. Hrs. 3
( Lab Required) This course introduces different methods used currently for
the analysis of biological materials. Qualitative and quantitative aspects are
explored. Instrumentation is described and practical methods are designed.
Prerequisite: a grade of "C" or better in CHEM 3590 or ENVR 3550.

CHEM 4610 Advanced Chemical Techniques Cr. Hrs. 6
( Lab Required) A workshop course consisting of lectures, problem solving,
and advanced instrumental techniques. The course is designed to train
potential research students in techniques like NMR, mass spectroscopy, and
chromatography. This course is required of all final year Honours students
in Chemistry. May not hold with the former CHEM 4600. Prerequisite: one of
CHEM 3360 (C), CHEM 3370 (C), CHEM 3400 (C), CHEM 3380 (C), CHEM 3390
(C), CHEM 3590 (C) or CHEM 3580 (C).

CHEM 4620 Biochemistry of Nucleic Acids Cr. Hrs. 3
The structure of nucleic acids; synthesis and sequence determination;
interaction with drugs and protein. May not be held with CHEM 4621.
Prerequisite: a "C" or better in one of CHEM 2370, CHEM 2371, MBIO 2370,
MBIO 2371.

CHEM 4630 Biochemistry of Proteins Cr. Hrs. 3
The structure and function of proteins, their physical and chemical
properties and methods for studying them. May not be held with CHEM
4631. Prerequisite: a "C" or better in one of CHEM 2370, CHEM 2371, MBIO
2370, MBIO 2371.

CHEM 4640 Spectroscopy, Relaxation and Structure Cr. Hrs. 3
A course dealing with quantum mechanical manipulations and illustrations
from magnetic resonance and other spectroscopies; relaxation and
polarization phenomena. Prerequisite: CHEM 3370 (C) or permission of the
Instructor.

CHEM 4650 Molecular States and Processes Cr. Hrs. 3
A course dealing with various aspects of molecular states and processes
including student selected topics. Prerequisite: CHEM 3370 (C).

CHEM 4670 Drug Design and Drug Discovery Cr. Hrs. 3
An understanding of the design, synthesis and interactions of drug
molecules. Emphasis will be on novel drug-like molecules in the early
stages of drug discovery with special focus on brain diseases and infectious
diseases. Prerequisites: CHEM 2220 (C); and one of CHEM 2360, CHEM 2361,
MBIO 2360, MBIO 2361 (C) or CHEM 2860 (C).

CHEM 4680 Organometallic Chemistry Cr. Hrs. 3
Chemistry of organometallic compounds of the transition metals and
representative elements. Prerequisite: CHEM 3400 (C), or CHEM 3380 (C), or
CHEM 3390 (C).

CHEM 4690 Specific Methods in Organic Synthesis Cr. Hrs. 3
Advanced methods and principles of organic synthesis of complex
molecules. Prerequisite: CHEM 3390 (C).

CHEM 4700 Advanced Biochemistry Laboratory Cr. Hrs. 3
( Lab Required) A laboratory and workshop consisting of lectures, problem
solving, and advanced instrumental techniques such as magnetic
resonance spectroscopy, mass spectrometry, circular dichroism, x-ray
crystallography, fluorescence spectroscopy and computer analysis of
protein sequences. This course is required for all final year Honours
students in Biochemistry. Prerequisite or concurrent requirement: CHEM
4620 or CHEM 4621; and CHEM 4630 or CHEM 4631.

CHEM 4710 Research Project in Chemistry or Biochemistry Cr. Hrs. 6
( Lab Required) A research project in any aspect of chemistry or
biochemistry, chosen in consultation with the course administrator and an
appropriate supervising faculty member. Written reports and oral
presentation at the end of the project will be required. The course is
normally available only to final year students in chemistry programs. May
not be held with CHEM 4711 or MBIO 4530. Prerequisite: Permission of the
course administrator.

CHEM 4800 Topics in Physical/Theoretical Chemistry Cr. Hrs. 3
Selected topics related to physical chemistry properties of matter, their
measurement, and computational methods for studying them. This is an
advanced 4000 level course, registration only by Departmental permission.
This course may not be offered every year - check with department for
availability.

CHEM 4802 Topics in Analytical Chemistry Cr. Hrs. 3
Selected topics on the most recent and sensitive techniques described in
the literature in the Analytical, Bioanalytical and Environmental areas. A
selection of topics among separation, surface, ionization, spectroscopy,
voltammetry and spectrometry techniques will be covered. This is an
advanced 4000 level course, registration only by Departmental permission.
This course may not be offered every year - check with department for
availability.

CHEM 4804 Topics in Biochemistry Cr. Hrs. 3
Selected advanced topics relevant to the study of biomolecules. This is an
advanced 4000 level course, registration only by Departmental permission.
This course may not be offered every year - check with department for availability.

**CHEM 4980 Work Term 3**  
Cr. Hrs. 0  
Work assignments in business, industry or government for students registered in the Chemistry Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

**CHEM 4990 Work Term 4**  
Cr. Hrs. 0  
Work assignments in business, industry or government for students registered in the Chemistry Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

### 4.6 Department of Computer Science

**Head:** John Anderson  
**Campus Address/General Office:** E2-445 EITC  
**Telephone:** 204 474 8313  
**Email Address:** queries@cs.umanitoba.ca  
**Website:** [www.cs.umanitoba.ca](http://www.cs.umanitoba.ca)

#### 4.6.1 Program Information

Computer technology continues to advance and computer applications are found in all fields and disciplines. As new applications proliferate, opportunities for careers in computing will continue to be strong. Both the Major and the Honours programs offer a co-op option so students may combine education with employment experience.

The department must approve a student's Honour or Major program prior to registration for each Fall/Winter Term. Students must also obtain departmental approval for any and all revisions to their program.

The Computer Science Honours and Major programs, including the Coop programs, and the Software Engineering area of specialization, are accredited by the Computer Science Accreditation Council.

#### Honours

The Honours program in Computer Science at the University of Manitoba was the first Honours program in Canada to be given professional accreditation by the Canadian Information Processing Society. The program provides an opportunity to study the subject in greater depth than the other programs in Computer Science and leads to an Honours Bachelor of Computer Science degree (B.C.Sc.). In addition, this program gives professional preparation for careers in areas such as software engineering, system design or project management.

An outline of the Honours program is provided below. MATH 1700 or equivalent is strongly recommended as an option. Optional courses are selected in consultation with the department advisor.

**To enter** the Honours program in Computer Science, a student must have completed at least 24 credit hours with a minimum DGPA of 3.00, and also obtained a minimum grade of "B" in COMP 1020. Students are strongly encouraged to complete MATH 1220 (or MATH 1300) and MATH 1230 (or MATH 1500) (or equivalents) with at least a "C" prior to entering the Computer Science Honours program. Failure to complete these first year Mathematics requirements will result in the inability to register for certain 2000 level required courses.

**Effective for entry to the Honours program in Fall 2019 and later:** To enter the Honours program in Computer Science, a student must have completed at least 24 credit hours with a minimum DGPA of 3.00, and also obtained a minimum grade of "B" in COMP 1020, "C+" in both MATH 1220 (or MATH 1300) and MATH 1230 (or MATH 1500) (or their equivalents) and "C" in MATH 1700 (or equivalents).

**To continue** in the Computer Science Honours program, students must maintain a minimum DGPA of 3.00 and complete a minimum of 9 credit hours during each Fall and Winter Term.

**To graduate** from the Computer Science Honours program students must achieve a minimum GPA of 3.00 and obtain a minimum grade of "C" on the courses that make up the 120 credit hours of the degree.

Students can take a maximum of 90 credit hours of computer science, statistics and mathematics courses. Outside of computer science and mathematics courses, students are encouraged to select courses such that...
their programs include at least 15 credit hours of study in science, engineering, or business, and at least 9 credit hours of study in the humanities or social sciences.

Honours Cooperative Option

The first class of students graduated from the Cooperative program in October 1983. This program provides students with an opportunity to gain a total of 12 months of paid employment prior to graduation. It assists students in obtaining work experience with participating employers around the world. For example, students have recently secured employment in Vancouver, Seattle, Toronto, Ottawa, and Japan and they have found the program an invaluable preparation for their careers.

Students interested in alternating employment terms and academic terms as part of their Honours Computer Science program may apply to enter the Cooperative Option at the conclusion of their second year in Honours Computer Science. The course and grade requirements for entry to this option are the same as those required for entry to the regular Honours program, as indicated in the chart below.

Students should refer to the general faculty regulations for Cooperative Options in Section 3.4, especially for information on performance requirements.

Students should note that the course and grade requirements for the Cooperative Option are the same as that of the regular Honours program. REMINDER: Students must complete at least nine (9) credit hours per each Fall and Winter Term (or equivalent for cooperative students) to remain in the Honours program.

To graduate with the Honours degree, a student must present a minimum grade of "C" in each course which contributes to the degree and a GPA of 3.00.

Students can take a maximum of 90 credit hours of computer science, statistics and mathematics courses. Outside of computer science and mathematics courses, students are encouraged to select courses such that their programs include at least 15 credit hours of study in science, engineering, or business, and at least nine (9) credit hours of study in the humanities or social sciences.

Students in this program will normally graduate following the completion of the Year 4 academic requirements in December, will receive their degree in February, and will be eligible to attend the May Convocation.

Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students will apply for openings in the Cooperative Option in April of their second year in the Honours program. They will be notified of their provisional acceptance in the program in September. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

The employment terms will be designed to provide students with the opportunity to acquire practical experience that complements their academic knowledge and gain insight into areas of specialization within the computing field. Students typically earn enough to defray the cost of their university education.

Students are required to register in and pay fees for each employment term prior to the Fee Deadline Date for that term. Students will be required to submit an employment report upon the completion of each of their three employment terms.

Four Year Major

To enter the Major Degree program in Computer Science, a student must have completed at least 24 credit hours with a minimum GPA of 2.00, and also obtained a minimum grade of "C+" in COMP 1020. Students are strongly encouraged to complete MATH 1300 and MATH 1500 (or equivalents) with at least a "C" prior to entering the Computer Science Major program. Failure to complete these first year Mathematics requirements will result in the inability to register for certain 2000 level required courses.

Effective for entry to the Major program in Fall 2019 and later: To enter the Major Degree program in Computer Science, a student must have completed at least 24 credit hours with a minimum DGPA of 2.00, and also obtained a minimum grade of "C+" in COMP 1020, "C+" in both MATH 1300 and MATH 1500 (or their equivalents) and "C" in MATH 1700 (or equivalents).

To continue in the Major program a student must maintain a minimum DGPA of 2.00.

To graduate with the Computer Science Major degree, a student must present a minimum grade of "C" in: MATH 1300, MATH 1500, MATH 1240, (STAT 1000 or STAT 1150), COMP 2080, COMP 2140, COMP 2150, COMP 2160, COMP 2280, COMP 3350, COMP 3370, COMP 3430, COMP 4620 and in each of the 18 credit hours of 3000 and 4000 level Computer Science courses that apply to the Computer Science component of their degree program. Additionally, students must achieve a minimum DGPA of 2.00.

Effective for students entering the Computer Science Major Fall 2019 and later: To graduate with the Computer Science Major degree, a student must present a minimum grade of "C+" in: MATH 1300 (or equivalent), MATH 1500 (or equivalent), and a minimum grade of "C" in MATH 1240, MATH 1700 (or equivalent), (STAT 1000 or STAT 1150), COMP 2080, COMP 2140, COMP 2150, COMP 2160, COMP 2280, COMP 3350, COMP 3370, COMP 3430, COMP 4620 and in each of the 18 credit hours of 3000 and 4000 level Computer Science courses that apply to the Computer Science component of their degree program. Additionally, students must achieve a minimum DGPA of 2.00.

This program is suitable for those students interested in combining a fairly extensive program in Computer Science with broad coverage of another subject or subjects of their choice (Science or non-Science). The program offers greater scheduling flexibility, more relaxed entrance requirements, and a wider range for the inclusion of electives from other disciplines than the Honours program, but it is not considered to offer the same professional training as the Honours program. Admission to graduate programs may be conditional upon completion of additional courses. Students intending to proceed to a master’s degree from the four year Major program must consult with the department at the beginning of their second year of undergraduate study and in each subsequent year.

The student will be able to transfer to the Honours program at the end of the second year, provided that departmental and faculty requirements for the Honours program at that stage are satisfied.

Students, who at the end of Year 1 are undecided between the four year Major program and the Honours program, should note that the required courses in Year 2 Honours satisfy the requirements for both the Honours and Major programs. It is suggested that students with the necessary prerequisite standing in Year 1 may wish to register in the courses listed for Year 2 of the Honours program, and thus keep both options open.

Students can take a maximum of 90 credit hours of computer science, statistics and mathematics courses. Outside of computer science and mathematics courses, students are encouraged to select courses such that
their programs include at least 15 credit hours of study in science, engineering, or business, and at least nine (9) credit hours of study in the humanities or social sciences. Students may be allowed to take up to 48 credit hours of courses outside the Faculty of Science with departmental permission, despite the faculty maximum of 36 credit hours. The permission would typically be granted if a student is completing a minor outside of Science and may have completed a variety of electives outside the Faculty prior to declaring a minor in one department.

**Four Year Major Cooperative Option**

This program provides students with an opportunity to gain a total of 12 months of paid employment prior to graduation. It assists students in obtaining work experience with participating employers around the world. For example, students have recently secured employment in Vancouver, Seattle, Toronto, Ottawa and Japan and have found the program an invaluable preparation for their careers.

Students interested in alternating employment terms and academic terms as part of their four year Major program in Computer Science may apply to enter the Cooperative Option at the conclusion of their second year of the Major program in Computer Science. The course and grade requirements for entry to this option are the same as those required for entry to the regular four year Major program, as indicated in the chart below. Students should refer to the general faculty regulations for Cooperative Options in Section 3.4.

Students should note that the course and grade requirements for the Cooperative Option are the same as that for the regular Major program. Students in this program will normally graduate following the completion of the Year 4 academic requirements in December, will receive their degree in February, and will be eligible to attend the May Convocation.

Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students will apply for openings in the Cooperative Option in April of their second year in the Major program. They will be notified of their provisional acceptance in the program in September. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

The employment terms will be designed to provide students with the opportunity to acquire practical experience and insight into areas of specialization within the computing field. Students can also typically earn enough to defray the cost of their university education.

Students are required to register in, and pay fees for, each employment term prior to the Fee Deadline Date for that term. Students will be required to submit an employment report upon the completion of each of their three employment terms.

**Three Year General**

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000, and (or) 4000 level courses from each of two Science areas. To satisfy the requirement in the area of Computer Science, students must select a minimum of 18 credit hours from the 2000, 3000, and (or) 4000 level courses offered by the department (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level.).

**NOTES:**

1. MATH 1210 or MATH 1211, MATH 1220 or MATH 1310 may be taken in place of MATH 1300; MATH 1230, MATH 1510, MATH 1520, or MATH 1690 (6) may be taken in place of MATH 1500. Honours students are encouraged to take MATH 1220 instead of MATH 1300 and to take MATH 1230 instead of MATH 1500 to better prepare them for later, higher-level studies. Students who have previously completed COMP 2130 may use it in lieu of MATH 1240.

2. Entry to the Honours Cooperative Option and four year Major Cooperative Option is at the end of second year. Employment terms follow 3A (September-December), 3B (May-August) and 4A (January-April). Students in the Cooperative Option must complete three employment terms and receive a passing grade in COMP 2980, COMP 3980 and COMP 4980 prior to the last academic term.

3. Additional information on how students may select their courses can be found at the beginning of this section.

4. IMPORTANT: The Honours and four year Major degree need not be completed in the order prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program. Students in the Cooperative Option should be aware that while other arrangements are possible, they may jeopardize their chances of obtaining employment by selecting such arrangements. Students should discuss their planned sequence of courses with the department prior to making adjustments to the sequence above.

5. IMPORTANT: A maximum of 90 credit hours of computer science, statistics and mathematics courses can be included in a Major or Honours program.

---

Faculty of Science

632 Undergraduate Calendar 2018-2019
4.6.3 Computer Science - Mathematics Joint Honours Program

The departments of Computer Science and Mathematics offer a joint Honours program in in-depth study in both Computer Science and Mathematics.

Honours Requirements

To enter the Joint Honours Computer Science-Mathematics program, the student must have a minimum grade of “B” in each of COMP 1020, either MATH 1232 or MATH 1690 (or a minimum grade of “A” in MATH 1700), and have satisfied the Faculty of Science requirements for entry to the honours program. It is recommended that STAT 2150 be completed in Year 1 as an elective.

NOTES:

1 MATH 1210 or MATH 1211, MATH 1220 or MATH 1310 may be taken in place of MATH 1300; MATH 1230, MATH 1510, MATH 1520, or MATH 1690 (6) may be taken in place of MATH 1500; MATH 1232, MATH 1710 or MATH 1690 (6) may be taken in place of MATH 1700. Honours students are encouraged to take MATH 1220 instead of MATH 1300 and to take MATH 1230 instead of MATH 1500 to better prepare them for later, higher-level studies. Students who have previously completed COMP 2130 may use it in lieu of MATH 1240.
2 Entry to the Honours Cooperative Option and four-year Major Cooperative Option is at the end of second year. Employment terms follow 3A (September-December), 3B (May-August) and 4A (January-April). Students in the Cooperative Option must complete three employment terms and receive a passing grade in COMP 2980, COMP 3980 and COMP 4980 prior to the last academic term.
3 Additional information on how students may select their courses can be found at the beginning of this section.
4 IMPORTANT: The Honours and four-year Major degree need not be completed in the order prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program. Students in the Cooperative Option should be aware that while other arrangements are possible, they may jeopardize their chances of obtaining employment by selecting such arrangements. Students should discuss their planned sequence of courses with the department prior to making adjustments to the sequence above.
5 IMPORTANT: A maximum of 90 credit hours of computer science, statistics and mathematics courses can be included in a Major or Honours program.

4.6.4 Computer Science – Physics & Astronomy Joint Honours Program

The departments of Computer Science and Physics & Astronomy offer a joint Honours program in in-depth study in both Computer Science and Physics & Astronomy.

To enter the Joint Honours Computer Science-Physics and Astronomy program, the student must have a minimum grade of “B” in each of PHYS 1050 (or “B+” in PHYS 1020), PHYS 1070 (or B+ in PHYS 1030), MATH 1300, MATH 1500, MATH 1700 (or any equivalent), COMP 1010 (or COMP 1012) and COMP 1020 and a minimum DGPA of 3.00. Students must complete a minimum of 9 credit hours per term in each Fall and Winter term.

To continue in the Honours program, students must maintain a minimum DGPA of 3.00, complete a minimum of 9 credit hours during each Fall and Winter term (or equivalent for students in the Co-operative option).

To graduate with the Honours degree, a student must obtain a minimum DGPA of 3.00 and present a minimum grade of “C” in each course that contributes to the degree.

The departments must approve a student’s Honours program each session. Students must also obtain departmental approval for any and all revisions to their program.

NOTES:

1 Students are strongly advised to take MATH 1220, MATH 1230 and MATH 1322. The following substitutions are allowed (but not advised), provided the grades indicated in brackets are achieved: MATH 1300 (A) in place of MATH 1220, MATH 1500 (A) or MATH 1510 (A) in place of MATH 1230, MATH 1700 (A) or MATH 1710 (A) in place of MATH 1232, MATH 1690 (B) in place of MATH 1230 and MATH 1232. With permission from the department, students may be able to substitute STAT 1000 and STAT 2000 in place of STAT 1150.
2 When chosen, the Cooperative Option work terms (2980, 3980, 4980) 2 When chosen, the Cooperative Option work terms (COMP 2980, COMP 3980, COMP 4980) will normally be completed during the Summer Terms following years 2, 3, and 4 respectively.

(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)
### JOINT HONOURS (Including Cooperative Option if selected) 120 CREDIT HOURS

### NOTES:
1. PHYS 1050 and PHYS 1070 are recommended.
2. MATH 1220 or MATH 1310 may be taken in place of MATH 1300; MATH 1230, MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1232 or MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of MATH 1500 and MATH 1700. Students who have previously completed COMP 2130 may use it in lieu of MATH 1240.
3. As there are no open electives in Year 2 of the program, students should complete the University written English requirement in Year 1. If not completed in Year 1, a “W” course must be completed prior to Year 3 in addition to the required Year 2 courses.
4. When chosen, the Cooperative Option work terms (COMP 2980, COMP 3980, COMP 4980) will normally be completed during the Summer Terms following years 2, 3, and 4 respectively.
5. Students are required to take at least one of PHYS 2260 or PHYS 2610.

### 4.6.5 Computer Science – Statistics Joint Honours Program

The departments of Computer Science and Statistics offer a Joint Honours program for in-depth study in both Computer Science and Statistics.

**To enter** the Joint Honours Computer Science-Statistics Program, the student must have a “B” or better in COMP 1020 and in STAT 2150 and a DGPA of 3.00. Note that MATH 12201, MATH 12301 and MATH 12321 and MATH 1240 are not required to enter the program, however, it is recommended that they be completed in Year 1 as they are prerequisites to Year 2 courses.

**To continue** in the Joint Honours Computer Science - Statistics Program, students must maintain a DGPA of 3.00.

**To graduate** with the Honours degree a student must present a minimum grade of “C” in each course that contributes to the degree. In addition, the student must achieve a minimum DGPA of 3.00.

Both departments must approve a student’s Honours program each session. Students must also obtain approval from both departments for any and all revisions to the program.

### NOTES:
1. MATH 1510 (B) or MATH 1500 (B) may be taken in place of MATH 1230; MATH 1300 (B) may be taken in place of MATH 1220; MATH 1710 (B) or MATH 1700 (B) may be taken in place of MATH 1232. STAT 1000 (C) and STAT 2000 (B) may be taken in place of STAT 1150.
2. COMP 4710 and COMP 4380 are suggested if offered.
3. The following courses are suggested: COMP 3350, COMP 3020, COMP 3490, STAT 3490, STAT 4630, STAT 4690.
4.6.6 Computer Science Course Descriptions-1000 Level

COMP 1010 Introductory Computer Science Cr. Hrs. 3
(Lab Required) An introduction to computer programming using a procedural high level language. May not be held with COMP 1011 or COMP 1012 or COMP 1013. Prerequisite: any grade 12 or 40S Mathematics, or equivalent.

COMP 1012 Computer Programming for Scientists and Engineers Cr. Hrs. 3
(Lab Required) An introduction to computer programming suitable for solving problems in science and engineering. Students will implement algorithms for numerical processing, statistical analysis and matrix operations. Not to be held with COMP 1010, COMP 1011 or COMP 1013. Prerequisite: Mathematics 40S or equivalent. Co-requisite: MATH 1230 or MATH 1500 or MATH 1501 (or equivalent).

COMP 1020 Introductory Computer Science 2 Cr. Hrs. 3
(Lab Required) More features of a procedural language, elements of programming. May not be held with COMP 1021. Prerequisite: COMP 1010 or COMP 1011 (C); or COMP 1012, or COMP 1013 (C); or High School Computer Science 40S (75%) and any grade 12 or 40S Mathematics, or equivalent.

COMP 1500 Computing: Ideas and Innovation Cr. Hrs. 3
An introduction to the topics of Computer Science and problem solving. Students will learn concepts in computer programming. May not be used to fulfill computer science requirements in a Computer Science Honours, Major, General or Minor program. Not available to students who have previously obtained credit in, or are concurrently registered in any of COMP 2080, COMP 2130, COMP 2140, COMP 2150, COMP 2160 or COMP 2280.

COMP 1600 Navigating Your Digital World Cr. Hrs. 3
Topics related to digital society such as security, encryption and data storage, issues of social and ethical importance, and current events. May not be used to fulfill computer science requirements in a Computer Science Honours, Major, General or Minor program. Not available to students who have previously obtained credit in, or are concurrently registered in any of COMP 2080, COMP 2130, COMP 2140, COMP 2150, COMP 2160 or COMP 2280. May not be held with the former COMP 1270.

4.6.6 Computer Science Course Descriptions-2000 Level

COMP 2080 Analysis of Algorithms Cr. Hrs. 3
Methods of analyzing the time and space requirements of algorithms. Average case and worst case analysis. Models of computation. Prerequisites: MATH 1240 (C), MATH 1241 (C) or COMP 2130 (C); and one of COMP 2140, or the former COMP 2061 (C). STAT 1000 or STAT 1001 or STAT 1150 is strongly recommended.

COMP 2130 Discrete Mathematics for Computer Science Cr. Hrs. 3
An introduction to the set theory, logic, integers, combinatorics and functions for today's computer scientists. Prerequisites: COMP 1020 or COMP 1021 (C), and a "C" in one of: MATH 1210, MATH 1211, MATH 1220, MATH 1300, MATH 1301, MATH 1310; and one of: MATH 1230, MATH 1500, MATH 1501, MATH 1510, MATH 1520, or MATH 1690.

COMP 2140 Data Structures and Algorithms Cr. Hrs. 3
(Lab Required) Introduction to the representation and manipulation of data structures. Topics will include lists, stacks, queues, trees, and graphs. May not be held with COMP 2061. Prerequisites: one of COMP 1020, COMP 1021 (C).

COMP 2150 Object Orientation Cr. Hrs. 3
Design and development of object-oriented software. Topics will include inheritance, polymorphism, data abstraction and encapsulation. Examples will be drawn from several programming languages. Prerequisite: COMP 2160; and one of COMP 2140 or COMP 2061(C).

COMP 2160 Programming Practices Cr. Hrs. 3
(Lab Required) Introduction to issues involved in real-world computing. Topics will include memory management, debugging, compilation, performance, and good programming practices. Prerequisite: COMP 1020 (C-) or COMP 1021 (C-).

COMP 2190 Introduction to Scientific Computing Cr. Hrs. 3
An applied computational course introducing topics such as approximation by polynomials, solution of non-linear equations, linear systems, simulation and computational geometry. May not hold with COMP 2191. Prerequisites: One of COMP 1020 or COMP 1021, or COMP 1012 (C) or COMP 1013 (C); and one of MATH 1230, MATH 1500, MATH 1501 (C), MATH 1510 (C), MATH 1520 (C), or MATH 1690 (C). Prerequisite or concurrent registration: One of MATH 1220, MATH 1300, MATH 1301, or MATH 1310.

COMP 2280 Introduction to Computer Systems Cr. Hrs. 3
(Lab Required) Data representation and manipulation, machine-level representation of programs, assembly language programming, and basic computer architecture. Not available to students who have previously completed ECE 3610. Prerequisites: COMP 2140 (C), COMP 2160 (C), and one of MATH 1240 (C), MATH 1241 (C) or COMP 2130 (C).

COMP 2980 Workterm 1 Cr. Hrs. 0
Work assignment in business, industry, or government for students registered in the Computer Science Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail)

4.6.6 Computer Science Course Descriptions-3000 Level

COMP 3010 Distributed Computing Cr. Hrs. 3
An introduction to the development of client server and peer-to-peer systems through web applications, distributed programming models, and distributed algorithms. Prerequisite: COMP 2150 (C) or ECE 3740 (C).

COMP 3020 Human-Computer Interaction 1 Cr. Hrs. 3
Human-computer interaction: human factors and usability; user-centered design, prototyping, usability evaluation. Prerequisite: one of COMP 2140 or COMP 2061 (C). A course in cognitive psychology, such as PSYC 2480, is recommended.

COMP 3030 Automata Theory and Formal Languages Cr. Hrs. 3
An introduction to automata theory, grammars, formal languages and their applications. Topics: finite automata, regular expressions and their properties; context-free grammars, pushdown automata and properties of context-free languages; Turing machines and their properties. Prerequisite: COMP 2080 (C).

COMP 3040 Technical Communication in Computer Science Cr. Hrs. 3
This course is designed to help students become more effective and confident writers in the context of the computing profession. Students will be introduced to a broad range of written and oral presentation styles used in the computing workplace. Prerequisite: Students must be enrolled in third year (or higher) of a majors or honours program in the Department of Computer Science.
COMP 3090 Digital Logic 2  Cr. Hrs. 3
Design and implementation of digital circuits. Minimization and state reduction, asynchronous circuits, arithmetic circuits, implementation using modern hardware techniques. May not to be held with ECE 2220. Prerequisite: COMP 2280 (C).

COMP 3170 Analysis of Algorithms and Data Structures  Cr. Hrs. 3
Fundamental algorithms for sorting, searching, storage management, graphs, databases and computational geometry. Correctness and analysis of those algorithms using specific data structures. An introduction to lower bounds and intractability. Prerequisites: one of COMP 2140 or COMP 2061(C); and COMP 2080 (C).

COMP 3190 Introduction to Artificial Intelligence  Cr. Hrs. 3
Principles of artificial intelligence: problem solving, knowledge representation and manipulation; the application of these principles to the solution of 'hard' problems. Prerequisite: one of COMP 2140 or COMP 2061(C).

COMP 3290 Introduction to Compiler Construction  Cr. Hrs. 3
Introduction to the standard compiler phases: scanning, parsing, symbol-table management, code generation, and code optimization. The emphasis is on the simpler techniques for compiler construction such as recursive descent. Prerequisites: COMP 2140 (or COMP 2061) (C) and COMP 2280 (or ECE 3610) (C). COMP 2160 is recommended.

COMP 3350 Software Engineering 1  Cr. Hrs. 3
Introduction to software engineering. Software life cycle models, system and software requirements analysis, specifications, software design, testing and maintenance, software quality. Prerequisites: COMP 2150 (C) or ECE 3740 (C).

COMP 3370 Computer Organization  Cr. Hrs. 3
Principles of computer systems architecture, organization and design. Performance, instruction sets, processors, input/output, memory hierarchies. Prerequisite: COMP 2280 (C) or ECE 3610 (C).

COMP 3380 Databases Concepts and Usage  Cr. Hrs. 3
An introduction to database systems including the relational, hierarchical, network and entity-relationship models with emphasis on the relational model and SQL. Prerequisite: one of COMP 2140 or COMP 2061(C).

COMP 3430 Operating Systems  Cr. Hrs. 3
(Lab Required) Operating systems, their design, implementation, and usage. Prerequisites: one of COMP 2140 or COMP 2061(C); and COMP 2280 (C) or ECE 3610 (C). COMP 2160 is recommended.

COMP 3440 Programming Language Concepts  Cr. Hrs. 3
An introduction to major concepts involved in the design of modern programming languages. The imperative, functional, and logical families and differences between them. Facilities for high level data and control structures, modular programming, data typing, and other topics will be covered. Prerequisite: one of COMP 2140 or COMP 2061(C).

COMP 3490 Computer Graphics 1  Cr. Hrs. 3
An introductory course in computer graphics including topics such as raster graphics, two and three dimensional transforms, and simple rendering. Prerequisite: COMP 2140 (C); and either COMP 2190 (C), or a C in both: MATH 1300 (or MATH 1220, MATH 1310, MATH 1301, MATH 1210 or MATH 1211) and MATH 1500 (or MATH 1230, MATH 1501, MATH 1510 or MATH 1520).

COMP 3820 Introduction to Bioinformatics Algorithms  Cr. Hrs. 3

COMP 3980 Workterm 2  Cr. Hrs. 0
Work assignment in business, industry, or government for students registered in the Computer Science Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail). Prerequisite: COMP 2980 (P).

4.6.6 Computer Science Course Descriptions-4000 Level

COMP 4020 Human-Computer Interaction 2  Cr. Hrs. 3
Advanced issues in the field of human-computer interaction. Topics will be selected from current research and development issues in the field of HCI. Prerequisite: COMP 3020 (C). A course in cognitive psychology such as PSYC 2480 is recommended.

COMP 4050 Project Management  Cr. Hrs. 3
Introduction to the issues involved in managing large, complex software projects. Prerequisite: COMP 3350 (C).

COMP 4060 Topics in Computer Science  Cr. Hrs. 3
This course will examine topics of interest at the fourth-year level. Specific topics will vary from year to year. Topics will be selected from current research in computer science. Prerequisite: Departmental permission.

COMP 4140 Introduction to Cryptography and Cryptosystems  Cr. Hrs. 3
Description and analysis of cryptographic methods used in the authentication and protection of data. Classical cryptosystems and cryptoanalysis, the Advanced Data Encryption Standard (ADES) and Public-key cryptosystems. Prerequisite: one of MATH 1240 (C), MATH 1241 (C) or COMP 2130 (C). Students must be registered in Computer Engineering or fourth year of a Major or Honours program in the Department of Computer Science.

COMP 4180 Intelligent Mobile Robotics  Cr. Hrs. 3
Topics include artificial intelligence, computer vision, human-robot interaction, and multi-robot systems. These abstract components are grounded in the problem of developing a team of intelligent mobile robots. All topics are covered with specific emphasis on applied problems, e.g. real-time performance. Not to be held with the former COMP 4060 –“Mobile Robotics”. Prerequisites: COMP 2160 and COMP 3190 (C).

COMP 4190 Artificial Intelligence  Cr. Hrs. 3
Reasoning with temporal knowledge; causal reasoning; plausible reasoning; nonmonotonic reasoning; abductive reasoning. Prerequisite: COMP 3190 (C).

COMP 4200 Expert Systems  Cr. Hrs. 3
Organization of expert systems; knowledge representation in expert systems; inference; knowledge engineering; tools for building expert systems; limitations of expert systems. Prerequisite: COMP 3190 (C).

COMP 4300 Computer Networks  Cr. Hrs. 3
(Lab required) This course examines the principles of computer networks, including network architectures, algorithms, protocols, and performance. May not be held with the former COMP 3720 or the former COMP 4720 or ECE 3700. Prerequisite: COMP 2280 (C) and COMP 3010 (C).

COMP 4340 Graph Theory Algorithms 1  Cr. Hrs. 3
Spanning trees, connectivity, planar graphs, directed graphs, networks, colouring problems and tours are studied and their applications to computer science will be highlighted. Prerequisite: COMP 3170 (C).

COMP 4350 Software Engineering 2 Cr. Hrs. 3
Advanced treatment of software development methods. Topics will be selected from requirements gathering, design methodologies, prototyping, software verification and validation. Prerequisite: COMP 3350 (C).

COMP 4360 Machine Learning Cr. Hrs. 3
Learning strategies; evaluation of learning; learning in symbolic systems; neural networks, genetic algorithms. Prerequisite: COMP 3190 (C).

COMP 4380 Database Implementation Cr. Hrs. 3
Implementation of modern database systems including query modification/optimization, recovery, concurrency, integrity, and distribution. Prerequisite: COMP 3380 (C).

COMP 4420 Advanced Design and Analysis of Algorithms Cr. Hrs. 3
Algorithm design with emphasis on formal techniques in analysis and proof of correctness. Computational geometry, pattern matching, scheduling, numeric algorithms, probabilistic algorithms, approximation algorithms and other topics. Prerequisites: COMP 3170 (C) and (STAT 1000 (C) or STAT 1001 (C) or STAT 1150 (C)).

COMP 4430 Operating Systems 2 Cr. Hrs. 3
Design and implementation of modern operating systems. Detailed analysis of an open source modern operating system and hands-on experience with its kernel and major components. Prerequisites: COMP 2160 (C) and COMP 3430 (C).

COMP 4490 Computer Graphics 2 Cr. Hrs. 3
Methods in computer graphics including topics such as representation of curves and surfaces, viewing in three dimensions, and colour models. Prerequisite: COMP 3490 (C).

COMP 4510 Introduction to Parallel Computation Cr. Hrs. 3
An overview of the architectures of current parallel processors and the techniques used to program them. Not to be held with ECE 4530. Prerequisites: COMP 3370 (C) and COMP 3430 (C).

COMP 4520 Undergraduate Honours Project Cr. Hrs. 3
A research based project on a specific area of computer science. Students must find a faculty supervisor and write a proposal in their penultimate term. If acceptable, the defined research is to be carried out in the student's final term. Permission to take the course is given on an individual basis. Available to 4th Year students only. Prerequisite: departmental permission.

COMP 4550 Real-Time Systems Cr. Hrs. 3
An introduction to the theory and practice of real-time systems. Topics include the design of real-time systems, scheduling, event based processing, and real-time control. This course may not be held for credit if a student has previously completed both of ECE 4240 and ECE 3760. Prerequisites: COMP 3430 (C) and COMP 3370 (C).

COMP 4560 Industrial Project Cr. Hrs. 3
Students will work in teams on an industrial project. Projects are supplied by the Department. Prerequisites: COMP 3350 (C) and departmental permission.

COMP 4580 Computer Security Cr. Hrs. 3
(Lab Required) Computer security and information management. This course will examine state-of-the-art knowledge about the issues relevant to data and computer security. Prerequisite: COMP 3430 (C) and COMP 3010 (C).

COMP 4620 Professional Practice in Computer Science Cr. Hrs. 3
Background and rationale to view Computer Science in a professional context. Examination of professional ethics, intellectual property, and privacy considerations important to Computer Scientists. May not be held with the former COMP 3620. Prerequisite: COMP 3350 (C).

COMP 4690 Computer Systems and Architecture Cr. Hrs. 3
Investigation of today's modern computer architecture and system design concepts, including requirements, specifications, and implementation. Instruction sets, instruction-level parallelism, speculative execution, multi-threaded architectures, memory hierarchy, multiprocessors, storage design and implementation, and interconnection networks. Prerequisite: COMP 3370 (C).

COMP 4710 Introduction to Data Mining Cr. Hrs. 3
Introduction to data mining concepts and their applications. Prerequisite: COMP 3380 or consent of department.

COMP 4740 Advanced Databases Cr. Hrs. 3
Parallel, distributed, object-oriented, object-relational, and XML databases; other emerging database technologies. Prerequisite: COMP 3380 (C).

COMP 4980 Workterm 3 Cr. Hrs. 0
Work assignment in business, industry, or government for students registered in the Computer Science Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail). Prerequisite: COMP 3980 (P).

COMP 4990 Workterm 4 Cr. Hrs. 0
Work assignment in business, industry, or government for students registered in the Computer Science Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment (Pass/Fail). Prerequisite: COMP 4980 (P).
4.7 Interdisciplinary Courses in Forensic Science and Science

FORS 2000 Introductory Forensic Science Cr. Hrs. 3
Survey course which introduces forensic science via a series of guest lectures provided by experts from within the university and from the community (e.g., Winnipeg Police, RCMP, Chief Medical Examiner, etc.). Multidisciplinary topics will be covered including how a case is studied, use of scientific techniques in investigations, collection of evidence, the role of the expert witness, and presentation of evidence in court. Prerequisites: BIOL 1030 (C+), CHEM 1310 (C+).

FORS 3000 Forensics Processing and Analysis Cr. Hrs. 3
(Lab Required) Theory and practice of processing and analysis of various types of forensic evidence. Lectures will be given by experts from within the university and within the community. Topics covered in lecture and lab exercises include protocols to identify, document and protect visible and latent forensic scientific evidence, analytical methods with forensic applications, rules and procedures governing the collection of evidence and the use of scientific data in court. Prerequisite: consent of the instructor. This course is a Topics course and may be completed multiple times under different titles.

SCI 1000 Topics in Science 1 Cr. Hrs. 3
Topics of current interest in the Faculty of Science. Offerings will be based on the interests and requirements of students and faculty and will include interdisciplinary topics not available in regular course offerings. This course may be used to satisfy a Science elective. Non-science students should check with their department. Prerequisite: consent of the instructor. This course is a Topics course and may be completed multiple times under different titles.

SCI 2000 Topics in Science 2 Cr. Hrs. 3
Topics of current interest in the Faculty of Science. Offerings will be based on the interests and requirements of students and faculty and will include interdisciplinary topics not available in regular course offerings. This course may be used to satisfy a Science elective. Non-science students should check with their department. Prerequisite: consent of the instructor. This course is a Topics course and may be completed multiple times under different titles.

SCI 3000 Topics in Science 3 Cr. Hrs. 3
Topics of current interest in the Faculty of Science. Offerings will be based on the interests and requirements of students and faculty and will include interdisciplinary topics not available in regular course offerings. This course may be used to satisfy a Science elective. Non-science students should check with their department. Prerequisite: consent of the instructor. This course is a Topics course and may be completed multiple times under different titles.

SCI 4000 Topics in Science 4 Cr. Hrs. 3
Topics of current interest in the Faculty of Science. Offerings will be based on the interests and requirements of students and faculty and will include interdisciplinary topics not available in regular course offerings. This course may be used to satisfy a Science elective. Non-science students should check with their department. Prerequisite: consent of the instructor. This course is a Topics course and may be completed multiple times under different titles.

4.8 Genetics Program

Campus Address/General Office: 212 Biological Sciences Building
Telephone: 204 474 9245
Email Address: Mark.Belmonte@umanitoba.ca
Website: manitoba.ca/science/biological_sciences

4.8.1 Program Information
The Faculty of Science offers an interdisciplinary program leading to a B.Sc. (Honours) degree or B.Sc. Major in Genetics. Genetics is the science of heredity dealing with the mechanisms of inheritance and has generated concepts basic to modern biology. Three areas are represented in this program: classical genetics, population genetics, and molecular genetics. Courses from Arts, Agricultural and Food Sciences, and Medicine are included in this program.

Genetics Entry, Continuation, and Graduation requirements

Honours
To enter the Honours program in Genetics, a student must have completed at least 24 credit hours with a minimum DGPA of 3.00, and also obtained a minimum grade of “B” in BIOL 1030, and a minimum grade of “C+” in CHEM 1310. STAT 1000, MATH 1500 and the additional 3 credit hours of specified Mathematics courses are program requirements and students are strongly encouraged to complete these courses in first year.

* Students interested in studying Genetics should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300. Effective 2009-2010, students will also require Biology 40S (or equivalent) and any Grade 12 mathematics course (or equivalent) for entry to BIOL 1020 (the required prerequisite for BIOL 1030).

To continue in the Genetics Honours program, students must maintain a minimum DGPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must maintain a minimum 3.00 DGPA and achieve a minimum grade of “C” on all courses that make up the 120 credit hours of the degree.

Honours Cooperative Option
Students interested in alternating academic terms and terms of paid employment as part of their Honours Genetics program may enter the Cooperative Option in April of their second year in Genetics Honours. This five year program provides students with minimum 12 months of paid employment by the time they graduate. It enables them to obtain work experience in re-search and industry with participating firms, government agencies and University units.

The course and grade requirements for entry and continuation in the Cooperative Option are the same as that for regular Honours program (see above). Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment-term. Each academic term in the third and subsequent years must comprise nine (9) credit hours. Students should refer to the general Faculty regulations for B. Sc. (Honours) Cooperative Options in Section 3.6.

Students must apply for openings in the Cooperative Option and should check with the Co-op office for the April deadline information. They will be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the students receiving an
employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each 4-month employment term. In order to stay in the Cooperative program, a student must obtain a grade of "pass" for each work term report.

4.8.2 Genetics Program Charts

**Major**

**To enter** the Major Degree program in Genetics, a student must have completed at least 24 credit hours with a minimum DGPA of 2.00, and also obtained a minimum grade of "C+" in BIOL 1030 and CHEM 1310. STAT 1000, MATH 1500 and the additional 3 credit hours of specified Mathematics courses are program requirements and students are strongly encouraged to complete these courses in first year.

* Students interested in studying Genetics should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300. Effective 2009-2010, students will also require Biology 405 (or equivalent) and any Grade 12 mathematics course (or equivalent) for entry to BIOL 1020 (the required prerequisite for BIOL 1030).

**To continue** in the Genetics Major Degree program, students must maintain a minimum DGPA of 2.00.

**To graduate** with the Bachelor of Science (Major) in Genetics, a student must obtain passing grades on all courses, obtain a minimum DGPA of 2.00, and a minimum grade of C in all required and optional courses that contribute to the Major.

**Major Cooperative Option**

Students interested in alternating academic terms and terms of paid employment as part of their Genetics Major program may enter the Cooperative Option in April of their second year. This five year program provides students with minimum 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for **entry and continuation** in the Cooperative Option are the same as that for regular Major Degree program (see above). Students are required to complete the first and second year requirements of the program and MBIO 3410 before they begin their first employment term. Students should refer to the general faculty regulations for B. Sc. (Major) Cooperative Options in Section 3.6.

Students must apply for openings in the Cooperative Option and should check with the Co-op office for the April deadline information. They will be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the student(s) they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each 4-month employment term. In order to stay in the Cooperative program, a student must obtain a grade of "pass" for each work term report.

One of: Math 1200, Math 1300, or Math 1700

In Year 1 or Year 2:
3 credit hours from the Faculty of Arts
3 credit hour "W" course
6 credit hours of electives

| Work Terms (if Co-op Selected): | MBIO 3980, MBIO 3990, MBIO 4980 and/or MBIO 4990 |

NOTES:

1 MATH 1220 or MATH 1310 may be taken in place of MATH 1300; MATH 1230, MATH 1510, or MATH 1520 may be taken in place of MATH 1500; MATH 1232 or MATH 1710 may be taken in place of MATH 1700; MATH 1240 may be taken in place of MATH 1200.

2 As there are no electives in Year 2 of the program, students should complete the University written English requirement in Year 1. If not completed in Year 1, a "W" course must be completed prior to Year 3 in addition to the required Year 2 courses.

3 IMPORTANT: Students in the cooperative program are advised to ensure that they are able to satisfy the prerequisites for all 3000 and 4000 level courses they plan to take.

4 MBIO 4530 and BGEN 4010 are required courses for students in Genetics Honours, but are not available to students in Cooperative Option, and require department consent for students in the Genetics Major.

(The number 6 in brackets indicates a 6 credit hour course.)

The optional courses are:

- Biochemistry and Medical Genetics: BGEN 4010 (6)
- Biological Sciences: BIOL 2410, BIOL 2420, BIOL 3290, BIOL 3300, BIOL 3400 (or PLNT 3400), BIOL 3542, BIOL 3560, BIOL 4500, BIOL 4510, BIOL 4540, BIOL 4542, BIOL 4560, BIOL 4650
- Chemistry: CHEM 2260 (CHEM 2280), CHEM 2290, CHEM 4360, CHEM 4370, CHEM 4620, CHEM 4630
- Microbiology: MBIO 2420, MBIO 3000, MBIO 3010, MBIO 3030, MBIO 3430, MBIO 3450, MBIO 3460, MBIO 4010, MBIO 4020, MBIO 4410, MBIO 45301 (6), MBIO 4540, MBIO 4670 (or the former MBIO 4570), MBIO 46722, MBIO 4600, MBIO 4610

Computer Science: COMP 1010, COMP 1020, COMP 1500, COMP 1600
- Physics: PHYS 1020, PHYS 1030, PHYS 1050, PHYS 1070
- Animal Science: ANSC 3500, ANSC 4280
- Pharmacology: PHAC 4030, PHAC 4040
- Plant Science: PLNT 2530, PLNT 3400 (or BIOL 3400), PLNT 3520, PLNT 4330, PLNT 4610

By an appropriate selection of courses from this list, students can obtain particular program emphasis in either plant, human or molecular genetics.

The Honours Co-op program must contain a minimum of 18 credit hours of 4000 level courses as options in Years 3 and 4.

Other suitable optional courses may be arranged through consultation with the Genetics program committee.

NOTES:

1 MBIO 4530 (6) and BGEN 4010 (6) are project courses. A research project is chosen in consultation with the Microbiology department (MBIO 4530) or Biochemistry and Medical Genetics (BGEN 4010) and the Genetics program committee, and is supervised by a staff member. Only one of MBIO 4530 or BGEN 4010 may be selected in this program. These are required courses for students registered in the Genetics Honours program and may be available to students registered in the Genetics Major program by departmental consent.

2 MBIO 4020 and MBIO 4672 are not available options for students in the Genetics Honours Degree program.
4.9 Department of Mathematics

Head: Stephen Kirkland
Campus Address/General Office: 342A Machray Hall
Telephone: 204 474 8703
Email Address: mathematics_dept@umanitoba.ca
Website: http://www.math.umanitoba.ca/

4.9.1 Program Information

Mathematics provides the language, reasoning and analytic tools that many other disciplines use to investigate their areas. These include all the physical sciences, computer and engineering sciences, social sciences, and the biological and health sciences. A wide range of business, industrial, and government programs rely on mathematics to provide insight and analysis. Students may specialize in mathematics alone or in combinations with physics, computer science, economics, or statistics.

NOTE: Students entering either the Faculty of Arts or Science, and intending to take courses from the department, are strongly advised to speak to a Science Academic Advisor or a faculty advisor in the department concerning an appropriate choice of mathematics courses. They may also consult the Department of Mathematics website at umanitoba.ca/science/mathematics.

Honours Requirements

To enter the Honours program in Mathematics, a student must have completed at least 24 credit hours with a minimum DGPA of 3.00, and also obtained a minimum grade of “B” in either MATH 1232 or MATH 1690, or a minimum grade of “A” in MATH 1700.

To continue in the Mathematics Honours program, students must maintain a minimum DGPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must maintain a minimum 3.00 DGPA and achieve a minimum grade of “C” on all courses that make up the 120 credit hours of the degree.

List of Year 2 Mathematics electives (of which two are required for the core requirements): MATH 2030, MATH 2040, MATH 2070, MATH 2140, MATH 2160, MATH 2170.

Other electives normally allowed are:

Statistics: STAT 2000, STAT 2400, STAT 3470, STAT 3480, STAT 3500 (STAT 3500), STAT 3800 (STAT 3600), STAT 4100 (STAT 4140), STAT 4520, STAT 4530, STAT 4580, STAT 4590, STAT 4600, STAT 4620, STAT 4630, STAT 4690.

Physics: PHYS 2380, PHYS 2600, PHYS 2610, PHYS 2650, PHYS 3670, PHYS 3680, PHYS 3650, PHYS 3660, PHYS 3630, PHYS 3380, PHYS 4390, PHYS 4620, PHYS 4640, PHYS 4650.

Chemistry: CHEM 2260 (CHEM 2280), CHEM 2290, CHEM 3360, CHEM 3370, CHEM 4640, CHEM 4650.

Economics: ECON 2010, ECON 2030, ECON 3010, ECON 3030, ECON 4040, ECON 4042.

Mechanical Engineering: MECH 3490.

Other courses may be chosen with permission of the department. Students are required to obtain the approval of the department concerning their choice of electives.

Double Honours: A student may elect Honours in Mathematics and one other field, subject to the approval of both departments. The Mathematics prescription for a Double Honours program is as indicated in the table below.

Four Year Major Requirements

To enter the four year Major in Mathematics, a student must have a “C+” in either MATH 1232 or MATH 1690 or a minimum grade of “B” in MATH 1700, and have satisfied all Faculty requirements for entry to the program.

To continue in the Mathematics Major degree program students must maintain a minimum DGPA of 2.00.

To graduate with the B. Sc. Major degree, a student must achieve a minimum DGPA of 2.00, and a minimum grade of “C” in each of the Major Program Specific courses (see below).

Major Program Specific Courses

MATH 1220, MATH 1230, MATH 1232, MATH 1240, MATH 2020, MATH 2080, MATH 2090, MATH 2150, MATH 2160, MATH 2180,

MATH 3320, MATH 3322, MATH 3340, MATH 3360, MATH 3390, MATH 3440, MATH 3460.

List of Year 2 Mathematics Electives (of which two are required for the core requirements): MATH 2030, MATH 2040, MATH 2070, MATH 2140, MATH 2160, MATH 2170.

Other electives can be chosen from the general list of approved electives, as in the honours program. For advice on this point students should talk to a faculty member in the department.

Four Year Major in Applied Mathematics with Option (Computer Science, Economics, Statistics)

These programs provide a sound general knowledge of applied mathematics together with a significant number of courses in the option area. Courses in the Computer Science option provide training in aspects of computer science which are most useful to the practicing mathematician. Courses in the Computer Sciences, Economics, and Statistics options are fundamental to each area and provide a strong, mathematical basis for further study.

To enter the four year Major in Applied Mathematics with one of the above three options, a student must have a “C+” in either MATH 1232 or MATH 1690 or a minimum grade of “B” in MATH 1700, and have satisfied all faculty requirements for entry to the program.

To continue in the Applied Mathematics Major degree programs, students must maintain a minimum DGPA of 2.00.

To graduate with the B. Sc. Major degree, a student must achieve a minimum DGPA of 2.00, and a minimum grade of “C” in each of the Major Program Specific courses (see below).

Applied Mathematics Major Program Specific Courses

MATH 1220, MATH 1230, MATH 1232, MATH 1240, MATH 2020, MATH 2080, MATH 2090, MATH 2140, MATH 2150, MATH 2160, MATH 2180, MATH 3340, MATH 3420, MATH 3440, MATH 3460 and MATH 3470.

It is recommended that students take all 12 credit hours of 1000 level mathematics courses in their initial 30 credit hours; however, students should take at least MATH 1230, MATH 1232 and MATH 1220. See the individual charts below for additional requirements for each option.

Options List: MATH 2030, MATH 2040, MATH 2170, or any 3000/4000 level MATH course.
Three Year General

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000, and (or) 4000 level courses from each of two Science areas. To satisfy the requirement in the area of Mathematics, students must select a minimum of 18 credit hours of 2000, 3000, and (or) 4000 level Mathematics courses (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level).

See a Science Academic Advisor or a Faculty Advisor in the department for information regarding entry to or completion of any of the programs outlined.

</tbody>
</table>

NOTES:
1 Students are strongly advised to take MATH 1220, MATH 1230 and MATH 1232. The following substitutions are allowed (but not advised), provided the grades indicated in brackets are achieved: MATH 1300 (A) in place of MATH 1220, MATH 1500 (A) or MATH 1510 (A) in place of MATH 1230, MATH 1700 (A) or MATH 1710 (A) in place of MATH 1232, MATH 1690 (B) in place of MATH 1230 and MATH 1232. With permission from the department, students may be able to substitute STAT 1000 and STAT 2000 in place of STAT 1150.
2 Department strongly recommends choosing MATH 2160 as one of the electives in Year 2.
3 These courses may not be offered every year, but are usually offered once every second year. Please refer to Aurora Student for courses offered in the current year and to the website of the Department of Mathematics for the planned schedule of future course offerings.

<td></td>
</tr>
</tbody>
</table>

MINOR

MATH 1220, MATH 1230, MATH 1232, plus a minimum of 9 credit hours from MATH 1240 and 2000 and (or) 3000 level Mathematics courses.

NOTES:

1 Students are strongly advised to take MATH 1220, MATH 1230 and MATH 1232. The following substitutions are allowed (but not advised), provided
the grades indicated in brackets are achieved: MATH 1300 (B) in place of MATH 1220, MATH 1500 (B) or MATH 1510 (B) in place of MATH 1230, MATH 1700 (B) or MATH 1710 (B) in place of MATH 1232, MATH 1690 (C+) in place of MATH 1230 and MATH 1232. STAT 1000 (C) and STAT 2000 (B) in place of STAT 1150.

4.9.2.8 Mathematics – Physics and Astronomy Joint Honours Program

Honours Requirements

To enter the Joint Honours Mathematics – Physics Honours program the student must have a minimum grade of “B” in: MATH 1232 or MATH 1690
(or a minimum grade of “A” in MATH 1700), PHYS 1050 (or “B+” in PHYS 1020) and PHYS 1070 (or “B+” in PHYS 1030).

To continue in the Honours program, students must maintain a minimum DGPA of 3.00, complete a minimum of 9 credit hours each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and a minimum grade of “C+” in each of the Honours Program Specific courses, and a minimum grade of “C” on all remaining courses that contribute to the 120 credit hours of the degree.
4.9.2.10 Mathematics - Computer Science Joint Honours Program

The Honours Program Specific courses consist of all the Physics and Astronomy courses listed in the program chart, with the exception of PHYS 1020, PHYS 1050, PHYS 1030 and PHYS 1070.

Students may take STAT 1000 and STAT 2000 in lieu of STAT 1150.

(Letters in brackets indicate minimum prerequisite standing for further study. The number 6 in brackets indicates a 6 credit hour course.)

4.9.2.9 Mathematics – Economics Joint Honours Program

The Department of Mathematics along with the Department of Economics (Faculty of Arts) offer a joint Honours program for students wishing in depth study in Mathematics and Economics. For Economics course listings, refer to the Faculty of Arts chapter in the Calendar.

To enter the Joint Honours Mathematics - Economics program, the student must have a minimum grade of "B" in: ECON 1010 and ECON 1020 (or ECON 1210 and ECON 1220), either MATH 1232 or MATH 1690 (or a minimum grade of "A" in MATH 1700) and have satisfied the Faculty of Science requirements for entry to the honours program.

</table>

**NOTES:**

1. Students are strongly advised to take MATH 1220, MATH 1230 and MATH 1232. The following substitutions are allowed (but not advised), provided the grades indicated in brackets are achieved: MATH 1300 (A) in place of MATH 1220, MATH 1500 (A) or MATH 1510 (A) in place of MATH 1230, MATH 1700 (A) or MATH 1710 (A) in place of MATH 1232, MATH 1690 (B) in place of MATH 1230 and MATH 1232. With permission from the department, students may be able to substitute STAT 1000 and STAT 2000 in place of STAT 1150.

2. Some courses may be taken in a different year than indicated; STAT 1150, COMP 1010, ECON 3040 may be taken in Year 2. The normal prerequisite for ECON 3040 is ECON 2040 (or the former ECON 3170), which will be waived for students in this program who have completed Year 1.

3. Of the 24 credit hours in electives in Economics in Years 3 and 4, no more than 6 credit hours may be at the 2000 level or below and at least 6 credit hours must be at the 4000 level. Students are encouraged to take ECON 4010, ECON 4020 and ECON 4040.

4.9.3 Mathematics Course Descriptions-0 Level

MATH 1010  Applied Finite Mathematics  Cr. Hrs. 3

(Regular Level) For students needing to fill the requirement of a university level mathematics course. Introduces students to modern applications of discrete mathematics. Topics include: mathematics of finance, linear programming, graph theory, and game theory. This is a terminal course and may not be used as a prerequisite for other Mathematics courses. This course cannot be used as part of an Honours, Major, General or Minor program in the mathematical sciences. Not available to any student already holding a grade of "C" or better in any Mathematics course with the exception of MATH 1020, FA 1020, the former MATH 1190 or MATH 1191. Not to be taken concurrently with any other Mathematics course with the exception of MATH 1020, FA 1020 or MATH 1191. No prerequisite.

MATH 1020  Mathematics in Art  Cr. Hrs. 3

Specific theory, structuring systems, and mathematical methods and principles used in works of art from various historical periods and contexts will be explored in relation to Euclidean and non-Euclidean geometries. Topics include: linear perspective; shapes, patterns, balance and symmetry; ratio, proportion and harmony; and order, dynamics, and chaos. The course will be one half art and one half mathematics, team-taught by faculty from the School of Art and the Department of Mathematics. This course is also given in the School of Art as FA 1020. This is a terminal course and may not be used as a prerequisite for other Mathematics courses. This course cannot be used as part of an Honours, Major, General or Minor program in the mathematical sciences. Not available to any student already holding a grade of "C" or better in any Mathematics course with the exception of MATH 1010, the former MATH 1190, or MATH 1191. Not to be taken concurrently with any other Mathematics course with the exception of MATH 1010 or MATH 1191. No prerequisite.

MATH 1080  Fundamentals of Mathematical Reasoning  Cr. Hrs. 3

(Regular Level) Logic, reasoning, problem solving, introduction to set theory, mathematical induction, introduction to number theory, bases of arithmetic and the standard algorithms, working with fractions and functions. The course is recommended for students intending to become early or middle years school teachers. This course cannot be used as part of
an Honours, Major, General or Minor program in the mathematical sciences. Prerequisite: Pre-Calculus Mathematics 40S or the former Mathematics 40S (300) or a minimum grade of 65% in Applied Mathematics 40S or a grade of "C" or better in MSKL 100 offered by Extended Education.

MATH 1090 Mathematical Reasoning in Euclidean Geometry Cr. Hrs. 3

(Lab required) Introduction to Euclidean geometry with emphasis on mathematical reasoning. Perimeter, area, volume, triangle congruence, parallel lines and quadrilaterals, similarity, circles, coordinate geometry or transformation geometry. The course is recommended for students intending to become early or middle years school teachers. This course cannot be used as part of an Honours, Major, General or Minor program in the mathematical sciences. Prerequisite: MATH 1080.

MATH 1200 Elements of Discrete Mathematics Cr. Hrs. 3

(Lab Required) Sequences and series, trigonometry, complex numbers, algebra of polynomials, approximation of zeros of functions, linear difference equations. Not to be held with MATH 1210, MATH 1211 or MATH 1201. Not available to any student holding credit in any Mathematics course numbered 2000 or higher, unless MATH 1200 is a required course in a student's program. Prerequisite: a minimum grade of 60% in Pre-calculus 40S or the former Mathematics 40S (300), or a grade of 60% or better in the MSKL 100 offered by Extended Education.

MATH 1210 Techniques of Classical and Linear Algebra Cr. Hrs. 3

(Lab Required) To introduce a variety of practical algebraic concepts and skills necessary for the study of calculus and advanced engineering mathematics. The emphasis of this course is in the development of methodology and algebraic skill necessary for successful completion of subsequent engineering mathematics courses. This course is intended for Engineering and Geophysics students only. May not be held with MATH 1200, MATH 1201, MATH 1210, MATH 1220, MATH 1300, MATH 1301, or MATH 1310. Prerequisites: a minimum grade of 60% in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a grade of "C" or better in the MSKL 100 offered by Extended Education.

MATH 1220 Linear Algebra 1 Cr. Hrs. 3

(Lab required) This course is intended for students in mathematically rich disciplines including those planning to enter an Honours or Major program in Mathematics or Statistics. An introduction to vectors, matrices, systems of linear equations and three-dimensional geometry. May not be held with MATH 1210, MATH 1211, MATH 1220, MATH 1300, MATH 1301, or the former MATH 1680. Prerequisite: a minimum grade of 60% in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a grade of "C" or better in the MSKL 100 offered by Extended Education. NOTE: A minimum grade of 70% in Applied Mathematics 40S may be used as a prerequisite to this course.

MATH 1230 Differential Calculus Cr. Hrs. 3

(Lab required) The course is intended for students in mathematically rich disciplines including those planning to enter an Honours or Major program in Mathematics or Statistics. Rigorous treatment of limits, continuity, and differentiation (with epsilon-delta proofs), applications in optimization problems, related rates, l'Hôpital's rule, curve sketching, Taylor polynomials. Not to be held with MATH 1500, MATH 1501, MATH 1510, MATH 1520, the former MATH 1680, or MATH 1690. Prerequisite: Pre-calculus Mathematics 40S (70%) or the former Mathematics 40S (300) (70%), or the MSKL 100 offered by Extended Education (B).

MATH 1232 Integral Calculus Cr. Hrs. 3

(Lab required) This course is intended for students in mathematically rich disciplines including those planning to enter an Honours or Major program in Mathematics or Statistics. Integral calculus: theory and techniques of integration, curve sketching (parametric and polar), volume, arc length, surface area and partial derivatives. Sequences and series. Not to be held with MATH 1690, MATH 1700, MATH 1701, MATH 1710. Prerequisite: MATH 1230 (C) or MATH 1500 (B) or MATH 1501 (B) or MATH 1510 (B).

MATH 1240 Elementary Discrete Mathematics Cr. Hrs. 3

(Lab required) The course is intended for students in mathematically rich disciplines including those planning to enter an Honours or Major program in Mathematics or Statistics. An introduction to Discrete Mathematics. Topics include mathematical induction, modular arithmetic, Boolean algebras, basic sentential logic, elementary set theory and functional notation, partial orders, basic graph theory, basic counting. May not be held with MATH 1241 or MATH 3120. Prerequisite: Pre-calculus Mathematics 40S (60%) or the former Mathematics 40S (300) (60%), or the MSKL 100 offered by Extended Education (C).

MATH 1300 Vector Geometry and Linear Algebra Cr. Hrs. 3

(Lab Required) An introduction to vectors, matrices, systems of linear equations and three-dimensional geometry. May not be held for credit with MATH 1210, MATH 1211, MATH 1220, MATH 1310, MATH 1301, or the former MATH 1680. Prerequisite: a minimum grade of 60% in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a grade of "C" or better in the MSKL 100 offered by Extended Education. NOTE: A minimum grade of 70% in Applied Mathematics 40S may be used as a prerequisite to this course.

MATH 1310 Matrices for Management and Social Sciences Cr. Hrs. 3

(Lab Required) Matrix methods with examples relevant to the Management and Social Sciences. Topics include vectors, matrices, systems of linear equations, and determinants; applications include economic models, the simplex method for linear programming, Markov chains, and game theory. May not be held with MATH 1210, MATH 1211, MATH 1220, MATH 1300, MATH 1301, or the former MATH 1680. Prerequisite: a minimum grade of 60% in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a grade of "C" or better in the MSKL 100 offered by Extended Education. NOTE: A minimum grade of 70% in Applied Mathematics 40S may be used as a prerequisite to this course.

MATH 1500 Introduction to Calculus Cr. Hrs. 3

(Lab Required) Differentiation and integration of elementary functions, with applications to maxima and minima, rates of change, area, and volume. May not be held with MATH 1230, MATH 1501, MATH 1510, MATH 1520, the former MATH 1680, or MATH 1690. Prerequisite: a minimum grade of 60% in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a grade of "C" or better in the MSKL 100 offered by Extended Education.

MATH 1510 Applied Calculus 1 Cr. Hrs. 3

(Lab Required) Functions and graphs; limits and continuity; differentiation of functions defined explicitly, implicitly and parametrically; applications of derivatives to velocity and acceleration, related rates, maxima and minima; differentials, indefinite and definite integrals, application of integration to area. Physical applications in this course make it especially suitable for students intending to take programs in engineering. May not be held with MATH 1230, MATH 1500, MATH 1501, MATH 1520, the former MATH 1680, or MATH 1690. Prerequisites: (a grade of 60% in one of Pre-calculus Mathematics 40S, or the former Mathematics 40S (300), or a grade of "C" or better in the MSKL 0100 offered by Extended Education) and (one of Physics 40S (300), PHYS 0900 (P), or PSKL 0100 (P) offered by Extended Education).

MATH 1520 Introductory Calculus for Management and Social Sciences Cr. Hrs. 3

(Lab Required) Pre-Calculus Mathematics 40S or the former Mathematics 40S (300) or a grade of "C" or better in the MSKL 100 offered by Extended Education.
(Lab Required) Differentiation and integration of functions of one variable and partial differentiation of functions of several variables. Emphasizes applications in the areas of management and social science. May not be held with MATH 1230, MATH 1500, MATH 1501, MATH 1510, the former MATH 1680, or MATH 1690. Prerequisite: a minimum grade of 60% in Pre-calculus Mathematics 40S or the former Mathematics 40S (300), or a minimum grade of "C" in the MSKL 100 offered by Extended Education.

MATH 1690 Calculus Cr. Hrs. 6

(Lab Required) An introduction to the calculus of functions of one variable. This course covers the same material as MATH 1500 and MATH 1700 together, but in greater depth. Exposure to high school calculus (45S) is desirable, but not essential. This course is intended for students planning to enter an Honours or 4 year Major program in Mathematics. May not be held with MATH 1230, MATH 1232, MATH 1500, MATH 1501, MATH 1510, MATH 1520, the former MATH 1680, MATH 1700, MATH 1701, MATH 1710. Prerequisite: a minimum grade of 80 % in Pre-calculus Mathematics 40S or the former Mathematics 40S (300).

MATH 1700 Calculus 2 Cr. Hrs. 3

(Lab Required) Theory and techniques of integration, curve sketching, volume, arc length, surface area and partial derivatives. May not be held with MATH 1232, MATH 1690, MATH 1701, MATH 1710. Prerequisite: A grade of "C" or better in one of MATH 1230, MATH 1500, MATH 1501, MATH 1510, MATH 1520, or the former MATH 1680.

MATH 1710 Applied Calculus 2 Cr. Hrs. 3

(Lab Required) Applications of integration to volumes, centres of mass, moments of inertia, work and fluid pressure; differentiation of trigonometric, inverse trigonometric, exponential, and logarithmic functions; techniques of integration; polar coordinates. Physical applications in this course make it especially suitable for students intending to take programs in engineering. May not be held with MATH 1232, MATH 1690, MATH 1700, MATH 1701. Prerequisite: A grade of "C" or better in one of MATH 1230, MATH 1500, MATH 1501, MATH 1510, MATH 1520, or the former MATH 1680. Prerequisite or concurrent Requirement: PHYS 1050 or PHYS 1051.

4.9.3 Mathematics Course Descriptions-2000 Level

MATH 2020 Algebra 1 Cr. Hrs. 3

(Lab required) The course is intended for students in mathematically rich disciplines. Groups, rings, fields: elementary concepts and examples. May not be held with MATH 2021 or the former MATH 3350. Prerequisite: MATH 2090 or MATH 2091 (C) or the former MATH 2352 (C) or the former MATH 2300 (B) or MATH 2301 (B).

MATH 2030 Combinatorics 1 Cr. Hrs. 3

(Lab required) Introductory combinatorics, including basic counting, permutations and combinations, enumeration, inclusion-exclusion, pigeonhole principle, solving basic recursions, relations, and derangements. May not be held MATH 2031 or the former MATH 3400. Prerequisites: MATH 1240 (C) or MATH 1241 (C) or [the former MATH 2202 (C) and one of the former MATH 2350 or the former MATH 2352 (C)] or consent of instructor.

MATH 2040 Curves and Surfaces Cr. Hrs. 3

(Lab required) Curves and surfaces in the plane and space. Intrinsic geometry of curves and surfaces: Serret Frenet frames, first and second fundamental forms, curvature and the Gauss map. Geodesics and parallel transport. Theorema Egregium and Gauss-Bonnet theorems. Prerequisites: [MATH 1232 (C) or MATH 1690 (C) or MATH 1700 (B) or MATH 1710 (B) and [MATH 1220 (C) or MATH 1300 (B) or MATH 1301 (B)]; or consent of instructor. Pre-or corequisite: MATH 2150 or MATH 2151 or MATH 2720 or MATH 2721.

MATH 2070 Graph Theory 1 Cr. Hrs. 3

(Lab required) Introduction to graphs, digraphs, and multigraphs. Topics include trees, cycles and circuits, planarity, basic graph algorithms, and applications of graph theory to social and physical sciences. May not be held with MATH 2071 or the former MATH 2400 or COMP 4340. Prerequisites: [MATH 1240 (C) or MATH 1241 (C)] and [MATH 1220 (C) or MATH 1300 (B) or MATH 1301 (B)].

MATH 2080 Introduction to Analysis Cr. Hrs. 3

(Lab required) The course is intended for students in mathematically rich disciplines. Fundamental properties of the real number system as a complete ordered field, Archimedean property, existence of square roots, density of rational numbers, uncountability of real numbers. Sequences, subsequences, limit theorems, monotonicity, Bolzano-Weierstrass theorem, Cauchy sequences. Rigorous treatment of limits and continuity of functions of one and several variables. Uniform continuity. Applications. May not be held with MATH 2081 or the former MATH 2202. Prerequisites: [MATH 1232 (C) or MATH 1690 (C) or MATH 1700 (B) or MATH 1701 (B) or MATH 1710 (B)] and [MATH 1220 (C) or MATH 1300 (B) or MATH 1301 (B) and (MATH 1240 (C) or MATH 1241 (C)).

MATH 2090 Linear Algebra 2 Cr. Hrs. 3

(Lab required) The course is intended for students in mathematically rich disciplines. Abstract vector spaces, linear transformations, bases and coordinatization, matrix representations, orthogonalization, diagonalization, principal axis theorem. May not be held with MATH 2091 or the former MATH 2300 or the former MATH 2301 or the former MATH 2350 or the former MATH 2352. Prerequisite: MATH 1220 (C) or MATH 1300 (B) or MATH 1301 (B).

MATH 2120 Introductory Numerical Methods for Engineers Cr. Hrs. 4

(Lab Required) Numerical methods applied to problems in engineering; roots of nonlinear equations and systems of linear equations, numerical differentiation and integration, initial-value problems. For Engineering and Geophysics students only. May not be held with MATH 2600 or MATH 2601. Prerequisites: one of COMP 1010, COMP 1011, COMP 1012, COMP 1013 (C); pre- or corequisite: MATH 2132 or the former MATH 2100 (C).

MATH 2130 Engineering Mathematical Analysis 1 Cr. Hrs. 3

(Lab required) Multivariable differential and integral calculus up to and including multiple integrals in cylindrical and spherical coordinates. For Engineering and Geophysics students only. May not be held for credit with MATH 2720, MATH 2750, or the former MATH 2110. Prerequisites: MATH 1210 or MATH 1211 and MATH 1710 (C).

MATH 2132 Engineering Mathematical Analysis 2 Cr. Hrs. 3

(Lab required) Infinite series, Taylor and Maclaurin Series; ordinary differential equations including Laplace transforms. For Engineering and Geophysics students only. May not be held for credit with MATH 2800, MATH 2730, or the former MATH 2100. Prerequisites: MATH 1210 (C) or MATH 1211 (C), and MATH 1710 (C).

MATH 2140 Modelling Cr. Hrs. 3

(Lab required) Introductory course on the design and analysis of mathematical models for real-life phenomena arising in the natural, engineering and social sciences. May not be held with the former MATH
3820 or the former MATH 3821. Prerequisite: MATH 1230 (C) or MATH 1690 (C) or MATH 1500 (B) or MATH 1510 (B) or MATH 1220 (C) or MATH 1300 (B) or MATH 1301 (B) or consent of instructor.

**MATH 2150 Multivariable Calculus Cr. Hrs. 3**

(Commuter required) The course is intended for students in mathematically rich disciplines. Parametric curves, arc length and curvature. Functions of several variables. Level curves. Partial derivatives, gradient, divergence and curl. Max/min problems. Double and triple integrals, line and surface integrals of functions and vector fields, and applications. Green's, Stokes, and divergence theorems. May not be held with MATH 2130, MATH 2151, MATH 2720, MATH 2721, or the former MATH 2750. Prerequisite: MATH 2080 (C) or MATH 2081 (C) or the former MATH 2202 (C).

**MATH 2160 Numerical Analysis 1 Cr. Hrs. 3**

(Commuter required) Elementary techniques of numerical solution of mathematical problems: solution of equations, linear systems of equations, nonlinear equations; finite and divided differences, interpolation; numerical differentiation and integration. May not be held with MATH 2120, MATH 2161, the former MATH 2600, or the former MATH 2601. Prerequisites: MATH 1232 (C) or MATH 1690 (C) or MATH 1700 (B) or MATH 1701 (B) or MATH 1710 (B) and MATH 1220 (C) or MATH 1300 (B) or MATH 1301 (B).

**MATH 2170 Number Theory 1 Cr. Hrs. 3**

(Commuter required) Prime numbers, unique factorization, linear congruences, Chinese remainder theorem, multiplicative functions, primitive roots and quadratic reciprocity. May not be held with the former MATH 2500 or the former MATH 2501. Prerequisite: MATH 2090 or MATH 2091 or (the former MATH 2350 (C) or the former MATH 2352 (C) or the former MATH 2300 (B) or the former MATH 2301 (B)) and consent of instructor.

**MATH 2180 Real Analysis 1 Cr. Hrs. 3**

(Commuter required) Introduction to metric spaces including connectedness, compactness and continuity; topics in infinite series of numbers, and sequences and series of functions. May not be held with the former MATH 3230. Prerequisite: MATH 2080 (C) or MATH 2081 (C) or the former MATH 2202 (C).

**MATH 2270 Multivariable Calculus Cr. Hrs. 3**

Calculus of several variables. For students in one of the following programs: Actuarial Mathematics, Statistics (honours or majors), Physics (honours or majors) Geophysics (honours or majors), and Physical Geography. May not be held with the former MATH 2750, the former MATH 2110, MATH 2130, MATH 2150, MATH 2151 or MATH 2721. Prerequisites: (One of MATH 1220, MATH 1300, MATH 1301, or MATH 1310) and (one of MATH 1232, MATH 1690, MATH 1700, MATH 1701, MATH 1710, or the former MATH 1730).

**4.9.3 Mathematics Course Descriptions-3000 Level**

**MATH 3120 Applied Discrete Mathematics Cr. Hrs. 3**

(Commuter Required) Sets, graphs, and Boolean algebra. For Engineering students only. May not be held with COMP 2130, Prerequisites: ECE 2220 (C) and MATH 2130 (C).

**MATH 3132 Engineering Mathematical Analysis Cr. Hrs. 3**

Vector integral calculus; series of Ordinary differential equations; Fourier series and Partial differential equations. For Engineering and Geophysics students only. May not be held with MATH 3740, MATH 3800, or the former MATH 3100. Prerequisites: MATH 2130 (C) and MATH 2132 (C).

Introduction to discrete mathematics; systems of linear differential equations; complex function theory and applications. For Engineering and Geophysics students only. May not be held with MATH 3110, MATH 3700, MATH 3710, or MATH 3800. Prerequisites: MATH 2130 (C) and MATH 2132 or the former MATH 2110 (C). NOTE: MATH 3132 is highly recommended.

**MATH 3320 Algebra 2 Cr. Hrs. 3**

Basic structure theory of groups, integral domains and field extensions. Not to be held with the former MATH 3350. Prerequisite: MATH 2020 (C) or MATH 2021 (C) or [the former MATH 3300 (C) and consent of instructor].

**MATH 3322 Algebra 3 Cr. Hrs. 3**

A continuation of topics in Algebra 1 and Algebra 2. More structure theory of groups, general ring theory, fields and field extensions, Galois theory. Prerequisite: MATH 3320 (C) or [the former MATH 3350 (C) and consent of instructor].

**MATH 3330 Computational Algebra Cr. Hrs. 3**

An introduction to the use of computers for symbolic mathematical computation, involving solving nonlinear systems and differential equations. A suitable software package will be used to explore applications. Prerequisite: MATH 2090 (C) or MATH 2091 (C) or the former MATH 2300 (C) or the former MATH 2301 (C) or the former MATH 2350 (C) or the former MATH 2352 (C) or consent of instructor.

**MATH 3340 Complex Analysis 1 Cr. Hrs. 3**

Analytic functions, Cauchy's theorem and integral formula, series representation of analytic functions, calculus of residues, Rouche's theorem and the principle of the argument. May not be held with the former MATH 3710. Prerequisites: [MATH 2180 (C) or the former MATH 3230 (C)] and [MATH 2150 (C) or MATH 2151 (C) or MATH 2720 (B) or MATH 2721 (B) or the former MATH 2750 (C)].

**MATH 3360 Combinatorics 2 Cr. Hrs. 3**

Advanced topics in combinatorics, including generating functions, elementary design theory, recurrences, chains and antichains, Polya counting. The course is challenging and is intended for students in mathematically rich disciplines. May not be held with the former MATH 4400. Prerequisite: MATH 2030 (C) or MATH 2031 (C) or the former MATH 3400 (C).

**MATH 3370 Graph Theory 2 Cr. Hrs. 3**

Advanced topics in graph theory, including matchings and coverings, optimization, factors, flows, extremal graph theory, basic Ramsey theory, connectivity, and spectral graph theory. Selected applications in science and operations research are studied. The course is challenging and is intended for students in mathematically rich disciplines. May not be held with COMP 4340. Prerequisite: MATH 2070 (C) or MATH 2071 (C) or the former MATH 2400 (B) or permission of instructor.

**MATH 3380 Introduction to Projective Planes Cr. Hrs. 3**

Affine planes and projective planes, cross ratio, complex projective plane (the great unifier), Desargues' theorem, projective planes over division rings, Pappus' theorem and commutativity, the fundamental theorem for projectivities on a line, introduction of coordinates in a projective plane. May not be held with the former MATH 2552 or the former MATH 3430. Prerequisite: MATH 2020 (C) or MATH 2021 (C) or the former MATH 3300 (C) or the former MATH 3350 (C) or consent of instructor.

**MATH 3390 Introduction to Topology Cr. Hrs. 3**
MATH 3410 Introduction to Mathematical Logic Cr. Hrs. 3

Propositional and first-order logic. Recursion theory. May not be held with the former MATH 4250. Prerequisite: MATH 2020 (C) or MATH 2021 (C) or the former MATH 2202 (C) or the former MATH 2352 (C) or consent of instructor.

MATH 3420 Numerical Analysis 2 Cr. Hrs. 3

Numerical methods for eigenvalue problems, nonlinear systems, initial-value problems, boundary-value problems; finite difference methods for ordinary and partial differential equations; error analysis. Not to be held with the former MATH 3600 or the former MATH 3601. Prerequisites: [MATH 2090 (C) or MATH 2091 (C) or the former MATH 2300 (B) or the former MATH 2301 (B) or the former MATH 2352 (C)] and [MATH 2150 (C) or MATH 2151 (C) or MATH 2720 (B) or MATH 2721 (B) or the former MATH 2750 (C) and (MATH 2160 (C) or MATH 2161 (C) or the former MATH 2600 (C) or the former MATH 2601 (C)]. Pre- or corequisite: MATH 3440 or the former MATH 2800 or the former MATH 2801.

MATH 3440 Ordinary Differential Equations Cr. Hrs. 3

Theory and applications of ordinary differential equations; existence and uniqueness of solutions, linear systems, simple nonlinear systems. This course is theory-based and is intended for students in mathematically rich disciplines. Not to be held with the former MATH 3800. Prerequisite: MATH 2180 (C) or [(MATH 1300 (B) or MATH 1301 (B)) and (the former MATH 2730 (B) or the former MATH 2731 (B) or the former MATH 2750 (C))].

MATH 3460 Partial Differential Equations Cr. Hrs. 3

Method of characteristics for first order PDEs, wave, beam, heat and Laplace equations, derivation of PDEs, existence and uniqueness, energy estimates, well-posedness, maximum principles, separation of variables. Not to be held with the former MATH 3810. Prerequisites: [MATH 2150 (C) or MATH 2151 (C) (the former MATH 2750 (C)) or (MATH 2720 (B) or MATH 2721 (B)) and (the former MATH 2730 (B) or the former MATH 2731 (B)))] and (MATH 3440 (C) or the former MATH 3800 (C)).

MATH 3470 Real Analysis 2 Cr. Hrs. 3

Functions of bounded variation, Riemann-Stieltjes integration and Lebesgue integration. Not to be held with the former MATH 3740 or the former MATH 3760. Prerequisites: [MATH 2150 (C) or MATH 2151 (C) or MATH 2720 (B) or MATH 2721 (B) or the former MATH 2750 (C)] and (MATH 2180 (C) or the former MATH 3230 (C)).

MATH 3472 Real Analysis 3 Cr. Hrs. 3

Fourier series and Fourier transforms; orthogonal systems and L2 theory, convergence and approximation. Multivariable calculus of maps from Rn to Rm, general chain rule and general notion of derivative, implicit function and inverse function theorems. Not to be held with the former MATH 3740 or the former MATH 3760. Prerequisite: MATH 3470 (C).

MATH 3480 Set Theory Cr. Hrs. 3

Axiomatic set theory. Cardinality, well-ordered sets, ordinal numbers, cardinal numbers. Axiom of Choice. Ordinal and cardinal arithmetic. Transfinite induction and recursion. May not be held with the former MATH 3220. Prerequisite: MATH 2020 (C) or MATH 2021 (C) or the former MATH 2202 (C) or consent of instructor.

MATH 4240 Advanced Group Theory Cr. Hrs. 3

Representation theory of finite groups, presentations of finite and infinite groups, or other topics. Prerequisite: MATH 3322 (C) or the former MATH 3350 (C) or consent of instructor.

MATH 4260 Abstract Measure Theory Cr. Hrs. 3

Lebesgue and abstract measures, measurable functions, convergence theorems, absolutely continuous functions, measure spaces, the Radon-Nikodym theorem, Fubini's and Tonelli's theorems. Not to be held with the former MATH 4750. Prerequisite: MATH 3472 (C) or the former MATH 3740 (B+) or the former MATH 3760 (C).

MATH 4270 Algebraic Topology Cr. Hrs. 3

This course will serve as an introduction to elements of homotopy or homology theory. Not to be held with the former MATH 4230. Prerequisites: [MATH 3320 (C) or the former MATH 3300 (C)] and [MATH 3390 (C) or the former MATH 3240 (C)], or consent of instructor.

MATH 4280 Basic Functional Analysis Cr. Hrs. 3

Banach spaces, Hahn-Banach, open mapping and closed graph theorems, principle of uniform boundedness, linear operators and functionals, dual space, Lp and Lq spaces, weak and weak* topologies, Hilbert spaces and compact operators on a Hilbert space. Not to be held with the former MATH 4750. Prerequisites: [MATH 3472 (C) or the former MATH 3740 (B+) or the former MATH 3760 (C) and (MATH 3390 (C) or the former MATH 3240 (C)], or consent of instructor.

MATH 4290 Complex Analysis 2 Cr. Hrs. 3

Conformal mappings, normal families, harmonic and subharmonic functions, Perron's family, Dirichlet problem and Green's function. Not to be held with the former MATH 4710. Prerequisites: [MATH 3340 (C) or the former MATH 3700 (B+) or the former MATH 3710 (C)] and [MATH 3390 (C) or the former MATH 3240 (C)].

MATH 4300 Combinatorial Geometry Cr. Hrs. 3

Topics in combinatorial geometry, including arrangements of convex bodies, introduction to polytopes, problems in discrete geometry, repeated distances, and geometric graphs. Prerequisite: MATH 3360 (C) or the former MATH 3400 (C) or consent of instructor.

MATH 4320 Dynamical Systems Cr. Hrs. 3

Techniques for the qualitative analysis of nonlinear systems of ordinary differential equations and discrete-time systems. Not to be held with the former MATH 4800. Prerequisite: MATH 3440 (C) or the former MATH 3800 (C).

MATH 4330 Fundamentals of Approximation Theory Cr. Hrs. 3

Theoretical aspects of approximation theory: density, existence, uniqueness; direct and inverse theorems for polynomial approximation. Prerequisites: [MATH 2080 (C) or MATH 2081 (C) or the former MATH 2202 (C) and (MATH 2160 (C) or MATH 2161 (C) or the former MATH 2600 (C) or the former MATH 2601 (C)), or consent of instructor.

MATH 4340 Introduction to Algebraic Geometry Cr. Hrs. 3

This course will introduce students to the basics of affine and projective varieties through a combination of basic theoretical tools and elementary examples. Prerequisite: MATH 3322 (C) or the former MATH 3350 (C) or consent of instructor.

MATH 4360 Introduction to Differential Geometry Cr. Hrs. 3
Manifolds and submanifolds; vector and tensor fields, Lie brackets and derivatives. Also at least one of the following: exterior differential calculus and Stokes' theorem, introduction to Riemannian geometry, symplectic geometry and hamiltonian mechanics. Not to be held with the former MATH 4730. Prerequisites: [MATH 3472 (C) or the former MATH 3740 (B) or the former MATH 3760 (C)] and [MATH 3390 (C) or the former MATH 3240 (C)].

**MATH 4370 Linear Algebra and Matrix Analysis  Cr. Hrs. 3**

Vector and matrix norms, matrix factorizations, eigenvalues and eigenvectors, theory of non-negative matrices. Applications to differential equations, math biology, numerical analysis, digital image processing, data mining, GPS, Markov chains, graph theory, etc will be given in this course. Not to be held with the former MATH 4310. Prerequisite: MATH 2090 (C) or MATH 2091 (C) or the former MATH 2300 (B) or the former MATH 2301 (B) or the former MATH 2350 (C) or the former MATH 2352 (C).

**MATH 4380 Mathematical Biology  Cr. Hrs. 3**

Formulation, analysis and simulation of suitable models in mathematical biology. Applications will be chosen from fields such as population dynamics, epidemiology, ecology, immunology and cellular dynamics. Not to be held with the former MATH 3530. Prerequisite: MATH 4320 (C) or the former MATH 3800 (C) or consent of instructor.

**MATH 4390 Numerical Approximation Theory  Cr. Hrs. 3**

Computational aspects of approximation by interpolatory polynomials, convolutions, artificial neural networks, splines and wavelets. Prerequisites: [MATH 2150 (C) or MATH 2151 (C) or MATH 2720 (B) or MATH 2721 (B) or the former MATH 2750 (C)] and [MATH 2160 (C) or MATH 2161 (C) or the former MATH 2600 (C) or the former MATH 2601 (C)], or consent of instructor.

**MATH 4440 Numerical Analysis of Partial Differential Equations  Cr. Hrs. 3**

Finite difference method, mathematical theory of Elliptic PDEs, finite element method, iterative solution of linear systems. Emphasis will be on the error analysis (stability, consistency and convergence) of the various methods. Prerequisites: [MATH 3420 (C) or the former MATH 3600 (C) or the former MATH 3601 (C)] and [MATH 3460 (C) or the former MATH 3810 (C)] and [MATH 3470 (C) or the former MATH 3740 (B) or the former MATH 3760 (C)], or consent of instructor. It is recommended that MATH 4370 be taken prior to or at the same time.

**MATH 4450 Number Theory 2  Cr. Hrs. 3**

Algebraic number theory, arithmetic geometry and analytic number theory, Diophantine equations, examples such as arithmetic of elliptic curves and Dirichlet L-functions. Not to be held with the former MATH 3450. Prerequisites: [MATH 2020 (C) or MATH 2021 (C)] and MATH 2170 (C) or [(the former MATH 2500 (C) or the former MATH 2501 (C)) and the former MATH 2202 (C) and the former MATH 2750 (C)], or consent of instructor.

**MATH 4460 Partial Differential Equations 2  Cr. Hrs. 3**

Green’s function, Poisson, heat, Schrodinger and wave equations in two and three spatial dimensions, variational characterization of eigenvalues, Fourier and Laplace transforms, introduction to functional analytic techniques in PDEs. Not to be held with the former MATH 4810. Prerequisites: [MATH 3460 (C) or the former MATH 3810] and [MATH 3470 (C) or the former MATH 3740 (B) or the former MATH 3760 (C)], or consent of instructor.

**MATH 4470 Rings and Modules  Cr. Hrs. 3**

The general theory of (non-commutative) rings, modules and algebras. Prerequisite: MATH 3322 (C) or the former MATH 3350 or consent of instructor.

**MATH 4910 Project Course in Mathematics  Cr. Hrs. 3**

A research project by the student in consultation with the department head and an appropriate supervising Faculty member. A written report will be required to be submitted by the end of the term. An oral examination may be required. This course is restricted to students in the fourth year of the Honours or Major program in Mathematics and is not available to Graduate Students. This course may not be held for credit with MATH 4900. Prerequisite: Consent of Department.

**MATH 4920 Topics in Mathematics  Cr. Hrs. 3**

Topics of current interest in Mathematics or Applied Mathematics upon the interests and requirements of students and faculty, and will include specialized topics not available in regular course offerings. Prerequisite: consent of department.
**4.10 Department of Microbiology**

Head: Deborah Court  
Campus Address/General Office: 213 Buller Building  
Telephone: 204 474 9372

### 4.10.1 Program Information

Microbiology is the study of microorganisms such as bacteria, viruses, fungi, protozoa, and algae, and their interactions with the environment. It is also an area of study that plays a pivotal role in understanding other life science disciplines, such as medicine, agriculture, ecology, and pharmacy. Molecular and systems microbiology are part of the program, which spans applied, environmental and medical microbiology. The departments of Microbiology and Chemistry offer joint Honours programs (including Co-op) and joint Four Year Major programs (including Co-op) in biochemistry and biotechnology* (See Sections 4.2 and 4.4).

(*As of Fall 2018, admission to the Biotechnology programs has been temporarily suspended. For further information, see the Faculty of Science office.)

**Microbiology Prerequisite Information**

Students are advised to take courses in the year suggested in the charts below; otherwise difficulties may arise with timetabling and prerequisite requirements. Students are responsible for all prerequisites and corequisites of the courses required or selected in all programs below. Since Chemistry courses form an integral part of all Microbiology programs, students should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300. Students will also require Biology 40S (or equivalent) and any Grade 12 mathematics course (or equivalent) for entry to BIOL 1020 (the prerequisite for BIOL 1030).

**Honours Requirements and Options**

**To enter** the Honours program in Microbiology, a student must have completed at least 24 credit hours with a minimum DGPA of 3.00, and also obtained a minimum grade of “B” in MBIO 1010, and a minimum grade of “C+” in CHEM 1310. BIOL 1020, BIOL 1030, STAT 1000 (or STAT 1150) and the 3 credit hours of specified Mathematics or Physics are program requirements and students are strongly encouraged to complete these courses in first year.

To continue in the Microbiology Honours program, students must maintain a minimum DGPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate from the Microbiology Honours program students must achieve a minimum DGPA of 3.00 and obtain a minimum grade of “C” on the courses that make up the 120 credit hours of the degree.

Students who wish to elect CHEM 2260, CHEM 2290 or CHEM 2470 as options should note the prerequisites in making a choice of mathematics courses.

CHEM 2210 must be taken before MBIO 2370 (CHEM 2370). Courses (MBIO 2360 and CHEM 2360), (MBIO 2370 and CHEM 2370) are the same and credit cannot be held for both. Microbiology students will normally register in MBIO 2360 and MBIO 2370, but CHEM 2360 and CHEM 2370 will be regarded as equivalents.

By careful choice of electives, programs may be selected giving emphasis to various areas of Microbiology, e.g., Biochemistry and Molecular Biology or Environmental and Ecological Microbiology. In choosing optional courses, students should be aware of any prerequisite requirements.

**Honours Cooperative Option**

Students interested in alternating academic terms and terms of paid employment as part of their Honours Microbiology program may enter the Cooperative Option in April of their second year in Honours Microbiology. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and university units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Honours program (see above), as indicated in the chart. Before their first co-op term, students are required to complete the first and second year requirements of the program, in addition to MBIO2370/CHEM 2370, MBIO 3010 and MBIO 3410. Students should refer to the general faculty regulations for B.Sc. (Honours) Cooperative Options in Section 3.6.

To continue in the Honours Cooperative program a student must maintain a minimum DGPA of 3.00, successfully complete each work term, and complete a minimum of 9 credit hours during each academic term. Students should note that the grade requirements for the Cooperative Option are the same as that for the regular Honours program (see above).

Students must check with the Co-op office for the April application deadline information. They will normally be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement.

Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

**Four Year Major**

**To enter** the Major Degree program in Microbiology, a student must have completed at least 24 credit hours with a minimum DGPA of 2.00, and also obtained a minimum grade of “C+” in MBIO 1010, and CHEM 1310. BIOL 1020, BIOL 1030, STAT 1000 (or STAT 1150) and the 3 credit hours of specified Mathematics or Physics are program requirements and students are strongly urged to complete these courses in first year.

* Students interested in studying Microbiology should note that Grade 12 mathematics and chemistry are prerequisite to CHEM 1300. Students will also require Biology 40S (or equivalent) and any Grade 12 mathematics course (or equivalent) for entry to BIOL 1020 (the prerequisite for BIOL 1030).

**To continue** in the Microbiology Major Degree, students must maintain a minimum DGPA of 2.00.

**To graduate** from the 4-year Major degree program in Microbiology, students are required to obtain a minimum DGPA of 2.00.
Options should note the prerequisites in making a choice of mathematics courses. Chemistry CHEM 2210 must be taken before MBIO 2370 (CHEM 2370). Courses MBIO 2360 and CHEM 2360, and MBIO 2370 and CHEM 2370 are the same and credit cannot be held for both. Microbiology students will normally register in MBIO 2360 and MBIO 2370, but CHEM 2360 and CHEM 2370 will be regarded as equivalents in the four year Major program.

Students must note course and grade prerequisites when selecting 3000 and 4000 level Microbiology courses.

Microbiology MBIO 4530 is not available in this program without special permission.

By careful choice of electives, programs may be selected giving emphasis to various areas of Microbiology, e.g., Biochemistry and Molecular Biology or Environmental and Ecological Microbiology. In choosing optional courses, students should be aware of any prerequisite requirements.

The listed requirements are minimum requirements. Students are reminded that should they wish to take further courses in Microbiology, they are at liberty to do so within the degree regulations.

**Four Year Major Cooperative Option**

Students interested in alternating employment terms and academic terms as part of their Major program in Microbiology may enter the Cooperative Option in April of their second year in Microbiology. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and University units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Major program. MBIO 3010 and MBIO 3410 are required in Year 3. Before their first co-op term students are required to complete the first and second year requirements of the program, in addition to MBIO2370/CHEM 2370, MBIO 3010 and MBIO 3410. See the general faculty regulations for B.Sc. (Major) Cooperative Option in Section 3.4.

Students must check with the Co-op office for the April application deadline information. They will normally be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to determine and select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

**Three Year General**

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000 and (or) 4000 level courses from each of two Science areas. To satisfy the requirement in the area of Microbiology, students must take a minimum of 18 credit hours of Microbiology courses as prescribed in the chart below (subject to the Faculty requirement that of the 36 credit hours in the two advanced level Science areas, at least 6 credit hours must be at the 3000/4000 level.).

Students wishing to elect courses in Microbiology in fulfilment of the requirements for the B.Sc. (General) degree should note the following:

- Students must obtain a grade of "C" or better in the following: MBIO 1010, BIOL 1020, BIOL 1030, CHEM 1300 and CHEM 1310.
- Students are encouraged to elect additional Microbiology courses above the required minimum.
- Microbiology MBIO 2770 and MBIO 2780 (CHEM 2770 and CHEM 2780) are not available in this program.

**Minor**

Students must complete MBIO 1010, CHEM 1300, CHEM 1310, BIOL 1020, BIOL 1030, plus 12 credit hours of Microbiology courses at the 2000 and (or) 3000 level.

**Biochemistry and Biotechnology* Programs**

The Department of Microbiology, in conjunction with the Department of Chemistry, offers Joint Honours programs, Joint Honours Cooperative Option programs, Joint four year Major programs and Joint four year Major Cooperative Option programs in Biochemistry and Biotechnology.* See Sections 4.2 Biochemistry Program and 4.4 Biotechnology Program* for full details.

(*As of Fall 2018, admission to the Biotechnology programs has been temporarily suspended. For further information, see the Faculty of Science office.)

### BIOCHEMISTRY – Joint Microbiology and Chemistry Programs: See Section 4.2 Biochemistry

### BIOTECHNOLOGY* – Joint Microbiology and Chemistry Programs: See Section 4.4 Biotechnology

*As of Fall 2018, admission to the Biotechnology programs has been temporarily suspended. For further information, see the Faculty of Science office.

### NOTES:

1 MATH1220 or MATH 1310 may be taken in place of MATH 1300. MATH 1240 may be taken in place of MATH 1200.

2 MBIO 4530 may be selected only by special permission.

3 It is strongly recommended that MBIO 2370 (CHEM 2370) be completed prior to year 3 as it is the prerequisite to many upper level MBIO courses.

4 IMPORTANT: The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.

5 MBIO 1010 may be completed in either year 1 or year 2. It is recommended that it be completed in first year.

6 MBIO 1220 and MBIO 1410 cannot be used to satisfy course requirements in a Major or Honours program.

7 Students in the Co-operative Option must complete MBIO 3010 and MBIO 3410 before their first employment term.

(The number 6 in brackets indicates a 6 credit hour course.)

### Option List for All Microbiology Programs:

**Agroecology: AGEC 2370**

**Biological Sciences:**

- BIOL 2242, BIOL 2260, BIOL 2261, BIOL 2300, BIOL 2301, BIOL 2380, BIOL 2381, BIOL 2410, BIOL 2411, BIOL 2420, BIOL 2421, BIOL 3260, BIOL 3290, BIOL 3291, BIOL 3330, BIOL 3370, BIOL 3400, BIOL 3450, BIOL 3452, BIOL 3460, BIOL 3462, BIOL 3470, BIOL 3472, BIOL 3500, BIOL 3501, BIOL 3510, BIOL 3542, BIOL 3543, BIOL 3560, BIOL 3561, BIOL 4242, BIOL 4244, BIOL 4246, BIOL 4430, BIOL 4480, BIOL 4540, BIOL 4542, BIOL 4544 (BIOL 3540), BIOL 4556, BIOL 4560

**Chemistry:**
CHEM 2260 (CHEM 2280), CHEM 2290, CHEM 2400 (CHEM 2380), CHEM 2470, CHEM 3390, CHEM 3590, CHEM 4570, CHEM 4590, CHEM 4360, CHEM 4370, CHEM 4620, CHEM 4630, CHEM 4670

Environmental Science: ENVR 2180
Food Sciences: FOOD 4150, FOOD 4280
General Agriculture: AGRI 2180
Pharmacology: PHAC 4030, PHAC 4040
Plant Science: PLNT 3400
Statistics: STAT 2000 or STAT 2150

4.10.3 Microbiology Course Descriptions-1000 Level

**MBIO 1010 Microbiology I**  
Cr. Hrs. 3  
(Reg Required) Topics will include the definition and history of microbiology, concepts of practical microbiology, prokaryotic cell structure, prokaryotic specialization in gene expression and transfer of genetic information, the role of microbes in environments including the human body, and applications of microbiology to food production and biotechnology. May not be held with MBIO 1011 or the former MBIO 2100 (MBIO 2101) or MBIO 2110 (MBIO 2111). Prerequisite: BIOL 1020.

**MBIO 1220 Essentials of Microbiology**  
Cr. Hrs. 3  
An introduction to the essential principles of microbiology including immunity, with emphasis on microbial disease. Not available to students who have previously obtained credit in or are currently enrolled in MBIO 1010 or MBIO 1011 (or former MBIO 2100 or MBIO 2101). NOTE: MBIO 1220 is intended for students planning to enter the College of Nursing or other health care or related programs. Students that have completed MBIO 1010 but wish to take MBIO 1220 to satisfy Faculty of Nursing entrance requirements must obtain departmental permission prior to registering for MBIO 1220. MBIO 1220 cannot be used to satisfy the requirements of the Microbiology Honours or Major degree programs. MBIO 1220 can be used as an elective course in any Science program.

**MBIO 1410 Introduction of Molecular Biology**  
Cr. Hrs. 3  
An introduction to the mechanisms, themes and patterns that are present in the molecular biology of organisms ranging from bacteria to humans. The basic applications of molecular biology to disciplines such as medical microbiology, criminology, genetic fingerprinting, genome sequencing, and bioinformatics will be discussed. Not available to students who have previously obtained credit in or are currently enrolled in MBIO 1010 or MBIO 1011 (or former MBIO 2100 or MBIO 2101). NOTE: MBIO 1410 is intended for students outside of Microbiology and Biological Sciences who require an introduction to molecular biology, such as those with interests in bioinformatics, biophysics, or bioengineering. Although this course may be used as an elective in an Arts or Science program, it may not be used to meet a program requirement for an Honours or Major program in Microbiology.

4.10.3 Microbiology Course Descriptions-2000 Level

**MBIO 2020 Microbiology II**  
Cr. Hrs. 3  
(Reg Required) Topics will include bacterial growth, chromosome replication, the specifics of transcription and translation and their application to the regulation of microbial gene expression. Families of bacterial and animal viruses, their modes of reproduction and pathogenicity will be discussed. Mutation and gene transfer in bacteria will be introduced. May not be held with MBIO 2021 or MBIO 2110, MBIO 2111. Prerequisites: MBIO 1010 or MBIO 1011 and one of CHEM 1310, CHEM 1311 or CHEM 1320 (C).

**MBIO 2230 Introductory Biogeochemistry**  
Cr. Hrs. 3  
(Reg Required) Topics will include bacterial growth, chromosome replication, the specifics of transcription and translation and their application to the regulation of microbial gene expression. Families of bacterial and animal viruses, their modes of reproduction and pathogenicity will be discussed. Mutation and gene transfer in bacteria will be introduced. May not be held with MBIO 2021 or MBIO 2110, MBIO 2111. Prerequisites: MBIO 1010 or MBIO 1011 and one of CHEM 1310, CHEM 1311 or CHEM 1320 (C).

**MBIO 2360 Biochemistry 1: Biomolecules and an Introduction to Metabolic Energy**  
Cr. Hrs. 3  
(Reg Required) An introductory course dealing with kinds of molecules encountered in biochemistry, and the concept of metabolic energy as a product of catabolism and a requirement for biosynthesis. This course is also given in Chemistry as CHEM 2360. May not be held with MBIO 2361, MBIO 2770, CHEM 2360, CHEM 2361, CHEM 2860, or CHEM 2770. Prerequisites: CHEM 1310 or CHEM 1311 (C); and one of BIOL 1030, BIOL 1031 (C). NOTE: Students may hold this course for credit in the B.Sc. General Degree program, but may not use it to fulfill the minimum requirement of 12 credit hours in 2000 level Chemistry (pre-September 2008 regulations). Those students following the new B.Sc. General Degree regulations (effective 2008-09) are able to use this course as advanced level credit in both Microbiology and Chemistry.

**MBIO 2370 Biochemistry 2: Catabolism, Synthesis, and Information Pathways**  
Cr. Hrs. 3  
(Reg Required) An introductory course dealing with the basic metabolic processes that occur in living cells, including the production and use of metabolic energy, the breakdown and synthesis of biomolecules; the synthesis of DNA, RNA and proteins; and the regulation of these processes. This course is also given in Chemistry as CHEM 2370. May not be held with MBIO 2371, MBIO 2780, CHEM 2370, CHEM 2371, or CHEM 2780. Prerequisites: CHEM 2210 (C), and one of MBIO 2360, MBIO 2361, CHEM 2360 or CHEM 2361 (C). NOTE: Students may hold this course for credit in the B.Sc. General Degree program, but may not use it to fulfill the minimum requirement of 12 credit hours in 2000 level Chemistry (pre-September 2008 regulations). Those students following the new B.Sc. General Degree regulations (effective 2008-09) are able to use this course as advanced level credit in both Microbiology and Chemistry.

**MBIO 2420 Introductory Virology**  
Cr. Hrs. 3  
(Reg Required) An introductory course dealing with the basic metabolic processes that occur in living cells, including the production and use of metabolic energy, the breakdown and synthesis of biomolecules; the synthesis of DNA, RNA and proteins; and the regulation of these processes. This course is also given in Chemistry as CHEM 2370. May not be held with MBIO 2371, MBIO 2780, CHEM 2370, CHEM 2371, or CHEM 2780. Prerequisites: CHEM 2210 (C), and one of MBIO 2360, MBIO 2361, CHEM 2360 or CHEM 2361 (C). NOTE: Students may hold this course for credit in the B.Sc. General Degree program, but may not use it to fulfill the minimum requirement of 12 credit hours in 2000 level Chemistry (pre-September 2008 regulations). Those students following the new B.Sc. General Degree regulations (effective 2008-09) are able to use this course as advanced level credit in both Microbiology and Chemistry.

**MBIO 2770 Elements of Biochemistry 1**  
Cr. Hrs. 3  
(Reg Required) Basic concepts of biochemistry including the properties of biomolecules (amino acids and proteins, enzymes, carbohydrates, lipids, and nucleic acids) and aspects of energy production in cells. For students in Agricultural and Food Sciences, Human Ecology, and four-year Biological Sciences programs in Science. May not be used as part of an Honours, Major, General, or Minor program in Chemistry or in Microbiology. This course is also given in Chemistry as CHEM 2770. May not be held with CHEM 2770, MBIO 2360, MBIO 2361, CHEM 2360, CHEM 2361, or CHEM 2770.
**MBIO 2780 Elements of Biochemistry 2**  
**Cr. Hrs. 3**  
(Lab Required) The continuation of MBIO 2770, dealing with nitrogen and lipid metabolism, representative biosynthetic pathways, and synthesis and importance of DNA, RNA and proteins. For students in Agricultural and Food Sciences, Human Ecology, and four-year Biological Sciences programs in Science. May not be used as part of an Honours, Major, General, or Minor program in Chemistry or Microbiology. This course is also given in Chemistry as CHEM 2780. May not be held with CHEM 2780, MBIO 2370, MBIO 2371, CHEM 2370, or CHEM 2371. Prerequisite: A grade of "C" or better in one of MBIO 2770, CHEM 2770, MBIO 2360, MBIO 2361, CHEM 2360, or CHEM 2361.

### 4.10.3 Microbiology Course Descriptions-3000 Level

**MBIO 3000 Applied Biological Safety**  
**Cr. Hrs. 3**  
A comprehensive overview of (i) applied biological safety in research and industrial environments and (ii) the disease-causing features of relevant infectious agents and considerations for their containment. The course consists of lectures and demonstration components. Prerequisite: MBIO 1010 (MBIO 1011)(C) or the former MBIO 2100 (or equivalent MBIO 2101) (C); and one of CHEM 1310, CHEM 1311, CHEM 1320 or permission of instructor. Check with department for availability.

**MBIO 3010 Mechanisms of Microbial Disease**  
**Cr. Hrs. 3**  
A consideration of host-parasite relationships, an introduction to the immune response, microbial pathogenesis, viral diseases, clinical microbiology and public health, and an introduction to antimicrobial agents. May not be held with MBIO 3011. Prerequisites: MBIO 2020 (MBIO 2021)(C) or the former MBIO 2100 or former MBIO 2101 (C).

**MBIO 3030 Microbiology III**  
**Cr. Hrs. 3**  
(Lab Required) The course will include an introduction to microbial growth and genomics approaches used for the analysis of microbial metabolism. Using these tools, the physiology of microbial cell walls, transport, and motility, as well as microbial metabolism as related to ATP production, respiration, fermentation and carbon fixation will be discussed. May not be held with MBIO 3031 or the former MBIO 2100. Prerequisites: MBIO 2020 (MBIO 2021)(C); and one of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371 (C); or consent of instructor.

**MBIO 3280 Microbial Communities**  
**Cr. Hrs. 3**  
(Lab Required) This course will examine microbial communities, which will be discussed in terms of their composition, physiological adaptations and their effects on their abiotic and biological surroundings. Topics will include nutrient cycling, biodegradation and adaptation to extreme environments, and the applications arising from these microbial functions. Methods for quantification of microbial biomass and biological activity will be discussed. This course may not be held for credit with MBIO 2280. Prerequisites: both MBIO 1010 (MBIO 1011)(C) and CHEM 1310 (CHEM 1311)(C); or MBIO 2100 (MBIO 2101)(C). MBIO 2020 (MBIO 2020, MBIO 2110) and MBIO 2410 are recommended prerequisites.

**MBIO 3410 Molecular Biology**  
**Cr. Hrs. 3**  
A rigorous treatment of the foundations of modern day molecular biology as it pertains to molecular disease, gene and cell manipulation, and cellular controls. May not be held with MBIO 3411. Prerequisites: One of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371, MBIO 2780, or CHEM 2780 (C); and a C or better in one of MBIO 2020 (MBIO 2021), MBIO 2110 (MBIO 2111), BIOL 2520 (BIOL 2521, ZOOL 2280, ZOOL 2281) or BIOL 2500 (BIOL 2501, BOTN 2460, BOTN 2460).
Microbiology is a very broad field that encompasses a wide range of specialized topics. In this course, students can pursue a specific topic in detail through lectures, assigned readings, seminars and research projects. The course is normally restricted to third and fourth year Honours and Major students. Topics to be covered by the course shall be decided by the instructor(s) in consultation with the student(s) and with the approval from the Department. Grades are based on written assignments and reports. Evaluation may also include oral presentation and poster presentation(s). Prerequisite: Consent of Department.

**MBIO 4410 Virology**  Cr. Hrs. 3

A comprehensive examination of fundamental properties of viruses, virus taxonomy, and the different ways in which viruses replicate. The ways viruses cause disease and experimental methods used in virology also will be examined. May not be held with MBIO 4411, or for credit by students who have already taken MMIC 7010. Prerequisites: MBIO 3010 or MBIO 3011 (C); and MBIO 3410 or MBIO 3411 (C).

**MBIO 4440 Systems Microbiology: from Genomes to Life**  Cr. Hrs. 3

(Lab Required) The purpose of this course is to use knowledge of the components of the bacterial cell to synthesize an understanding of the growth of microbes and their adaptation to their environments. The most recent research tools and systems biology approaches will be discussed. This course may not be held for credit with MBIO 3440. Prerequisites: MBIO 3030 (MBIO 3031)(C); or the former MBIO 2110 (MBIO 2111)(C); and one of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371(C).

**MBIO 4480 Microbes in our Environment**  Cr. Hrs. 3

(Lab Required) A course investigating the diversity of roles microbes play in our immediate environment, and how they affect it. Environments to be examined may include the human body, waste treatment facilities and extreme environments. Molecular tools to study the community structure and roles of individual organisms will also be discussed. This course may not be held for credit with MBIO 4340. Prerequisites: MBIO 3030 (MBIO 3031)(C); or the former MBIO 2110 (MBIO 2111)(C); and one of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371(C).

**MBIO 4520 Industrial Bioprocesses**  Cr. Hrs. 3

(Lab Required) Bioprocesses for a range of commercially important healthcare and industrial products including antibiotics, vaccines, steroids, therapeutic recombinant proteins, monoclonal antibodies, and ethanol will be discussed. Other topics will include bioreactor design, metabolic engineering, applied genetic engineering and animal cell technology. This course may not be held for credit with MBIO 4510. Prerequisites: MBIO 3030 (or one of MBIO 2100 or MBIO 2101) (C); and one of MBIO 2370, MBIO 2371, CHEM 2370, CHEM 2371 (C).

**MBIO 4530 Project in Microbiology**  Cr. Hrs. 6

(Lab Required) A research project chosen in consultation with the department head, and supervised by a staff member. A written report is normally required. The course is available only to final year Honours students in Microbiology, the Joint Microbiology-Chemistry programs, or the Genetics program. May not be held with CHEM 4710.

**MBIO 4540 Biological Energy Transduction**  Cr. Hrs. 3

Biochemistry of biological processes involving interconversion of different forms of energy such as oxidative phosphorylation, membrane transport and contractile processes. May not be held with MBIO 4541. Prerequisite: MBIO 2020 (MBIO 2021) or MBIO 2110 (MBIO 2111) (C); and one of MBIO 2370, MBIO 2371, CHEM 2370, or CHEM 2371(C); or consent of the department. MBIO 3030 (MBIO 3031) is recommended as a prerequisite to this course.

**MBIO 4600 Molecular Genetics of Prokaryotes**  Cr. Hrs. 3

(Lab Required) A detailed examination of replication, expression, mutability, repair and transposition of DNA in bacteria and their viruses. Priority will be given to Science Honours and Majors students. Check with the department for availability. May not be held with MBIO 4601, MBIO 4602. Prerequisites: MBIO 2020 (MBIO 2021) or MBIO 2110 (MBIO 2111) (C); and one of MBIO 2370, MBIO 2371, CHEM 2370, or CHEM 2371 (C). BIOL 2500, BIOL 2501, BOTN 2460, BOTN 2461) is recommended.

**MBIO 4602 Molecular Genetics of Prokaryotes - Lectures**  Cr. Hrs. 3

A detailed examination of replication, expression, mutability, repair and transposition of DNA in bacteria and their viruses. Lecture material will be identical to that of MBIO 4600, but MBIO 4602 lacks the laboratory component. Honours and Major students must register in MBIO 4600. Check with the department for availability. May not be held with MBIO 4600, MBIO 4601. Prerequisites: MBIO 2020 (MBIO 2021) or the former MBIO 2110 (MBIO 2111) (C); and one of MBIO 2370, MBIO 2371, or CHEM 2370, CHEM 2371(C). BIOL 2500 (BOTN 2460, BOTN 2461) is recommended.

**MBIO 4610 Molecular Genetics of Eukaryotes**  Cr. Hrs. 3

(Lab Required) A comprehensive study dealing with replication and expression of DNA, genome structure, and the involvement of genes in diseases such as cancer. Priority will be given to Science Honours and Majors students. Check with the department for availability. May not be held with MBIO 4612. Prerequisites: MBIO 2020 (MBIO 2021) or MBIO 2110 (MBIO 2111) (C); and MBIO 3410 or MBIO 3411. BIOL 2500 (BOTN 2501, BIOL 2501, BIOL 2501, BOTN 2460, BOTN 2461) is recommended.

**MBIO 4612 Molecular Genetics of Eukaryotes - Lectures**  Cr. Hrs. 3

A comprehensive study dealing with replication and expression of DNA, genome structure, and the involvement of genes in diseases such as cancer. Lecture material will be identical to that of MBIO 4610, but MBIO 4612 lacks the laboratory component. Honours and Majors students must register in MBIO 4610. Check with the department for availability. May not be held with the MBIO 4610. Prerequisites: MBIO 2020 (MBIO 2021) or MBIO 2110 (MBIO 2111) (C); and MBIO 3410 or MBIO 3411 (C). BIOL 2500 (BOTN 2501, BOTN 2461) is recommended.

**MBIO 4670 Applied Molecular Biology**  Cr. Hrs. 3

(Lab Required) The overall objective of this course is to introduce and describe current molecular techniques and their application to biological problems. These include, but are not limited to basic gene cloning, mutagenesis, and over-expression. Priority will be given to Science Honours students. May not be held with MBIO 4672, or the former MBIO 4570, MBIO 4581 or the former MBIO 4580. Prerequisites: MBIO 3410 or MBIO 3411 (C).

**MBIO 4672 Applied Molecular Biology**  Cr. Hrs. 3

The overall objective of this course is to introduce and describe the current molecular techniques and their application to biological problems. These include, but are not limited to basic gene cloning, mutagenesis and over-expression. May not be held with MBIO 4670, the former MBIO 4570, MBIO 4581 or the former MBIO 4580. Prerequisite: MBIO 3410 or MBIO 3411 (C).

**MBIO 4980 Work Term 3**  Cr. Hrs. 0

Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).

**MBIO 4990 Work Term 4**  Cr. Hrs. 0

Work assignments in business, industry or government for students registered in the Microbiology Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only).
4.11 Department of Physics and Astronomy

Head: Kumar Sharma
Campus Address/General Office: 301 Allen Building
Telephone: 204 474 9817
Email Address: physics@umanitoba.ca
Website: http://www.physics.umanitoba.ca/

4.11.1 Program Information

Physics is the discipline that by experiment and logical analysis examines the laws of nature that form the basis for all relationships and interactions between matter and energy. Knowledge of physics is also essential in other natural sciences, such as chemistry and geology, and to professions such as engineering, medicine and dentistry. Astronomy, the other focus of this department, examines the universe, the earth and the planets, as well as phenomena such as quasars, pulsars, comets, and asteroids; a planetarium and an astronomical observatory are part of this program. In both Physics and Astronomy mathematical skills are developed simultaneously.

The department must approve a student’s Honour or Major program prior to registration in each session. Students must also obtain approval for any and all revisions to their program.

The Department of Physics and Astronomy and the Department of Electrical and Computer Engineering have defined focus areas of study within their own programs. Students taking the courses recommended for these focus areas will find it easier to transfer between programs in Physics and Astronomy and Electrical and Computer Engineering programs.

Students interested in obtaining more information about transferring to a Physics program from Electrical Engineering should consult with the Head of the Physics department.

Honours

To enter the Honours programs in Physics and Astronomy, a student must have completed at least 24 credit hours with a minimum DGPA of 3.00, and also obtained a minimum grade of “B” in PHYS 1070, or a “B+” in PHYS 1030. Students are strongly encouraged to complete MATH 1300, MATH 1500, and MATH 1700 in Year 1. Not only are these courses required in the Physics and Astronomy programs, they are required prerequisites to several second year Physics and Astronomy required courses.

To continue in the Physics and Astronomy Honours program, students must maintain a minimum DGPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and minimum grade of “C” in each course that contributes to the 120 credit hours of the degree.

There are a number of awards — the Coish, the C.P. Loewen, the Neaman, the Roulston, and the Sen Scholarships — available in this program.

Joint Honours

The Department of Physics and Astronomy offers joint honours pro-grams in conjunction with the Departments of Mathematics, Computer Science, and Chemistry.

To enter the Joint Honours Mathematics-Physics program the student must have a minimum grade of “B” in: MATH 1232 or MATH 1690 or a minimum grade of “A” in MATH 1700, PHYS 1050 (or “B+” in PHYS 1020) and PHYS 1070.

HONOURS: Astronomy and Astrophysics

To enter the Joint Honours Computer Science-Physics program, the student must have a minimum grade of “B” in: PHYS 1050 (or “B+” in PHYS 1020), PHYS 1070, MATH 1300, MATH 1500 (or equivalent), MATH 1700 (or equivalent), and COMP 1020.

To enter the Joint Honours Chemistry-Physics program, the student must have a minimum grade of “B” in: PHYS 1050 (or “B+” in PHYS 1020), PHYS 1070, CHEM 1300, CHEM 1310, MATH 1500 and MATH 1700.

Double Honours

The Department of Physics and Astronomy offers a double honours degree in conjunction with the Biochemistry program.

Four Year Major

The program is intended for students who wish to learn Physics as part of a general education, or combine Physics with other disciplines. There are many options with this degree which might include a career in education, high technology, business, or science journalism. The large number of electives will allow the students to obtain significant background in another filed such as Chemistry, Life Sciences, Computer Science, Mathematics, Physical Geography, Geophysics or Geology. In some cases, these can be recognized formally as a minor or part of a double major program.

To enter the four year Major program in Physics and Astronomy, a student must have PHYS 1050 (C+) or PHYS 1020 (B). In addition, students must have satisfied the faculty requirements for entry to the four year Major program. Students are strongly encouraged to complete PHYS 1070 or PHYS 1030 as well as MATH 1300, MATH 1500, and MATH 1700 in Year 1. Not only are they required courses in the Physics and Astronomy programs, these courses are required prerequisites to several required second year Physics and Astronomy courses.

Three Year General

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 36 credit hours of 2000 and (or) 3000 level courses from two Science departments. To satisfy the requirement in the Department of Physics and Astronomy, students must select a minimum of 18 credit hours from the list in the chart below.

Variations in any of the programs listed above may be possible, but must be approved by the head of the department and the Science general office.

### NOTES:

1. Students must achieve a minimum grade of "C" in all courses contributing to the Honours program.

2. PHYS 1050 and PHYS 1070 are recommended. MATH 1220 may be taken in place of MATH 1300; MATH 1230 or MATH 1510 or MATH 1520 may be taken in place of MATH 1500; MATH 1232 or MATH 1710 may be taken in place of MATH 1700; MATH 1690 may be taken in place of MATH 1500 and MATH 1700.

3. Although they are not required courses in the Physics programs, MATH 2080, MATH 2180, and MATH 3340 are recommended electives for the Physics Honours and Four Year Major degrees.

4. Students who do not take PHYS 1070 or PHYS 1030 in Year 1 must postpone PHYS 2600 until Year 3. PHYS 2260, PHYS 2610 and PHYS 2650 may be taken in Year 2 or Year 3 if the respective prerequisites are met.

5. Students who have already taken COMP 1010 before joining the program may count COMP 1010 in lieu of COMP 1012. However, students who have not taken COMP 1010 before entering the program must then take COMP 1012.

6. Students may take STAT 1000 and STAT 2000 in lieu of STAT 1150.

### IMPORTANT:
The Honours and four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates the recommended arrangement of the required courses and is meant to be a guide around which students can plan their program (Letters in brackets refer to minimum prerequisite standing required for further study. The number 6 in brackets indicates a 6 credit hour course).

### 4.11.3 Astronomy Courses

**ASTR 1810 Introduction to Astronomy: The Magnificent Universe**  
Cr. Hrs. 3

(Lab Required) This introductory astronomy course surveys our magnificent Universe. The topics covered in this course outline the properties of stars and planets that can be observed and the physics necessary to interpret these observations. It also includes an introduction to galaxies and cosmology. Using lectures and laboratory sections, it provides an astronomy background and introduction to the scientific method. It ranges...
from introductory physical background to considering current research problems. This course is taught with algebra and trigonometry used frequently. May not be held with the former PHYS 1810. Prerequisites: (one of Physics 40S, PHYS 0900 (P), or equivalent) and (70% or better in one of Pre-calculus Mathematics 40S, Applied Mathematics 40S, or equivalent). It is strongly recommended that students attain a minimum of 70% as the average of their marks in Physics 40S and Pre-calculus Mathematics 40S.

**ASTR 1830 Life in the Universe**  
Cr. Hrs. 3
This descriptive, general interest course explores the topic of life in the universe. Some of the following topics will be covered: (1) Some astronomy fundamentals (gravity, light). (2) The solar system (an introduction to the solar system, the formation of the solar system, the origin of life on Earth, extremophiles, the conditions needed for life, possible locations for life in the solar system). (3) Exoplanets (discovery methods, properties of detected Exoplanets, the Habitable Zone). (4) Star system formation (pre-stellar disks, planetary migration). (5) The Interstellar medium (nebulae, molecular clouds). (6) Our Milky Way galaxy as an environment for life and the Drake Equation. (7) The Search for Extra Terrestrial Intelligence (SETI). This course is qualitative with simple arithmetic and trigonometry used occasionally. May not be held with the former PHYS 1830.

**ASTR 2000 Foundations of Astrophysics**  
Cr. Hrs. 3
This course covers the foundations of astrophysics, with emphasis on the core physical principles and processes that govern astronomical phenomena. The course emphasizes how the physics of matter, radiation, gravity, magnetic fields, and the interaction between light and matter can be used to understand a range of astrophysical phenomena, including fundamental processes, fascinating energetic objects, and topics at the forefront of modern research. Prerequisites: (a grade of "C" or better in one of PHYS 1070, PHYS 1071, or PHYS 2152) or (a "C+" or better in PHYS 1030 or PHYS 1031) and (a "C" or better in one of MATH 1322, MATH 1690, MATH 1700, MATH 1701, MATH 1710, or the former MATH 1730) or permission of the department. ASTR 1810 is recommended.

**ASTR 2070 Observational Astronomy Techniques**  
Cr. Hrs. 3
(Lab Required) Students will learn the basic astronomy tools and practical concepts pertaining to observational astronomy. Lecture topics include spectroscopy, the optics of mirrors and lenses relevant to telescopes, types of telescopes, and factors that affect the quality of astronomical observations. The practical aspects include observational project development, and hands-on telescope experience using the University of Manitoba's Ewen Campus Observatory (ECO) and the Glenlea Astronomical Observatory (GAO) as well as smaller 8-inch portable telescopes. May not be held with the former PHYS 2070. Prerequisites: (a "C" or better in one of PHYS 1070, PHYS 1071, or PHYS 2152) or (a "C+" or better in PHYS 1030 or PHYS 1031) and (a "C" or better in one of MATH 1322, MATH 1690, MATH 1700, MATH 1701, MATH 1710, or the former MATH 1730) and (one of ASTR 1810, the former PHYS 1810, ASTR 1830, the former PHYS 1830, or ASTR 2000) or permission of the department.

**ASTR 3070 Observational Astronomy Project**  
Cr. Hrs. 3
(Lab Required) Students will learn to develop and execute an observational research project. Students will choose their research topic with the constraint that the data be collected using the University of Manitoba’s Astronomical Observatory at Glenlea Astronomical Observatory and the Ewen Campus Telescopes. The optical observational data will be supplemented by archival data from professional research telescopes such as the Hubble Space Telescope, Chandra X-ray Observatory and others. The course covers the determination of observational constraints, the use of filters, methods of data analysis, and interpretation of results. The research project will be written into a report and presented. Not to be held with the former PHYS 2070. Prerequisite: ASTR 2070 or permission of the department.

**ASTR 3180 Stars**  
Cr. Hrs. 3
This course provides an overview of the physics of stars, including all phases of stellar evolution: from star formation, to the main-sequence phase, to star death, to the formation of degenerate or compact remnants such as white dwarfs, neutron stars and black holes. Topics include radiative transfer, stellar structure and atmosphere, nuclear fusion, stellar evolution, degenerate stars, and other exotic forms of compact stellar remnants. May not be held with the former PHYS 3180. Prerequisite: ASTR 2000 or permission of the department.

**ASTR 3230 The Phenomenology of Galaxies**  
Cr. Hrs. 3
This course investigates galaxies from the perspective of recent observational data, exploring characteristics that theories have yet to explain. Topics include sources of their radiation, such as stars, gas and dust; their structure and kinematics, which indicate the existence of dark matter; and their formation and evolution, which has implications for cosmological studies. May not be held with the former PHYS 4230. Prerequisite: ASTR 2000 or permission of the department. ASTR 2070 or ASTR 3180 is recommended.

**ASTR 4020 Cosmology and Black Holes**  
Cr. Hrs. 3
Topics include static solutions of Einstein’s equations, gravitational waves, static models for stars (white dwarfs, neutron stars), dynamic models for stars (Birkhoff theorem, black holes), and cosmology (Robertson-Walker metric, Friedmann equations). Further topics discussed in the course are cosmic inflation, dark matter and energy, as well as large-scale structure of the universe. May not be held with the former PHYS 4020. Prerequisite: PHYS 4010.

**ASTR 4100 High-Energy Astrophysics**  
Cr. Hrs. 3
This course provides an overview of the field of high-energy astrophysics and of high-energy missions, with emphasis on X-ray and gamma-ray astrophysical sources and relevant radiation processes. Radiation and high-energy processes include synchrotron radiation, bremsstrahlung, Inverse Compton scattering, pion decay, and particle acceleration. Astrophysical sources include accreting compact objects, supernovae and their remnants, gamma-ray bursts, and clusters of galaxies. The course can include topics relevant to nuclear astrophysics and will train students in writing observing proposals for high-energy facilities. May not be held with PHYS 4300 when the topic is "High-Energy Astrophysics". Prerequisites: (PHYS 2386 or the former PHYS 2380) and PHYS 2600 and PHYS 3670. ASTR 2000 is recommended.

**ASTR 4200 Radio Astronomy**  
Cr. Hrs. 3
This course will provide an introduction to observational radio astronomy and processes in radio astrophysics. Topics will include: an introduction to radio astronomy; basic radiative transfer; blackbody radiation and radiation from an accelerated charge; radio telescopes, receivers, and interferometers; thermal continuum sources (e.g., Hill regions); non-thermal continuum sources (e.g., radio galaxies); pulsars; and spectral-line sources (e.g., the 21 cm line, radio recombination lines, and rotational energy transitions in simple molecules). May not be held with PHYS 4300 when the topic taught is "Radio Astronomy." Prerequisites: (PHYS 2386 or the former PHYS 2380) and PHYS 2600 and PHYS 3670. ASTR 2000 is recommended.

**ASTR 4400 Magnetohydrodynamics, Astrophysical Plasmas, and the Interstellar Medium**  
Cr. Hrs. 3
This course develops a theoretical understanding of interstellar magnetic fields for a diverse range of astrophysical objects, processes, and phenomena. The theoretical aspects of magnetohydrodynamics (MHD), including waves, shocks, instabilities, and turbulence are discussed. MHD and plasma physics are applied to the magneto-ionic interstellar medium of our galaxy, including supernova remnants. Magnetic fields in molecular clouds and cores are examined, with emphasis on their role in star formation. The course also develops a theoretical foundation for the
4.11.3 Physics and Astronomy Course Descriptions-0 Level

PHYS 0900  Preparing for University Physics  Cr. Hrs. 0
(Lab Required) A review of elementary physics, emphasizing the laws of mechanics, for students considering enrolling in a first-year university physics course. Mathematical techniques used in solving physics problems and the relevance of physics to everyday life will be stressed. Although this course may be used as part of the prerequisite requirements for first-year Physics courses, students are encouraged to take Physics 40S whenever possible.

PHYS 1020  General Physics 1  Cr. Hrs. 3
(Lab Required) It's a crazy world; come and find out why objects fall, slide, bounce, stick, go in circles or stay straight, float or sink, glide or crash. Why don't satellites fall to the ground? What exactly does weightlessness mean anyway? Find answers to these and other questions as you get to know Newton's and other basic laws of nature and see what makes the world go round. This course, together with the sequel PHYS 1030, is recommended for students seeking either a single, comprehensive course in Physics or entry into health science programs. It may also be used for entry into the Honours Physics program ("B+" or better) or the Major Physics program ("B" or better). May not be held with PHYS 1021, PHYS 1050, PHYS 1051, the former PHYS 1410, or the former PHYS 1420. Prerequisites: (one of Physics 40S, PHYS 0900 (P), PSKL 0100 (P) offered by Extended Education, or equivalent) and (one of Pre-calculus Mathematics 40S, Applied Mathematics 40S (with 70% or better), a grade of "C" or better in MSKL 0100 offered by Extended Education, or equivalent). It is strongly recommended that students attain a minimum of 70% as the average of their marks in Physics 40S and Pre-calculus Mathematics 40S.

PHYS 1030  General Physics 2  Cr. Hrs. 3
(Lab Required) Discover how physics is the basis of the hi-tech world we live in and how we live in it. Learn how to use simple, intuitive physics concepts that are described using little math and no calculus to understand a diversity of topics including how electricity is made, what drives the greenhouse effect, what makes a diamond sparkle, lasers, LASIK eye surgery and the workings of the human eye. This course, together with its prerequisite PHYS 1020, is recommended for students seeking either a single comprehensive course in Physics, or entry into health science programs. This course may not be held with PHYS 1031, the former PHYS 1410 the former PHYS 1420. Prerequisite: one of PHYS 1020, PHYS 1021, PHYS 1050, or PHYS 1051.

PHYS 1050  Physics 1: Mechanics  Cr. Hrs. 3
(Lab Required) It's rocket science! Mechanics is the science of describing (Kinematics) and explaining (Dynamics) motion. The basic concepts of calculus together with laws of conservation of momentum and energy are used to develop the tools required to describe, analyze and predict the outcomes of linear and rotational motion in simple mechanical systems. A brief introduction to the Einstein theory of special relativity provides a taste of modern approaches to this subject. This course develops a strong scientific foundation for students considering a program of study in engineering or the physical sciences. May not be held with PHYS 1020, PHYS 1021, PHYS 1051, the former PHYS 1410, or the former PHYS 1420. Prerequisite: one of Physics 40S (60% or better), PHYS 0900 (P) or PSKL 0100 (P) offered by Extended Education, or equivalent. Pre- or corequisite: one of MATH 1230, MATH 1500, MATH 1501, MATH 1510, MATH 1520, the former MATH 1530, or MATH 1690.

PHYS 1070  Physics 2: Waves and Modern Physics  Cr. Hrs. 3
(Lab Required) At the heart of modern communications, waves and oscillations are key to understanding the world around us from subatomic scales to biology, traffic flow, the stock market, climate change and the cosmos itself. Learn about the mysterious quantum world, the basis of the latest nanotechnology, where particles are waves and waves are particles. Explore Bohr's model of the atom and discover Heisenberg's Uncertainty Principle. This calculus based course addresses the underlying concepts for all modern science and engineering. This course, like Physics 1 (PHYS 1050), is intended for students considering a program in the physical sciences. May not be held for credit with PHYS 1071, the former PHYS 1410, the former PHYS 1420, or PHYS 2152. Prerequisites: (a grade of "C" or better in PHYS 1050 or PHYS 1051) or (a grade of "B" or better in PHYS 1020 or PHYS 1021) and (a grade of "C" or better in one of MATH 1230, MATH 1500, MATH 1501, MATH 1510, MATH 1520, or the former MATH 1530). Pre- or corequisite: one of MATH 1232, MATH 1700, MATH 1701, MATH 1690, MATH 1710, or the former MATH 1730. Recommended for entry into the Honours programs (with a grade of "B").

PHYS 2010  Computational Modeling of Natural and Human-Created Systems  Cr. Hrs. 3
This course uses computer simulations to explore emergent behavior in simple models of natural phenomena, traffic, financial systems, and human behavior. The goal of the course is to show how computational modeling can be applied to exciting interdisciplinary problems spanning a wide range of human knowledge, beyond what is normally considered to be physics. Prerequisites: (one of COMP 1012, COMP 1013, COMP 1010 or COMP 1011) and (one of PHYS 1020, PHYS 1021, PHYS 1050, or PHYS 1051) or (one of MATH 1220, MATH 1300, MATH 1301, or the former MATH 1310) and (one of MATH 1230, MATH 1500, MATH 1501, MATH 1510, MATH 1520, the former MATH 1530, or MATH 1690).

PHYS 2152  Modern Physics for Engineers  Cr. Hrs. 3
(Lab Required) An overview of topics in modern physics including wave particle duality, atomic structure and quantum mechanics. Elementary classical electromagnetic theory and wave theory are reviewed as an introduction to the modern physics concepts. For Engineering students only. May not be held with PHYS 1070 or PHYS 1071. Prerequisites: a "C" or better in one of PHYS 1050, PHYS 1051; or a "B" or better in PHYS 1020 or PHYS 1021; and a "C" or better in one of MATH 1230, MATH 1500, MATH 1501, MATH 1510, MATH 1520; and a "C" or better in one of MATH 1232, MATH 1700, MATH 1701, MATH 1710 or MATH 1690. Prerequisite or concurrent requirement: MATH 2130.

PHYS 2210  Understanding Electricity and Magnetism  Cr. Hrs. 3
An introduction ranging from its history to connections with real-world phenomena in engineering and biology, and common sense on the understanding of the phenomena. The student is carefully guided through mathematical derivations. Physics is used to develop the theory and the applications of such things as motors, radios, magnetic resonance imaging (MRI) systems and computers. May not be held with the former PHYS 2200, or the former PHYS 2201, PHYS 2600 or PHYS 2610. Prerequisites: [(a "C" or better in PHYS 1070 or PHYS 1071) or (a "C-" or better in both of PHYS 1020 or PHYS 1021) and PHYS 1303 or PHYS 1304)] or (a "C" or better in one of MATH 1230, MATH 1500, MATH 1501, MATH 1510, MATH 1520). Pre- or corequisite: [MATH 1200 or the former MATH 1201 or MATH 1240 or MATH 1241] and [one of MATH 1232, MATH 1690, MATH 1700, MATH 1701, MATH 1710].

PHYS 2260  Optics  Cr. Hrs. 3
(Lab Required) A survey of refraction, reflection, simple lens systems and optical systems, dispersion, achromatism and an elementary treatment of diffraction, interference, and polarization. May not be held with PHYS 2261. Prerequisites: A "C" or better in PHYS 1050 or PHYS 1051, or a "C-" or better

</tbody>
</table>
PHYS 3430 Honours Physics Laboratory Cr. Hrs. 6
Six hours per week. This is a hands-on course of experimental essentials of modern physics. Prerequisites: one of PHYS 2260, PHYS 2261, PHYS 2610 or ECE 2160, or permission of the department.

PHYS 3496 Mathematical Physics 2 Cr. Hrs. 3
This course provides a continuation of the mathematics required for both the Honours and Major programs in Physics and Astronomy. Topics include complex analysis, generalized coordinate systems, Sturm-Liouville theory and generalized orthogonal functions, partial differential equations, and applications in physics. Prerequisite: PHYS 2496 or PHYS 2490. MATH 2090 or the former MATH 2300 is recommended.

PHYS 3570 Physics of Materials 1 Cr. Hrs. 3
Introduction to the physics of materials. Solids within the elastic limit: stress and strain tensors, elastic constants. Liquids: continuity equation, Bernoulli, Euler and Navier-Stokes equations. Pre- or corequisite: PHYS 3386 or the former PHYS 3380.

PHYS 3630 Electrod. & Magnetostatic Theory Cr. Hrs. 3
Material covered will include electrostatics (i.e. Gauss’ Law, Laplace and Poisson equations) and magnetostatics (Lorentz force, Maxwell equations) as well as the properties of electrostatic fields in matter and magnetism in materials. Prerequisites: PHYS 2600 and (one of PHYS 2496, PHYS 2490, or MATH 3132) or permission of the department. PHYS 3496 is recommended.

PHYS 3650 Classical Mechanics 2 Cr. Hrs. 3
The second in a sequence of two courses on intermediate to advanced level mechanics. Topics include calculus of variations, Lagrangian and Hamiltonian dynamics, canonical equations using Poisson brackets, nonlinear oscillations and chaos, coupled oscillations, and the wave equation in continuous media. Prerequisite: PHYS 2650. Pre- or corequisite: one of PHYS 3496, PHYS 2490, or MATH 3132.

PHYS 3670 Classical Thermodynamics Cr. Hrs. 3
An introduction to the laws of classical equilibrium thermodynamics and their applications. Prerequisite: one of PHYS 2496, PHYS 2490 or MATH 3132.

4.11.3 Physics and Astronomy Course Descriptions-4000 Level

PHYS 4010 General Relativity and Gravitation Cr. Hrs. 3
The course briefly covers Newtonian gravity, special relativity and Minkowski space, before moving on to relativistic electrodynamics with the focus on the energy-momentum tensor, relativistic hydrodynamics, non-inertial reference frames and the principle of covariance and Einstein’s field equations, linearized field equations and gravitational waves, as well as Schwarzschild’s solution with the application to a static black hole. Prerequisites: PHYS 3650 and (PHYS 3496 or PHYS 2490) or permission of the department. Pre- or corequisite: PHYS 4646 or the former PHYS 3640.

PHYS 4250 Computational Physics Cr. Hrs. 3
Application of numerical methods and programming skills to model a variety of physics problems on a computer. Topics include differential equations, boundary value and eigenvalue problems, special functions, and Monte Carlo methods, with examples from classical, quantum, and statistical mechanics. Prerequisites: (one of COMP 1012, COMP 1013, COMP 1010, or COMP 1011) and (PHYS 3496 or PHYS 2490) or permission of the department.

PHYS 4300 Topics in Physics Cr. Hrs. 3
Topics will vary depending upon student needs and interests, and will include specialized topics not available in regular course offerings.

PHYS 4360 Medical Radiation Physics Cr. Hrs. 3
The relevant physics of the production and interaction of radiation beams used in both diagnostic and therapeutic medicine will be covered. Such beams included X- and g-rays, particle beams, visible and I.R. radiation, microwaves, and ultrasound. Prerequisite: PHYS 3220 or the former PHYS 4560 or permission of the department.

PHYS 4386 Quantum Mechanics 3 Cr. Hrs. 3
The third in the sequence of three courses on quantum mechanics which includes systems of identical particles, variational methods, time-dependent perturbation theory and scattering theory. May not be held with the former PHYS 4390. Prerequisites: (PHYS 3386 or the former PHYS 3380) and (PHYS 3496 or PHYS 2490).

PHYS 4400 Medical Imaging Cr. Hrs. 3
Fundamental principles of image formation, analysis of the characteristics of medical images, parametric description of image quality; application to transmission radiography. Prerequisite: PHYS 3220 or permission of the department.

PHYS 4516 Introduction to Nuclear and Particle Physics Cr. Hrs. 3
Bulk properties of the atomic nucleus; nuclear models, nuclear disintegration; alpha-decay, gamma transitions, and beta-decay; scattering formalism and experiments; evidence for quark structure and properties of the hadrons (neutrons, protons, mesons); basic introduction to QCD; basic intro to the weak interaction and neutrino physics; basic introduction to the standard model. May not be held with the former PHYS 4510. Prerequisites: (PHYS 3386 or the former PHYS 3380) and (PHYS 4646 or the former PHYS 3640).

PHYS 4520 Introduction to Solid State Physics Cr. Hrs. 3
An introduction to the following topics as they relate to the properties of solids: crystal structure and lattice energy; lattice vibrations; specific heat; free-electron gas; electronic band structure; metals, semiconductors and insulators. Prerequisite: (PHYS 3386 or the former PHYS 3380) and (PHYS 4680 or the former PHYS 3680).

PHYS 4590 Advanced Optics Cr. Hrs. 3
Light as a classical electromagnetic wave, optical fields in media, interference by wavefront and amplitude splitting, diffraction, diffraction theory of image formation, spatial filtering and image processing, coherence theory. Prerequisites: (PHYS 2260 or PHYS 2261) and (PHYS 4646 or the former PHYS 3640).

PHYS 4600 Lasers and Applications Cr. Hrs. 3
Light and atoms: semi-classical theory, principles of laser operation and properties of laser light, polarization optics, Gaussian beam optics, laser spectroscopy. Prerequisites: (PHYS 2260 or PHYS 2261) and (PHYS 3386 or the former PHYS 3380).

PHYS 4620 Advanced Classical Mechanics Cr. Hrs. 3
Canonical invariants and Lagrange and Poisson brackets. Hamilton-Jacobi theory, action-angle variables, normal modes of vibration. Prerequisite: PHYS 3650 and PHYS 3496.

PHYS 4630 Physics of Materials 2 Cr. Hrs. 3
Physics of materials beyond the elastic limit, emphasizing atomistic features. Structural aspects, crystal defects, plastic deformation, radiation damage, diffusion and dislocations. Prerequisite: PHYS 3570 (C).
PHYS 4646  Electro - and Magnetodynamics and Special Relativity  Cr. Hrs. 3
Topics covered will include time dependent Maxwell's equations, Ohm’s and Faraday’s Law, electromagnetic waves, potential and fields, radiation, and special relativity including the Lorentz transformations. May not be held with the former PHYS 3640. Prerequisites: PHYS 3630 or ECE 3590. Pre- or corequisite: one of PHYS 3496, PHYS 2490, or MATH 3132.

PHYS 4676 Honours Thesis - Proposal and Preparation  Cr. Hrs. 3
For students in term 1 of their final year in Honours. The student will prepare a proposal for the undergraduate thesis and demonstrate the feasibility of the project under the supervision of a faculty member. The results of the study will be presented (in written and oral form) to an examining committee during the term. Both experimental and theoretical topics are acceptable. A grade of C (based on the presentations) is required to proceed to the next course which forms the final stage of the honours thesis. May not to be held with the former PHYS 4670 or the former PHYS 4672. Prerequisites: PHYS 3430 and permission of the department.

PHYS 4678 Honours Thesis - Dissertation  Cr. Hrs. 3
For students in term 2 of their final year in Honours. The student will complete the work needed and produce an undergraduate thesis under the supervision of a faculty member. The grade will be based on the examining committee’s evaluation of a progress report (presented mid-term) and an evaluation of the thesis manuscript and oral presentation at the end of term. Both experimental and theoretical topics are acceptable. May not be held with the former PHYS 4670, the former PHYS 4672, or the former PHYS 4674. Prerequisite: permission of the department.

PHYS 4680  Statistical Mechanics  Cr. Hrs. 3
Principles of statistical mechanics and their applications. Topics include phase space, Liouville and Poincare theorem, statistical ensembles, entropy, ideal classical gas, photon gas, Fermi gas, Bose-Einstein condensation, models of magnetism, and phase transitions. May not be held with the former PHYS 3680. Prerequisites: PHYS 2386 or the former PHYS 2380 and PHYS 3670. Pre- or corequisite: PHYS 3496 or PHYS 2490.

4.12 Psychology Program

Head: Dan Bailis
Campus Address/General Office: P404 Duff Roblin Bldg.
Telephone: 204 474 9338
Email Address: psychugadvisor@umanitoba.ca
psychughhead@umanitoba.ca
Website: http://www.umanitoba.ca/psychology/

4.12.1 Program Information
Psychology is the scientific study of behaviour and mental processes, including the biological bases of behaviour and cognitive processes, and behavioural and cognitive neuroscience. The Honours and Major programs combine courses in Psychology with related courses in Science. Courses from the Faculty of Arts are included in this program. The Faculty of Science offers programs leading to a B.Sc. (Honours) degree in Psychology and a B.Sc. (Major) degree in Psychology.

Honours
To enter the Honours program, students must have obtained a grade of "B" or better in PSYC 2260 and a grade of "B" in six credit hours in courses offered by the Faculty of Science. In addition, students must have obtained a degree grade point average of 3.50. Introductory courses in Biological Sciences, Chemistry, Computer Science, Mathematics or Statistics are highly recommended.

Students will normally take PSYC 2260 in Year 2 and enter Honours in Year 3. Students who qualify for entry to the 4-Year Major in Psychology after Year 1 should choose that option. See the 4-Year Major entry requirements for details.

To continue in the Honours program, a student must register in a minimum of 9 credit hours in each Fall and Winter Term and must meet all of the continuation criteria of the Faculty of Science. In addition, students must maintain a minimum degree grade point average of 3.50 based on all courses in the program. Students who do not meet the minimum continuation requirement will be required to withdraw from the Honours program.

To graduate, a student must obtain 120 credit hours of courses with grades of "C" or better in each course and with a minimum degree grade point average of 3.00. In addition, students must complete the program of study in the chart below.

Four Year Major
To enter the Major program, students must normally have obtained a grade of C+ or better in PSYC 1200 (or in both PSYC 1211 and PSYC 1221) and in six credit hours in courses offered by the Faculty of Science and meet the Faculty of Science requirements for entry to the Major program. Introductory courses in Biological Sciences, Chemistry, Computer Science, Mathematics, or Statistics are highly recommended.

To continue in the Major program, a student must meet all of the continuation criteria of the Faculty of Science. This includes maintaining a minimum DGPA of 2.00 at each point of assessment, and no more than 18 credit hours of failing grades after entry to the program. Students who do not meet the minimum continuation requirement will be required to withdraw from the Major program. The department must approve a student's Major program for each session. All program revisions must also have prior approval.
To graduate with the degree of Bachelor of Science (Major), a student must complete 120 credit hours of courses with passing grades (D or better) in each course, with a minimum DGPA of 2.00. In addition, the student must complete the program of study as listed in the program chart below.

**NOTE**: Psychology cannot be used to fulfill either the introductory or advanced level Science requirements in the 3-year B.Sc. General Degree.

### Psychology Courses

All Psychology courses are available to Science students. For a complete course listing, see the Faculty of Arts section.

Psychology courses taught at the Université de Saint-Boniface can be used to satisfy degree requirements.

### 4.13 Department of Statistics

The Science courses that are chosen must be approved by the Department of Psychology and must include a minimum of 18 credit hours at the 2000 level or above.

Free options are to be chosen from courses that are acceptable for credit in the Faculty of Science and must be approved by the Department of Psychology.

During Years 2 to 4 a total of 42 credit hours of 2000 or 3000 level Psychology courses must be completed, including a minimum of 3 credit hours from each of the five lettered categories of courses below.

The courses required in this program satisfy the university mathematics requirement.

### Important

The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.

(Letters in brackets indicated minimum prerequisite standing required for further study. The number 6 in brackets indicates a 6 credit hour course.)

The courses required in this program satisfy the university mathematics requirement.

### Important

The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible arrangement of the required courses and is meant to be a guide around which students can plan their program.

(Letters in brackets indicated minimum prerequisite standing required for further study. The number 6 in brackets indicates a 6 credit hour course.)

Psychology courses taught at the Université de Saint-Boniface can be used to satisfy degree requirements.
4.13.1 Program Information

Statistics is a discipline grounded in mathematics that has practical applications in many other areas. Statistics is an analytical discipline that helps other disciplines carry out research projects and studies that involve measurement, comparison, and interpretation. Statistics is a useful ancillary subject to other sciences, the social sciences, and many of the professional programs. The department offers joint programs with Computer Science, Mathematics, Economics and Actuarial Mathematics.

Honours Requirements

To enter the Honours program in Statistics, a student must have completed at least 24 credit hours with a minimum DGPA of 3.00, and also obtained a minimum grade of “B” in STAT 2150.

STAT 1150, MATH 1220, MATH 1230, MATH 1232 and MATH 1240 are all requirements of the Statistics Honours degree program and students are strongly encouraged to take these courses in Year 1.

To continue in the Statistics Honours program, students must maintain a minimum DGPA of 3.00, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B.Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and minimum grade of “C” in each course that contributes to the 120 credit hours of the degree.

Statistics Honours Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Honours Statistics program may enter the Cooperative Option in April of their second year in Honours Statistics. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and university units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Honours program. Students are required to complete the first and second year requirements of the program; and STAT 3470 and STAT 3480 before they begin their first employment term. Students should refer to the general faculty regulations for B.Sc. (Honours) Cooperative Option in Section 3.6.

To continue in the Honours Cooperative program a student must maintain a minimum DGPA of 3.00, successfully complete each work term and complete a minimum of 9 credit hours during each academic term. Students should note that the grade requirements for the Cooperative Option are the same as that for the regular Honours program (see above). Students must check with the Co-op office for the April application deadline information. They will normally be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

Four Year Major Requirements

To enter the Major Degree program in Statistics, a student must have completed at least 24 credit hours with a minimum DGPA of 2.00, and also obtained a minimum grade of “C+” in STAT 2150.

STAT 1150, MATH 1220, MATH 1230, MATH 1232 and MATH 1240 are all requirements of the Statistics Honours degree program and students are strongly encouraged to take these courses in Year 1.

To continue in the four year Major program a student must maintain a minimum DGPA of 2.00.

To graduate from the four year Major program a student must obtain a minimum DGPA of 2.00, and a minimum grade of “C” in each of the Major Program Specific courses (see below).

Statistics Four Year Major Cooperative Option

Students interested in alternating academic terms and terms of paid employment as part of their Major program in Statistics may enter the Cooperative Option in April of their second year in Statistics. This program provides students with a minimum of 12 months of paid employment by the time they graduate. It enables them to obtain work experience in research and industry with participating firms, government agencies and university units.

The course and grade requirements for entry to this option are the same as those required for entry to the regular Major program. Students are required to complete the first and second year requirements of the program; and STAT 3470 and STAT 3480 before they begin their first employment term. Students should refer to the general faculty regulations for B.Sc. (Major) Cooperative Option in Section 3.4.

To continue in the four year Major program a student must maintain a minimum DGPA of 2.00. Students should note that the grade requirements for the Cooperative Option are the same as that for the regular Major program (see above).

Students must check with the Co-op office for the April application deadline information. They will normally be notified of their provisional acceptance in the program by September. Acceptance into the program is dependent upon the student receiving an employment placement. Employment term positions available to the students will be approved by the department, and the employers will select the students they wish to employ. Students are advised that satisfying the entrance requirements does not guarantee a place in the Cooperative Option if the demand for places exceeds the number of places available. The department reserves the right to select the best qualified applicants.

Students are required to register in and pay fees for each employment term prior to the commencement of each employment term. Students will be required to submit an employment report upon the completion of each employment term.

Major Program Specific courses

All courses specified in the program charts below (excluding the required optional courses and electives).

The department must approve a student’s four year Major program each session. Students must obtain departmental approval for any and all revisions to their programs.

In order to improve their academic backgrounds as well as job opportunity-ties, students should carefully elect the optional courses in this program. They should particularly consider one of the following sequences of courses in Economics or Computer Science.
**Economics:** ECON 1010, ECON 1020, ECON 2010, ECON 2020, ECON 2030, ECON 3010, ECON 3020, ECON 3030, ECON 3040, ECON 4040, ECON 4042. (This list of courses is effective as of Fall 2015.)

**Computer Science** (Software and Artificial Intelligence): COMP 1010, COMP 1020, COMP 1500, COMP 1600, COMP 2080, COMP 2130, COMP 2140, COMP 3380, COMP 3440, COMP 4200, COMP 4380.

**Computer Science** (Numerical Analysis and Graphics): COMP 1010, COMP 1020, COMP 1500, COMP 1600, COMP 2080, COMP 2130, COMP 2140, COMP 2190, COMP 3140 or COMP 3490.

**Three Year General**

As prescribed with all other faculty regulations in Section 3.2, students in this program must select 18 credit hours of 2000, 3000, or 4000 level courses from each of two Science areas. To satisfy the requirement in the area of Statistics, students must take a minimum of 18 credit hours of 2000, 3000 and (or) 4000 level Statistics courses. STAT 2000 and STAT 2150 cannot be used towards this requirement.

**NOTES:**

1. The following substitutes are allowed: MATH 1300 (B) in place of MATH 1220, MATH 1500 (B) or MATH 1510 (B) in place of MATH 1230, MATH 1700 (B) or MATH 1710 (B) in place of MATH 1232, MATH 1690 (C) in place of MATH 1230 and MATH 1232; STAT 1000 (C) and STAT 2000 (B) in place of STAT 1150.

2. Of the electives chosen as part of the Honours Degree, 18 credit hours are to be selected from one department which represents a field of application such as: Actuarial Mathematics, Biological Sciences, Microbiology, Economics, Psychology or Sociology. (Mathematics and Computer Science are excluded from this list.) In consultation with the department, combinations of courses from a coherent area of studies may be selected.

3. Of the electives chosen as part of the Major Degree, 15 credit hours must be selected from either, Computer Science and Mathematics, or from one of the following departments: Actuarial Mathematics, Biological Sciences, Microbiology, Economics, Psychology, or Sociology.

4. IMPORTANT: The four year Major program need not be completed in the manner prescribed in the chart above. The chart indicates one possible
arrangement of the required courses and is meant to be a guide around which students can plan their program.

5 The following substitutes are allowed: STAT 1000 (C) and STAT 2000 (B) in place of STAT 1150.

6 STAT 2000 and STAT 2150 cannot be counted towards this requirement. (Letters in brackets indicate minimum prerequisite standing for further study.)

4.13.3 Statistics - Actuarial Mathematics Joint Honours Program

The Department of Statistics and the Warren Centre for Actuarial Studies and Research offer a joint Honours program for students wishing in depth study in Statistics and Actuarial Mathematics.

Entry Requirements:

To enter the Joint Honours program, students must have completed 24 credit hours with a minimum DGPA of 3.0. Students must also obtain a minimum grade of “B” in STAT 2150. All of the courses listed in Year 1 of the program chart are program requirements and students are strongly urged to take them in the first year.

To continue in the Joint Honours Statistics - Actuarial Mathematics program, students must maintain a minimum DGPA of 3.0, and complete a minimum of 9 credit hours during each Fall and Winter Term.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.0 and a minimum grade of “C” on all remaining courses that contribute to the 120 credit hours of the degree.

Recommended Electives:

FIN 3410, FIN 4240, COMP 1010, STAT 4630

JOINT HONOURS 120 CREDIT HOURS

YEAR 1 YEAR 2 YEAR 3 YEAR 4

STAT 11501, STAT 2150 (B) STAT 2400, STAT 3400 STAT 3050, STAT 3470, STAT 3480, STAT 3800 STAT 4100, STAT 4200, STAT 4520, STAT 4530

ECON 10101, ECON 10201

MATH 12201, MATH 12301, MATH 12321, MATH 1240

MATH 2720

3 credit hour “W” course

3 credit hours of electives

3 credit hours of electives

3 credit hours of electives

30 Hours

NOTES:

1 The following substitutions are allowed: MATH 1300 (C) or MATH 1310 (C) in place of MATH 1220 (C), MATH 1500 (B) or MATH 1510 (B) in place of MATH 1230 (C), MATH 1700 (B) or MATH 1710 (B) in place of MATH 1232. STAT 1000 (C) and STAT 2000 (B) in place of STAT 1150.

2 Students are strongly urged to complete ACC 1100 in Year 1 when possible. FIN 2200 may be taken in Year 2, 3 or 4; however, it is strongly recommended that it be completed in Year 2. Note that ACC 1100 is a prerequisite for FIN 2200.

3 STAT 3490, ACT 4020 and ACT 4030 may be taken in Year 3 or 4.

4.13.4 Statistics - Computer Science Joint Honours Program

Statistics - Computer Science Joint Honours Program - see 4.6.5

Computer Science - Statistics Joint Honours Program

4.13.5 Statistics - Mathematics Joint Honours Program

The departments of Statistics and Mathematics offer a joint Honours program for students wishing in depth study in Statistics and Mathematics.

To enter the Honours program students must have satisfied the Faculty of Science requirements for entry to the program, and have obtained a minimum grade of “B” in STAT 2150, and either MATH 1232 or MATH 1690 (or a minimum grade of “A” in MATH 1700).

To continue in the Honours program, students must maintain a minimum DGPA of 3.00.

To graduate with the B. Sc. Honours degree, a student must achieve a minimum DGPA of 3.00 and a minimum grade of “C” on all remaining courses that contribute to the 120 credit hours of the degree.

YEARS 1 OR 2:

STAT 11501, STAT 2150 (B)

COMP 1010

6 credit hours from the Faculty of Arts, which should include the required “W” course

12 credit hours of approved electives

30 Hours

Note: 1 Students are strongly advised to take MATH 1220, MATH 1230, MATH 1232. The following substitutions are allowed (but not advised), provided the grades indicated in brackets are achieved: MATH 1300 (A) in place of MATH 1220, MATH 1500 (A) or MATH 1510 (A) in place of MATH 1230, MATH 1700 (A) in place of MATH 1232, MATH 1690 (B) in place of MATH 1230 and MATH 1232. STAT 1000 (C) and STAT 2000 (B) in place of STAT 1150.

(Letters in brackets indicate minimum prerequisite standing for further study.)

4.13.6 Statistics - Economics Joint Honours Program

The Department of Statistics along with the Department of Economics (Faculty of Arts) offer a Joint Honours program for students wishing in
### 4.13.7 Statistics Course Descriptions-1000 Level

**STAT 1000  Basic Statistical Analysis 1**  
Cr. Hrs. 3

This course is not recommended for students in certain programs (see the description of STAT 1150). An introduction to the basic principles of statistics and procedures used for data analysis. Topics to be covered include: gathering data, displaying and summarizing data, examining relationships between variables, sampling distributions, estimation and significance tests, inference for means. May not be held with STAT 1001, STAT 1150, STAT 2220. Prerequisite: Any grade 12 or 40S Mathematics, or equivalent.

### 4.13.7 Statistics Course Descriptions-2000 Level

**STAT 2000  Basic Statistical Analysis 2**  
Cr. Hrs. 3

This course is not recommended for students in certain programs (see the description of STAT 2150). The study of estimation and hypothesis testing procedures for means and proportions in one, two and multiple sample situations, introduction to the analysis of variance; regression and correlation analysis; optional topics may include nonparametric procedures, design of experiments, probability models. May not to be held with STAT 1150, STAT 2001. Prerequisite: STAT 1000 (C), or STAT 1001 (C).

**STAT 2150  Statistics and Computing**  
Cr. Hrs. 3

This course is recommended for students in mathematically rich disciplines, including Statistics, Mathematics, Actuarial Science, Computer Science, and related interdisciplinary programs. Topics to be covered include: exploratory data analysis and visualization, graphical methods, random number generation, random variables, simple statistical models and computing, Monte Carlo methods, large sample and simulation-based inference, statistical software packages. Prerequisites: STAT 1150 (C) or STAT 2000 (B) or STAT 2001 (B) and (a C or better in one of: MATH 1230, MATH 1500, MATH 1501, MATH 1510, the former MATH 1530, or MATH 1690 (C)).

**STAT 2220  Contemporary Statistics for Engineers**  
Cr. Hrs. 3

Descriptive statistics, basic probability concepts, special statistical distributions, statistical inference-estimation and hypothesis testing, regression, reliability, statistical process control. May not be held with STAT 1000, STAT 1001 or STAT 1150. Prerequisite: a "C" or better in one of MATH 1232, MATH 1690, the former MATH 1680, MATH 1700, MATH 1701, MATH 1710.

**STAT 2400  Introduction to Probability I**  
Cr. Hrs. 3

Basic probability, discrete distributions including binomial, hypergeometric, geometric and Poisson, joint distributions, applications involving discrete random variables. This course is not available to any student who has previously obtained credit for STAT 3470. Prerequisites: STAT 1150 (C), STAT 2000 (B), or STAT 2001 (B); and MATH 1232 (C), MATH 1690 (C), MATH 1700 (B), MATH 1701 (B), or MATH 1710 (B), or the former MATH 1730 (B).

### 4.13.7 Statistics Course Descriptions-3000 Level

**STAT 3000  Applied Linear Statistical Models**  
Cr. Hrs. 3

Applied Linear regression and analysis of variance for designed experiments. This course is not for use in the Honours or Major degree programs in Statistics. Not to be held with STAT 3470, STAT 3480, the

Development of the basic concepts of probability theory and application in areas of biostatistics, actuarial science, reliability theory, queuing theory. Prerequisites: STAT 3400 or the former STAT 3500 (C); and MATH 2150 or MATH 2720 or MATH 2721 (or the former MATH 2750)(C).

Techniques for quality improvement through the use of statistical process control. Topics will include acceptance sampling, Pareto diagrams, boxplots, normal probability plots, control charts (EWMA and CUSUM), measurements of process capability and process performance. Prerequisite: a "C" or better in STAT 1150 or STAT 2000 or STAT 2001.

Parametric versus nonparametric inference; inference using ranks and order statistics; tolerance intervals; contingency tables; goodness-of-fit tests; examples from the social and physical sciences. Prerequisite: a "C" or better in one of STAT 1150, STAT 2000 or STAT 2001.

(Contuation of STAT 2400. Continuous distributions, properties of common distributions, distributions of functions of random variables. May not be held with the former STAT 3500. Prerequisite: STAT 2400(C). Prerequisite or Corequisite: one of MATH 2150, MATH 2720, MATH 2721 (or the former MATH 2750)(C), or the former MATH 2730, or MATH 2731.

Linear regression, multiple regression, correlation analysis, introduction to one way analysis of variance, some related topics. May not be held with STAT 3000 or the former STAT 3120. Prerequisite: STAT 2150 (C). Pre- or corequisite: STAT 3400 or the former STAT 3500.

Analysis of variance, randomized block design, nested and Latin square experiments, analysis of covariance. May not be held with STAT 3000 or the former STAT 3130. Prerequisite: STAT 3470 (C).

Trend and seasonal components, exponential smoothing by the multiple regression method, the Box-Jenkins Methodology, analysis of seasonal data. Prerequisite: a grade of "C" or better in one of: STAT 3470, STAT 3000 or the former STAT 3120.

(Required) Multivariate distributions and transformations, order statistics, sampling distributions, convergence, introduction to statistical inference. May not be held with the former STAT 3600. Prerequisite: STAT 3400 or the former STAT 3500 (C).

Work assignment in business, industry, or government for students registered in the Statistics Honours or Major Cooperative Option. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail grade only). Prerequisites: STAT 3470 (C) and STAT 3480 (C).

Work assignments in business, industry or government for students registered in the Statistics Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail). Prerequisite: STAT 3980 (Pass).

Introduction to methods of estimation, including asymptotic and Bayesian methods. May not to be held with the former STAT 4140. Prerequisite: STAT 3800 or the former STAT 3600.

An introduction to basic principles and techniques for lifetime data analysis in biostatistics and reliability, with emphasis on theory and applications. Topics to be covered include: censoring, truncation, survival and hazard functions, parametric and nonparametric methods, proportional hazards regression. Prerequisites: STAT 3480 (C); and either STAT 3800 or the former STAT 3600 (C); or consent of department.

Introduction to methods of hypothesis testing, including asymptotic and Bayesian methods. May not be held with the former STAT 4140. Prerequisite: STAT 4100.

A development of sampling theory for use in sample survey problems, in regression estimates, in systematic sampling, sources of errors in surveys. Prerequisites: STAT 3800 or the former STAT 3600 (C); and STAT 3480; or consent of department.

Objectives in designing experiments; designs commonly used in research including analysis and an introduction to the construction of designs. Prerequisites: STAT 3800 or the former STAT 3600 (C); and STAT 3480 (C); or consent of department.

A mathematical treatment of some advanced topics in sampling theory. Multistage sampling plans and other selected topics. Prerequisite: STAT 4520 (C) or consent of department.

The theory and analysis of experimental designs treated in STAT 4530 and more advanced designs; construction of designs. Prerequisite: STAT 4530 (C) or consent of department.

Topics of current interest in Statistics that will vary with the needs and interests of students and Faculty. Prerequisite: STAT 3800 or the former STAT 3600 (C); or consent of department.

An introduction to stochastic processes. Prerequisite: STAT 3050 (C); and STAT 3800 or the former STAT 3600 (C); or consent of department.

The course will emphasize applications of various techniques in multivariate analysis and gaining familiarity with the relevant programs in statistical packages, i.e., SAS, BMDP. Prerequisites: STAT 3480 (C); and a “C” or better in one of MATH 1220 (or the former MATH 2300 or MATH 2301) and MATH 2150 (or the former MATH 2720 or MATH 2721 or MATH 2750) or consent of instructor.
STAT 4700 Statistical Consulting  Cr. Hrs. 3
The role of a Statistics Consultant. Practical consulting experience. This course is normally open to fourth year and graduate students in Statistics. Prerequisites: STAT 3800 or the former STAT 3600 (C); and STAT 3480; or consent of department. Prerequisites or concurrent requirements: STAT 4520 and STAT 4530.

STAT 4980 Work Term III  Cr. Hrs. 0
Work assignments in business, industry or government for students registered in the Statistics Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail). Prerequisite: STAT 3990 (Pass).

STAT 4990 Work Term IV  Cr. Hrs. 0
Work assignments in business, industry or government for students registered in the Statistics Honours or Major Cooperative program. Requires submission of a written report covering the work completed during the four-month professional assignment. (Pass/Fail). Prerequisite: STAT 4980 (Pass).

4.14 Courses Offered in Other Faculties and Schools
All courses acceptable for credit in any degree program at the University of Manitoba are acceptable for credit in Science (excluding Pass/Fail courses) subject to overall degree requirements. All courses will be included on admission to the Faculty and will be applied toward the elective requirement in all degree programs offered in Science. For course descriptions, including any prerequisites and/or restrictions, see the chapter entitled Course Descriptions in this Calendar.

Students are reminded that normally a maximum of 30 credit hours (General Degree) or 36 credit hours (Major Degree) from courses offered by Faculties or Schools other than the Faculty of Science can contribute to degree requirements.

4.15 Resources for Students Interested in Science Related Professional Schools or Faculties

SECTION 1: Degree Offered

The Bachelor of Social Work Program

Historically, the social work profession has focused on the well-being of people as well as the social structures and conditions that prevent a just and equal society. The Bachelor of Social Work Program is a professional program that is designed to prepare generalists who are knowledgeable of social work theories, and who can demonstrate skills related to practice, research, and social policy analysis. Students and graduates undertake these activities in accordance with the Canadian Association of Social Workers’s Code of Ethics. The program is accredited by the Canadian Association for Social Work Education.

Graduates have competence for entry-level social work positions in a variety of different practice areas. The program is based on the principles of social justice, human rights, and anti-oppression, with an emphasis on critical thinking and understanding the structural roots of social problems. Foundation courses are grounded in critical theoretical frameworks including Indigenous worldviews, feminism, and anti-racism.

The program is offered at multiple geographic sites including the Fort Garry Campus, the William Norrie Centre (Inner-city), the Université de Saint-Boniface, and Thompson, Manitoba (Northern Social Work Program) as well as by Distance Delivery.

*This includes one year (30 credit hours) of prior university study.

**Please see 4.1 B

1.2 Interfaculty Option in Aging

The Interfaculty Option in Aging is offered by the following faculties: Arts, Nursing, Kinesiology and Recreation Management, and Social Work. To complete the option, students will complete each of the following requirements: a) 2610* Health and Physical Aspects of Aging; b) 2650* The Social Aspects of Aging; c) one field placement SWRK 3150 or SWRK 4120 in aging d) one Field Focus of Social Work Practice course (SWRK 4200 or SWRK 4300) in aging. Students are encouraged to take courses from the participating units other than Social Work.

NOTE*: These courses are offered on a rotational basis by participating units.

Upon the successful completion of these requirements, a notation will be added to the student’s transcript. For further information on the Interfaculty Option in Aging, please refer to the Faculty’s website umanitoba.ca/faculties/social_work
SECTION 2: Admission Requirements

The following is a summary of the admission requirements to the Bachelor of Social Work program. Equivalent academic courses completed at recognized universities elsewhere will be considered. All admission requirements, as well as application deadline dates and forms, are included in an applicant information bulletin that is available from the Admissions Office, Enrolment Services, 424 University Centre; this information is also posted on the university’s website.

2.1 Admission to the Fort Garry Social Work Program

Admission Requirements

Completion of 30 credit hours of university level courses which are acceptable to the University of Manitoba. The written English and mathematics requirements are recommended to be completed as part of University 1. If these requirements are not met in University 1 (i.e. the first 30 credit hours), as per the university policy, they must be completed within the first 60 credit hours of the programs. General Academic Regulations for a complete list of all courses which satisfy the university written English and mathematics requirement. Minimum GPA for consideration for all applicants (including Educational Equity applicants): 2.5

A Criminal Record Statement and a Child Abuse Registry (CAR) check (for a record of those registered as an offender) must be completed following selection.

Selection criteria: Two applicant pools are created; 60% of all spaces are allocated to applicants who meet the above criteria, work for a Winnipeg or Aboriginal agency, and/or have two years employment in human service fields. Deadline for applications for part-time studies is February 1. Classes begin in May.

As per the university’s policy, all students are required to complete, within the first 60 credit hours of their programs, a minimum of one three credit hour course with significant content in written English, and a minimum of one three credit hour course with significant content in mathematics. Please refer to the Calendar’s General Academic Regulations for a complete list of all courses which satisfy the university written English and mathematics requirement.

Concentrated Program

All applicants wishing to complete the program in two years of full-time study must have completed a minimum of 51 credit hours of university study (which are acceptable to the University of Manitoba) prior to admission to the BSW program. Applicants wishing to complete the degree through the two year concentrated program must have an Adjusted Grade Point Average of 3.00 from previous university study. In the event that three credit hours in each of written English and mathematics have not been completed as part of the 51 credit hours of previous university study, they must be completed within the first year of the two-year BSW program.

The deadline for submission of applications in March 1st (for September start date).

The Selection Process

The selection process is designed to accomplish three objectives: to treat applicants fairly and equitably, to provide the diversity of practitioners required by the profession, and to provide for an efficient admissions process. The faculty selects applicants to the Fort Garry Campus B.S.W. program through two categories as described below.

Academic Achievement Category: 60% of all available positions are awarded on the basis of highest Adjusted Grade Point Average.

Educational Equity Initiative: 40% of all available positions are allocated to those eligible for inclusion in one or more of the Educational Equity Priority Groups and awarded on the basis of highest Adjusted Grade Point Average.

The purpose of the Educational Equity initiative is to achieve equality in professional education so that no person shall be denied educational opportunities or benefits for reasons unrelated to ability. In the fulfillment of this goal, the aim is to correct the conditions of disadvantage in professional education experienced by Canadian Aboriginal peoples, persons with disabilities, LGBTTQ, immigrants and refugees to Canada, and persons who are, because of their race or colour, a visible minority in Canada. Giving effect to the principle of educational equity means more than treating persons in the same way; it also requires special measures and the accommodation of difference. Details of the Educational Equity initiative are provided in the application information bulletin.

Students in the Fort Garry Social Work Program must successfully meet the graduation criteria set for all BSW students in the Faculty of Social Work.

2.2 Admission to the Inner City Social Work Program

The Inner City Social Work (B.S.W.) ACCESS Program at the William Norrie Centre is an inner-city extension of the Faculty of Social Work. Students admitted to the Inner City Social Work Program are accepted directly into a four-year B.S.W. program, and do not require prior university study.

The objective of this program is to enhance the accessibility of the B.S.W. program by preparing as social workers those mature students who have had inner-city or similar social service experience, but who lack the normal university entrance requirements. Special academic and social support is provided to students admitted to the program. Staff assists candidates in arranging funding resources.

All students complete a total of 123 credit hours of university study. Full time or part-time study is offered.

Admission to the Inner City Social Work Program is limited. Applicants to the full-time program must be 21 years old, low income, and residents of Winnipeg at the time of application. The deadline date for submitting applications is March 1. Orientation begins mid-August and is mandatory.

A part-time B.S.W. Access program is offered to individuals who meet the above criteria, work for a Winnipeg or Aboriginal agency, and/or have two years employment in human service fields. Deadline for applications for part-time studies is February 1. Classes begin in May.

As per the university’s policy, all students are required to complete, within the first 60 credit hours of their programs, a minimum of one three credit hour course with significant content in written English, and a minimum of one three credit hour course with significant content in mathematics. Please refer to the Calendar’s General Academic Regulations for a complete list of all courses which satisfy the university written English and mathematics requirement.

Students at the Inner City Social Work Program must successfully meet the graduation criteria set for all BSW students in the Faculty of Social Work. For further information, contact: Inner City Social Work Program, 485 Selkirk Avenue, Winnipeg, Manitoba, R2W 2M6; telephone: (204) 668-8160.

2.3 Admission to the Northern Social Work Program

The Northern Social Work (B.S.W.) ACCESS program, based in Thompson Manitoba, is an extension of the Fort Garry Faculty of Social Work. Students are admitted directly into a four-year B.S.W. program and do not require prior university study.

All students complete a total of 123 credit hours of university study. Full time or part-time study is offered.

The objective of this program is to enhance the accessibility of the B.S.W. program by preparing as social workers mature students who, without the support of the program, would be unable to successfully complete a university degree due to lack of financial resources, lack of academic qualifications and remote location. Special academic and personal support is provided to students admitted to the program, as well as some assistance in arranging funding resources.

Students who have completed 30 credit hours of university level courses and have a minimum GPA of 2.5 may apply as External Students.

Admission to the Northern Social Work program is limited. Applicants must meet specified northern residency requirements. The deadline date for submitting applications is March 1 (classes begin in September).

As per the university’s policy, all students are required to complete, within the first 60 credit hours of their programs, a minimum of one three credit hour course with significant content in written English, and a minimum of
one three credit hour course with significant content in mathematics. Please refer to the Calendar’s General Academic Regulations for a complete list of all courses which satisfy the university written English and mathematics requirement. Students in the Northern Social Work program must successfully meet the graduation criteria set for all BSW students in the Faculty of Social Work. For further information, contact the Faculty of Social Work at Thompson, 3 Station Road, Thompson, Manitoba, R8N 0N3; telephone: (204) 677-1450

2.4 Admission to the Distance Delivery Social Work Program

The Faculty of Social Work is committed to the accessibility of social work education. The faculty has extended the concept of accessibility to include geographical accessibility through the delivery of the B.S.W. based on two approaches: (1) to individuals by means of an online study program and (2) to community-based groups using the cohort method.

The Distance Delivery B.S.W. program is intended to encourage individuals who are employed in the social services and living outside of Winnipeg, but who may not have had the opportunity to pursue professional social work education.

All students complete a total of 123 credit hours of university study. Full time or part-time study is offered.

Delivery methods for the online study component of the program include a combination of web conferences and online courses. Access to computer, high speed internet and headset with microphone is required.

All course examinations are scheduled and arranged by the university’s Registrar’s Office to take place in the student’s community.

Delivery of the program to the community-based cohorts utilizes the face-to-face delivery with the option of a combination of face-to-face, web conferences, and online study.

Applicants to the Distance Delivery B.S.W. program must meet all three of the following requirements to be admitted into the program:

- Minimum of 30 credit hours of university level courses which are acceptable to the University of Manitoba; and
- 1 year (1750 hours) of work experience, within the last 5 years, in the social services; and
- Residency outside of the city of Winnipeg.

Complete and detailed admissions information is available on our web site at umanitoba.ca/faculties/social work or by calling the Faculty of Social Work Distance Delivery BSW General Office at 204-474-7912. The deadline for submission of applications is March 1st (for September start date).

As per the university’s policy, all students are required to complete, within the first 60 credit hours of their programs, a minimum of one three credit hour course with significant content in written English, and a minimum of one three credit hour course with significant content in mathematics. Please refer to the Calendar’s General Academic Regulations for a complete list of all courses which satisfy the university written English and mathematics requirement.

Students in the Distance Delivery B.S.W. program must successfully meet the graduation criteria set for all BSW students in the Faculty of Social Work.

2.5 The Université de Saint-Boniface

The Université de Saint-Boniface, in conjunction with the University of Manitoba, now offers a French language Bachelor of Social Work program. Please contact Program Coordinator at 204 237-1818 ext. 447 for more information.

2.6 Special Student Admission

A Special Student in Social Work is one who wishes to take undergraduate Social Work courses with no intentions of proceeding to a B.S.W. degree at the present time. In addition, the student is not currently registered at any other university. Students seeking admission as Special Students may request information from the Faculty of Social Work, 521 Tier Building; telephone (204) 474 7050. Criteria for admission are:

- Successful completion of a minimum of 30 credit hours of university level courses which are acceptable to the University of Manitoba; and
- Adjusted Grade Point Average of 2.5 (C+).

Students are reminded they must apply online and submit an official transcript (one bearing the university seal) along with the application form available on the University of Manitoba website. An application fee applies. Once admitted as a Special Student, students will:

- Be limited to completion of nine credit hours of required social work courses plus SWRK 1310 and SWRK 2080.
- Be prohibited from registering for courses until August (refer to Aurora Student for specific dates).
- Have all courses classified as “SS,” which means that grades for these courses may not generate a Grade Point Average.

Students Enrolled in other Faculties/Schools

Students currently enrolled in other faculties or schools at the University of Manitoba may register for Social Work courses provided they have completed a minimum of 30 credit hours of university study and achieved a minimum Cumulative Grade Point Average of 2.5. These students will also be limited to completion of SWRK 1310 and SWRK 2080 plus nine credit hours of required social work courses.

Courses available to Special Students and students enrolled in other faculties and schools at the University of Manitoba:

### Required Social Work Courses:

- SWRK 1310 Introduction to Social Welfare Policy Analysis
- SWRK 2080 Interpersonal Communication Skills
- SWRK 2090 Human Behaviour and Social Work Practice
- SWRK 2110 Emergence of the Canadian Welfare State
- SWRK 2130 Comparative Social Welfare Systems
- SWRK 3130 Contemporary Canadian Social Welfare
- SWRK 3100 Systematic Inquiry in Social Work

### Elective Social Work Courses:

- SWRK 2050 Community & Organizational Theory
- SWRK 2070 Small Group Dynamics
- SWRK 4050 Selected Topics in Social Work
- SWRK 4080 Current Issues in Social Welfare
NOTE: Special and non-Social Work students are required to abide by the same pre-/co-requisite policy that applies to B.S.W. students.

SECTION 3: Faculty Academic Regulations

The provisions of the chapter, General Academic Regulations and Requirements, and the chapter, University Policies, apply to all students. In addition, the Faculty of Social Work has regulations and requirements, published below, that apply specifically to its students.

All students are asked to note that some academic policies and regulations are under review and are subject to change.

3.1 Prerequisite and Co-requisite Policy

The faculty has established a set of pre-/co-requisite requirements to assist students in planning their program of study. All students must abide by the pre- and corequisite requirements for all courses. Any exceptions to the pre- and corequisite policy MUST be approved by the Committee on Academic Standings prior to course registration.

If a student successfully completes a course for which a pre/co-requisite requirement has not been satisfied, this course will not be considered applicable to their BSW program.

3.2 Residence Requirements for a Degree Program

The general university residence requirement applies to the Faculty of Social Work.

3.3 Scholastic Progress

Except in circumstances covered in the official regulations referred to below, clear standing in the faculty requires both the Degree Grade Point Average and Subject Grade Point Average of 2.5 (C+) at the end of each term. A minimum grade of 2.0 (C) is required for all Social Work courses. The passing grades for electives taken in other faculties or schools are those required by the faculties or schools concerned. Complete statements of the regulations governing scholastic progress in the Faculty of Social Work are published in the B.S.W. Student Handbook. Students wishing to do so may consult the policy governing scholastic progress as written in the B.S.W. Student Handbook with the Chair of the Committee on Academic Standings, or the Dean. In the event of any question or dispute, this set of regulations shall be considered the official version. Directors of off-campus programs and the Student Services and Admissions/Advising Office at Fort Garry Campus will advise students on issues concerning scholastic progress.

3.4 Professional Unsuitability Bylaw

The Senate has approved a bylaw granting authority to the faculty to require a student to withdraw for reasons of professional unsuitability (see the chapter, General Academic Regulations and Requirements). The bylaw is published in the B.S.W. Student Handbook. Students are reminded of their obligation to be familiar with all regulations governing their continued progress in the program.

3.5 Dean’s Honour List

BSW student eligibility for the Dean’s Honour List is considered on a term by term basis. To qualify for the Dean’s Honour List a student must:

- Have completed a minimum of 9 credit hours in the term under consideration, of which a minimum 6 credit hours must be with a standard grade.
- Have achieved a minimum Term GPA of 3.6
- Pass/Fail courses are included in the credit hour count.

3.6 Appeal of Grades

The general university policy for appeal of assigned grades applies to the Faculty of Social Work. As well, the Faculty Council has approved a Social Work policy on the appeal of assigned grades and term work. The policy is outlined in the B.S.W. Student Handbook. The Faculty Council has established the Academic Standing Appeals Committee to deal with these matters.

3.7 Distance Courses Open to Fort Garry Campus and Inner City Social Work Students

B.S.W. students who are enrolled in the Fort Garry Campus or Inner City Social Work programs may take up to six credit hours of selected social work courses through Distance Delivery. The following courses are excluded: SWRK 2080, SWRK 3100, SWRK 3140, SWRK 4200 and SWRK 4300. If any Fort Garry Campus or Inner City Social Work program students are enrolled in the above mentioned practice courses they will be withdrawn.

3.8 Opting Into Field and Practices of the Two-Year Plan

Students may apply for ‘opt-in’ by fulfilling the following conditions:

- Consult with and submit written request for ‘Opt-in’ to the Coordinator of Student Services and Admission/Advising Office and Field Coordinator no later than February 1.
- Successfully complete all Social Work courses required by the end of Winter term prior to opt-in year (except for SWRK 4210 Feminist Perspectives on Social Work Practice, SWRK 4220 Aboriginal People and Social Work Practice, SWRK 4200 Field Focus of Social Work Practice 1, SWRK 4300 Field Focus of Social Work Practice 2, SWRK 3150 Field Instruction 1 and SWRK 4120 Field Instruction 2) and
- Successfully complete all elective courses (including written English and mathematics requirements) by the end of Winter term prior to opting in.
- Achieve a minimum Degree Grade Point Average of 3.00 at point of opting in.
- Achieve a minimum Subject Grade Point Average of 3.00 at point of opting in.

Final approval to opt-in is also based on faculty resources: space availability in SWRK 4210 Feminist Perspectives on Social Work Practice and SWRK 4220 Aboriginal People and Social Work Practice during Summer Session; space availability in SWRK 4200 Field Focus of Social Work Practice 1 and SWRK 4300 Field Focus of Social Work Practice 2 courses in Fall and Winter terms; and the availability of concentrated field placements.

3.9 Courses Open to Challenge for Credit

The Faculty of Social Work accommodates those students who are qualified and who can demonstrate acceptable knowledge and skill, by allowing them to challenge certain Social Work courses. They are:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>SWRK 2080</td>
<td>Interpersonal Communication Skills</td>
</tr>
<tr>
<td>SWRK 3100</td>
<td>Systematic Inquiry in Social Work</td>
</tr>
<tr>
<td>SWRK 3130</td>
<td>Contemporary Canadian Social Welfare</td>
</tr>
</tbody>
</table>

Information on the procedures for challenge is available in the B.S.W. Student Handbook. The dates at which courses may be challenged are given in the academic schedule of the Undergraduate Calendar.
3.10 Credit for Social Work Courses Taken at Other Universities

The Faculty of Social Work supports the principle of granting credit for social work courses taken within the last nine years in accredited programs leading to professional social work qualification. Information on granting credits for social work courses is available in the B.S.W. Student Handbook. The Faculty of Social Work has transfer credit agreements with specific diploma and certificate programs. Please consult the B.S.W. Student Handbook for detailed information.

SECTION 4: Program and Graduation Requirements

When planning your workload, allow approximately two hours of study/reading time for each hour of class time. It is also advisable to schedule time to use the library. The faculty will offer as many evening courses as possible each year; however, some courses may only be available during daytime.

4.1 Curriculum Outline

A) Three-Year Plan

This plan allows a Fort Garry Campus student who has completed 30-50 credit hours of general university study prior to admission, to combine Social Work professional courses with other university courses. It requires three years of full-time study, after admission to the faculty, to complete the requirements for the B.S.W. degree. A student who has already completed the 51 credit hours of general university study which are acceptable to the University of Manitoba may also register for this program ignoring the elective requirements.

NOTES:
- SWRK 1310 and SWRK 2080 are open to University 1 students.
- All students must take the foundation courses very early in the program. Failure to do so may restrict progression through the program.
- See course descriptions (Section 5) for a complete list of pre-/co-requisites.
- Students must take SWRK 1310 before proceeding to SWRK 2110, SWRK 2130, and SWRK 3130. In addition, SWRK 1310, SWRK 2080 and SWRK 2090 are pre- or co-requisite to SWRK 3140.
- All foundation courses (SWRK 1310, SWRK 2080, SWRK 2090 and SWRK 3140) are pre-requisite to SWRK 4200, SWRK 4300, SWRK 4210, SWRK 4220, SWRK 3150 and SWRK 4120. In addition, SWRK 3150 Field Instruction 1 and SWRK 4200 Field Focus of Social Work Practice 1 are pre-requisites to SWRK 4120 Field Instruction 2.
- See Aurora Class Schedule for a list of SWRK 4200 and SWRK 4300 courses.
- Students must take one section of SWRK 4200 and one section of SWRK 4300. Each section is anchored in a different field or focus of social work practice. It is recommended that students take SWRK 4200 and SWRK 4300 courses that corresponds with their field placement area of practice.
- Students must take SWRK 4200 concurrently with SWRK 3150 and SWRK 4300 concurrently with SWRK 4120. If a student withdraws from SWRK 4200, he/she must also withdraw from SWRK 3150 and if a student withdraws from SWRK 4300, he/she must also withdraw from SWRK 4120. As well, if a student withdraws from SWRK 3150 he/she must withdraw from SWRK 4200 and if a student withdraws from SWRK 4120 he/she must withdraw from SWRK 4300. Students, who fail to withdraw from the co-requisite course, will be withdrawn.
- Student admitted after ‘97-98 must complete 3 credit hours of written English and 3 credit hours of mathematics as part of first 30 credit hours (unless completed prior to admission).
- This plan assumes that students do not take courses in the summer.

B) Two-Year Plan (Concentrated Program)

Fort Garry Campus

Fort Garry Campus students who have completed 51 credit hours of general university study prior to admission to the B.S.W. program, and have attained a minimum Adjusted Grade Point Average (A.G.P.A.) of 3.00, are eligible for the two year plan (Concentrated Program). If a student has completed the 51 credit hours of general university study which are acceptable to the University of Manitoba, but does not have the required
3.00 A.G.P.A., or prefers a more extended time period, that student can register for either the three-year plan or the part-time plan.

Students eligible to register for the concentrated program may choose to do so at point of initial registration following admission only.

If any of the required social work courses were part of 51 credit hours completed prior to admission to the BSW program, they will have to be substituted with elective courses after admission to the BSW program. Any outstanding elective courses, including written English and mathematics requirements, must be completed by the end of Winter term in the first year of the BSW Concentrated Program.

Students must maintain a Degree Grade Point Average (D.G.P.A.) and Subject Grade Point Average (S.G.P.A.) of a minimum 3.00 at the end of each term to remain in the Concentrated Program. In an instance where one or both of these requirements are not met, the student’s status will be changed from Concentrated to Regular.

Students planning on completing their program in two years must follow the structure outlined below (which requires completing at least 12 credit hours, including SWRK 4210 and SWRK 4220, during the summer).

**Note:** See course descriptions (Section 5) for a complete list of pre/co-requisites

### C) The Part-Time Plan

Please note that it is possible to pursue the Bachelor of Social Work degree through a program of part-time study. Part-time students must complete all the required social work and elective courses within nine years of their admission to the faculty.

### 4.2 Field Instruction

Field instruction provides students with an opportunity to engage, as beginning practitioners, in the processes of social work assessment, planning, intervention, evaluation and integration of theory from classroom to placement setting. Field students are placed in a variety of programs and agencies. These include school settings, policy placements, probation services, child and family services, immigrant and refugee services, health, disability and other settings.

B.S.W. students are required to register for two field placement courses, SWRK 3150 and SWRK 4120. Both courses are graded on a pass/fail basis. Students must successfully complete all prerequisite courses, have a Social Work (Subject) Grade Point Average of 2.50 and be in the appropriate year of their degree plan prior to commencing in field practicum. Students wishing to divert from their degree plan should consult with their Academic Advisor and/or the Coordinator of Student Services and Admissions/Advising Office before February 1. Both field practicum courses have a co-requisite course, which is SWRK 4200: Field Focus of Social Work Practice 1 for SWRK 3150: Field Instruction 1. SWRK 4300: Field Focus of Social Work Practice 2 is the co-requisite course for SWRK 4120: Field Instruction 2. The Field Focus course selected should correspond as closely as possible to the field placement’s area of practice.

Field Instruction is provided by university-appointed, agency-based field instructors who have knowledge, skills, and expertise in social work practice. Field liaisons are also appointed and available to provide support to field students and field instructors throughout the academic session, as required. Students must meet all field requirements prior to commencing field placement, such as immunization policies, Child Abuse Registry Checks, Vulnerable Sector Record Checks and Criminal Record Checks, as determined and specified by the respective field agency. Students are expected to demonstrate initiative and participate actively in all aspects of field placement. If a student is unable to attend field placement due to illness or agency closure, he/she must make up the field hours for that particular day.

The Field Coordinator is the Instructor of Record for SWRK 3150 and SWRK 4120. While the Faculty is responsible for assisting in securing a reasonable placement for the student (with the exception of Distance Delivery students who secure their own placements), it is important to note that a student is not guaranteed placement in a field setting on the basis of completion of prerequisite courses and/or submission of a Field Placement Request form. Students must demonstrate readiness for practice in the process of securing a placement. If concerns are raised regarding the student’s behaviour, judgment or practice and/or if the student demonstrates difficulty in his or her attempts to attain confirmation as a result of his or her performance in the field interview process, the Field Coordinator and Associate Dean of Undergraduate Programs will determine what additional steps may be taken to resolve this matter, or may determine the student is unprepared for meeting the requirements of field placement at this time.

Students are allowed one voluntary withdrawal from the course SWRK 3150: Field Instruction 1 and one voluntary withdrawal from the course SWRK 4120: Field Instruction 2. If a student withdraws from SWRK 3150, he/she must withdraw from the co-requisite SWRK 4200 and if a student withdraws from SWRK 4120, he/she must withdraw from co-requisite SWRK 4300. A student with more than one voluntary withdrawal from SWRK 3150 or SWRK 4120 shall be required to withdraw from the Faculty.

A student who has two or more years of social work employment experience in the past five years may apply to register for SWRK 3152, Prior
Learning Assessment and Recognition (PLAR), in lieu of his or her first field placement, SWRK 3150. Information regarding PLAR can be found at: http://umanitoba.ca/faculties/social_work/programs/fort_garry/917.html.

Fort Garry and Inner City Social Work Programs

Prior to applying for field placement, students are expected to participate in the Everything you wanted to know about Field workshop and The Résumé and Interview Preparation workshop offered at Fort Garry and Inner City programs prior to Field Information Day.

Students are required to e-mail a completed Field Application form, along with an updated résumé, on or before Feb. 1 to the Field Program Assistant. Field Application Forms are available at https://www.umanitoba.ca/faculties/social_work/programs/field_education/n/594.html.

Upon receipt, new users to the Intern Placement Tracking (IPT) program will receive a temporary password, user name and an IPT Student Manual. In IPT, students are required to identify up to 8 field agency preferences, due on or before March 1st. Field placements will not be secured for students who do not submit their request, along with all required documentation, by the aforementioned deadline dates. Students applying for field placement, SWRK 4120, during summer session, when available, must meet specific eligibility criteria as outlined in the B.S.W. Student Handbook.

Fort Garry students in the regular, three-year program who are registered in SWRK 3150 or SWRK 4120 attend field placement two days per week (15 hours) during Fall and Winter terms. Inner City campus students who are registered in SWRK 3150 or SWRK 4120 attend field placement two days per week (15 hours) during Fall and Winter terms. Field Garry campus students in the Concentrated Program and Inner City students in Accelerated Field attend field placement four days per week (30 hours) during Fall and Winter terms, participating in one field placement only. Students contemplating switching to a concentrated field placement are required to make themselves aware of eligibility requirements of the Concentrated Program and to contact the Coordinator of Student Services and Admissions/Advising Office for confirmation of their eligibility no later than February 1.

Students deemed eligible for field are referred by the Field Coordinator or Field Program Assistant to an appropriate field placement agency for consideration of an interview. Students who are accepted and offered field placement will receive e-mail placement confirmation, including key dates and relevant field information, prior to term commencement. While efforts will be made to consider student field focus areas of interest, there is no guarantee of a student being placed in one of her/his identified agency preferences. Final authority for field placement referral and confirmation rests with the Field Coordinator. Decisions may be based on availability of agency openings as well as the educational needs of the student.

All students registered in Field Instruction courses (SWRK 3150 and SWRK 4120) are required to attend field orientation on Tuesday, September 4, 2018. As attendance at field orientation is mandatory, regular classes are not scheduled on September 4th. Information regarding field orientation will be e-mailed to each field student in their placement confirmation letter. Students requiring additional information may contact the Field Program Assistant at 204-474-6171 or the Field Coordinator at 204-474-8300.

Accelerated Field – Inner City Social Work Program

Accelerated Field allows eligible students to undertake Field Instruction I (SWRK 3150) and Field Instruction 2 (SWRK 4120) in one field placement between September and April. Field instruction includes four days of placement per week for a total of 840 hours. Students who are approved to take Accelerated Field must also register for two co-requisite Field/Focus of Social Work Practice (SWRK 4200 and SWRK 4300) courses.

Students who have completed 75 credit hours including the four foundation courses (SWRK 1310, SWRK 2080, SWRK 2090 and SWRK 3140) and have maintained a minimum Degree Grade Point Average (D.G.P.A.) of 3.0 and Subject Grade Point Average (S.G.P.A.) of 3.0 are eligible to apply for Accelerated Field. Inner City Social Work Program (ICSWP) students in request of Accelerated Field must submit a written request to the Director of ICSWP requesting a transfer from regular to Accelerated Field placement. If approved, written documentation from the Director must be attached to the student’s Field Request Form, due on March 1st.

Northern Bachelor of Social Work Program

Students in the Northern Bachelor of Social Work program in Thompson work closely with the Field Coordinator in preparing for and securing an appropriate field placement. Students are required to complete a total of 490 field hours including 450 hours in placement and 40 hours of integrated seminar in order to successfully complete SWRK 3150 and SWRK 4120. Students requiring additional information may contact the Field Coordinator at 204-677-1456.

Distance Delivery Social Work Program

Students in the Distance Delivery BSW degree program are responsible for securing their own field placements. Field Application Forms are available online at http://umanitoba.ca/faculties/social_work/programs/field_education/n/904.html

Students requesting field placement during:

a) Fall/Winter (September to April) Students must attend a Field Preparation Cisco WebEx offered throughout the months of September to January 30th and must submit a completed Field Application Form by February 1st. Students who are approved for field will be required to complete one module of orientation outlining guidelines and procedures for applying and securing placements across Canada.

Students registered in SWRK 3150 or SWRK 4120 in Fall/Winter terms (September to April) attend field placement two days or 15 hours per week for a total of 420 hours.

b) Summer (May to August) Students must attend a Field Preparation adobe session offered throughout the months of September to January 30th and must submit a completed Field Application Form by February 1st. Students who are approved for field will be required to complete one module of orientation outlining guidelines and procedures for applying and securing placements across Canada.

Students registered in SWRK 3150 or SWRK 4120 in the Summer term (May to August) attend field placement four days or 30 hours per week for a total of 420 hours.

Field placements will not be approved for students who do not submit the completed Field Application Form by the deadline date.

Final approval for field placement rests with the Distance Delivery Field Coordinator. Decisions may be based on availability of agency openings as well as the educational needs of students.

All students registered in Field Instruction courses (SWRK 3150 and SWRK 4120) are required to attend Field Instruction Sessions offered through Cisco WebEx and complete several modules prior to entering field placement. Attendance at Field Instruction Sessions is mandatory. Students requiring information may contact the Distance Delivery Field Assistant at 204-474-9537 or the Distance Delivery Field Coordinator at 204-474-8352.

Distance Delivery Social Work Program

Accelerated Field allows eligible students to undertake Field Instruction I (SWRK 3150) and Field Instruction 2 (SWRK 4120) in one field placement between September and April. Field Instruction includes four days of
placement per week for a total of 840 hours. Students who are approved to take Accelerated Field must also register for two co-requisite Field/Focus of Social Work Practice (SWRK 4200 and SWRK 4300) courses.

Students who have completed 75 credit hours including the four foundation courses (SWRK 1310, SWRK 2080, SWRK 2090 and SWRK 3140) and have maintained a minimum Degree Grade Point Average (D.G.P.A.) of 3.0 and Subject Grade Point Average (S.G.P.A.) of 3.0 are eligible to apply for Accelerated Field. Distance Delivery Program students requesting an Accelerated Field must indicate their preference in their Field application form. The student will receive approval after their application is reviewed.

All students registered in Distance Delivery Accelerated Field Instruction courses (SWRK 3150 and SWRK 4120) are required to attend Field Instruction Sessions offered through Cisco WebEx. Attendance at Field Instruction Sessions is mandatory. Students will also complete Field orientation modules after they have registered for Field SWRK 3150 or SWRK 4120. The orientation modules must be completed prior to the student entering field. Students requiring information may contact the Distance Delivery Administrative Assistant at 204-474-7912 or the Distance Delivery Field Coordinator at 204-474-6812. Final approval for field placement rests with the Distance Delivery Field Coordinator. Decisions may be based on availability of agency openings as well as the educational needs of students.

4.3 Requirements for Graduation

Eligibility for graduation is contingent upon:

- The successful completion of 72 credit hours of required Social Work courses; successful completion means attaining a minimum grade of “C” in all Social Work courses and a minimum Subject Grade Point Average (S.G.P.A.) of 2.50 (C+).
- The successful completion of 51 credit hours of electives. Students admitted after 1997/98, are required to successfully complete three credit hours of written English and three credit hours of Mathematics within the first 60 credit hours of their programs. The passing grades for electives taken in other faculties or schools are those required by the faculties or schools concerned. A minimum of “C” must be attained in Social Work electives. The minimum Degree Grade Point Average (D.G.P.A.) required for graduation is also 2.50 (C+).
- Total credit hours required for a B.S.W. are 123 (51 credit hours of electives + 72 credit hours of required Social Work courses).

Student Responsibilities

It is the student’s responsibility to be familiar with all the requirements of the B.S.W. degree, to ensure compliance with degree program requirements, including prerequisite requirements, and to understand all relevant regulations, policies and practices. The final completion of degree requirements is the student's responsibility.

SECTION 5: Course Descriptions-1000 Level

SWRK 1310 Introduction to Social Welfare Policy Analysis Cr. Hrs. 3

Examination of social welfare policy as the end product of ideologies. Introduction of elements of ideology and the comparison of competing ideological systems. The relationship of economic, political and ethical views of society and their manifestations in societal responses to human need and social services.

SECTION 5: Course Descriptions-2000 Level

SWRK 2050 Community and Organizational Theory Cr. Hrs. 3

Deals with concepts such as conflict and power which relate social work practice to the nature of secondary human relationships. These are applied to the dynamics within and between communities and organizations.

SWRK 2070 Small Group Dynamics Cr. Hrs. 3

Group norms, values, and goal as they relate to decision-making and communication patterns in groups. Membership roles and leadership styles are related to group development and group functioning.

SWRK 2080 Interpersonal Communication Skills Cr. Hrs. 3

A basic core of interpersonal skills for communicating effectively and for establishing and maintaining relationships in one-to-one and group situations. Emphasis is on experiential learning using a variety of techniques.

SWRK 2090 Human Behaviour and Social Work Practice Cr. Hrs. 6

Students are introduced to a broad range of theories and will develop an understanding of how people and environments reciprocally affect each other. Particular emphasis is placed on understanding how gender, race, ethnicity, socioeconomic factors, age, ability, and sexual orientation contribute to and influence human behaviour throughout the lifespan.

SWRK 2110 Emergence of the Canadian Social Welfare State Cr. Hrs. 3

An examination of the emergence of the Canadian welfare state from its various colonial inheritances to the Canada Assistance Plan. Social, political, economic, religious, geographical, demographic and cataclysmic factors influencing the development of the welfare state are examined and analyzed. Prerequisite: SWRK 1310. Students may not hold credit for both SWRK 2110.

SWRK 2130 Comparative Social Welfare Systems Cr. Hrs. 3

The welfare systems of three modern societies are examined and compared. Economic, political, social, religious, geographical, demographic and cataclysmic factors influencing the development of the various models of social provision are analyzed for their significance to the Canadian welfare system. Prerequisite: SWRK 1310. Students may not hold credit for both SWRK 2130.

SWRK 2650 The Social Aspects of Aging Cr. Hrs. 3

An examination of the social aspects of aging. Emphasis on understanding the aging process as a life transition involving adaptation through interaction with social and physical environments. Students may not hold credit for REC 2650 and IDES 2650 or HMEC 2650 or SWRK 2650. (A required Option in Aging course)

SECTION 5: Course Descriptions-3000 Level

SWRK 3100 Systematic Inquiry in Social Work Cr. Hrs. 3

Relates systematic methods of scientific inquiry to social work practice; theory building for practice; information collection; descriptive data for decision-making, understanding technical research material, introduction to issues of research design.

SWRK 3130 Contemporary Canadian Social Welfare Cr. Hrs. 3

An examination of social welfare in Canadian society, leading to an evaluation of present approaches in the light of changing economic and social conditions and changing needs. Prerequisite: SWRK 1310.

SWRK 3140 Introduction to Social Work Practice Cr. Hrs. 3

Introduces students to ecological and other generalist based practice frameworks and the role of professional social workers. Course emphasizes values and knowledge in context of a rational approach to problem solving which includes problem definition, assessment, contracting, intervention and evaluation. Pre- or corequisite SWRK 1310, SWRK 2080 and SWRK 2090.
An experiential course for self-understanding and self-awareness to produce a disciplined and conscious use of self in professional communication and relationships. Prerequisites: SWRK 2080 and written consent of instructor.

**SWRK 4200 Field Focus of Social Work Practice**  
Cr. Hrs. 6

A seminar for the critical examination of social work theory, values, policy and skills in the context of a field or focus of practice. The course integrates policy with practice at micro, meso and macro levels. Course seminar topics may vary from year to year and are organized to cover various fields or focus of practice. Prerequisites: SWRK 1310, SWRK 2080, SWRK 2090, and SWRK 3140. Corequisite: SWRK 3150. Students cannot hold credit for both SWRK 4150 and SWRK 4200.

**SWRK 4210 Feminist Perspectives on Social Work Practice and Social Welfare Policy**  
Cr. Hrs. 6

An analysis of social work practice and welfare policy from a feminist perspective. Course emphasizes the integration of social work intervention with policy in the social welfare context and overlays concepts such as empowerment, ecological practice, oppression, and practice in context of cultural diversity. Prerequisites: SWRK 1310, SWRK 2080, SWRK 2090, and SWRK 3140. Students may not hold credit for both SWRK 4210 and SWRK 4170 or SWRK 4210 and SWRK 4190.

**SWRK 4220 Aboriginal People and Social Work Practice**  
Cr. Hrs. 6

An analysis of social work practice and welfare policy from an aboriginal perspective. The course emphasizes the linkage between practice and policy and overlays concepts such as colonization, decolonization, and approaches to practices which include cross culture, structure, and anti-oppression in the context of Aboriginal world views, experience and helping practices. Prerequisites: SWRK 1310, SWRK 2080, SWRK 2090, and SWRK 3140. Students may not hold credit for both SWRK 4220 and SWRK 4160 or SWRK 4220 and SWRK 4180.

**SWRK 4250 Family Group Conferences**  
Cr. Hrs. 3

This course provides an overview of the research, theory and application of Family Group Conferencing within the context of child and family services and the implications for intervention. Emphasis is on experiential learning of Family Group Conferencing process and techniques.

**SWRK 4260 Addiction and CFS Practice**  
Cr. Hrs. 3

The focus of this course is to increase the student’s knowledge about addictions as well as to develop student’s skills for intervention with families affected by addiction within the context of child and family services. Emphasis is on experiential learning of knowledge, process and techniques.

**SWRK 4270 Crisis Intervention**  
Cr. Hrs. 3

This course provides an overview of the research, theory and application of crisis intervention, methods and techniques within the context of child and family services. Emphasis will be on expanding existing knowledge through experiential learning of crisis intervention processes and techniques.

**SWRK 4300 Field Focus of Social Work Practice 2**  
Cr. Hrs. 6

A seminar for the critical examination of social work theory, values, policy and skills in the context of a field or focus of practice. The course integrates policy with practice at micro, meso and macro levels. Course seminar topics may vary from year to year and are organized to cover various fields or focus of practice. For students admitted after 1993-1994. Prerequisite: SWRK 4200, SWRK 3150. Corequisite: SWRK 4120.

Université de Saint-Boniface

L’Université de Saint-Boniface

Profil de l’université

L’Université de Saint-Boniface (l’Université), fondée en 1818, est située dans le quartier francophone au cœur même de la ville de Winnipeg. Ce quartier est situé sur les rives des rivières Rouge et Seine, dans l’est de Winnipeg.

L’Université de Saint-Boniface est le plus ancien établissement postsecondaire de l’Ouest canadien et est l’université de langue française au Manitoba. Elle est située à deux pas du centre-ville de Winnipeg, carrefour de nombreuses activités culturelles et sportives. L’Université est accessible à toute personne apte à poursuivre des études postsecondaires en français. Avec une vingtaine de programmes et 1 400 étudiants et étudiantes provenant de 25 pays, l’Université offre une éducation universitaire générale et spécialisée ainsi qu’une formation technique et professionnelle. À l’Université, nous avons l’intime conviction que l’apprentissage doit se poursuivre toute la vie! Notre Division de l’Éducation permanente offre une formation continue (langues, développement professionnel, développement personnel, etc.) de qualité exceptionnelle ainsi que des programmes uniques destinés aux enfants d’âge scolaire.

Bien ancrée dans son milieu, l’Université contribue pleinement à la vitalité et à l’épanouissement de la francophonie manitobaine, canadienne et internationale. Grâce à son enseignement de qualité et à sa recherche dynamique, elle rayonne largement au-delà de ses frontières. Établissement à dimension humaine, l’Université se définit comme un milieu interculturel inclusif qui contribue au développement global de la personne.

Formation universitaire

L’Université de Saint-Boniface offre une gamme de programmes universitaires de premier cycle en arts, en travail social, en traduction, en sciences, en éducation et en administration des affaires, ainsi que des programmes d’études supérieures en éducation et en études canadiennes.

Les étudiants et les étudiantes peuvent être admis directement en arts, en sciences ou en administration des affaires selon les critères d’admission spécifiques. Les étudiants et les étudiantes qui ne répondent pas aux critères d’admission directe doivent compléter une première année universitaire (U1) avant de s’inscrire au programme de baccalauréat de leur choix.

Des études universitaires entreprises à l’Université de Saint-Boniface ouvrent également la voie à des programmes dans d’autres universités, notamment l’Université du Manitoba. Pour vous renseigner sur ces possibilités, veuillez communiquer avec le Service d’orientation pédagogique de l’USB.

Annuaire

L’annuaire de l’Université de Saint-Boniface est désormais disponible en ligne seulement.

Admission

Vous voulez poursuivre vos études à l’Université de Saint-Boniface? La première étape est de déposer votre candidature à un des programmes de votre choix. Pour en savoir davantage, visitez la rubrique Futurs étudiants du site Web de l’USB.

Inscription

Dès que vous recevrez une confirmation écrite de votre admission à un programme particulier, vous pourrez vous inscrire en remplissant un formulaire d’inscription disponible au Registrariat.

- Si vous choisissez d’étudier à l’Université de Saint-Boniface, vous devez vous inscrire auprès de cet établissement, même si vous comptez suivre un ou plusieurs cours à l’Université du Manitoba. Vous devrez toutefois payer des frais de cours auprès de l’Université du Manitoba pour les cours que vous y suivez.
- Si vous voulez vous inscrire à un ou plusieurs cours à l’USB, mais que votre établissement d’appartenance est l’Université du Manitoba ou tout autre collège affilié à l’Université du Manitoba, vous devez vous inscrire auprès de votre établissement d’appartenance.
- Deux jours ouvrables après votre inscription, votre facture sera disponible dans votre portail MonUSB. Veuillez consulter l’avis aux étudiants pour vous renseigner davantage sur les factures.

Chaque faculté, école et programme peut avoir des règlements académiques précis. Il vous revient de prendre connaissance des règlements qui vous concernent et de les respecter. Pour connaître ces renseignements, veuillez consulter l’annuaire, sous la rubrique de votre faculté ou école ou sous la rubrique Règlements académiques. Consultez également la section réservée à votre programme, qui pourrait contenir ses propres exigences.

Exigences linguistiques

En général, les exigences linguistiques minimales pour tous les programmes d’études universitaires et collégiaux exigent l’inscription à un plein cours ou à deux demi-cours de français. La réussite de ce ou ces cours est une condition d’obtention du diplôme. Veuillez noter que ces exigences constituent un minimum seulement.

Les profils linguistiques servent à vous diriger vers les cours de langue appropriés et à proposer des mesures d’enrichissement qui permettront de combler les lacunes, le cas échéant. Il ne s’agit pas de tests d’admission, mais plutôt de tests de classement.

Toute personne qui s’inscrit une première fois à l’USB fait dresser son profil linguistique en français par le Service de perfectionnement linguistique (SPL) avant de s’inscrire.

Puisque certains programmes exigent aussi des connaissances de la langue anglaise, les personnes admises à ces programmes et qui connaissent peu l’anglais doivent également faire dresser leur profil linguistique en anglais avant de s’inscrire.

Registrariat

Le Registrariat est le point d’entrée pour étudier à l’Université de Saint-Boniface. Entre autres, il offre de l’apport et de l’information sur l’admission à un programme, l’inscription aux cours, l’aide financière disponible et l’horaire des cours et des examens.

Le Registrariat est ouvert du lundi au vendredi de 8 h 30 à 16 h 30.

Maîtrise ès Arts, études canadiennes Program Information

The Maîtrise ès Arts, études canadiennes is offered by the Université de Saint-Boniface, an affiliated college of the University of Manitoba, in French only, and only via the Internet. Students are generally mid-career and are enrolled in the programme on a part-time basis, out of personal interest or for career enhancement. Graduates can pursue careers in the federal or provincial public service, in journalism, in the Foreign Service, or in the private sector; in addition, graduates of the programme may be admitted to doctoral programs, subject to program requirements.

Graduates of this program will receive a Maîtrise ès Arts en études canadiennes.

Admission Requirements

In addition to the minimum admission requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, students must have taken four years of studies at the university level. A pre-M.A. program is not available at this time.

Admission Deadlines

Students should complete and submit their online application with supporting documentation (if applicable) by the date indicated in the following table:

<table>
<thead>
<tr>
<th>Term</th>
<th>Start Date</th>
<th>Canadian/US</th>
<th>International</th>
</tr>
</thead>

<td>October 1</td>
<td>July 1</td>
</tr>
<tr>
<td>SUMMER</td>
<td>May</td>
<td>February 1</td>
<td>November 1</td>
</tr>
</tbody>
</table>

Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar, students must complete a minimum number of 18 credit hours of graduate coursework. In addition, students must submit an acceptable thesis and pass a thesis oral examination.

All students must complete GRAD 7500 Academic Integrity Tutorial (0 credit hours). Students newly admitted to a graduate program must successfully complete this course within the first term of registration, unless the course has been completed previously.

Language Requirement: Reading and comprehension skills in both French and English; coursework and the thesis may be written in either French or English, subject to availability of a bilingual instructor.

Expected Time to Graduate: 2 - 3 Years. See 4.4.7 Time in Program.

Education - St Boniface Program Information

The maitrise en éducation program is offered by the Université de Saint-Boniface, an affiliated college of the University of Manitoba. The department offers the following specializations: Inclusive Special Education; Educational Administration; Guidance and Counselling; Language, Literacy and Curriculum. Some courses are the French equivalent of the courses offered at the Faculty of Education, University of Manitoba. Many courses are specific to French education in the Province of Manitoba.

Admission Requirements

The minimum admission requirements are those of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this calendar.

All students must complete, during the program or prior to entry into the program, course EDUA 5801 (Introduction to Research in Education).

Admission Deadlines

Students should complete and submit their online application with supporting documentation (if applicable) by the date indicated in the following table:

<table>
<thead>
<tr>

Program Requirements

In addition to the minimum course requirements of the Faculty of Graduate Studies found in the Graduate Studies Regulations Section of this Calendar, students must complete the following, based on their program route:

Thesis route: A Thesis and 18 credit hours are required. At least 12 credit hours must be taken at the 7000 level in the Faculty of Education; 6 credit hours may be taken at the 5000/7000 level in the Faculty of Education or at the 3000 level or above in other faculties.

Practicum route: A practicum and 18 credit hours are required. At least 12 credit hours must be taken at the 7000 level in the Faculty of Education; 6 credit hours may be taken at the 5000/7000 level in the Faculty of Education or at the 3000 level or above in other faculties. Candidates who opt for the practicum route must pass an oral examination open to all members of the University community and the public.

Comprehensive examination route: 30 credit hours are required. At least 18 credit hours must be taken at the 7000 level in the Faculty of Education;
12 credit hours may be taken at the 5000/7000 level in the Faculty of Education or at the 3000 level or above in other faculties. The comprehensive examination features an oral and a written component and may take the form of a literature review or a school-based project.

All students must complete GRAD 7500 Academic Integrity Tutorial (0 credit hours). Students newly admitted to a graduate program must successfully complete this course within the first term of registration, unless the course has been completed previously.

Language Requirement

The language of instruction and communication at USB is French. Students admitted to USB must be sufficiently proficient in French to be able to understand classroom lectures, to write assignments and to participate in classroom discussions in French. All coursework must be written in French, as well as theses, practicum reports and comprehensive examinations. International students admitted to the M.Eng. Ed. Program at USB will not be required to complete an English Language Proficiency Test. However, all students must have knowledge of written English in order to understand the regulations and policies of the Faculty of Graduate Studies as well as assigned course readings in English.

Expected Time to Graduate: 2 years. See 4.4.7 Time in Program.

Courses taught at Université de Saint-Boniface

**Faculté des arts: Français-1000 Level**

**FRAN 1001 Grammaire de l'écrit**  
(Laboratoire requis) Perfectionnement du français par l'entremise d'activités de compréhension et de production de textes divers menant à une étude approfondie de la grammaire, à l'enrichissement du vocabulaire et à un aperçu de la stylistique interne. Développement d'habitudes de travail telles que l'utilisation des outils de rédaction et l'autocorrection. Mise en pratique des notions apprises dans le cours et activités orales dans le cadre des séances de travaux dirigés obligatoires. N. B.: Une note minimale de C constitue un préalable à FRAN 1091. On ne peut s'inscrire à FRAN 1001 et à FRAN 1111 de façon concomitante. Ce cours ne peut être reconnu aux fins des 30 crédits nécessaires dans le cadre d'une majeure en français ou des 18 crédits nécessaires dans le cadre d'une mineure en français, ainsi que pour le baccalauréat spécialisé (4 ans).

**FRAN 1021 L'art de parler**  
Cr. Hrs. 3  
Correction et amélioration du français parlé (structures de phrases, aspects grammaticaux d'erreurs courantes). Distinction entre la langue parlée et la langue écrite. Prise de conscience des différents registres de la langue en fonction des différentes situations de communication. Apprentissage des techniques de l'expression orale : exposé, débat, discours.

**FRAN 1091 Rédaction universitaire**  
Cr. Hrs. 3  
(Laboratoire requis) Initiation aux méthodes de travail universitaire : les techniques du résumé, du compte rendu et de la dissertation. Préalable : une note minimale de C est requise dans FRAN 1001 pour les étudiants et étudiantes qui l'auront suivi.

**FRAN 1111 Grammaire et laboratoire**  
Cr. Hrs. 3  
(Laboratoire requis). Approfondissement des notions de la grammaire. Attention particulière accordée à l'analyse de la phrase. Préalables : une note minimale de C dans FRAN 1111 et à FRAN 1001 de façon concomitante.
FRAN 2213 Histoire de la littérature française : Modernités, XIXe - XXe siècles
Cr. Hrs. 3

FRAN 2223 Le Récit : perspectives et enjeux
Cr. Hrs. 3
Introduction aux divers aspects du récit écrit dans la tradition littéraire occidentale. Analyse des questions relatives au personnage, à l’action, à la temporalité et à l’espace. Étude des problèmes relatifs à la représentation comme forme littéraire : représentation de la parole et de la pensée ; point de vue, narration et instances narratives ; types de description, organisation de la fiction, partage entre fiction et réel. Introduction à la théorie des genres littéraires. Préalables : une note minimale de C dans FRAN 1091 et dans un des FRAN 1021 ou FRAN 1111.

FRAN 2233 Littérature et romantisme
Cr. Hrs. 3

FRAN 2243 Réalisme et naturalism
Cr. Hrs. 3

FRAN 2253 L’Art du discours
Cr. Hrs. 3

FRAN 2303 Introduction aux études littéraires
Cr. Hrs. 3

FRAN 2313 La littérature du Canada français et du Québec, des origines à 1945
Cr. Hrs. 3

FRAN 2323 La littérature du Canada français et du Québec, de 1945 à nos jours
Cr. Hrs. 3

FRAN 2333 Héritage folklorique et tradition orale au Canada français
Cr. Hrs. 3
Étude du folklore et des moeurs traditionnelles du Canada français ; une attention particulière sera accordée à la tradition orale, tels les proverbes, contes, récits et chansons traditionnels. On ne peut se faire créditer FRAN 2333 et l’ancien FRAN 2851. Préalables : une note minimale de C dans FRAN 1091 et dans un des FRAN 1021 ou FRAN 1111.

FRAN 2343 Les influences de la littérature orale au Québec et au Canada français
Cr. Hrs. 3
Étude des traits particuliers de la littérature orale fixée, tels les contes, légendes et mythes, suivie d’une étude d’œuvres (romans, poésie, théâtre, nouvelles) produites au Québec et au Canada français qui ont été inspirées par la littérature orale. On ne peut se faire créditer FRAN 2343 et l’ancien FRAN 2861. Préalables : une note de C dans FRAN 1091 et dans un des FRAN 1021 ou FRAN 1111.

FRAN 2413 Le corps blessé dans la littérature canadienne d’expression française
Cr. Hrs. 3
Étude du thème du corps blessé dans la littérature canadienne d’expression française. Analyse de diverses représentations, approches et conceptualisations du corps handicapé et d’autres différences visibles ou sensibles tout au long du XXe siècle et jusqu’à l’actuel. Conçu pour toute personne qui s’intéresse aux études sur le handicap et pour les étudiants et les étudiantes intéressés à poursuivre leurs études en travail social, éducation, administration des affaires ou toute spécialité reliée au domaine de la santé. Préalables : une note minimale de C dans FRAN 1091 et dans un des FRAN 1021 ou FRAN 1111.

FRAN 2423 Folie et déficience mentale dans la littérature canadienne d’expression française
Cr. Hrs. 3
Étude de la folie et de la déficience mentale dans la littérature canadienne d’expression française. Analyse des diverses représentations, approches et conceptualisations de la folie et des déficiences mentales tout au long du XXe siècle et jusqu’à l’actuel. Conçu pour toute personne qui s’intéresse aux études sur le handicap et aussi pour les étudiants et étudiantes intéressés à poursuivre leurs études en travail social, éducation, administration des affaires ou toute spécialité reliée au domaine de la santé. Préalables : une note minimale de C dans FRAN 1091 et dans un des FRAN 1021 ou FRAN 1111.

FRAN 2523 Atelier de théâtre
Cr. Hrs. 6

FRAN 2541 Introduction au théâtre 2 Cr. Hrs. 3

FRAN 2641 Le discours amoureux dans la littérature française Cr. Hrs. 3

FRAN 2881 Civilisation canadienne-française Cr. Hrs. 3

FRAN 2931 Initiation à la linguistique Cr. Hrs. 3

Faculté des arts: Français-3000 Level

FRAN 3123 Histoire du français 2 Cr. Hrs. 3

FRAN 3133 Phonétique et phonologie Cr. Hrs. 3

FRAN 3143 Variation du français dans l’espace francophone Cr. Hrs. 3

FRAN 3213 Littérature et existentialisme Cr. Hrs. 3

FRAN 3223 Littérature et imaginaire Cr. Hrs. 3

FRAN 3233 Analyse sociocritique Cr. Hrs. 3

FRAN 3243 Le Romantisme noir Cr. Hrs. 3

FRAN 3313 La littérature québécoise avant la Révolution tranquille (1945-1960) Cr. Hrs. 3

FRAN 3323 La production littéraire au Québec à l’époque de la Révolution tranquille Cr. Hrs. 3
Rappel des contextes politiques, historique, socioculturel et idéologique au Québec qui ont mené à la période de révolte appelée la Révolution tranquille. Étude de son impact sur la société québécoise et notamment sur sa production littéraire. Analyse approfondie d’un choix de textes. On ne peut se faire créditer FRAN 3323 et l’ancien FRAN 3841. Préalables : une note minimale de C dans FRAN 2303 et FRAN 2223.

FRAN 3343 Théories postcoloniales Cr. Hrs. 3

FRAN 3531 Le théâtre québécois Cr. Hrs. 3
Aperçu historique et étude du théâtre québécois de Lescarbot à Tremblay. Étude des œuvres de Gratien Gelinas, de Marcel Dubé, de Michel Tremblay, etc. Préalables : une note minimale de C dans FRAN 2223 et FRAN 2303.

**FRAN 3541 Le théâtre de l’Ouest**  
Cr. Hrs. 3  
Étude d’œuvres d’auteurs franco-manitobains, tels que Roger Auger, Claude Dorge, Marcien Ferland, etc. Préalables : une note minimale de C dans FRAN 2223 et FRAN 2303.

**FRAN 3641 Le rire dans la littérature française**  
Cr. Hrs. 3  
Étude du développement de la veine comique à travers la littérature française, de son origine au Moyen-Age jusqu’aux temps modernes en passant par ses manifestations au cours des différents siècles. Préalables : note minimale de C dans FRAN 2223 et dans FRAN 2303.

**FRAN 3651 Littérature et vision tragique du monde**  
Cr. Hrs. 3  
Étude du développement de la veine tragique à travers la littérature française, de son origine au Moyen-Age jusqu’aux temps modernes en passant par ses manifestations au cours des différents siècles. Préalables : une note minimale de C dans FRAN 2223 et dans FRAN 2303.

**FRAN 3661 L’esprit de la Révolution française**  
Cr. Hrs. 3  
Le maintien des formes classiques qui atteignent, au début du XVIIe siècle, un summum d’élégance et de raffinement et l’apparition, d’une part, des idées nouvelles qui entraîneront la chute de l’ancien régime et, d’autre part, d’une sensibilité annonciatrice d’un âge nouveau. Préalables : une note minimale de C dans FRAN 2223 et dans FRAN 2303.

**FRAN 3671 Études de poésie**  
Cr. Hrs. 3  
Études des formes poétiques de la Renaissance (Marot, poètes de la Pléiade, poètes baroques), du Romantisme (Lamartine, Musset, Vigny, Hugo), du Parnasse (Gautier) et du début du Symbolisme (Baudelaire). Préalables : une note minimale de C dans FRAN 2223 et dans FRAN 2303.

**FRAN 3731 Initiation aux littératures francophones**  
Cr. Hrs. 3  

**FRAN 3851 Littérature de l’Ouest : poésie, nouvelles**  
Cr. Hrs. 3  

**FRAN 3861 Littérature de l’Ouest : roman**  
Cr. Hrs. 3  

**FRAN 3931 Lexicologie et lexicographie**  
Cr. Hrs. 3  
Objectifs de la lexicologie ; étude des unités lexicales dans le cadre de la théorie linguistique ; analyses lexicales à partir de textes choisis. Problèmes théoriques et pratiques de la lexicographie. Préalable : une note minimale de C dans le FRAN 2931.

**FRAN 3941 Syntaxe du français contemporain**  
Cr. Hrs. 3  

**FRAN 3991 Création littéraire: conte et nouvelle**  
Cr. Hrs. 3  
Création de contes, de nouvelles et d’autres textes fictifs à partir d’une étude détaillée des genres narratifs. Une partie du cours sera consacrée à l’étude des divers types de phrase et des contextes où ils pourraient être employés. Préalable : une note minimale de C dans FRAN 2223 et FRAN 2303.

**Faculté des arts: Français-4000 Level**

**FRAN 4071 Sujets particuliers**  
Cr. Hrs. 3  
Contenu variable d’année en année selon les besoins des étudiantes et des étudiants, et selon la spécialité du professeur ou de la professeure. Il est possible de se faire créditer ce cours plus d’une fois pourvu que le contenu du cours soit chaque fois différent. Préalable : une note minimale de C dans un cours FRAN de niveau 3000.

**FRAN 4081 Littérature et cinéma**  
Cr. Hrs. 3  
Étude d’œuvres littéraires et de leur réalisation cinématographique conduisant à un examen de problèmes de l’adaptation à l’écran d’une œuvre littéraire ainsi qu’à une comparaison des techniques d’expression des deux arts et à une réflexion sur la création dans les deux langages spécifiques, le langage textuel et le langage visuel. Préalable : note minimale de C dans un cours FRAN niveau 3000 (littérature).

**FRAN 4113 Politiques linguistiques et gestion des langues**  
Cr. Hrs. 3  

**FRAN 4123 Le français au Manitoba**  
Cr. Hrs. 3  

**FRAN 4213 Dadaïsme et surréalisme : littérature, art, cinéma**  
Cr. Hrs. 3  

**FRAN 4313 Analyse féministe de la littérature**  
Cr. Hrs. 3  
Étude de différents courants de la critique féministe, en rapport avec les théories de la critique littéraire contemporaine. Préalable : une note minimale de C dans un cours de littérature FRAN, niveau 3000.
FRAN 4323 La littérature de l’Acadie et de la Louisiane francophone  Cr. Hrs. 3

FRAN 4551 L’âge d’or du théâtre français  Cr. Hrs. 3
Étude thématique, dramatique et esthétique de six pièces représentatives de l’école classique du théâtre français (XVIIe siècle). Préalable : une note minimale de C dans un cours de littérature FRAN de niveau 3000.

FRAN 4561 Le théâtre français du XVIIIe siècle  Cr. Hrs. 3
Étude du renouveau des formes dramatiques dans quelques œuvres du théâtre français du XVIIIe siècle. Préalable : une note minimale de C dans un cours de littérature FRAN de niveau 3000.

FRAN 4591 Création littéraire: théâtre  Cr. Hrs. 3

FRAN 4661 Nouveaux visages du roman  Cr. Hrs. 3
Étude détaillée de quelques œuvres romanesques produites depuis le début des années 1980 (romans de Le Clézio, Perec, Duras, Sarraute, etc.). Préalable : une note minimale de C dans FRAN 3343 et FRAN 3731.

FRAN 4731 Littérature africaine  Cr. Hrs. 3
Introduction à la littérature des pays africains francophones. Étude de textes qui ont marqué le XXe siècle, avec un accent mis sur les productions après l’ère des Indépendances. Préalables : une note minimale de C dans FRAN 3343 et FRAN 3731.

FRAN 4741 Littérature maghrébine  Cr. Hrs. 3

FRAN 4751 Littérature antillaise  Cr. Hrs. 3

FRAN 4931 La langue dans la littérature  Cr. Hrs. 3

FRAN 4971 Sociolinguistique  Cr. Hrs. 3
Initiation aux rapports que l’on peut établir entre la langue et la société, aux domaines d’étude et aux méthodes de la sociolinguistique. Préalable : une note minimale de C dans le FRAN 2931.

FRAN 4991 Création littéraire : poésie  Cr. Hrs. 3
Mise en pratique des techniques de création poétique (étude des rythmes, des images, des sonorités, etc.) pour la réalisation d’œuvres poétiques originales. Préalable : une note minimale de C dans un cours de littérature FRAN de niveau 3000.

Faculté des arts-Géographie

GEOG 1281 Introduction à la géographie humaine  Cr. Hrs. 3
Étude des divers aspects du milieu humain: la population, l’habitat et les ressources naturelles. L’étudiant ne peut se faire créditer avec le GEOG 1280, ou GEOG 1200 ou GEOG 1201.

GEOG 1291 Introduction à la géographie physique  Cr. Hrs. 3
Étude des divers aspects de l’environnement physique: le climat, le relief, les sols et la végétation. L’étudiant ne peut se faire créditer avec GEOG 1290, ou GEOG 1200 ou GEOG 1201.

GEOG 2211 Géographie économique (HS)  Cr. Hrs. 6
Introduction à l’expression spatiale des activités économiques. Le cours traite du concept de ressource, de la localisation et de l’utilisation des ressources naturelles, des théories sur les facteurs de localisation des activités industrielles, de l’agriculture et des fondements du développement régional. Préalable: une note minimale de C dans un minimum de 3 crédits de géographie de niveau 1000 ou l’autorisation écrite du professeur.

GEOG 2331 Espace, populations et migrations : perspectives géographiques  Cr. Hrs. 3
Étude des facteurs qui déterminent le nombre et la répartition des populations. Analyse des variations dans la fécondité, la mortalité et les migrations, ainsi qu’analyse des causes et conséquences de ces variations. On ne peut se faire créditer GEOG 2331 et: GEOG 2330, GEOG 2481 ou GEOG 2480. Préalable: Une note minimale de C dans un minimum de 3 crédits de géographie de niveau 1000 ou l’autorisation écrite de la professeure ou du professeur.

GEOG 2541 Météorologie et climatologie (PS)  Cr. Hrs. 3
Étude de la nature, des contrôles et des observations du temps et des variations spatio-temporelles du climat. Préalable : une note minimale de C dans un minimum de 3 heures-crédits de géographie de niveau 1000 ou l’autorisation écrite du professeur.

GEOG 2551 Géomorphologie (PS)  Cr. Hrs. 3
Vue d’ensemble des reliefs variés de la surface du globe et des processus géomorphologiques responsables de leur formation. (Laboratoire hebdomadaire). Préalable: une note minimale de C dans un minimum de 3 crédits de géographie de niveau 1000 ou l’autorisation écrite de la professeure ou du professeur.

GEOG 2651 Géographie politique I  Cr. Hrs. 3
Étude des relations qui existent entre l’État et son territoire: sa localisation, ses frontières et ses disparités régionales. On ne peut se faire créditer GEOG 2651 et GEOG 2430. Préalable: une note minimale de C dans un minimum de 3 crédits de géographie de niveau 1000 ou l’autorisation écrite de la professeure ou du professeur.

GEOG 2661 Géographie politique II  Cr. Hrs. 3
Étude des rapports de force entre les États et leurs relations avec l’espace, les ressources, la population et les groupes ethniques. On ne peut se faire créditer GEOG 2661 et GEOG 2430. Préalable : une note minimale de C dans GEOG 2651 ou l’autorisation écrite de la professeure ou du professeur.

GEOG 3411 Géographie de l’eau  Cr. Hrs. 3
L'eau, élément essentiel de la géographie physique. Bilan d'eau, cycle hydrologique, infiltration, percolation et écoulement, eaux souterraines, hydrologie fluviale et marine. Cours d'eau, lacs et océans, environnement. On ne peut se faire créditer GEOG 3411 et GEOG 3410. Préalable: une note minimale de C dans le GEOG 1291 ou GEOG 1290 ou l'autorisation écrite de la professeure ou du professeur.

**GEOG 3421 L'eau, enjeu géostratégique**  Cr. Hrs. 3
L'eau, un enjeu stratégique d'importance: un survol historique des enjeux liés à l'eau et les enjeux actuels, la répartition inégale de la ressource eau et son partage équitable, les solutions techniques, économiques, institutionnelles et juridiques envisagées et le droit international. Préalable: une note minimale de C dans le GEOG 1280 ou GEOG 1281, et les deux GEOG 2651 et GEOG 2661 (ou le GEOG 2430, ou l'autorisation écrite du professeur).

**GEOG 3481 Particularités de la géographie du Canada (A)**  Cr. Hrs. 3

**GEOG 3501 Géographie de l'Europe (A)**  Cr. Hrs. 6
Vue générale sur la géographie du continent européen et plus spécifiquement sur l'Union européenne. L'accent sera placé sur quelques pays. Préalable: une note minimale de C dans un minimum de 6 crédits de géographie de niveau 1000, ou l'autorisation écrite de la professeure ou du professeur.

**GEOG 3591 Géographie des pays en voie de développement (A)**  Cr. Hrs. 6

**GEOG 3761 Sujets particuliers en géographie**  Cr. Hrs. 3
Le contenu variera d'année en année, il sera donc possible de se faire créditer ce cours plus d'une fois. Préalable: un cours (3 crédits) de niveau 2000 ou 3000 avec une note minimale de C. Préalable: l'autorisation du professeur ou de la professeure.

**GEOG 3771 Sujets particuliers en géographie**  Cr. Hrs. 3
Le contenu variera d'année en année, il sera donc possible de se faire créditer ce cours plus d'une fois. Préalable: l'autorisation écrite de la professeure ou du professeur.

**GEOG 3821 Les territoires de la francophonie mondiale (A, HS)**  Cr. Hrs. 3
La mise en place des espaces francophones partout dans le monde: le développement et l'éclatement des empires français et belge. La territorialité et l'identité au sein de la francophonie internationale. Répartition géographique et développement institutionnel. Ententes politiques et aspirations territoriales. On ne peut se faire créditer GEOG 3821 et GEOG 3820 et GEOG 3811 et GEOG 3820. Préalable: une note minimale de C dans un minimum de 6 crédits de géographie de niveau 1000.

**GEOG 3831 L'espace francophone panaméricain (A, HS)**  Cr. Hrs. 3
L'étude des communautés francophones des Amériques dans le temps et dans l'espace. La mise en place de la francophonie panaméricaine et les circonstances de son éclatement. Ses enjeux économiques, sociaux, politiques et culturels. Les infrastructures, les institutions et les réseaux francophones. Préalable: une note minimale de C dans le GEOG 3821.

**GEOG 3841 Les espaces francophones de l'Afrique, de l'Asie et de l'Océanie (A, HS)**  Cr. Hrs. 3
L'étude des communautés francophones africaines, asiatiques et océaniennes. Les étapes de la colonisation et de la décolonisation, l'évolution vers l'indépendance et l'accèsion au statut d'État souverain. La mise en place des infrastructures, des institutions et des réseaux francophones. Préalable: une note minimale de C dans GEOG 3821.

**Faculté des arts-German**

**GRMN 1123 Introduction à l'allemand 1**  Cr. Hrs. 3
Trois heures de cours plus une heure de laboratoire de langue par semaine. Le cours est destiné aux étudiants et aux étudiantes n'ayant aucune connaissance de l'allemand ou n'en ayant qu'une connaissance minime. Le cours comporte une initiation à la grammaire fondamentale, mais l'accent est mis sur le développement d'aptitudes à la lecture et à la conversation. On ne peut se faire créditer GRMN 1123 et l'ancien GRMN 1121 ou GRMN 1120. On ne peut s'inscrire à ce cours si on a déjà obtenu des crédits pour l'allemand 405 ou GRMN 2100 ou GRMN 2101.

**GRMN 1125 Introduction à l'allemand 2**  Cr. Hrs. 3
Trois heures de cours plus une heure de laboratoire de langue par semaine. Le cours est destiné aux étudiants et aux étudiantes n'ayant aucune connaissance de l'allemand ou n'en ayant qu'une connaissance minime. Le cours comporte une initiation à la grammaire fondamentale, mais l'accent est mis sur le développement d'aptitudes à la lecture et à la conversation. On ne peut se faire créditer GRMN 1125 et l'ancien GRMN 1121 ou GRMN 1120. On ne peut s'inscrire à ce cours si on a déjà obtenu des crédits pour l'allemand 405 ou GRMN 2100 ou GRMN 2101. Préalable : GRMN 1123.

**GRMN 2103 Allemand intermédiaire 1 (A) L**  Cr. Hrs. 3

**GRMN 2105 Allemand intermédiaire 2 (A) L**  Cr. Hrs. 3

**GRMN 3201 Deutsche sprachpraxis I**  Cr. Hrs. 6
Usage de l'allemand contemporain par la conversation, l'écriture et les exercices pratiques; étude de textes fictifs et non-fictifs et de films. L'accent est mis sur l'acquisition de vocabulaire et sur les particularités stylistiques et
structurelles. On ne peut se faire créditer le GRMN 3201 et le GRMN 3200. Préalable: une note minimale de C dans GRMN 2100 ou GRMN 2101.

**GRMN 3211 Allemand commercial**  
Cr. Hrs. 6

**GRMN 3601 Sujets particuliers**  
Cr. Hrs. 3

Contenu variable en fonction des besoins et des intérêts des étudiantes et des étudiants et de la professeure ou du professeur. On ne peut se faire créditer GRMN 3601 et GRMN 3600. Le contenu variera d’année en année, il sera donc possible de se faire créditer ce cours plus d’une fois. Préalable: une note minimale de C dans GRMN 2101 ou GRMN 2100, ou l’autorisation écrite de la professeure ou du professeur.

**Faculté des arts-History**

**HIST 1201 Initiation à la civilisation occidentale (G)**  
Cr. Hrs. 6

Aperçu de l'histoire culturelle du monde occidental de l'antiquité grecque à nos jours. L'étudiant(e) qui détient les crédits du HIST 1201 ne peut se faire créditer aucun des cours HIST 1200 ou HIST 1350 ou HIST 1360.

**HIST 1441 Histoire du Canada (C)**  
Cr. Hrs. 6

Étude de l’évolution générale du Canada, des “origines” à nos jours. À travers un survol des principales périodes, régions, groupes, personnages et institutions qui ont contribué à la formation et à la transformation de la société canadienne, il s’agira d’illustrer la richesse et la complexité des rapports humains dans le temps et l’espace. L’étudiant(e) qui détient les crédits du HIST 1441 ne peut se faire créditer aucun des cours HIST 1440 ou HIST 1390 ou HIST 1400.

**HIST 2041 Histoire des États-Unis jusqu’en 1877 (A)**  
Cr. Hrs. 3

Une vue générale du développement du peuple américain de l’établissement jusqu’à la période de Reconstruction. L’étudiant(e) ne peut se faire créditer à la fois le HIST 2041 et le HIST 2230.

**HIST 2191 Histoire économique et sociale canadienne du XIXe siècle (C)**  
Cr. Hrs. 6

Ce cours aborde l’émergence de l’industrialisation au Canada et ses effets sur la société canadienne. La mise en place d'une bourgeoisie industrielle et d'un prolétariat sera examinée attentivement de même que ses implications sur la société canadienne.

**HIST 2283 Histoire des francophones de l'Ouest canadien (C)**  
Cr. Hrs. 3

Étude historique et thématique du fait français de l'Ouest canadien (Man., Sask., Abc., C.-B.) de ses premiers établissements au XVIIIe siècle jusqu'aux communautés actuelles. Différents événements, processus historiques et thèmes (socio-économie, politique, culture, religion) seront analysés. La francophonie ouest-canadienne se compose de communautés minoritaires ayant des histoires propres sans être isolées les unes des autres.

**HIST 2381 Le monde du 20e siècle (G,M)**  
Cr. Hrs. 6

Les crises du monde moderne, y compris l'impact, sur une échelle universelle, de la civilisation occidentale, du choc des idéologies, de la guerre, de la paix et la modernisation. On ne peut se faire créditer HIST 2381 et HIST 2380.

**HIST 2481 Histoire de la France depuis 1500 (E)**  
Cr. Hrs. 6

Aperçu de la Renaissance des XVIIe, XVIIIe et XIXe siècles et de l'époque contemporaine.

**HIST 2661 Histoire de l’Union soviétique (E)**  
Cr. Hrs. 3

Une attention particulière sera donnée à la Révolution russe de 1917, à la nature et au fonctionnement du système politique soviétique, aux expériences sociales et économiques du régime soviétique ainsi qu’au rôle des Soviétiques dans la politique internationale. L’étudiant(e) qui détient le crédit du HIST 2661 ne peut se faire créditer aucun des cours HIST 2660, HIST 2490 ou l’ancien HIST 3471.

**HIST 2671 Histoire du capitalisme (M)**  
Cr. Hrs. 3

Étude de l'émergence et de l'évolution du capitalisme ainsi que de ses conséquences sociales du 15e siècle jusqu'à nos jours. L'étudiant(e) ne peut se faire créditer à la fois le HIST 2671 et le HIST 2670.

**HIST 2761 Histoire des États-Unis depuis 1877 (A)**  
Cr. Hrs. 3

Une revue générale du développement du peuple américain à partir de la Reconstruction jusqu’au présent. L’étudiant(e) qui détient le crédit du HIST 2761 ne peut se faire créditer aucun des cours HIST 2760 ou HIST 2230.

**HIST 2841 Histoire de la Russie jusqu'en 1917 (E)**  
Cr. Hrs. 3

Un survol historique du développement de la Russie jusqu'à la fin de la période impériale. L'étudiant(e) qui détient le crédit du HIST 2841 ne peut se faire créditer aucun des cours HIST 2840 ou HIST 2490 ou l'ancien HIST 3471.

**HIST 2971 Le Canada moderne : de 1921 à nos jours (C)**  
Cr. Hrs. 6

Étude approfondie de la transformation du Canada en un État moderne, entité nationale, politique, économique, sociale et culturelle. L’étudiant(e) ne peut se faire créditer à la fois le HIST 2971 et le HIST 2970.

**HIST 2991 Histoire de l’Église catholique depuis 1540 (G)**  
Cr. Hrs. 3

Histoire de l’Église catholique depuis 1540 jusqu’à nos jours. On portera attention particulièrement à la réponse que l’Église a donnée à la modernisation du monde ainsi qu’à l’évolution théologique et aux réformes institutionnelles. L’étudiant(e) ne peut se faire créditer à la fois le HIST 2991 et le HIST 2990.

**HIST 3011 La guerre au 20e siècle**  
Cr. Hrs. 3

**HIST 3101 Histoire de l’Éducation en Occident depuis 1500, une introduction (M)**  
Cr. Hrs. 3

Introduction à l’histoire de l’éducation en Occident. Présentation des grands jalons au cours des cinq cents dernières années. Parmi les thèmes abordés, il y aura la création et de l'évolution des différents niveaux d'écoles, la programmation, le financement, la place de l'Église et celle de l’État dans l'éducation, les méthodes d'enseignement, les différences entre les sexes, la progression de l'alphabétisation et de la scolarisation. Préalable: [avoir obtenu une note minimale de C dans six crédits en histoire ou l’autorisation écrite de la professeure ou du professeur.

**HIST 3111 Sujets spéciaux 1 (G)**  
Cr. Hrs. 3

Occasion d’étudier un thème choisi en histoire. Le contenu varie mais doit comprendre un travail en histoire sociale ou culturelle ou sur un sujet spécifique. Consulter le département d’histoire et le Guide d’inscription. Préalable: [avoir obtenu une note minimale de C dans six crédits en histoire]
ou l'autorisation écrite de la professeure ou du professeur. Le contenu variera d'année en année alors l'étudiant(e) peut se faire créditer ce cours plus d'une fois.

**HIST 3121 Sujets spéciaux 2 (G)**  Cr. Hrs. 3

L'occasion d'étudier un thème choisi en histoire. Le contenu varie mais doit comprendre un travail en histoire sociale ou culturelle sur un sujet spécifique. Consulter le département d'histoire et le Guide d'inscription. Préalable : [avoir obtenu une note minimale de C dans six crédits en histoire] ou l'autorisation écrite de la professeure ou du professeur. Le contenu variera d'année en année alors l'étudiant(e) peut se faire créditer ce cours plus d'une fois.

**HIST 3141 Histoire de la démocratie (G)**  Cr. Hrs. 3

Ce cours aborde un sujet au coeur de l'actualité : la démocratie et, plus spécialement la démocratisation des États dans le monde depuis le 19e siècle. Nous abordons les aspects théoriques de la démocratie et l'évolution de la mise en pratique de la théorie démocratique. Préalable : [avoir obtenu une note minimale de C dans six crédits en histoire] ou l'autorisation écrite de la professeure ou du professeur.

**HIST 3301 Histoire du terrorisme contemporain (G)**  Cr. Hrs. 3

Étude d'un aspect particulier des conflits sociopolitiques qui ont marqué l'histoire contemporaine : le terrorisme. L'évolution historique de ce phénomène est traitée tant du point de vue de sa notion / définition(s), son / ses idéologie(s), ses objectifs ou buts, que de ses revendications, sa géographie et ses méthodes d'action. Préalable : une note minimale de C dans 6 crédits en Histoire ou l'autorisation écrite de la professeure ou du professeur.

**HIST 3721 Histoire du Manitoba (C)**  Cr. Hrs. 6

L'évolution politique, économique et sociale de la province depuis sa création à nos jours. Le cours sera précédé d'un bref aperçu de l'ère missionnaire dans l'Ouest canadien. Préalable : une note minimale de C dans HIST 1441 ou HIST 1440 ou l'autorisation écrite du professeur.

**HIST 3761 Sujets particuliers en histoire des États-Unis I (A)**  Cr. Hrs. 3

La matière de ce cours sera annoncée chaque année. Veuillez consulter le Département d'histoire. On ne peut se faire créditer HIST 3761 et HIST 3760. Préalable : une note minimale de C dans six crédits en histoire, ou l'autorisation écrite de la professeure ou du professeur. Le contenu variera d'année en année, il sera donc possible de se faire créditer ce cours plus d'une fois.

**HIST 3771 Sujets particuliers en histoire des États-Unis II (A)**  Cr. Hrs. 3

La matière de ce cours sera annoncée chaque année. Veuillez consulter le Département d'histoire. On ne peut se faire créditer HIST 3771 et HIST 3770. Préalable : une note minimale de C dans six crédits en histoire, ou l'autorisation écrite de la professeure ou du professeur. Le contenu variera d'année en année, il sera donc possible de se faire créditer ce cours plus d'une fois.

**HIST 3781 Études choisies en histoire du Canada I (C)**  Cr. Hrs. 3

Il est construit en vue de donner une connaissance approfondie de certains sujets et thèmes particuliers de l'histoire du Canada. La description détaillée de ce cours sera disponible à l'avance au bureau du professeur. Le contenu variera d'année en année, il sera donc possible de se faire créditer ce cours plus d'une fois. On ne peut se faire créditer HIST 3781 et HIST 3780. Préalable : [avoir obtenu une note minimale de C dans six crédits en histoire, ou l'autorisation écrite de la professeure ou du professeur.

**HIST 3791 Études choisies en histoire du Canada II (C)**  Cr. Hrs. 3

Il est construit en vue de donner une connaissance approfondie de certains sujets et thèmes particuliers de l'histoire du Canada. La description détaillée de ce cours sera disponible à l'avance au bureau du professeur. On ne peut se faire créditer HIST 3791 et HIST 3790. Préalable : [avoir obtenu une note minimale de C dans six crédits en histoire, ou l'autorisation écrite de la professeure ou du professeur.

**HIST 3811 Famille, amour et mariage dans la société occidentale, 1500-1800 (E)**  Cr. Hrs. 6

Étude de la théorie et de la pratique du mariage dans l'Europe moderne, particulièrement dans un rapport avec les aspects démographiques, économiques, religieux et juridiques de la relation maritale. Préalable : une note minimale de C dans six crédits en histoire ou l'autorisation écrite de la professeure ou du professeur.

**Faculté des arts-Philosophy**

**PHIL 1291 Pensee critique**  Cr. Hrs. 3

Ce cours aide les étudiants à penser clairement et de manière critique, à présenter, à défendre et à évaluer des arguments. On discutera des bons et des mauvais raisonnements, des sophismes quotidiennes et de certaines formes de raisonnement telles que le syllogisme catégorique et des moyens et des manières de définir les mots. Les étudiants ne peuvent se faire créditer à la fois les cours PHIL 1291 et un quelconque des cours suivants : PHIL 1290 ou PHIL 1320 ou PHIL 1321.

**PHIL 1321 Introduction à la logique**  Cr. Hrs. 6

Introduction aux notions fondamentales de la morale et de l'éthique et présentation des théories morales occidentales les plus importantes pour notre appréciation de notre condition morale actuelle : la morale des vertus (Aristote), la morale religieuse (le catholicisme), la morale déontologique (Kant) et la morale utilitariste (Bentham et Mill). Études de problèmes moraux contemporains à partir de ces théories. On ne peut se faire créditer PHIL 1401 et aucun de l'ancien PHIL 2530, l'ancien PHIL 2531.

**PHIL 1401 Introduction à l'éthique**  Cr. Hrs. 3

Introduction aux notions fondamentales de la morale et de l'éthique et présentation des théories morales occidentales les plus importantes pour notre appréciation de notre condition morale actuelle : la morale des vertus (Aristote), la morale religieuse (le catholicisme), la morale déontologique (Kant) et la morale utilitariste (Bentham et Mill). Études de problèmes moraux contemporains à partir de ces théories. On ne peut se faire créditer PHIL 1401 et aucun de l'ancien PHIL 2530, l'ancien PHIL 2531.

**PHIL 1511 Introduction historique à la philosophie**  Cr. Hrs. 6

Introduction aux grands penseurs de la civilisation occidentale des anciens grecs tels que Platon et Aristote jusqu'aux philosophes analytiques et (si possible) aux existentialistes contemporains. Introduction aux grandes questions telles que la nature de la réalité, l'existence de Dieu, la connaissance humaine et la moralité. La logique élémentaire sera aussi étudiée. L'étudiant(e) qui détient les crédits du PHIL 1511 ne peut se faire créditer aucun des cours PHIL 1510 ou PHIL 1200 ou PHIL 1260. Le cours PHIL 1510 fait partie à la fois du groupe 1 et du groupe 2.

**PHIL 2171 Sujets particuliers 1**  Cr. Hrs. 3

Les sujets traités varient d'année en année. Préalable : une note minimale de C dans trois crédits de philosophie ou avoir complété un minimum de 30 crédits universitaires. Compte tenu du fait que le contenu de ce cours varie d'année en année, il peut être suivi plus d'une fois.

**PHIL 2301 Philosophie politique**  Cr. Hrs. 6

Analyse et évaluation des doctrines des grands penseurs politiques tels que Platon, Hobbes, Locke, Mill, Marx; leurs idéaux de justice, de liberté, de bonheur, d'égalité et d'épanouissement personnel, leurs théories sur la nature humaine et sur les fondements de la société. L'étudiant(e) ne peut se
faire créditer à la fois le PHIL 2301 et le PHIL 2300. Préalable: après avoir complété et réussi 30 unités de cours universitaires.

**PHIL 2631 Le rationalisme continental**  
Cr. Hrs. 3
Étude des philosophes du continent: Descartes, Spinoza, Liebniz, qui ont perçu la raison plutôt que l'expérience comme la clé de toute connaissance de l'Univers. L'étudiant(e) ne peut se faire créditer à la fois le PHIL 2631 et le PHIL 2630. Préalable: [une note minimale de C dans six heures-crédits au niveau 1000 en philosophie] ou autorisation écrite du professeur.

**PHIL 2641 L'empirisme britannique**  
Cr. Hrs. 3
Revue et analyse des théories des grands empiristes britanniques: Locke, Berkeley et Hume, sur la nature et les fondements de la connaissance humaine et ses relations avec l'expérience. L'étudiant(e) ne peut se faire créditer à la fois le PHIL 2641 et le PHIL 2640. Préalable: [une note minimale de C dans six heures-crédits au niveau 1000 en philosophie] ou autorisation écrite du professeur.

**PHIL 2661 Aristote**  
Cr. Hrs. 3

**PHIL 2701 Philosophie de la religion**  
Cr. Hrs. 6
Examen critique des raisons pouvant justifier l'attitude religieuse. Le cours portera entre autres sur l'existence de Dieu et sa nature, la raison et la foi, la signification du discours religieux, la révélation, les miracles, le mysticisme. On ne peut se faire créditer PHIL 2701 et PHIL 2700 ou PHIL 2730.

**PHIL 2741 Éthique et biomédecine**  
Cr. Hrs. 3
Le cours examine quelques-unes des plus importantes questions d'éthique soulevées par les récents développements en biologie et en médecine. Les sujets à couvrir incluent: l'attribution de rares ressources médicales limitées; la manipulation génétique; l'euthanasie vs la prolongation de la vie; l'avortement et l'infanticide ainsi que l'expérimentation sur des sujets humains. On ne peut se faire créditer à la fois le PHIL 2741 et aucun des cours suivants: PHIL 2290 ou PHIL 2531 ou PHIL 2740. Préalable: avoir complété avec succès 30 heures de crédits universitaires.

**PHIL 2751 Éthique et environnement**  
Cr. Hrs. 3
Examen de certaines questions éthiques importantes en rapport avec la pollution de l'environnement et de l'épuisement des ressources. On étudiera (entre autres): l'idéal des limites de la liberté et de l'environnement, la rareté et l'idéal de la justice, la croissance versus l'état de stabilité économique, les droits des animaux et l'éthique de la survie vs. l'éthique du bien être. On ne peut se faire créditer à la fois le PHIL 2751 et aucun des cours suivants: PHIL 2290 ou PHIL 2531 ou PHIL 2750. Préalable: avoir complété avec succès 30 heures crédits universitaires.

**PHIL 2781 Musique et comportement humain**  
Cr. Hrs. 3
Examen critique de l'influence de la musique sur le comportement humain à partir des penseurs les plus marquants à ce sujet: Pythagore, Platon, Aristote, Philodème de Gadara, Nietzsche, Adorno et Bloom. Écoute d'extraits musicaux pour ancrer les notions dans la réalité musicale ancienne et contemporaine.

**PHIL 2811 Philosophie de l'éducation**  
Cr. Hrs. 3
Présentation des thèmes centraux à la philosophie de l'éducation: quels sont les traits désirables à acquérir, pourquoi le sont-ils et comment on les acquérir. Le cours présente également différentes réponses à ces questions qu'apportent les théories de la nature humaine. On ne peut se faire créditer PHIL 2811 et aucun de l'ancien PHIL 2810, l'ancien PHIL 3550, l'ancien PHIL 3551. Préalable: avoir complété avec succès 30 crédits universitaires.

**PHIL 2823 Philosophie de l'existence**  
Cr. Hrs. 3
Présentation des principaux thèmes de ce courant philosophique et mise en relief de la vision particulière des auteurs étudiés, en particulier celle de Sören Kierkegaard, de Karl Jaspers, de Martin Buber, de Gabriel Marcel, de Jean-Paul Sartre et de Paul-Louis Landsberg. On ne peut se faire créditer PHIL 2823 et l'ancien PHIL 2820 ou PHIL 2821.

**PHIL 2831 Éthique des affaires**  
Cr. Hrs. 3
Le cours explore l'application de la théorie éthique dans les affaires. Les sujets discutés incluent normalement: les théories sur la justice, la responsabilité des corporations, l'éthique dans la publicité, la protection du consommateur et de l'environnement, les préférences à l'embauche. On ne peut se faire créditer à la fois PHIL 2831 et PHIL 2830. Préalable: avoir complété avec succès 30 crédits universitaires.

**PHIL 2841 Éthique de la guerre et de la paix**  
Cr. Hrs. 3
Une étude des questions éthiques relatives à la guerre et à la recherche de la paix qu'on trouve traitées dans les œuvres des plus grands philosophes et des penseurs politiques et militaires choisis. Les théories morales pertinentes telles que la non-violence, la guerre sainte, la guerre juste, les raisonnements éthiques qui sous-tendent les politiques de dissuasion seront examinées de manière critique dans le contexte historique et contemporain. On ne peut se faire créditer à la fois PHIL 2841 et PHIL 2840.

**PHIL 2861 Philosophie du droit**  
Cr. Hrs. 3
Une introduction à la philosophie du droit et au système réglementaire en général. Les sujets abordés incluent: le concept de loi (la loi et la religion, la loi naturelle, et les lois des livres), la relation, s'il y a lieu, entre la loi et la moralité et les politiques du droit au Canada et ailleurs. On ne peut se faire créditer à la fois PHIL 2861 et PHIL 2860.

**PHIL 2871 La philosophie et le droit**  
Cr. Hrs. 3
Examen de la philosophie du droit à partir des questions non traitées du cours PHIL 2861. L'étudiant examinera des thèmes tels que: la culpabilité et la responsabilité; les théories du châtiment; le droit à la dissidence; le raisonnement légal et l'éthique professionnelle. On ne peut pas se faire créditer à la fois PHIL 2871 et PHIL 2870.

**PHIL 2901 Philosophie de la démocratie**  
Cr. Hrs. 3
A partir d'une réflexion portant sur l'émergence de la démocratie et de ses fondements, d'une réflexion portant sur son implantation de plus en plus universelle et d'une réflexion portant sur ce que la démocratie contient comme promesses et dangers, le cours, à l'aide des penseurs les plus importants pour approcher la démocratie, veut aider les étudiant(e)s à mieux comprendre philosophiquement le système politique dans lequel ils vivent.

**PHIL 3223 Philosophie et littérature**  
Cr. Hrs. 3
Les sujets abordés incluent: l'analyse de l'acte de la lecture, la structure fondamentale de l'œuvre littéraire, les qualités esthétiques de la nouvelle et du roman, la vérité et le mensonge en littérature, le rôle de la littérature dans l'éducation. Dans la deuxième partie, on propose une analyse philosophique des œuvres célèbres de Heinrich von Kleist, de Dostoïevski et d'Orwell. Préalable: avoir complété avec succès 30 crédits universitaires.

**PHIL 3225 Anthropologie philosophique**  
Cr. Hrs. 3
L'anthropologie philosophique naît du questionnement de l'existence proprement philosophique et de la réflexion portant sur la nature et le sens de la vie humaine. Au-delà de l'analyse proprement philosophique des traits caractéristiques de l'être humain, elle cherche à intégrer et à mettre en valeur les contributions des sciences
humaines. Après avoir présenté les points de vue des principaux représentants de ce courant de pensée (Scheler, Plessner, Gehlen, Straus), ce cours propose une réflexion approfondie sur les principales dimensions de l'existence humaine. On ne peut se faire créditer PHIL 3225 et PHIL 3571. Préalable : avoir complété avec succès 30 crédits universitaires.

PHIL 3591 Nietzsche Cr. Hrs. 3
À partir de la présentation biographique du philosophe et d’une brève présentation de ses opposants philosophiques (Socrate, Rousseau, le judéo-christianisme, le wagnérisme), le cours permet l’approfondissement des thèses et thèmes les plus importants de la pensée nietzschéenne : volonté de puissance, surhomme, mort de Dieu, nihilisme, amor fati, éternel retour du même, etc. Préalable : 30 crédits universitaires.

Faculté des arts-Political Studies

POLS 1503 Introduction à la politique 1 Cr. Hrs. 3

POLS 1505 Introduction à la politique II Cr. Hrs. 3

POLS 2003 Introduction à la politique comparée I Cr. Hrs. 3

POLS 2005 Introduction à la politique comparée II Cr. Hrs. 3

POLS 2043 Introduction à la politique globale I Cr. Hrs. 3

POLS 2045 Introduction à la politique globale II Cr. Hrs. 3

POLS 2073 Introduction à la politique canadienne I : État et société Cr. Hrs. 3

POLS 2075 Introduction à la politique canadienne II : Institutions et politiques publiques Cr. Hrs. 3
Étude des principales institutions politiques canadiennes, incluant la Constitution, le fédéralisme, le système électoral, les pouvoirs exécutif, législatif, judiciaire, administratif et médiatique. Le cours analysera aussi des politiques publiques centrales qui illustrent le fonctionnement et l’interaction de ces institutions. On ne peut faire créditer POLS 2075 et l’ancien POLS 2071 ou POLS 2070.

POLS 2513 Pensée politique classique Cr. Hrs. 3

POLS 2515 Pensée politique moderne Cr. Hrs. 3

POLS 2561 Questions d’actualité en politique canadienne Cr. Hrs. 6
Analyse des activités du gouvernement canadien dans certains domaines problématiques ainsi qu’une revue des différentes approches à ces problèmes. Préalable : (un de l’ancien POLS 1501, POLS 1500, l’ancien POLS 1501 ou POLS 1500) ou (POLS 1503 et POLS 1505), ou l’autorisation écrite de la professeure ou du professeur.

POLS 2571 Initiation à l’administration publique Cr. Hrs. 6
Une revue des principes fondamentaux, du recrutement du personnel et de l’organisation ainsi que de la gestion fiscale au sein du gouvernement. L’étudiant ne peut se faire créditer à la fois le POLS 2571 et le POLS 2570.

POLS 3141 Sujets particuliers en politique 1 Cr. Hrs. 3
Contenu du cours variable d’année en année. Contacter le département pour une description de cours. On ne peut se faire créditer POLS 3141 et POLS 3140 (019.314). Le contenu variera d’année en année, il sera donc possible de se faire créditer ce cours plus d’une fois. Préalable : l’autorisation écrite de la professeure ou du professeur.

POLS 3151 Sujets particuliers en politique 2 Cr. Hrs. 3
Contenu du cours variable d’année en année. Contacter le département pour une description de cours. On ne peut se faire créditer POLS 3151 et POLS 3150. Le contenu variera d’année en année, il sera donc possible de se faire créditer ce cours plus d’une fois. Préalable : l’autorisation écrite de la professeure ou du professeur.
POLS 3161 Droits de la personne et libertés civiles Cr. Hrs. 3
(Autrefois 019.316) Une étude des fondements des systèmes modernes de droits de la personne dans les démocraties libérales. Les thèmes abordés incluent les principaux arguments philosophiques relatifs aux droits de la personne, les principales théories des droits, ainsi que les conventions internationales et les systèmes de protection des droits de la personne. Préalables: Une note minimale de C dans POLS 2515 ou POLS 2510 (ou l’ancien POLS 2511) ou POLS 2070 (ou l’ancien POLS 2171) ou (POLS 2073 et POLS 2075) ou l’autorisation de la professeure ou professeur.

POLS 3171 La Charte canadienne des droits et libertés Cr. Hrs. 3
(Autrefois 019.317) Une étude systématique des droits et libertés garantis par la Charte à travers les jugements de la Cour suprême. Des thèmes supplémentaires sont abordés, dont les sources historiques, politiques et intellectuelles de la protection des droits au Canada, ainsi qu’un survol des lois canadiennes relatives aux droits de la personne. Préalables: Une note minimale de C dans POLS 2071 ou POLS 2070 (ou l’ancien POLS 2171) ou (POLS 2073 et POLS 2075) ou l’autorisation de la professeure ou du professeur.

POLS 3181 Droits humains dans le système mondial Cr. Hrs. 3

POLS 3211 Sociopolitique des conflits armés Cr. Hrs. 3
Analyse des causes (endogènes et exogènes), déroulement, conséquences et prévention des conflits armés à partir d’études de cas. Évolution des notions de conflit, de guerre et de sécurité. Transformations de la pratique et de la conduite des conflits armés depuis 1945. Préalable : Une note minimale de B dans POLS 2040 ou POLS 2041 ou POLS 2043 et POLS 2045.

POLS 3251 Économie politique internationale Cr. Hrs. 3

POLS 3563 Le Canada dans le système mondial Cr. Hrs. 3

POLS 3621 Violence politique Cr. Hrs. 3
Causes et formes de la violence visant le changement politique, le contrôle de l’État, le renversement d’un régime ou la modification des frontières politiques existantes. Analyse de la violence politique mobilisée par les acteurs étiatiques et non-étiatiques tant à l’intérieur qu’à l’extérieur des frontières nationales. Manifestations extrêmes de la violence politique : Guerillas, terrorisme et terrorisme d’État, émeutes, violence à caractère ethnique et religieux. Préalable : Une note minimale de C dans POLS 1500 ou POLS 1501 ou dans POLS 1503 et POLS 1505.

POLS 3771 Organisations internationales: L’ONU et ses institutions spécialisées Cr. Hrs. 3

POLS 3841 Les approches théoriques en relations internationales Cr. Hrs. 3
Étude des différentes approches théoriques utilisées dans l’analyse des relations internationales, ainsi que des méthodologies utilisées par les analystes de la politique internationale. On ne peut se faire créditer POLS 3841 et POLS 3840. Préalable : une note minimale de C dans POLS 2041 ou POLS 2040 ou dans POLS 2043 et POLS 2045, ou l’autorisation écrite de la professeure ou du professeur.

POLS 3881 Politique étrangère comparée Cr. Hrs. 3

POLS 3951 Méthodes de recherche en sciences politiques Cr. Hrs. 3

Faculté des arts-Psychology

PSYC 1211 Introduction à la psychologie I Cr. Hrs. 3
Étude des processus fondamentaux sous-jacents à la psychologie tels que les bases biologiques des comportements, les processus sensoriels, la perception, les états de conscience, l’apprentissage et la mémoire. Description des méthodes de recherche propres à la psychologie scientifique. On ne peut se faire créditer PSYC 1211 et PSYC 1201 ou PSYC 1200.

PSYC 1221 Introduction à la psychologie II Cr. Hrs. 3
Étude des connaissances utilisées par les psychologues pour aider l’être humain dans sa compréhension personnelle et ses interactions sociales. Exploration des motivations, de l’intelligence, de la personnalité et de la psychopathologie. Description des outils et des méthodes de travail propres à la psychologie appliquée. On ne peut se faire créditer PSYC 1221 et PSYC 1201 ou PSYC 1200.

PSYC 2251 Introduction à la recherche en psychologie Cr. Hrs. 3
Étude de la psychologie comme discipline scientifique et description des méthodes de collecte et d’interprétation des données en psychologie. Cours obligatoire pour la majeure devant être suivi en deuxième année.
PSYC 2261 Introduction aux méthodes de recherche en psychologie  Cr. Hrs. 3

PSYC 2291 Le développement de l’enfant  Cr. Hrs. 3
Étude du développement psychologique normal de la période prénatale à la puberté. Présentation des méthodes de recherche utilisées dans l’étude de l’enfant. On ne peut se faire créditer à la fois PSYC 2291 et PSYC 2290. Préalable : une note minimale de C dans PSYC 1201 ou PSYC 1200, ou dans PSYC 1211 et PSYC 1221, ou l’autorisation écrite de la professeure ou du professeur.

PSYC 2361 Cerveau et comportement  Cr. Hrs. 3
Étude de la relation entre le cerveau et les comportements. Apprentissage des éléments fondamentaux du système nerveux et comment ils s’intègrent pour assumer les sensations, le contrôle moteur, les émotions, le sommeil, l’apprentissage et la mémoire. On ne peut se faire créditer PSYC 2361 et aucun de PSYC 2360, PSYC 3550 ou PSYC 3540 quand l’intitulé est “Cerveau et comportement”. Préalables : une note minimale de C dans PSYC 1200 ou dans l’ancien PSYC 1201 ou une note minimale de C dans PSYC 1211 ou PSYC 1221, ou l’autorisation écrite de la professeure ou du professeur.

PSYC 2441 Principes de modification du comportement  Cr. Hrs. 3
Discussion des hypothèses fondamentales, des principes et des méthodes de modification du comportement à partir d’exemples tirés du comportement humain, normal et anormal. Projets de recherche supervisés dans des secteurs d’application précis ou recherche fondamentale sur le comportement. On ne peut se faire créditer PSYC 2441 et PSYC 2440. Préalables : une note minimale de C dans PSYC 1201 ou PSYC 1200 ou dans PSYC 1211 et PSYC 1221, ou l’autorisation écrite de la professeure ou du professeur.

PSYC 2481 Processus cognitifs  Cr. Hrs. 3
Une introduction aux processus langage, supérieurs dans une perspective de traitement de l’information. Les sujets abordés incluent l’attention, le développement cognitif, l’imagerie, le langage, la mémoire et la résolution de problèmes. Le cours sera basé sur de nombreuses références aux résultats expérimentaux récents. L’étudiant(e) ne peut se faire créditer à la fois le PSYC 2481 et le PSYC 2480. Préalable : une note minimale de C dans le PSYC 1200 ou le PSYC 1201 ou [une note minimale de C dans tous les deux PSYC 1211 et PSYC 1221] ou l’autorisation écrite du professeur.

PSYC 2491 Psychologie de l’anormal  Cr. Hrs. 3

PSYC 2531 Psychologie de la personnalité  Cr. Hrs. 3
Étude de la théorie et de la recherche dans les principes qui gouvernent le développement de la personnalité. On ne peut se faire créditer PSYC 2531 et aucun de PSYC 2530, l’ancien PSYC 3451, l’ancien PSYC 3450. Préalables : une note minimale de C dans PSYC 1200 ou dans l’ancien PSYC 1201 ou une note minimale de C dans PSYC 1211 et PSYC 1221, ou l’autorisation écrite de la professeure ou du professeur.

PSYC 2541 Psychologie sociale  Cr. Hrs. 3
Introduction aux façons par lesquelles nous affectons et sommes affectés par le comportement des autres. Les sujets abordés incluent typiquement : attitudes et changement d’attitudes, croyances et jugements sociaux, conformisme, persuasion, normes et rôles sociaux, dynamiques de groupes, préjugés, agression, altruisme, attraction et relations interpersonnelles ainsi que les conflits intergroupes. On ne peut se faire créditer PSYC 2541 et aucun de PSYC 2540, l’ancien PSYC 2410, l’ancien PSYC 2411, l’ancien PSYC 2420 ou l’ancien PSYC 2421. Préalables : une note minimale de C dans l’ancien PSYC 1201 ou dans PSYC 1200 ou une note minimale de C dans PSYC 1211 et PSYC 1221, ou l’autorisation écrite de la professeure ou du professeur.

PSYC 3131 Psychologie de la santé  Cr. Hrs. 3
Introduction au domaine de la psychologie de la santé. On y étudie comment les interactions complexes entre des facteurs environnementaux, psychologiques, neurologiques et immunitaires contribuent au maintien de la santé et, par conséquent, au développement des maladies. On ne peut se faire créditer PSYC 3131 et aucun de PSYC 3130, PSYC 3530 ou PSYC 3531 quand l’intitulé est “Psychologie de la santé”. Préalables : une note minimale de C dans PSYC 2451 ou PSYC 2540 ou l’ancien PSYC 2410 ou l’ancien PSYC 2411 ou l’ancien PSYC 2420 ou l’ancien PSYC 2421 ou l’autorisation écrite de la professeure ou du professeur.

PSYC 3151 Domaines d’application de la modification du comportement  Cr. Hrs. 3
Descriptions détaillées des lignes directrices pour le design, la mise en pratique et l’évaluation des méthodes de modification du comportement. Possibilité de réaliser un projet de recherche supervisé dans des domaines d’application spécifique ou de recherche fondamentale sur le comportement. On ne peut se faire créditer PSYC 3151 et aucun des PSYC 3150, l’ancien PSYC 2451, l’ancien PSYC 2450. Préalable : une note minimale de C dans PSYC 2441 ou PSYC 2440, ou l’autorisation écrite de la professeure ou du professeur.

PSYC 3311 Le développement de l’adolescent  Cr. Hrs. 3
Étude du développement psychologique normal de la puberté au stade adulte, à l’aide des résultats de recherches scientifiques. On ne peut se faire créditer PSYC 3311 et aucun des PSYC 3310, l’ancien PSYC 2311, l’ancien PSYC 2310. Préalable : une note minimale de C dans PSYC 2291 ou PSYC 2290, ou l’autorisation écrite de la professeure ou du professeur.

PSYC 3341 Design et analyse de données en recherche en psychologie  Cr. Hrs. 3

PSYC 3351 Neurosciences du comportement  Cr. Hrs. 3
Présentation des fondements de la neurobiologie du comportement. Accent mis sur les propriétés du traitement de l’information du système nerveux de façon à offrir un cadre de référence à la compréhension de
thèmes tels la perception, l'attention, le sommeil et la vigilance, la motivation et l'apprentissage. On ne peut se faire créditer PSYC 3351 et PSYC 3350, PSYC 3331 ou PSYC 3330. Préalables : une note minimale de C dans PSYC 1201 ou PSYC 1200 ou dans PSYC 1211 et PSYC 1221, ou l'autorisation écrite de la professeure ou du professeur.

PSYC 3441 Perception Cr. Hrs. 3 Survol des méthodes et des techniques qui traitent de l'interaction entre les informations sensorielles et les informations existantes au sein de l'organisme. La psychophysiologie, les constances perceptuelles, l'apprentissage perceptuel, l'adaptation et les distortions. On ne peut se faire créditer PSYC 3441 et PSYC 3160. Préalables: une note minimale de C dans PSYC 1201 ou PSYC 1200 ou dans PSYC 1211 et PSYC 1221, ou l'autorisation écrite de la professeure ou du professeur.

PSYC 3481 Psychologie des relations interculturelles et intergroupes Cr. Hrs. 3 Étude des aspects psychologiques impliqués dans les relations entre individus ou groupes d'individus issus de cultures ou sous-cultures différentes. Définition des concepts de stéréotype, de préjugé et de discrimination et exploration de leurs sources d'influence respectives. Présentation des grandes théories qui visent à expliquer les conflits interculturels et intergroupes et celles qui visent à promouvoir de bonnes relations entre cultures. Préalable : une note minimale de C dans PSYC 1201 ou PSYC 1200 ou dans PSYC 1211 et PSYC 1221, ou l'autorisation écrite de la professeure ou du professeur. On ne peut se faire créditer PSYC 3481 et INTL 4481.

PSYC 3511 Psychologie industrielle et organisationnelle Cr. Hrs. 3 Examen des modèles théoriques contemporains et de la recherche portant sur les aspects psychologiques impliqués dans le comportement en milieu de travail. Les thèmes abordés incluent la sélection du personnel, les processus de groupes, la satisfaction, la productivité et la culture organisationnelle. On ne peut se faire créditer PSYC 3511 et PSYC 3510. Préalable: [une note minimale de C dans le PSYC 1200 ou le PSYC 1201] ou [une note minimale de C dans tous les deux PSYC 1211 et PSYC 1221] ou l'autorisation écrite du professeur.

PSYC 3531 Problèmes contemporains 1 Cr. Hrs. 3 Contenu variable d'année en année, mais traitant généralement d'un sujet d'actualité concernant la psychologie ou l'analyse psychologique d'un problème d'intérêt public. On ne peut se faire créditer PSYC 3531 et PSYC 3530 quand le sujet est le même. Le contenu varie d'année en année, il est donc possible de se faire créditer ce cours plus d'une fois. Préalables: [une note minimale de C dans PSYC 1200 ou l'ancien PSYC 1201] ou [une note minimale de C dans tous les deux PSYC 1211 et PSYC 1221] ou l'autorisation écrite de la professeure ou du professeur.

PSYC 3631 Mesure et évaluation en psychologie Cr. Hrs. 3 Étude et application des principes de la mesure dans divers domaines psychologiques. Étude des concepts de validité, de constance, d'échelonnage, et de variance. Introduction à la construction et à l'utilisation de différents tests psychologiques. On ne peut se faire créditer PSYC 3631 et PSYC 3630. Préalables : une note minimale de B dans PSYC 2261 ou PSYC 2260 ou l'ancien PSYC 2300, et l'autorisation écrite de la professeure ou du professeur.

PSYC 3641 Introduction à la neuropsychologie Cr. Hrs. 3 Un survol des connaissances actuelles touchant les relations entre le cerveau et les comportements humains. Organisation du système nerveux, désordres neurologiques, effets des lésions cérébrales sur les comportements (agnosie, aphasie, apraxie, négligence, etc.) asymétrie cérébrale, applications cliniques. Préalable : une note minimale de C dans PSYC 1201 ou PSYC 1200 ou dans PSYC 1211 et PSYC 1221 ou l'autorisation écrite de la professeure ou du professeur.

Faculté des arts-Religion

RLGN 1283 Le Christianisme ancien et médiéval (A) Cr. Hrs. 3 Étude des affirmations et des pratiques chrétiennes à partir de l'histoire du christianisme dès son début jusqu'à la fin du moyen âge. On ne peut se faire créditer RLGN 1283 et l'ancien RLGN 1281.

RLGN 2413 Les religions établies au Canada (C) Cr. Hrs. 3 Un aperçu historique des institutions et groupes religieux établis avant le 19e siècle, au Canada, notant comment ceux-ci répondent aux caractéristiques spéciales de la vie canadienne. On ne peut se faire créditer RLGN 2413 et RLGN 2410 ou RLGN 2411.

RLGN 2415 Les nouvelles religions au Canada (C) Cr. Hrs. 3 Un aperçu historique et phénoménologique des nouvelles institutions et groupes religieux au Canada, visant comment ceux-ci répondent aux caractéristiques spéciales de la vie canadienne. On ne peut se faire créditer RLGN 2415 et RLGN 2410 ou RLGN 2411.

RLGN 2591 La religion et les problèmes sociaux (C) Cr. Hrs. 3 Les problèmes tels que l'ordre, la justice, la guerre, le changement social, la désobéissance civile, l'avortement et l'euthanasie seront considérés à la lumière des ressources d'une ou de plusieurs traditions religieuses. L'étudiant(e) ne peut se faire créditer à la fois le RLGN 2591 et le RLGN 2590.

RLGN 2681 Les femmes et les religions 1 (C) Cr. Hrs. 3
Le contenu de ce cours varie d’année en année. Toutefois, il traite, à travers divers modèles interprétatifs contemporains, de sujets d’intérêt courant en lien avec la compréhension et le rôle des femmes dans les différentes traditions religieuses. On ne peut pas se faire créditer RLGN 2681 et RLGN 2680.

RLGN 3131 La religion et la pensée moderne (C)        Cr. Hrs. 3
Étude des idées contenues dans certaines idéologies modernes telles que le marxisme, la théorie de l’évolution, les méthodes d’interprétation biblique, la psychologie moderne, l’athéisme et l’humanisme face à la religion. On ne peut se faire créditer à la fois le RLGN 3131 et RLGN 3251 ou RLGN 3130.

RLGN 3531 Problèmes contemporains 1 (C)        Cr. Hrs. 3
Exploration de sujets particuliers d’intérêt courant en religion, de certains aspects de méthodologie, de l’étude de la religion ou d’une analyse de certains problèmes courants d’intérêt général, du point de vue religieux. Le contenu variera d’année en année, il sera donc possible de se faire créditer ce cours plus d’une fois. On ne peut se faire créditer RLGN 3531 et RLGN 3530. Préalable : l’autorisation écrite de la professeure ou du professeur.

RLGN 3541 Problèmes contemporains 2 (C)        Cr. Hrs. 3
Exploration de sujets particuliers d’intérêt courant en religion, de certains aspects de méthodologie de l’étude de la religion ou d’une analyse de certains problèmes courants d’intérêt général du point de vue religieux. Le contenu variera d’année en année, il sera donc possible de se faire créditer ce cours plus d’une fois. On ne peut se faire créditer RLGN 3541 et RLGN 3540. Préalable : l’autorisation écrite de la professeure ou du professeur.

Faculté des arts-Sociology

SOC 1211 Introduction à la microsociologie        Cr. Hrs. 3
Introduction systématique à la perspective sociologique: points de vue théorique, méthodes et domaines de recherche. On initiera l’étudiant(e) à l’étude de la socialisation, des groupes, de la famille, de l’école, des minorités, des rôles sexuels. L’étudiant(e) qui détient les crédits du SOC 1211 ne peut se faire créditer aucun des cours SOC 1200 ou SOC 1201.

SOC 1221 Introduction à la macrosociologie        Cr. Hrs. 3
Introduction systématique à la perspective sociologique: points de vue théoriques, méthodes et domaines de recherche. Initiation à la culture, à la stratification sociale, aux mouvements sociaux, à la population, aux institutions politiques, aux différents systèmes de la société. On ne peut se faire créditer SOC 1221 et SOC 1201. Préalable : une note minimale de C dans le SOC 1211.

SOC 2221 Théories sociologiques classiques        Cr. Hrs. 3

SOC 2261 Sociologie de la ville et du milieu urbain        Cr. Hrs. 3

SOC 2291 Introduction aux méthodes de recherche        Cr. Hrs. 6
Ce cours initie l’étudiant aux méthodes quantitatives et qualitatives d’appréhension des phénomènes sociaux. Il traite des présupposés de l’enquête scientifique, de la conceptualisation des problèmes de recherche, de l’analyse statistique élémentaire et de l’utilisation d’un programme informatisé pertinent. L’étudiant(e) ne peut se faire créditer à la fois le SOC 2291 et le SOC 2290. Préalable : une note minimale de C dans le SOC 1200 ou le SOC 1201 ou [une note minimale de C dans tous les deux SOC 1211 et SOC 1221].

SOC 2311 Choix de problèmes sociaux        Cr. Hrs. 3
Analyse d’un ou de plusieurs problèmes sociaux contemporains (autres que le crime et la délinquance). On pourra examiner, par exemple, des problèmes tels que la pauvreté, la guerre, l’environnement, la consommation de drogues, la mortalité. Pour plus de détails sur le contenu du cours, consulter le guide d’inscription ou s’adresser au professeur. On ne peut se faire créditer SOC 2311 et SOC 2310. Préalable : [une note minimale de C dans SOC 1200 ou SOC 1201] ou [une note minimale de C dans tous les deux SOC 1211 et SOC 1221].

SOC 2321 La société canadienne et sa culture        Cr. Hrs. 3
Ce cours procède à une analyse sociologique des institutions canadiennes en adoptant, comme point de référence, des perspectives historiques, culturelles, économiques et politiques. L’étudiant(e) ne peut se faire créditer à la fois le SOC 2321 et le SOC 2320. Préalable : [une note minimale de C dans le SOC 1200 ou le SOC 1201] ou [une note minimale de C dans tous les deux SOC 1211 et SOC 1221].

SOC 2331 Psychosociologie        Cr. Hrs. 3
Ce cours examine la relation entre individu, groupe et société en soulignant l’interaction comme étant le processus qui donne à la vie quotidienne sa forme, sa direction et sa signification. Les sujets discutés peuvent inclure : le soi, le processus de formation de l’identité, la motivation, le contrôle des émotions. L’étudiant(e) ne peut se faire créditer à la fois le SOC 2331 et le SOC 2330. Préalable : [une note minimale de C dans le SOC 1200 ou le SOC 1201] ou [une note minimale de C dans tous les deux SOC 1211 et SOC 1221].

SOC 2371 Rapports ethniques        Cr. Hrs. 3
Une introduction aux dimensions sociologiques et socio-psychologiques des rapports ethniques au Canada. L’étudiant(e) ne peut se faire créditer à la fois le SOC 2371 et le SOC 2370. Préalable : [une note minimale de C dans le SOC 1200 ou le SOC 1201] ou [une note minimale de C dans tous les deux SOC 1211 et SOC 1221].

SOC 2391 L’organisation sociale        Cr. Hrs. 3
Étude des forces qui influencent la formation de l’ordre dans la société, son maintien et son changement, le contrôle social, le conflit de pouvoir, l’intégration. On ne peut se faire créditer SOC 2391 et SOC 2390. Préalables : une note minimale de C dans SOC 1201 ou SOC 1200 ou dans SOC 1211 et SOC 1221.

SOC 2461 La famille        Cr. Hrs. 3
Analyse sociologique des diverses formes et pratiques familiales dans les sociétés contemporaines, ainsi que de leur évolution à partir de formes plus anciennes. Sont également étudiés les rapports entre les formes familiales et le contexte social global. L’étudiant(e) ne peut se faire créditer à la fois le SOC 2461 et le SOC 2460. Préalable : [une note minimale de C dans le SOC 1200 ou le SOC 1201] ou [une note minimale de C dans tous les deux SOC 1211 et SOC 1221].

SOC 2511 Criminologie        Cr. Hrs. 3

SOC 2531 Sociologie du Manitoba        Cr. Hrs. 6

Une étude sociologique de la population du Manitoba avec un accent sur ses regroupements culturels et sa stratification sociale. Préalable: [une note minimale de C dans le SOC 1200 ou le SOC 1201] ou [une note minimale de C dans tous les deux SOC 1211 et SOC 1221].

**SOC 3331 Origines de la pensée sociologique**  
**Cr. Hrs. 3**  
Une introduction systématique à la pensée sociologique, de ses origines philosophiques jusqu’au milieu du 19e siècle. Examen de la pensée sociale qui deviendra la base de la théorie sociologique. On ne peut se faire créditer SOC 3331 et le SOC 3330. Préalable : [une note minimale de C dans SOC 1201 ou SOC 1200] ou [une note minimale de C dans SOC 1211 et SOC 1221]. Et une note minimale de C dans le SOC 1222.

**SOC 3371 Sociologie du travail**  
**Cr. Hrs. 3**  
Analyse du travail comme dimension centrale de la vie contemporaine. La transformation qu’a connu le travail dans le temps et par rapport aux changements politiques, technologiques et sociaux. L’organisation du travail du point de vue des travailleurs et des employeurs. L’impact du travail sur les individus, les institutions sociales et la société en général. On ne peut se faire créditer SOC 3371 et SOC 3370. Préalable : [une note minimale de C dans SOC 1201 ou SOC 1200] ou [une note minimale de C dans les deux SOC 1211 et SOC 1221].

**SOC 3391 Théories sociologiques contemporaines**  
**Cr. Hrs. 3**  

**SOC 3471 Sociologie politique**  
**Cr. Hrs. 3**  
Évaluation critique de la théorie et des recherches sociologiques relatives aux rapports de force dans la société. Ce cours traitera des divers aspects du pouvoir (économique, politique, idéologiques), des conflits de classe, de la socialisation, de l’origine, des fonctions et de l’évolution de l’État. L’étudiant(e) ne peut se faire créditer à la fois le SOC 3471 et le SOC 3470. Préalable : [une note minimale de C dans le SOC 1200 ou le SOC 1201] ou [une note minimale de C dans les deux SOC 1211 et SOC 1221].

**SOC 3581 Culture, médias et société**  
**Cr. Hrs. 3**  
Étude de l’influence des médias dans les sociétés contemporaines; analyse de la production, de la circulation et de la consommation de diverses formes médiatiques et de leur impact sur la vie sociale. On ne peut se faire créditer SOC 3581 et SOC 3580, SOC 3591 ou SOC 3590. Préalables : une note minimale de C dans SOC 1201 ou SOC 1200 ou dans les deux SOC 1211 et SOC 1221; SOC 2331 ou SOC 2330 est recommandé.

**SOC 3731 Société et éducation**  
**Cr. Hrs. 3**  
Un examen critique des enjeux de l’éducation et leur impact sur l’évolution de la société. On aborde des questions telles que: le curriculum; l’interaction au sein de la classe, compte tenu des caractéristiques socio-économiques des élèves (genre, ethnie, niveau de revenu et profession des parents, etc.). Le cours intéressera particulièrement les personnes qui se préparent à faire carrière en éducation. L’étudiant(e) ne peut se faire créditer à la fois le SOC 3731 et le SOC 3730. Préalable : [une note minimale de C dans le SOC 1200 ou le SOC 1201] ou [une note minimale de C dans tous les deux SOC 1211 et SOC 1221].

**SOC 3811 Sociologie de la sexualité et des rôles sexuels**  
**Cr. Hrs. 3**  
Étude exploratoire des rapports entre les hommes et les femmes dans la société contemporaine. Ce cours examine le processus de construction sociale de la sexualité et des rôles sexuels, à travers une perspective historique de comparaison entre les cultures. L’étudiant(e) ne peut se faire créditer à la fois le SOC 3811 et le SOC 3810. Préalable : [une note minimale de C dans le SOC 1200 ou le SOC 1201] ou [une note minimale de C dans tous les deux SOC 1211 et SOC 1221].

**SOC 3871 Inégalités sociales**  
**Cr. Hrs. 3**  

**Faculté des arts-Spanish**

**SPAN 1171 Introduction à l’espagnol I**  
**Cr. Hrs. 3**  
(Laboratoire requis) Ce cours est conçu pour des étudiants et des étudiantes ayant très peu ou n’ayant aucune connaissance de l’espagnol. Les étudiants et les étudiantes dont la langue maternelle est l’espagnol ou possédant des crédits d’espagnol 40 S ou l’équivalent peuvent s’inscrire à ce cours sans permission spéciale. On ne peut se faire créditer SPAN 1171 et aucun des cours suivants : SPAN 1180 ou l’ancien SPAN 1181 (ancien TRAD 1181). Ce cours n’est pas accessible aux étudiants qui ont déjà obtenu des crédits pour SPAN 1262 ou l’ancien SPAN 1260 ou SPAN 1261 (ancien TRAD 1261) ou SPAN 1272 ou l’ancien SPAN 1270 ou SPAN 1271 (ancien TRAD 1271) ou SPAN 1280 ou SPAN 1290.

**SPAN 1191 Introduction à l’espagnol II**  
**Cr. Hrs. 3**  
(Laboratoire requis) Cours destiné aux étudiants et étudiantes connaissant déjà l’alphabet et le système de sons espagnols, ayant une compréhension élémentaire de la langue et maîtrisant les bases de la communication et de l’écriture équivalentes à celles qui seraient obtenues à SPAN 1171. On ne peut se faire créditer SPAN 1191 et SPAN 1190, l’ancien SPAN 1181 (TRAD 1181) ou SPAN 1180. Cours non accessible aux étudiants et étudiantes qui ont déjà obtenu des crédits pour l’ancien SPAN 1260, l’ancien SPAN 1261 (TRAD 1261), SPAN 1262, SPAN 1263, SPAN 1270, l’ancien SPAN 1271 (TRAD 1271), SPAN 1272, SPAN 1273, SPAN 1280, SPAN 1290. Préalable : une note minimale de C dans SPAN 1171, ou l’autorisation écrite du professeur ou de la professeure.

**SPAN 1263 Espagnol intermédiaire : grammaire et conversation 1**  
**Cr. Hrs. 3**  
(Laboratoire requis) Ce cours est la première partie de l’espagnol intermédiaire. L’accent est mis sur le développement des compétences intermédiaires en lecture, écriture, expression orale et compréhension orale. Les principaux objectifs sont de renforcer les compétences de communication et de renforcer la sensibilisation sociale et culturelle du monde hispanophone. Ce cours n’est pas ouvert aux étudiants parlant couramment l’espagnol. On ne peut se faire créditer SPAN 1263 et aucun de Spanish 40S, SPAN 1262, SPAN 1280, SPAN 1290, l’ancien SPAN 1260 ou l’ancien SPAN 1261 (ancien TRAD 1261). Préalables : une note minimale de C dans les deux SPAN 1180 ou l’ancien SPAN 1181 ou l’ancien TRAD 1181 ou SPAN 1190 ou (SPAN 1171 et SPAN 1191) ou l’autorisation écrite de la professeure ou du professeur. Les étudiant(e)s ayant obtenu un crédit pour l’espagnol à l’école secondaire (40S) peuvent s’inscrire directement à ce cours.

**SPAN 1273 Espagnol intermédiaire : grammaire et conversation 2**  
**Cr. Hrs. 3**  
(Lab. requis) Ce cours est la deuxième partie de l’espagnol intermédiaire. L’accent est mis sur le développement des compétences intermédiaires en lecture, écriture, expression orale et compréhension orale. Les principaux objectifs sont de renforcer les compétences de communication et de renforcer la sensibilisation sociale et culturelle du monde hispanophone. Ce
cours n'est pas ouvert aux étudiants parlant couramment l'espagnol. On ne peut se faire créditer SPAN 1273 et aucun de SPAN 1272, SPAN 1271, SPAN 1280, SPAN 1290, l'ancien SPAN 1270, l'ancien TRAD 1271. Préalables : une note minimale de C dans SPAN 1263 ou SPAN 1262 ou l'ancien SPAN 1260 ou SPAN 1261 ou l'ancien TRAD 1261 ou l'autorisation écrite de la professeure ou du professeur.

SPAN 2361 Espagnol commercial Cr. Hrs. 3
(Ancien TRAD 2361) Initiation au vocabulaire commercial et aux techniques d'écriture dans le domaine des affaires. Accent mis sur la composition appliquée au domaine commercial: rédaction de lettres, comptes rendus d'activités ou de réunion, etc. Préalable: une note minimale de C dans SPAN 1261 (TRAD 1261), l'ancien SPAN 1260, SPAN 1280, SPAN 1290 ou SPAN 1262 ou l'autorisation écrite de la professeure ou du professeur.

SPAN 2551 Espagnol langue avancée et composition Cr. Hrs. 3
Le but de ce cours, destiné aux étudiantes et aux étudiants qui ont atteint une maîtrise de niveau intermédiaire de l'espagnol, est d'améliorer leur niveau de langue et l'habileté de leur expression écrite. On ne peut se faire créditer SPAN 2551 et SPAN 2550. Préalable: Une note minimale de C dans SPAN 1261 ou SPAN 1262 ou SPAN 1280 ou SPAN 1290 ou l'ancien SPAN 1260 ou l'ancien TRAD 1261, ou l'autorisation écrite de la professeure ou du professeur.

SPAN 2571 El espanol a través del cine hispanoamericano Cr. Hrs. 3
(Ancien TRAD 2571) Les cultures espagnole et latino-américaine à partir d'œuvres cinématographiques issues de ces cultures. Accent sur la discussion et l'expression orale. Préalable: une note minimale de C dans SPAN 1271 (TRAD 1271), SPAN 1270, SPAN 1280, SPAN 1290 ou SPAN 1272 ou l'autorisation écrite de la professeure ou du professeur.

SPAN 2573 Espagnol sujet spécial I Cr. Hrs. 3
Le contenu de ce cours varie en fonction des besoins et des intérêts des étudiants et des professeurs. La formule du tutorat peut être utilisée. Le contenu du cours varie d'année en année. Puisque les contenus varient d'année en année et que le cours se crée selon les besoins des étudiantes et des professeurs. La formule du tutorat peut être utilisée. Cours dont le contenu varie d'année en année et pouvant donc être suivi plus d'une fois. Préalable : une note minimale de C à un cours d'espagnol de niveau 2000 ou l'autorisation écrite de la professeure ou du professeur.

SPAN 3341 Grammaire et syntaxe de l'espagnol Cr. Hrs. 3
Ce cours comprend une étude approfondie et détaillée de la grammaire et de la syntaxe de l'espagnol. On ne peut se faire créditer à la fois le SPAN 3341 et aucun des cours SPAN 3340, l'ancien SPAN 3280 (044.328). Préalable: Note minimale de C ou plus dans n'importe quel d'espagnol de niveau 2000 ou le consentement par écrit du professeur.

SPAN 3461 Littérature et civilisation d'Amérique latine Cr. Hrs. 3
(Ancien TRAD 3461) Initiation aux grands auteurs d'Amérique latine, ainsi qu'aux caractères spécifiques des sociétés latino-américaines : valeurs, pratiques culturelles, mais aussi politiques, commerciales et professionnelles. Préalable : une note minimale de C dans SPAN 1261 (TRAD 1261) ou SPAN 1260.

SPAN 3561 Cours avancé d'espagnol professionnel Cr. Hrs. 3
(Ancien TRAD 3561) Pratique de la traduction de l'espagnol vers le français et vice versa, comprendre et faire fonctionner la grammaire, la syntaxe, ainsi que les nuances linguistiques propres au français et au espagnol. Préalable : une note minimale de C dans SPAN 2361 (TRAD 2361).

SPAN 3881 Violence, révolutions et dictatures dans la culture hispanophone Cr. Hrs. 3
Panne de la culture latino-américaine suivant l'histoire de la violence. On étudiera les manifestations culturelles reliées aux événements qui ont marqué l'histoire de l'Amérique latine: révolutions, guerillas, dictatures. Le contenu du cours se centre sur les manifestations des artistes et d'autres producteurs culturels vis-à-vis de la violence (apologistes ou pacifistes?). Préalable: Avoir obtenu > ou plus dans au moins un cours d'espagnol de niveau 2000 ou le consentement écrit du professeur.

Faculté des arts-Theatre

THTR 1001 Initiation à l'improvisation théâtrale Cr. Hrs. 3
Ce cours vise à initier les étudiants aux aspects fondamentaux de l'improvisation théâtrale. À ce titre, il aborde différents aspects de l'improvisation comme l'expression des sentiments et du corps, la mise en scène, le jeu à partir d'un motif, la créativité, l'écoute du public, la capacité d'attention, l'initiative, la réceptivité, la spontanéité sur scène et l'utilisation des accessoires.

THTR 1021 Introduction à l'analyse du texte théâtral Cr. Hrs. 3
Il s'agit d'une introduction à l'analyse des textes théâtraux. Ce cours vise à initier les étudiants aux aspects fondamentaux de l'improvisation théâtrale. À ce titre, il aborde différents aspects de l'improvisation comme l'expression des sentiments et du corps, la mise en scène, le jeu à partir d'un motif, la créativité, l'écoute du public, la capacité d'attention, l'initiative, la réceptivité, la spontanéité sur scène et l'utilisation des accessoires.
théorie du son, éventail de bruitages, utilisation d’effets sonores et de musique dans un spectacle, enregistrement. Enfin, ce cours se penchera sur la question de la régie: direction technique et direction de production théâtrale.

THTR 2531 Le jeu corporel
Cr. Hrs. 3
Ce cours vise à initier les étudiants aux diverses approches du corps comme langage scénique: les rapports entre le langage et le geste, les fonctions de la gestuelle dans un jeu équilibré. Il sera aussi question des rapports entre le corps et l’espace, le corps et les rythmes. Il s’agira enfin de mettre l’accent sur les grandes tendances qui se dégagent des problématiques actuelles sur les rapports entre le corps et le jeu.

THTR 2541 L'expression orale au théâtre
Cr. Hrs. 3

THTR 2551 Improvisation théâtrale
Cr. Hrs. 3
Ce cours reprend les grands principes de l’improvisation théâtrale proposés dans le THTR 1000 (Initiation à l’improvisation théâtrale), mais il les applique cette fois à nombre de thématiques, de situations et d’aspects différents du jeu improvisé. À ce titre, ce cours aborde et explore d’autres dimensions de l’improvisation théâtrale, tout en se fondant sur les acquis du cours l’improvisation de première année.

THTR 3521 Interprétation, voix et expression orale
Cr. Hrs. 3

THTR 3531 Jeu et caméra
Cr. Hrs. 3
Ce cours vise à initier les étudiants au rôle créateur de la caméra. À ce titre, les rapports entre le jeu de l’acteur et les différents types de cadrages relatifs au septième art seront abordés. En outre, il y sera question de compréhension et d’interprétation de scripts, ainsi que de nombreux aspects relatifs au jeu de l’acteur sur un plateau de tournage: scènes de combat, essayage de costumes, apprentissage d’accents étrangers, maniement d’armes, principes de jeu avec des animaux ou des doublures. Du reste, ce cours accordera une attention particulière à la question des auditions.

THTR 3541 Le jeu réaliste
Cr. Hrs. 3

THTR 3551 Clown et masques
Cr. Hrs. 3
Ce cours vise à initier les étudiants aux aspects fondamentaux de l’art du clown et du rôle des masques dans l’engagement physique au théâtre. Aussi aborde-t-il les différents aspects du jeu du clown et de la pratique de jeu masqué (théâtre antique, Commedia dell’arte), comme la gestuelle, le langage, le mouvement, l’espace, l’utilisation des accessoires et l’importance de l’intégration du clown à la formation de l’acteur.

THTR 3561 Scénographie
Cr. Hrs. 3

THTR 3571 Atelier de théâtre
Cr. Hrs. 3
Cours d’initiation à la pratique théâtrale dans son ensemble; jeu, scénographie, mise en scène. Ce cours constitue une synthèse de tous les aspects de l’art dramatique en prévision de scènes devant la salle de classe et/ou pour des invités à la fin du trimestre. Des aspects incontournables de l’art dramatique figurent au programme de ce cours: la concentration, l’écoute personnelle et collective, le monologue intérieur, la mémoire sensorielle et affective, l’analyse approfondie de scènes, la construction de personnages, le travail à l’extérieur des répétitions ainsi que le comportement lors de répétitions. Préalables: Avoir réussi l’un des deux cours consacrés à l’improvisation (THTR 1001, THTR 2551), 4 cours de 2e année et 2 cours de 3e année.

THTR 4521 Mise en scène
Cr. Hrs. 3
Ce cours vise à initier les étudiants aux principes relatifs à la mise scène. Les rapports entrent l’art de la mise en scène et certaines théories esthétiques seront abordées. également de mettre l’accent sur les grandes tendances qui se dégagent des problématiques actuelles de la mise en scène. Ce cours propose aussi une réflexion critique sur la mise en scène comme forme d’interprétation qui mène à la création théâtrale.

THTR 4531 Mise en scène II
Cr. Hrs. 3
Ce cours reprend les principes de Mise en scène 1 et les applique à la drammaturgie, à la scénographie, à différentes esthétiques historiques et au jeu de l’acteur. À ce titre, ce cours permet à l’étudiant de mieux connaître les ressources artistiques et pratiques à la disposition du metteur en scène. À travers une série de travaux pratiques et de projets, l’étudiant pourra parachever ses connaissances de la mise en scène. Tout en insistant sur les divers aspects de la mise en scène, ce cours accordera aussi une importance particulière à direction des acteurs.

THTR 4541 Jouer les genres théâtraux: comédie, tragédie et drame
Cr. Hrs. 3
Cours de synthèse dans lequel les étudiants aborderont la technique des jeux liés aux genres théâtraux: la comédie, la tragédie et le drame. À ce titre, une attention particulière sera apportée à l’action comique, tragique et dramatique sous le rapport des conflits et des renversements de situation, des rythmes vocaux (répliques, interaction entre comédiens), des didascalies, du contexte culturel des œuvres dramaturgiques et du contexte théâtral en général. Ce cours permettra aussi d’aborder la question de la composition et de l’interprétation d’un personnage, en fonction de la compréhension du texte et des techniques de jeu.

THTR 4551 Atelier de théâtre et production
Cr. Hrs. 3
L’objectif de ce cours consiste à produire une pièce de théâtre, soit une création collective, soit une ouvrage de répertoire. La contribution et l’implication des étudiant-e-s seront essentielles car ils devront prendre en charge, sous la supervision du professeur, les divers aspects d’une production théâtrale: publicité, décors, costumes, éclairages, bruitages et, dans une moindre mesure, mise en scène. À ce titre, ce cours donne l’occasion aux étudiant-e-s de mettre en pratique ce qu’ils auront appris dans d’autres cours de la Spécialisation en études théâtrales; ce qui leur permettra d’acquérir à la fois une plus grande autonomie et une expérience indispensable dans le domaine des arts de la scène.

École de traduction: Traduction-2000 Level

**TRAD 3011 Lexicologie comparée**

Étude des domaines abordés par la lexicologie et comparaison des structures lexicosémantiques de l'anglais et du français dans l'optique de la traduction. Ce cours abordera entre autres des notions telles que la contextualisation; la cocurrence; les interférences linguistiques (anglicismes, gallicismes, faux amis); et la modulation lexicale en traduction. Préalable: avoir réussi l’examen d’admission ou obtenu une note minimale de B dans FRAN 1091 et FRAN 1111.

**TRAD 3101 Analyse et résumé de textes II**

Pratique des techniques d’analyse et de résumé à partir de textes français ou anglais. La reformulation en français sera l’occasion d’un exercice intellectuel proche de la traduction. Recherches documentaires visant non seulement à l’amélioration des connaissances générales, mais aussi à l’établissement de glossaires. Préalable: une note minimale de C dans le TRAD 2101. N.B. Ce cours, obligatoire dans le cadre du baccalauréat spécialisé, ne l’est pas pour le certificat de traduction. Toutefois, si l’examen d’admission révélait des lacunes par rapport à l’analyse ou au résumé, l’étudiante ou l’étudiant pourrait devoir suivre ce cours en plus de ceux prévus pour le certificat.

**TRAD 3111 Laboratoire I**

Travaux pratiques dans des conditions semblables à celles d’un bureau de traduction (qualité du produit fini, gestion du temps, échéances, etc.). Révision des travaux par le professeur ou la professeure. Préalables : une note minimale de C dans TRAD 2101 et TRAD 3101 ou dans TRAD 3261 et TRAD 3131.

**TRAD 3121 Lexicographie comparée**

**TRAD 3131 Terminologie bilingue et documentation**

**TRAD 3141 Rédaction professionnelle comparée I**

Étude comparative de documents professionnels anglais et français afin de mettre en lumière les différences qui peuvent exister dans les méthodes de présentation ou d’expression en anglais et en français. Production de textes professionnels variés (lettres, procès-verbaux, curriculum vitae, etc.). Préalables: une note minimale de C dans les TRAD 3101 ou dans TRAD 2151, ou l’autorisation écrite du professeur ou de la professeure.

**TRAD 3261 Traduction générale (anglais-français)**

Mise en pratique des principes de traduction présentés dans le cours TRAD 2151 (Introduction à la traduction) auquel il fait suite. Textes à traduire de nature générale et portant sur divers domaines de l’actualité et de la vie professionnelle. Préalable: une note minimale de C dans le TRAD 2151.

**TRAD 3271 General Translation (French-English)**

**TRAD 3281 Sujets particuliers**

Contenu variable en fonction des besoins et des intérêts des étudiants et des professeurs. Préalable: un cours (3 crédits) de niveau 2000 avec une note minimale de C ou l’autorisation de la professeure ou du professeur.

**TRAD 3301 Culture générale II**

Diplôme professionnel dans l’une des disciplines suivantes: traduction, adapté ou spécialisé, ou une des disciplines suivantes: traduction, adapté ou spécialisé.
Cours autodidactique pluridisciplinaire. L'étudiante ou l'étudiant établit son corpus à partir d'une liste de lecture et en accord avec le ou la responsable de son programme d'étude. Préalable: une note minimale de C dans le TRAD 2301.

TRAD 4101 Mémoire de terminologie            Cr. Hrs. 3 |

TRAD 4111 Laboratoire II                    Cr. Hrs. 3 |
Travaux pratiques dans des conditions semblables à celles d'un bureau de traduction (qualité du produit fini, présentation, gestion du temps, relations interpersonnelles, etc.). Traduction des textes appartenant à des domaines de spécialité ou qui présentent un degré de difficulté plus élevé. Préalable: une note minimale de C dans TRAD 3111.

TRAD 4141 Rédition professionnelle comparée 2 Cr. Hrs. 3 |

TRAD 4231 Translation in the Social Sciences Cr. Hrs. 3 |
Révision et pratique des principes de la traduction vers l'anglais à partir de textes français appartenant au domaine des sciences sociales. Etablissement de dossiers documentaires et de fiches terminologiques bilingues. Préalable: une note minimale de C dans le TRAD 3271 et TRAD 3131.

TRAD 4241 Legal Translation                  Cr. Hrs. 3 |
Révision et pratique des principes de la traduction vers l'anglais à partir de textes français appartenant au domaine juridique. Etablissement de dossiers documentaires et de fiches terminologiques dans ces domaines. Préalable: une note minimale de C dans le TRAD 3271 et TRAD 3131.

TRAD 4251 Literary Translation              Cr. Hrs. 3 |
Révision et pratique des principes de la traduction vers l'anglais à partir de textes littéraires français. Analyse du style et des modes d'expression et recherche d'équivalences en langue d'arrivée. Préalable: une note minimale de C dans le TRAD 3271.

TRAD 4261 Initiation à l'interprétation       Cr. Hrs. 3 |

TRAD 4263 Théories de la traduction           Cr. Hrs. 3 |
Étude des courants théoriques contemporains dans le domaine de la traduction, allant des sourcistes aux ciblistes. Accent particulier mis sur les approches intermédias, qui font ressortir la place du traducteur, des institutions, etc. dans le modèle. Préalable: réussite d'au moins deux cours de traduction de niveau 3000.

TRAD 4271 Scientific and Technical Translation Cr. Hrs. 3 |
Révision et application des principes de la traduction vers l'anglais à partir de textes appartenant aux domaines scientifiques et techniques. Etablissement de dossiers documentaires et terminologiques dans ces
domaines. Préalable: une note minimale de C dans le TRAD 3271 et TRAD 3131.

**TRAD 4273 Traduction biomédicale et pharmaceutique**  
Cr. Hrs. 3  
Analyse et traduction de différents genres de textes dans le domaine biomédical et pharmaceutique. Accent mis sur les systèmes notionnels, terminologiques et phraséologiques propres au domaine et sur le développement d’une démarche d’exploitation de connaissances spécialisées. Préalable: une note minimale de C dans TRAD 3261 et TRAD 3131.

**TRAD 4281 Adaptation publicitaire**  
Cr. Hrs. 3  
Initiation à l’adaptation et à la traduction de textes publicitaires. Apprentissage des méthodes de modulation intralinguistique et interlinguistique de l’énoncé publicitaire en fonction de facteurs linguistiques, affectifs et sociaux. Préalable: une note minimale de C dans TRAD 3261 ou TRAD 3271.

**TRAD 4361 Traduction spécialisée (anglais-français)**  
Cr. Hrs. 3  
Révision et application des principes de la traduction vers le français à partir de textes pragmatiques anglais appartenant à divers domaines de spécialisation. Préalable: une note minimale de C dans le TRAD 3271 et TRAD 3131.

**TRAD 4371 Specialized Translation (French-English)**  
Cr. Hrs. 3  
Révision et application des principes de la traduction vers l’anglais de textes pragmatiques français appartenant à divers domaines de spécialisation. Préalable: une note minimale de C dans le TRAD 3271 et TRAD 3131.

**TRAD 4381 Traduction en sciences sociales (anglais-français)**  
Cr. Hrs. 3  
Familiarisation avec le langage propre aux sciences sociales et qui tient compte de méthodes de recherche et d’analyse bien définies, tant en anglais qu’en français et auquel on aura recours chaque fois que le texte de départ l’exigera, tout en enrichissant sa culture générale. Préalable: une note minimale de C dans TRAD 3261 et TRAD 3131.

**TRAD 4391 Traduction juridique (anglais-français)**  
Cr. Hrs. 3  
Révision et application des principes de la traduction vers le français de textes juridiques anglais appartenant à divers aspects du droit: textes législatifs, règlements, textes de jurisprudence, de doctrine, contrats. Préalable: une note minimale de C dans le TRAD 3261 et TRAD 3131.

**TRAD 4401 Traduction littéraire (anglais-français)**  
Cr. Hrs. 3  

**TRAD 4411 Traduction scientifique et technique (anglais-français)**  
Cr. Hrs. 3  
Révision et application des principes de la traduction vers le français à partir de textes appartenant aux domaines scientifiques et techniques. Établissement de dossiers documentaires et terminologiques dans ces domaines. Préalable: une note minimale de C dans le TRAD 3261 et TRAD 3131.

**TRAD 4421 Version commerciale et économique (anglais-français)**  
Cr. Hrs. 3  
Révision et application des principes de la traduction vers le français de textes pragmatiques spécialisés dans les domaines du commerce et de l’économie. Établissement de lexiques bilingues et enrichissement des connaissances dans ce domaine de spécialisation. Pratique de rédaction dans le style commercial. Préalable: une note minimale de C dans le TRAD 3261 et TRAD 3131.

**TRAD 4501 Initiation à la localisation**  
Cr. Hrs. 3  
Utilisation de divers outils informatiques indispensables à la localisation et à l’adaptation de logiciels pour des publics très variés. Réflexion sur le rôle du traducteur au sein de l’équipe linguistique et technique. Préalable: une note minimale de C dans TRAD 2111 et TRAD 3261 ou TRAD 3271 ou l’autorisation du professeur ou de la professeure.

**École d’administration des affaires-Accounting (ACC)**

**ACC 1101 Introduction à la comptabilité financière**  
Cr. Hrs. 3  
(Laboratoire requis) Analyse des termes, des principes et des concepts utilisés dans la préparation et la présentation d’états financiers. On ne peut se faire créditer ACC 1101 et ACC 1100.

**ACC 1111 Introduction à la comptabilité de management**  
Cr. Hrs. 3  
(Laboratoire requis) L’importance des méthodes comptables dans la gestion de l’information utilisées par la direction d’une entreprise. Préalable: ACC 1101 ou ACC 1100 avec une note minimale de D. On ne peut se faire créditer ACC 1111 et ACC 1110. Préalables ou concomitants: un de D et ECON 1201 ou ECON 1200 ou ECON 1011 ou ECON 1010 avec une note minimale de D et ECON 1021 ou ECON 1020 avec une note minimale de D.

**ACC 2011 Comptabilité intermédiaire-Actifs**  
Cr. Hrs. 3  

**ACC 2021 Comptabilité intermédiaire - Capitaux propres et passifs**  
Cr. Hrs. 3  
Cadre théorique de la comptabilité relatif aux capitaux propres avec une considération du traitement comptable des passifs à court et à long termes, régimes de retraite, locations impôts sur les bénéfices, actions, droits, etc. Modifications comptables. Préalable: ACC 2011 avec une note minimale de D.

**ACC 3031 Comptabilité avancée**  
Cr. Hrs. 3  
Société en nom collectif; consolidation; regroupements d’entreprises; états financiers consolidés; comptabilité des organismes sans but lucratif et des organismes du secteur public. Ce cours n’est pas offert à chaque année. On ne peut se faire créditer ACC 3031 et ACC 3030. Préalable: [ACC 2011 ou ACC 2010] et [ACC 2021 ou ACC 2020].

**ACC 3041 Comptabilité de coûts**  
Cr. Hrs. 3  
Utilité de la comptabilité de management et prise de décision, concepts de coûts. systèmes de coûts, budgets, contrôle budgétaire, gestion décentralisée. analyse de la performance financière. Préalable: ACC 1111.

**ACC 3051 Comptabilité fiscal**  
Cr. Hrs. 3  
**ACC 4011 Vérification**  
Cr. Hrs. 3

Étude de la philosophie et des notions de la vérification, des responsabilités légales et éthiques d'un vérificateur, des techniques de base de la vérification, y compris l'échantillonnage statistiques et l'établissement d'organigrammes, et de la vérification de gestion. Préalables: ACC 2011 ou ACC 2010 (D) et ACC 2021 ou ACC 2020 (D), ou l'autorisation du chef de département. On ne peut se faire créditer ACC 4011 et ACC 4010.

**ACC 4031 Théorie comptable**  
Cr. Hrs. 3

Évolution de la théorie comptable, processus de normalisation et influence du milieu sur son cheminement, étude des modèles de mesure des bénéfices, théorie d'agence, hypothèse de l'efficience des marchés de capitaux, etc. Contenu variable d'année en année selon les besoins des étudiantes et des étudiants, et selon la spécialité du professeur ou de la professeure. On ne peut se faire créditer le ACC 4031 et le ACC 4030. Préalables: [ACC 2011 ou ACC 2010 (D)] et [FIN 2201 ou FIN 2200(D)]. Préalable ou concomitant: ACC 2021 ou ACC 2020 (D).

**École d'administration des affaires-Actuarial Studies (ACT)**

**ACT 2321 Mathématiques financières**  
Cr. Hrs. 3

Étude de l'intérêt composé et des rentes discrètes et continues; équations de valeur, analyse de fonds; détermination de taux de rendement; construction de tables. On ne peut se faire créditer ACT 2321 et ACT 2320 et ACT 3320. Préalable: MATH 1500 ou MATH 1501 ou MATH 1520, ou l'équivalent.

**École d'administration des affaires-Entrepreneurship/Small Business (ENTR)**

**ENTR 4511 Entrepreneurship et création d'entreprises**  
Cr. Hrs. 3

Ce cours porte sur la création d'entreprise. Lancement d'une entreprise; caractéristiques de l'entrepreneur; plan d'entreprise; définition du projet; détermination du marché; fonctions administratives; problèmes particuliers au lancement d'une entreprise, aide gouvernementale. On ne peut se faire créditer ENTR 4100. Préalable: ACC 1101, ACC 1100 et MKT 2211 ou MKT 2210 (D), et [GMGT 2030 (D) ou GMGT 2061 (D) ou GMGT 2060 (D) ou (GMGT 2081 (D)) ou GMGT 2080 (D)].

**École d'administration des affaires-Finance (FIN)**

**FIN 2201 Gestion financière**  
Cr. Hrs. 3

(Laboratoire requis) Introduction aux principes de la gestion financière de l'entreprise en particulier dans le choix du financement, le choix de l'investissement et de la gestion des fonds. Préalables: ACC 1101 ou ACC 1100 avec une note minimale de D, un de MATH 1501, MATH 1520 ou MATH 1520 avec une note minimale de C, STAT 1001 ou STAT 1000 avec une note minimale de C, un de ECON 1201, ECON 1200, ECON 1011 ou ECON 1010 avec une note minimale de C et ECON 1021 ou ECON 1020 avec un note minimale de C.

**FIN 3411 Investissements**  
Cr. Hrs. 3

Introduction aux marchés de capitaux à l'efficacité des opérations de couverture, les différents concepts financiers, les modèles de fixation de prix sur les gains en capital, la théorie et la gestion de portefeuille, les options et les marchés à terme, les investissements internationaux et l'efficacité des marchés. Les étudiants apprendront les concepts financiers, manipuleront les outils et les techniques, ainsi que leur utilisation dans les prises de décision d'investissement. Les étudiants doivent avoir une bonne connaissance du logiciel Excel, les travaux du cours exigent l'analyse des données sur les fiches de calcul. On ne peut se faire créditer FIN 3411 et FIN 3410. Préalable: une note minimale de C+ dans FIN 2201 ou FIN 2200.

**FIN 3451 Finance internationale**  
Cr. Hrs. 3

Introduction à l'étude des aspects internationaux du financement d'une compagnie et des marchés internationaux de capitaux. Préalable: FIN 2201 avec une note minimale de C-.

**FIN 3481 Financement d'entreprise: Théories et pratiques**  
Cr. Hrs. 3

Ce cours a pour objectif d'approfondir la compréhension que les étudiants ont de la théorie financière et des techniques financières ainsi que de leurs applications aux politiques financières d'entreprise. Parmi les sujets étudiés, on trouvera: le coût du capital, le choix des investissements, la structure financière, les politiques de dividende, le crédit-bail, les options réelles, les fusions et acquisitions ainsi que d'autres sujets spéciaux. On ne peut se faire créditer FIN 3481 et FIN 3480. Préalable: une note minimale de C+ dans FIN 2201 ou FIN 2200.

**FIN 4401 Pratiques de gestion financière**  
Cr. Hrs. 3

Ce cours a pour but d'approfondir et de consolider la compréhension des concepts de base de finance déjà acquis aux cours d'introduction et intermédiaire, et comment appliquer ces connaissances par moyen des simulations de cas et des vraies situations d'affaires. Les grandes problèmes d'éthique, de la responsabilité sociale des entreprises, des règles de gouvernance d'entreprise, et du leadership seront aussi discutés. La pensée critique et le travail d'équipe joueront des rôles importants dans l'analyse de ces cas. On ne peut se faire créditer FIN 4401 et FIN 4400. Préalable: une note minimale de D dans FIN 3481 ou FIN 3480.

**École d'administration des affaires-General Management (GMGT)**

**GMGT 1011 Les entreprises et la société**  
Cr. Hrs. 3

Analyse de la nature, du rôle, de l'impact et de l'importance des entreprises dans la société. Les activités internes des entreprises (ex. finances, marketing, opérations) seront discutées, mais la majorité du cours étudiera les relations entre les entreprises et les parties prenantes clés dans l'environnement externe (y compris les gouvernements, les propriétaires, les clients, les communautés, les fournisseurs, et les générations à venir). Le étudiant et les étudiantes examineront les contextes institutionnels variés (ex. économiques, politico-légaux, et socioculturels) et appliqueront la pensée critique aux relations entre entreprises et la société, avec considération des modèles alternatifs de gestion. Accent sur les sujets sociaux contemporains en management (ex. le développement durable, la responsabilité sociale des entreprises). On ne peut se faire créditer à la fois GMGT 1011 et GMGT 1010.

**GMGT 2011 Business Communications and Critical Thinking**  
Cr. Hrs. 3

(3lab required) An introduction to theoretical, cultural and ethical bases of effective communication. Students will develop interpersonal, oral and written communication skills at individual, group and organizational levels and will also develop analytical, problem-solving, rhetorical and critical thinking abilities required in organizational and business settings. Recommend that GMGT 2011 be taken in their first 30 credit hours. Not to be held for credit with GMGT 2010 or GMGT 2001 or GMGT 2000.

**GMGT 2061 Management et théorie des organisations**  
Cr. Hrs. 3

Analyse des principaux concepts qui sous-tendent la formation des organisations et leur gestion interne. L'accent est mis sur l'analyse des différentes approches théoriques relatives à la théorie des organisations et au management. On ne peut se faire créditer le GMGT 2061 et GMGT 2081 ou GMGT 2031.

**GMGT 2071 Introduction au comportement organisationnel**  
Cr. Hrs. 3
Analyse de l'impact du comportement humain sur l'organisation formelle et informelle. Les sujets traités sont le leadership, les groupes de travail, les conflits au sein de l'organisation et la communication. On ne peut se faire créditer le GMGT 2071 et GMGT 2070 ou GMGT 2030.

GMGT 2081 Introduction au management et à la théorie de l'organisation Cr. Hrs. 3
Analyse des principaux concepts régissant la formation d'organisations et leur gestion interne. L'accent est mis sur l'analyse de différentes approches théoriques concernant l'organisation et sa gestion. L'étudiant(e) ne peut se faire créditer à la fois le GMGT 2080 et le GMGT 2030.

GMGT 2121 Les entreprises et le gouvernement Cr. Hrs. 3
Analyse des rapports entre le gouvernement et les entreprises au niveau de la conception, de la modification et de la mise en place des politiques gouvernementales affectant l'entreprise. Analyse des moyens dont disposent les entreprises pour influencer la prise de décision des gouvernements. Préalable: ECON 1200 ou ECON 1201 (D).

GMGT 2141 Introduction aux communications Cr. Hrs. 3
Communication orale dans le milieu des affaires. Rédaction de documents écrits venant appuyer les activités d'écoute et de parole. Apprentissage des connaissances grammaticales, syntaxiques et lexicales. Apprendre à s'exprimer en public.

GMGT 3301 Droit commercial Cr. Hrs. 3
Sommaire historique du droit, organisation des tribunaux, constitution du Canada, attributions législatives du gouvernement fédéral et des assemblées provinciales. Notions juridiques et problèmes attenants à l'organisation des entreprises, la rédaction des contrats, le mandant et le mandataire, les effets négociables, les débts et les procédures de faillite.

GMGT 3561 Séminaire en management : C r. Hrs. 3
Analyse de la gestion d'organisation: Réflexion critique sur des sujets d'actualité pertinents. L'étudiant(e) ne peut se faire créditer à la fois le GMGT 3561 et le GMGT 3560. Préalable: GMGT 2061 (D) ou GMGT 2060 (D) ou GMGT 2081 (D) ou GMGT 2080 (D) et GMGT 2071 (D) ou GMGT 2070 (D).

GMGT 3581 Éthique et responsabilité sociale Cr. Hrs. 3
Le rôle social de l'entreprise. L'environnement interne et externe de l'entreprise; les problèmes sociaux et les activités de responsabilité sociale; l'éthique professionnelle du gestionnaire contemporain, la comptabilité sociale; les groupes défavorisés; etc. On ne peut se faire créditer GMGT 3581. Préalable: GMGT 2071 ou GMGT 2070 ou et GMGT 1011 ou GMGT 1010.

GMGT 4011 Gestion stratégique des organisations Cr. Hrs. 3
Étude de la gestion stratégique de l'organisation. L'étude de ces cas permettra à l'étudiant d'intégrer les connaissances acquises en mettant l'accent sur les questions qui entourent l'élaboration des stratégies et la gestion des politiques établies. Ce cours ne sera suivi qu'à la fin du programme ou avec l'autorisation écrite du professeur ou de la professeure.

GMGT 4121 Commerce international Cr. Hrs. 3
Étude des échanges internationaux à travers les politiques économiques internationales, les ententes régionales, les tarifs commerciaux, les institutions internationales et le financement des échanges.

GMGT 4151 Gestion des organisations sans but lucratif Cr. Hrs. 3
Description et analyse de la dynamique des organismes sans but lucratif (OSBL); leur environnement spécifique, leur fonctionnement interne et leurs mdes d'intervention dans la communauté. Approfondissement de la compréhension de la spécificité du secteur tertiaire, ce qui rend apte à y intervenir efficacement soit en tant que gestionnaires, soit en tant que bénévoles. Préalables : GMGT 2061 ou GMGT 2060, GMGT 2081 ou GMGT 2080, GMGT 2071 ou GMGT 2070, HRIR 2440 ou HRIR 2441. On ne peut pas obtenir de crédits à la fois pour GMGT 4151 et GMGT 4150.

GMGT 4211 Séminaire en gestion et capitalisme Cr. Hrs. 3
Étude des institutions, des évolutions et des débats associés au capitalisme moderne et de leurs implications pour la gestion. Exploration d'autres perspectives de gestion et des interactions bidirectionnelles dans le contexte d'enjeux plus vastes. Conçus de manière à présenter une diversité de perspectives afin de ne pas en privilégier une par rapport aux autres. On ne peut se faire créditer le GMGT 4211 et le GMGT 4210. Préalables: GMGT 1011 (D) ou GMGT 1010 (D) ou GMGT 2121 (d) ou GMGT 2120 (D).

GMGT 4551 Développement d'habiletés de gestionnaire Cr. Hrs. 3
Développement de certaines habiletés nécessaires au succès professionnel. Les principaux apprentissages sont: la gestion du stress, la communication orale, la négociation, la recherche d'emploi, les techniques de créativité et d'innovation, la gestion des relations vie privée/vie professionnelle. Préalable: GMGT 2070 (D).

École d'administration des affaires-Human Resources/Industrial Relations (HRIR)

HRIR 2441 Gestion des ressources humaines 1 Cr. Hrs. 3
Introduction au système de gestion des ressources humaines. Les sujets abordés ont trait à la planification, l'analyse de postes, la formation, la gestion de la diversité, la gestion des carrières, l'évaluation du rendement, l'acquisition des ressources humaines, les modes de reconnaissance et la problématique de la gestion des ressources humaines dans un contexte en constante changement. On ne peut se faire créditer à la fois le HRIR 2441 et le HRIR 2440.

HRIR 3511 Gestion des ressources humaines 2 Cr. Hrs. 3
La planification des tâches, la structuration des rôles et du travail, la coordination et la réalisation des activités feront l'objet d'un apprentissage théorique associé au développement d'habiletés. Préalable: HRIR 2440 (D).

HRIR 3541 Gestion des équipes de travail Cr. Hrs. 3
Initiation à la gestion des équipes de travail en mettant l'accent sur les dimensions humaines et administratives du travail en équipe. Préalable: GMGT 2070 (D).

HRIR 4411 Dotation et développement des ressources humaines Cr. Hrs. 3
Le cours est une analyse approfondie et pratique des problèmes de dotation et de développement des ressources humaines au sein des organisations. À travers ce cours, les étudiant(e)s développeront leurs habiletés d'intervention dans des domaines tels que la planification des emplois, le recrutement et la sélection, l'évaluation de la performance, l'analyse des besoins de formation, l'implantation et le contrôle d'un programme de formation, etc. Préalable: HRIR 2440 (D).

HRIR 4421 Rémunération Cr. Hrs. 3
Ce cours est une analyse des principaux concepts et des systèmes de rémunération incluant: stratégie, équité salariale, compétitivité, points de rémunération individuels, incitatifs de performance, avantages sociaux, politiques gouvernementales, rôle des syndicats dans la rémunération, incidences et gestion du processus de rémunération. Préalable: HRIR 2440 (D).

HRIR 4481 La négociation collective Cr. Hrs. 3
Ce cours est une analyse des éléments et enjeux de la négociation collective et de la gestion des conventions collectives et une analyse du cadre juridiques des négociations publiques et privées. Le système canadien de relations industrielles est comparé à d'autres systèmes nationaux. Préalable: HRIR 3450 (D).

HRIR 4511 Gestion de la diversité  Cr. Hrs. 3
La gestion de la diversité du point de vue historique, social, légal et opérationnel. L'influence de la diversité de la main-d'œuvre sur les politiques, les pratiques et les procédures de l'organisation. Modèle du développement organisationnel pluraliste relié à un ensemble de systèmes sociaux. Préalable: HRIR 2440 (D).

HRIR 4521 Relations industrielles et gestion des ressources humaines comparées  Cr. Hrs. 3
Perspective internationale des relations industrielles (RI) et de la gestion des ressources humaines (GRH) par l'analyse et l'étude comparée des systèmes de relations industrielles et des pratiques de gestion des ressources humaines dans certains pays ainsi que des développements actuels. Théories et questions pertinentes à cette matière. On ne peut se faire créditer le HRIR 4521, le HRIR 4520. Préalable recommandé mais non obligatoire: le HRIR 3451.

HRIR 4531 Gestion du changement  Cr. Hrs. 3

HRIR 4541 Innovations en gestion des ressources humaines  Cr. Hrs. 3
Présentation des nouveaux courants en gestion des ressources humaines; examen de ses fondements, présentation des modèles d'implantation et en analyse critique. Préalable: HRIR 2441 (HRIR 2440).
2151 et MSCI 2150 ou ABIZ 2520. Préalables : MATH 1520 (C) ou MATH 1501 (MATH 1500) (C) ou l’équivalent. Préalable ou concomitant : STAT 1001 (STAT 1000) (D) ou (C) ou l’équivalent.

**MSCI 3401 Sciences de la gestion II**

Cr. Hrs. 3

Modèles de recherche opérationnelle utilisés dans l’analyse de problèmes de gestion. Les réseaux, les problèmes d’investissement du point de vue déterministe, la programmation dynamique, la théorie des jeux. On ne peut se faire créditer MSCI 3401 et MSCI 3400. Préalable : MSCI 2151 ou MSCI 2150, ou l’autorisation écrite de la professeure ou du professeur.

**École d'administration des affaires-Supply Chain Management Operations (OPM)**

**OPM 2601 Principes de la gestion des opérations et de la production**

Cr. Hrs. 3

Étude des notions de base en gestion des opérations et de la production, systèmes de production, conception de système, analyse et contrôle. Préalable ou concomitant : STAT 1001 ou l’équivalent.

**OPM 4611 Gestion de projets**

Cr. Hrs. 3

Étude de la gestion de projets. Définition et contexte d’application de la gestion de projets. Techniques, approches et outils de gestion d’un projet en fonction de la structure organisationnelle de l’entreprise et des contraintes de temps, de coût et de qualité. Préalable : GMGT 2081, GMGT 2080 et OPM 2601, OPM 2600.

**École d'administration des affaires-Supply Chain Management (SCM)**

**SCM 2161 Gestion de la chaîne logistique et des opérations**

Cr. Hrs. 3

Étude de la gestion de la chaîne logistique (GCL) et des opérations. Positionne la gestion des opérations comme un domaine d’étude fondamental à l’intérieur de la GCL. Se focalise sur l’approche processus et la conception de système. L’étudiant(e) qui détient les crédits du SCM 2161 ne peut se faire créditer aucun des cours OPM 2601 ou OPM 2600 ou SCM 2160.

**Faculté des sciences-Biology**

**BIOL 1001 Biologie : Les fondements de la vie**

Cr. Hrs. 3

Étude de certains principes unificateurs de la vie. Attention particulière à la biologie cellulaire, à la bioénergétique, à la division cellulaire, à la génétique et à l’évolution. Ne peut être utilisé dans un programme de majeure ou de spécialisation. On ne peut se faire créditer BIOL 1001 et BIOL 1000, BIOL 1020 ou BIOL 1021. Préalable : Mathématiques 40S ou MATH 0401 Habilités mathématiques.

**BIOL 1011 Biologie : La diversité biologique et ses interactions**

Cr. Hrs. 3

Introduction à la diversité (les procaryotes, les protistes, les champignons, les plantes et les animaux), à la forme et à la fonction des plantes et des animaux ainsi qu’aux principaux concepts de l’écologie. Ne peut être utilisé dans un programme de majeure ou de spécialisation. On ne peut se faire créditer BIOL 1011 et BIOL 1010, BIOL 1030 ou BIOL 1031. Préalable : Mathématiques 40S ou MATH 0401 Habilités mathématiques.

**BIOL 1021 Biologie I : Thèmes et Principes**

Cr. Hrs. 3

(Laboratoire requis) Les principes unificateurs à la base de la biologie dont la biologie cellulaire, la bioénergétique, la division cellulaire, la génétique et l’évolution. Pour ceux et celles qui veulent suivre un programme de sciences biologiques avec majeure ou spécialisation. On ne peut se faire créditer BIOL 1021 et BIOL 1020, BIOL 1001, BIOL 1000 ou BIOE 2590.

Préalables : Biologie 40S (ou l’équivalent), un cours de Mathématiques 40S (ou l’équivalent) et un de Chimie 40S ou Physique 40S (ou l’équivalent); ou BIOL 1001 ou BIOL 1000 avec une note minimale de C. Si BIOL 1001 (BIOL 1000) sert de préalable à BIOL 1021 (BIOL 1020), on ne peut se faire créditer BIOL 1001 et BIOL 1021 dans le cadre d’un programme.

**BIOL 1031 Biologie II : Diversité biologique, fonction et interaction**

Cr. Hrs. 3

(Laboratoire requis) Introduction à la biodiversité dont les eucaryotes, les protistes, les champignons, les plantes et les animaux, la forme et la fonction des plantes et des animaux et les principes de base de l’écologie. Pour ceux et celles qui veulent suivre un programme de sciences biologiques avec majeure ou spécialisation. On ne peut se faire créditer BIOL 1031 et BIOL 1030, BIOL 1011, BIOL 1000 ou BIOE 2590. Préalable : une note minimale de C dans BIOL 1021 ou BIOL 1020. Note : BIOL 1031 est préalable aux cours de biochimie (CHEM 2361) et aux cours plus avancés de microbiologie, et à la plupart des cours de sciences biologiques. Il prépare aussi aux études en agriculture, en sciences alimentaires, en dentisterie, en écologie humaine, en médecine, en optométrie, en pharmacie, en sciences vétérinaires, en éducation physique et en sciences.

**BIOL 1411 Anatomie du corps humain**

Cr. Hrs. 3

(Labo requis) Discussions sur la micro-anatomie et la macro-anatomie incluant les changements qui se produisent de la conception à la vieillesse. Bien que ce cours fasse partie des cours au choix dans un programme en arts ou en sciences, il ne peut rencontrer les exigences de la spécialisation ni du programme de majeure en sciences biologiques. Aucun préalable n’est requis pour ce cours mais le cours de biologie du niveau secondaire est vivement recommandé. On ne peut se faire créditer BIOL 1411 et BIOL 1410.

**BIOL 1413 Physiologie du corps humain**

Cr. Hrs. 3

(Labo requis) Ancien ZOOL 1331) Étude des fonctions de tous les systèmes ainsi que des mécanismes de normalisation homostatique. Bien que ce cours fasse partie des cours au choix dans un programme en arts ou en sciences, il ne peut rencontrer les exigences de la spécialisation ni du programme de majeure en sciences biologiques. On ne peut se faire créditer BIOL 1413 et BIOL 1412, BIOL 2411, BIOL 2412, ZOOL 2531, ZOOL 2530 ou BIOL 2421, BIOL 2420, ZOOL 2541, ZOOL 2540. Préalable : une note minimale de C dans BIOL 1411 ou BIOL 1410 (ZOOL 1320); ou une note minimale de C dans BIOL 1031 ou BIOL 1030. Ce préalable ne s’applique pas au programme de baccalauréat en sciences infirmières.

**BIOL 2201 Les invertébrés**

Cr. Hrs. 3

(Laboratoire requis) Ancien ZOOL 2601) Étude phylogénétique et biologique des invertébrés insistant sur les taxa et les groupes qui ont une importance phylogénétique particulière. On ne peut se faire créditer BIOL 2201 et BIOL 2200 (ZOOL 2601, ZOOL 2600). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030.

**BIOL 2231 L’évolution et la structure morphologique des chordés**

Cr. Hrs. 6

**BIOL 2261 Les champignons et les lichens**

Cr. Hrs. 3

(Laboratoire requis) Introduction aux champignons et aux lichens. L’accent est mis sur les groupes taxinomiques majeurs, leur organisation et leurs structures, leurs cycles de vie, leur identification et leur importance écologique générale. On ne peut se faire créditer BIOL 2261 et BIOL 2260 ou

<td>BIOL 2301 Principes d’écologie</td>
<td>Cr. Hrs. 3</td>
<td>(Laboratoire requis) (Anciens BOTN 2371, ZOOL 2371) Principes d'écologie au niveau de l'individu, de la population, de la communauté et de l'écosystème. Également offert à la Faculté de sciences de l'agriculture et de nutrition de l'Université du Manitoba sous la cote AGEC 2370. On ne peut se faire créditer BIOL 2301 et BIOL 2300 (ZOOL 2371, ZOOL 2370, BOTN 2371, BOTN 2370), AGEC 2370 ou BIOL 2390 (ZOOL 2290, BIOL 2280). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030. Préparable ou concomitant : une note minimale de D dans STAT 1001 ou STAT 1000.</td>
<td></td>
</tr>
<tr>
<td>BIOL 2381 Introduction à la toxicologie</td>
<td>Cr. Hrs. 3</td>
<td>Survol des principes généraux à la base des effets des substances toxiques sur les systèmes biologiques, tout en prenant en considération l'histoire, l'étendue et les applications de la toxicologie, les mécanismes d'action des toxines et certains types majeurs de toxines. On ne peut se faire créditer BIOL 2381 et BIOL 2380, BIOL 2382 (BOTN 2190, ZOOL 2190), ENV 2190 ou AGRI 2190. Préalables : une note minimale de C dans BIOL 1031 ou BIOL 1030 et un de CHEM 1311, CHEM 1310 ou CHEM 1320 avec une note minimale de C.</td>
<td></td>
</tr>
<tr>
<td>BIOL 2411 Physiologie du corps humain 1</td>
<td>Cr. Hrs. 3</td>
<td>(Ancien ZOOL 2531) Étude des principaux mécanismes de contrôle du corps (systèmes nerveux et endocrinien) ainsi que des systèmes musculaire et reproducteur. On ne peut se faire créditer BIOL 2411 et BIOL 2410 (ZOOL 2531, ZOOL 2530) ou BIOL 3460 (ZOOL 3530). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030 ou dans BIOL 1413 ou BIOL 1412 (ZOOL 1330) ou une note minimale de C+ dans BIOL 1001 ou BIOL 1000 et dans BIOL 1011 ou BIOL 1010.</td>
<td></td>
</tr>
<tr>
<td>BIOL 2421 Physiologie du corps humain 2</td>
<td>Cr. Hrs. 3</td>
<td>(Ancien ZOOL 2541) Étude de la régulation homéostatique par les systèmes effecteurs du corps (cardiovasculaire, respiratoire, digestif, rénal et immunitaire). On ne peut se faire créditer BIOL 2421 et BIOL 2420 (ZOOL 2541). Préalable : une note minimale de D dans BIOL 2411 ou BIOL 2410 (ZOOL 2531, ZOOL 2530) ou un D dans BIOL 3460 (ZOOL 3530), ou l’autorisation écrite de la professeure ou du professeur.</td>
<td></td>
</tr>
<tr>
<td>BIOL 2501 Génétique 1</td>
<td>Cr. Hrs. 3</td>
<td>(Laboratoire requis) (Anciens BOTN 2461) Principes de l'hérédité, de la gamétique, et des fondements cytologiques de la transmission héréditaire chez les plantes et les animaux. Concepts de dominance et d’interaction génétique, de détermination du sexe, de la transmission des caractères liés au sexe et des gènes liés, variations chromosomiques, génétique des populations et code génétique. On ne peut se faire créditer BIOL 2501 et BIOL 2500 (BOTN 2461, BOTN 2460) ou PLNT 2520. Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030. NOTE : Ce cours ne peut pas être reconnu en microbiologie (MBIO).</td>
<td></td>
</tr>
<tr>
<td>BIOL 2521 Biologie cellulaire</td>
<td>Cr. Hrs. 3</td>
<td>(Ancien ZOOL 2281) Étude de la fonction des organites cellulaires conjointement avec leur structure microscopique ou leur ultrastructure, en insistant sur l'ensemble de la vie cellulaire en tant que système dynamique. On ne peut se faire créditer BIOL 2521 et BIOL 2520 (ZOOL 2281, ZOOL 2280). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030.</td>
<td></td>
</tr>
<tr>
<td>BIOL 3291 Plantes médicinales et hallucinogènes</td>
<td>Cr. Hrs. 3</td>
<td>Survol botanique et historique des plantes médicinales, hallucinogènes et toxiques utilisées dans diverses cultures. On ne peut se faire créditer BIOL 3291 et BIOL 3290. Préalables : Minimum de 30 heures crédits universitaires ou l’autorisation écrite de la professeure ou du professeur.</td>
<td></td>
</tr>
<tr>
<td>BIOL 3301 Biologie évolutive</td>
<td>Cr. Hrs. 3</td>
<td>(Laboratoire requis) (Anciens BOTN 3001 ou ZOOL 3001) Introduction aux sujets principaux et aux méthodes de recherche en biologie évolutive. Les sujets incluent : génétique évolutive, adaptation, spéciation et reconstruction de l’histoire de l’évolution. On ne peut se faire créditer BIOL 3301 et BIOL 3300 (ZOOL 3001, ZOOL 3000, BOTN 3001, BOTN 3000). Préalables : une note minimale de C dans BIOL 2501, BIOL 2500 (BOTN 2461, BOTN 2460) ou PLNT 2520 et dans BIOL 2261, BIOL 2260 (BOTN 2210), BIOL 2360 (ZOOL 2290), BIOL 2210 (ZOO 2230), BIOL 2231 (ZOO 2501), BIOL 2201 ou BIOL 2200 (ZOO 2601, ZOO 2600) avec une note minimale de C, ou l’autorisation écrite de la professeure ou du professeur.</td>
<td></td>
</tr>
<tr>
<td>BIOL 3501 Génétique 2</td>
<td>Cr. Hrs. 3</td>
<td>(Laboratoire requis) Complément du cours d’introduction à la génétique BIOL 2501 (BOTN 2461, BOTN 2460). Présentation des divers aspects de la liaison génique et de la recombinaison génique, de la fonction de liant, de l’alléisme, des mutations et de la réparation, de l’utilisation des bactéries et des virus comme outils génétiques, des bases de la génétique du développement et de l'hérédité extranucléaire. On ne peut se faire créditer BIOL 3501 et BIOL 3500. Préalable : une note minimale de C dans un de BIOL 2501, BIOL 2500 (BOTN 2461, BOTN 2460) ou PLNT 2520. Préparable ou concomitant : un de CHEM 2371, CHEM 2370, MBIO 2371, MBIO 2370, CHEM 2780 ou MBIO 2780, ou l’autorisation écrite de la professeure ou du professeur.</td>
<td></td>
</tr>
<tr>
<td>BIOL 3561 Histologie animale comparée</td>
<td>Cr. Hrs. 3</td>
<td>(Laboratoire requis). (Ancien ZOOL 3061) Étude de l'organisation cellulaire et tissulaire des animaux, de la morphologie cellulaire, de la spécialisation, des types de tissus et de l'organisation cellulaire et tissulaire de tous les systèmes. Accent mis sur les mammifères, mais des études comparatives avec d'autres groupes animaux seront aussi incluses. On ne peut se faire créditer BIOL 3561 et BIOL 3560 (ZOOL 3061, ZOOL 3060). Préalable : une note minimale de C dans BIOL 1031 ou BIOL 1030. Préalable conseillé : un de BIOL 2210 (ZOO 2320), BIOL 2231 (ZOO 2501), BIOL 2521 ou BIOL 2520 (ZOO 2281, ZOO 2280).</td>
<td></td>
</tr>
<tr>
<td>CHEM 1301 Université I Chimie : La structure et la modélisation chimique</td>
<td>Cr. Hrs. 3</td>
<td>(Laboratoire requis) Structure et modèles atomiques et leurs applications à la chimie, y inclus une étude des états solide, liquide et gazeux des substances chimiques et des mélanges. On ne peut se faire créditer CHEM 1301 et CHEM 1300. Préalables : Mathématiques 40S (Mathématiques appliquées ou Précalcu1) et Chimie 40S (ou son équivalent), ou CHEM 0900 (P), ou CHEM 1000 avec une note minimale de B. N.B. : Ceux et celles qui s’inscrivent à CHEM 1301 et qui n’ont pas réussi CHEM 0900 doivent subir un test diagnostique durant la première semaine de cours. On conseille fortement à ceux et celles qui obtiennent moins de 60% dans ce test de suivre CHEM 0900 avant CHEM 1301. CHEM 0900 est un cours de rattrapage en chimie offert occasionnellement à l’Université du Manitoba.</td>
<td></td>
</tr>
<tr>
<td>CHEM 1311 Université I Chimie : Une introduction à la chimie physique</td>
<td>Cr. Hrs. 3</td>
<td>(Laboratoire requis) La thermochimie, la thermodynamique chimique, la cinétique chimique. On ne peut se faire créditer CHEM 1311 et CHEM 1310. Préalable : une note minimale de C dans CHEM 1301 ou CHEM 1300.</td>
<td></td>
</tr>
</tbody>
</table>
| CHEM 2211 Introduction à la chimie organique I : Structure et fonction | Cr. Hrs. 3 | (Laboratoire requis) Introduction aux concepts de réactivité organique et de liaison chez les molécules organiques. Préparation et propriétés de molécules organiques renfermant un groupe fonctionnel. On ne peut se
faire créditer CHEM 2211 et CHEM 2210 ou CHEM 1320. Préalable : une note minimale de C dans CHEM 1311 ou CHEM 1310.

**CHEM 2221 Introduction à la chimie organique II : Réactivité et synthèse** Cr. Hrs. 3

(Laboratoire requis) Introduction à la réactivité des composés organiques et à la spectroscopie organique. L’application de l’interchangeabilité des groupes fonctionnels dans les synthèses de composés. On ne peut se faire créditer CHEM 2221 et CHEM 2220. Préalable : une note minimale de C dans CHEM 2211 ou CHEM 2210.

**CHEM 2261 Introduction à la spectroscopie** Cr. Hrs. 3

(Laboratoire requis) Introduction aux principes théoriques de la spectroscopie atomique et moléculaire et leurs applications à l’étude des propriétés chimiques et physiques à l’échelle microscopique. Exploration de la spectroscopie ultraviolet et visible, de vibration, de rotation et de résonance magnétique nucléaire. On ne peut se faire créditer CHEM 2261 et CHEM 2260 (ou les anciens CHEM 2281 et CHEM 2280). Préalables : [Une note minimale de C dans CHEM 1311 ou CHEM 1310], [une note minimale de C dans un de PHYS 1031, PHYS 1070 et PHYS 1070] et [six crédits de niveau 1000 en mathématiques (de préférence Calcul), à l’exception de MATH 1191 et des anciens MATH 1010, MATH 1190, MATH 1020 ou FA 1020].

**CHEM 2361 Biochimie I : Les molécules biochimiques et une introduction à l’énergie métabolique** Cr. Hrs. 3

**CHEM 2371 Biochimie II : Catabolisme, synthèse et les voies d’information** Cr. Hrs. 3

**CHEM 2401 Chimie inorganique : Structure et applications** Cr. Hrs. 3

(Laboratoire requis) Revue de la liaison chimique, de la structure et de la réactivité à travers le tableau périodique des éléments. La revue sera illustrée par des exemples liant la chimie inorganique à la science des matériaux et à la biochimie. Pour le laboratoire, des composés inorganiques simples seront préparés et analysés. On ne peut se faire créditer CHEM 2401 et CHEM 2400, CHEM 2381 ou CHEM 2380. Préalable : une note minimale de C dans CHEM 1311 ou CHEM 1310.

**CHEM 2471 Introduction à la chimie analytique** Cr. Hrs. 3

(Laboratoire requis) Un cours de chimie analytique quantitative fournit une formation utile à presque tous les scientifiques. Ce cours outille les étudiants et étudiantes avec les principes théoriques à la base des méthodes analytiques, avec l’habileté de planifier et d’interpréter des expériences et ensuite d’interpréter les résultats. On ne peut se faire créditer CHEM 2471 et CHEM 2470. Préalables : une note minimale de C dans CHEM 1311 ou CHEM 1310 et un cours de 3 crédits de Mathématiques de niveau 1000 à l’exception de MATH 1010, MATH 1191, MATH 1190, MATH 1020 ou FA 1020.

**CHEM 3571 Chimie biophysique** Cr. Hrs. 3

Application de la chimie physique aux problèmes biologiques avec l’accent sur l’interprétation quantitative. Les sujets comprennent la cinétique enzymatique, la bioénergétique, les processus de transport ainsi que la spectroscopie. On ne peut se faire créditer CHEM 3571 et CHEM 3570. Préalables : [un de CHEM 2361, CHEM 2360, MBIO 2361 ou MBIO 2360] et [un de MATH 1501, MATH 1500, MATH 1230, MATH 1510 ou MATH 1520]. CHEM 2261 ou CHEM 2260 (ou les anciens CHEM 2281 ou CHEM 2280) est recommandé.

**CHEM 4361 Signalaisation et régulation de l’expression génétique** Cr. Hrs. 3

Biochimie de la réponse cellulaire aux stimuli externes, en mettant l’accent sur les animaux. Les récepteurs à la surface des cellules, les ligands, la signalisation au niveau, la phosphorylation, la protéolyse, la transcription et les gradients dans le tissu cellulaire. On ne peut se faire créditer CHEM 4361 et CHEM 4360. Préalable : une note minimale de C dans un de CHEM 2371, CHEM 2370, MBIO 2371 ou MBIO 2370.

**CHEM 4371 Glycobiologie et activation des protéines** Cr. Hrs. 3

Le rôle des biomolécules contenant des glucides en biochimie et leur importance dans la connaissance des maladies génétiques. L’importance de la protéolyse limitée dans l’activation des biomolécules. On ne peut se faire créditer CHEM 4371 et CHEM 4370. Préalable : une note minimale de C dans un de CHEM 2371, CHEM 2370, MBIO 2371 ou MBIO 2370.

**CHEM 4621 Biochimie des acides nucléiques** Cr. Hrs. 3

La structure des acides nucléiques, synthèse et détermination des séquences. Interactions avec les protéines et les médicaments. On ne peut se faire créditer CHEM 4621 et CHEM 4620. Préalable : une note minimale de C dans un de CHEM 2371, CHEM 2370, MBIO 2371 ou MBIO 2370.

**CHEM 4631 Biochimie des protéines** Cr. Hrs. 3

Les structures et fonctions des protéines, leurs propriétés physiques et chimiques et les méthodes utilisées pour les étudier. On ne peut se faire créditer CHEM 4631 et CHEM 4630. Préalable : une note minimale de C dans un de CHEM 2371, CHEM 2370, MBIO 2371 ou MBIO 2370.

**CHEM 4711 Projet de recherche en chimie ou biochimie** Cr. Hrs. 6

**Faculté des sciences-Computer Science**

**COMP 1011 Introduction à l’informatique I** Cr. Hrs. 3

(Laboratoire requis) Introduction à la programmation par un langage procédural évolutif. On ne peut se faire créditer COMP 1011 et COMP 1010, COMP 1013 ou COMP 1012. Préalable : n’importe quel cours de mathématiques de 1ère année ou de niveau 405, ou l’équivalent.
COMP 1013 Programmation informatique pour scientifiques et ingénieurs  
(Laboratoire requis) Une introduction à la programmation informatique propre à la résolution de problèmes en science et en génie. Les étudiants développent des algorithmes pour le traitement numérique, l'analyse statistique et les opérations sur des matrices. On ne peut se faire créditer COMP 1013 et aucun des COMP 1012, COMP 1010, COMP 1011. Préalables : Mathématiques 40S (précalcul) ou l'ancien Mathématiques 40S (300). Concomitant : MATH 1500 ou MATH 1501 (ou équivalent).

COMP 1021 Introduction à l'informatique II  
(Laboratoire requis) Introduction à la programmation orientée objet, aux structures de données informatiques et à l'algorithme. On ne peut se faire créditer COMP 1021 et COMP 1020. Préalable : [Une note minimale de C dans un de COMP 1011, COMP 1010, COMP 1013 ou COMP 1012] ou [Informatique 40S (75%) et n’importe quel cours de mathématiques de 12e année ou de niveau 40S, ou l’équivalent].

COMP 1261 Introduction aux services informatiques modernes I  
Le traitement de texte, les chiffriers, les systèmes pour la gestion de données et le traitement graphique. Aucune connaissance préalable en informatique n’est nécessaire. On ne peut s’y inscrire si on est inscrit à un programme de majeure ou de spécialisation en informatique.

COMP 2191 Introduction au calcul scientifique  
Informatique appliquée présentant des concepts tels que l’approximation par polynômes, la résolution d’équations non linéaires, les systèmes linéaires, la simulation et la géométrie analytique. On ne peut se faire créditer COMP 2191 et COMP 2190. Préalables : [une note minimale de C dans un de COMP 1021, COMP 1020, COMP 1013 ou COMP 1012] et [une note minimale de C dans un de MATH 1230, MATH 1501, MATH 1500, MATH 1510, MATH 1520 ou MATH 1690]. Préalable ou concomitant : un de MATH 1220, MATH 1301, MATH 1300 ou MATH 1310.

Faculté des sciences - Mathematics

MATH 0401 Habiletés mathématiques  
(Laboratoire requis) Cours conçu principalement, mais non exclusivement, en fonction des besoins d’étudiants et d’étudiantes se préparant à suivre des cours d’informatique, de mathématiques, de statistiques ou de physique de niveau universitaire, sans avoir réussi le préalable normal, Mathématiques 40S. Apprentissage de l’application des outils mathématiques à des situations élémentaires, puis computationnellement plus compliquées. Leçons magistrales comportant la révision des concepts fondamentaux, des exemples, des résolutions de problèmes pratiques, des applications et de la rétroaction. Cours ne comportant aucun crédit universitaire; non conçu pour remplacer Mathématiques 40S (pré-calcul) comme condition d’admission à l’Université du Manitoba ou l’Université de Saint-Boniface, mais servant de préalable alternatif lors de l’inscription à certains cours de niveau 1000; un résultat de C (60%) est requis dans MATH 0401.

MATH 1191 Sujets choisis en mathématiques  
Cours offrant aux étudiants et aux étudiantes de diverses facultés un aperçu des mathématiques modernes. Sujets à l’étude tirés des systèmes de nombres, de la géométrie et de la combinatorie. Cours terminal et ne pouvant être reconnu comme préalable à aucun autre cours universitaire en mathématiques. Ne peut pas être reconnu aux fins d’un programme spécialisé ou général, majeure ou mineure en sciences mathématiques. Sont exclus ceux qui ont obtenu une note de C ou plus dans un cours de mathématiques, à l’exception de MATH 1010 ou MATH 1020 (FA 1020). Seul concomitant en mathématiques : MATH 1010 ou MATH 1020 (FA 1020). Aucun préalable.

MATH 1211 Techniques d’algèbre classique et linéaire  
(Laboratoire requis) Introduit une variété de concepts algébriques pratiques et d’outils nécessaires pour l’étude du calcul et des mathématiques avancées de l’ingénieur. L’emphase est mise sur le développement d’une méthodologie et d’outils algébriques nécessaires pour la réussite d’études plus avancées dans les mathématiques de l’ingénieur. Ce cours s’adresse uniquement aux étudiants en génie et en géophysique. On ne peut se faire créditer MATH 1211 et aucun de MATH 1210, MATH 1200, MATH 1201, MATH 1300, MATH 1301, MATH 1310. Préalable : une note minimale de 60% dans Mathématiques 40S (précalcul) ou l’ancien Mathématiques 40S (300) ou une note minimale de 60% dans le cours Mathematical Skills offert par la Extended Education Division de l'Université du Manitoba ou le cours MATH 0401. Habiletés mathématiques offert à l'Université de Saint-Boniface.

MATH 1241 Éléments de mathématiques discrètes  
(Laboratoire requis) Introduction aux mathématiques discrètes, parfois appelées mathématiques finies, qui sont l’étude des structures mathématiques où la notion de continuité n’est pas exigée : l'induction mathématique, l’arithmétique modulaire, la logique mathématique élémentaire, l’algèbre de Boole, la théorie élémentaire des ensembles, la notation fonctionnelle, les bases de la théorie des graphes, les techniques de dénombrement. On ne peut se faire créditer MATH 1241 et MATH 1240 (ou l’ancien MATH 3120). Préalable : [une note minimale de 60% en MATH 40S pré-calcul (ou l’ancien MATH 40S (300))] ou [une note minimale de C dans MATH 1240 ou dans le cours Mathematical Skills offert à l’Extended Education de l’Université du Manitoba].

MATH 1301 Géométrie vectorielle et algèbre linéaire  
(Laboratoire requis) Introduction aux vecteurs, aux matrices, aux systèmes d’équations linéaires et à la géométrie à trois dimensions. On ne peut se faire créditer MATH 1301 et MATH 1211, MATH 1210, MATH 1220, MATH 1300 ou MATH 1310 (ou l’ancien MATH 1680). Préalable : [une note minimale de 60 % dans Mathématiques 40S (pré-calcul) ou l’ancien Mathématiques 40S (300)] ou [une note minimale de C dans MATH 0401 ou MSKL 100 offert par la Extended Education de l’Université du Manitoba].

MATH 1501 Introduction au calcul  
(Laboratoire requis) Différentiation et intégration des fonctions élémentaires avec application à la théorie des extrêmes, aux taux de changements ainsi qu’aux aires et aux volumes. On ne peut se faire créditer MATH 1501 et MATH 1230, MATH 1500, MATH 1510, MATH 1520 ou MATH 1690 (ou les anciens MATH 1530, MATH 1680). Préalable : [une note minimale de 60 % dans Mathématiques 40S (pré-calcul) ou l’ancien Mathématiques 40S (300)] ou [une note minimale de C dans MATH 0401 ou MSKL 100 offert par la Extended Education de l’Université du Manitoba].

MATH 1701 Calcul II  
(Laboratoire requis) Théories et techniques d’intégration, tracés de courbes, calculs de volume, de longueurs d’arc, d’aires et des dérivées partielles. On ne peut se faire créditer MATH 1701 et MATH 1232, MATH 1690, MATH 1700 ou MATH 1710. Préalable : Une note minimale de C dans un de MATH 1230, MATH 1501, MATH 1500, MATH 1510, MATH 1520 (ou les anciens MATH 1530, MATH 1680).

MATH 2021 Algèbre 1  
(Laboratoire requis) Ce cours est destiné aux étudiants et aux étudiantes dans des disciplines riches en mathématiques. Groupes, anneaux, corps : concepts élémentaires et exemples. On ne peut se faire créditer MATH 2021 et MATH 2020 (ou l’ancien MATH 3350). Préalable : [une note minimale de C dans MATH 2091 ou MATH 2090 (ou l’ancien MATH 2352)] ou [une note minimale de B dans l’ancien MATH 2301 (ou l’ancien MATH 2300)].
Laboratoire requis). Introduction à la combinatoire, incluant les principes de base de dénombrement, les permutations et combinaisons, l’énumération, le principe d’inclusion-exclusion, le principe du pigeonnier, les solutions de récurrences simples, les relations, et les dérangements. On ne peut se faire créditer MATH 2031 et MATH 2030 (ou les anciens MATH 2451, MATH 2450, MATH 3400). Préalable : une note minimale de C en MATH 1241 ou MATH 1240 (ou un des anciens MATH 2202 ou MATH 2352).

MATH 2071 Théorie des graphes 1  Cr. Hrs. 3
(Laboratoire requis) Introduction aux graphes, digraphes et multigraphes. Les sujets comprennent les arbres, les cycles, les circuits, les graphes planaires, les algorithmes élémentaires et les applications des graphes aux sciences sociales et physiques. On ne peut se faire créditer MATH 2071 et MATH 2070 (ou l’ancien MATH 2400) ou COMP 4340. Préalables : [une note minimale de C dans MATH 1241 ou MATH 1240 et [une note minimale de C dans MATH 1220 ou (une note minimale de B dans MATH 1301 ou MATH 1300)].

MATH 2081 Introduction à l’analyse  Cr. Hrs. 3
(Laboratoire requis) Ce cours est destiné aux étudiantes et aux étudiants dans des disciplines riches en mathématiques. Propriétés fondamentales du système de nombres réels en tant que corps ordonné complet, propriété archimédienne, existence de racines carrées, densité des nombres rationnels, non-dénombrabilité des nombres réels, suites, sous suites, théorèmes sur les limites, monotonicité, théorème de Bolzano-Weierstrass, suites de Cauchy, traitement rigoureux des limites, continuité des fonctions à une ou plusieurs variables, continuité uniforme et applications. On ne peut se faire créditer MATH 2081 et MATH 2080 (ou l’ancien MATH 2202). Préalables : [une note minimale de C dans MATH 1232 ou MATH 1690] ou [une note minimale de B dans un de MATH 1701, MATH 1700 ou MATH 1710)] et [une note minimale de C dans MATH 1220] ou [une note minimale de B dans MATH 1301 ou MATH 1300)] et [une note minimale de C dans MATH 1241 ou MATH 1240].

MATH 2091 Algèbre linéaire 2  Cr. Hrs. 3
(Laboratoire requis) Ce cours est destiné aux étudiantes et aux étudiants dans des disciplines riches en mathématiques. Espaces vectoriels abstraits, représentations matricielles, orthogonalisation, diagonalisation, théorème des axes principaux. On ne peut se faire créditer MATH 2091 et MATH 2090 (ou les anciens MATH 2301, MATH 2300, MATH 2352). Préalable : [une note minimale de C dans MATH 1220 ou (une note minimale de B dans MATH 1301 ou MATH 1300)] et [une note minimale de C dans MATH 1241 ou MATH 1240].

MATH 2151 Calcul à plusieurs variables  Cr. Hrs. 3
(Laboratoire requis) Ce cours est destiné aux étudiantes et aux étudiants dans des disciplines riches en mathématiques. Introduction aux fonctions à plusieurs variables des points de vue algébrique et géométrique telles qu’on les retrouve dans le calcul des courbes et surfaces de niveaux, les dérivations partielles et le calcul du gradient, de la divergence et du rotationnel. On aborde aussi les problèmes de Min/Max, le calcul des intégrales doubles, triples, curvilignes et de surfaces, les fonctions vectorielles, les champs de vecteurs et leurs applications ainsi que les théorèmes de Green, de Stokes et de la divergence. On ne peut se faire créditer MATH 2151 et MATH 2150, MATH 2720, MATH 2721, (ou l’ancien MATH 2750). Préalable : une note minimale de C dans MATH 2081 ou MATH 2080 (ou l’ancien MATH 2202).

MATH 2161 Analyse numérique 1  Cr. Hrs. 3
(Laboratoire requis) Techniques élémentaires de résolutions numériques des équations linéaires et non-linéaires : techniques des différences finies, techniques d’interpolation, techniques de dérivation et d’intégration numériques. On ne peut se faire créditer MATH 2161 et MATH 2160 ou MATH 2120 (ou les anciens MATH 2601, MATH 2600). Préalables : [une note minimale de C dans MATH 1232 ou MATH 1690] ou [une note minimale de B dans un de MATH 1701, MATH 1700, MATH 1710)] et [une note minimale de C dans MATH 1220 ou (une note minimale de B dans MATH 1301 ou MATH 1300)].

MATH 2301 Algèbre linéaire II  Cr. Hrs. 3
Suite de MATH 1301. Espaces vectoriels à dimensions finies; transformations linéaires et matrices; vecteurs réels et valeurs réelles. La diagonalisation et ses applications. Espaces avec produits scalaires. On ne peut se faire créditer MATH 2301 et MATH 2300, l’ancien MATH 2350, MATH 2352 ou MATH 3130. Préalables : [une note minimale de C dans MATH 1301, MATH 1300 ou MATH 1310, et un de MATH 1501, MATH 1500, MATH 1510, MATH 1520, MATH 1530 ou MATH 1690].

MATH 2311 Géométrie euclidienne et non euclidienne  Cr. Hrs. 3
(Laboratoire requis) Les axiomes d’Euclide, la géométrie des triangles et des cercles, les transformations du plan, les constructions avec règle et compas, la puissance d’un point et l’axe radical, la division et les faisceaux harmoniques, l’inversion et les problèmes d’Apollonius. Introduction aux axiomes d’Hilbert, à la géométrie projective et aux géométries non euclidiennes. On ne peut se faire créditer MATH 2311 et les anciens MATH 2551, MATH 2550 ou MATH 2552. Préalable : [une note minimale de C dans MATH 1301 ou MATH 1300] ou [une note minimale de C dans MATH 1220].

MATH 2451 Mathématiques combinatoires  Cr. Hrs. 6
Introduction à certains sujets d’intérêt courant en mathématiques combinatoires : les techniques d’énumération, les graphiques, les dessins de blocs et les généralisations, les récurrences linéaires. On ne peut se faire créditer MATH 2451 et MATH 2450. Préalables : [une note minimale de C dans un de MATH 1241 ou MATH 1240 ou MATH 1241 ou MATH 1240 ou MATH 1240].

MATH 2501 Introduction à la théorie des nombres  Cr. Hrs. 3
Étude de la divisibilité, de la factorisation unique, des congruences linéaire et quadratique et du théorème de Fermat. On ne peut se faire créditer MATH 2501 et MATH 2500. Préalable : [une note minimale de C dans un de MATH 1220 ou MATH 1241 ou MATH 1240].

MATH 2551 Géométrie moderne  Cr. Hrs. 6
Approche moderne à la géométrie à l’aide de transformations géométriques. Sujets variés, tels isométries, symétries, similarités, inversion circulaire et groupes. On ne peut se faire créditer MATH 2551 et MATH 2550. Préalables : [une note minimale de C dans MATH 1690 ou un de MATH 1501, MATH 1500, MATH 1510, MATH 1520, MATH 1530; aussi, un de MATH 1301, MATH 1300, MATH 1310, MATH 1701, MATH 1700, MATH 1710 ou MATH 1720].

MATH 2601 Mathématiques numériques  I  Cr. Hrs. 3
Techniques élémentaires de solution numérique de problèmes mathématiques : solution d’équation; différences finies; interpolation, systèmes d’équations; différentiation numérique; intégration numérique. On ne peut se faire créditer le MATH 2601 et le MATH 2600, MATH 2120. Préalables : [MATH 1301 ou MATH 1300 ou MATH 1310, MATH 1690, MATH 1701 ou MATH 1700, MATH 1710, et COMP 1011 ou COMP 1010 ou son équivalent, ou l’autorisation écrite du professeur.

MATH 2701 Calcul III A  Cr. Hrs. 3

Calculus of multiple variables. One cannot receive credit for MATH 2701 and MATH 2751. Prerequisites: MATH 1301 or MATH 1311 and any of MATH 1691, MATH 1701, MATH 1711 or MATH 1731.

**MATH 2711 Calcul III B**  
Cr. Hrs. 3

Analysis, suites and series. One cannot receive credit for MATH 2711 and MATH 2751. Prerequisite: one of MATH 1690, MATH 1701, MATH 1711 or MATH 1731 and any of MATH 1201 or MATH 2201. Co-concurrent: MATH 1301 or the MATH 1311.

**MATH 2721 Calcul à plusieurs variables**  
Cr. Hrs. 3

Calculus differential et intégral à plusieurs variables. One cannot receive credit MATH 2721 and MATH 2720, MATH 2151, MATH 2150 or MATH 2130 (or the ancients MATH 2751, MATH 2750, MATH 2110). Prerequisites: (one note minimale of C in one of MATH 1301, MATH 1300, MATH 1220 or MATH 1310) and one of MATH 1701, MATH 1700, MATH 1232, MATH 1690, MATH 1710, or the ancien MATH 1730).

**MATH 2801 Équations différentielles ordinaires et leurs applications**  
Cr. Hrs. 3

Introduction to the theory of differential equations. Techniques of practical solutions, mainly in the form of equations of the first order and the higher order of equations linear. Introduction to the solution techniques, primarily in the first order and linear equations of higher. One cannot receive credit MATH 3331 and MATH 3330. Prerequisite: one note minimale of C in MATH 2091 or MATH 2090 (or the ancients MATH 2301, MATH 2300, MATH 2352) or the permission of the professor or the professor.

**MATH 3361 Combinatoire 2**  
Cr. Hrs. 3

Advanced combinatorics, including functions generating theory, elementary theory of the concept, recurrences, chains and antichains, enumeration of Polya. This course is exigent and addresses to students and students in the discipline rich in mathematics. One cannot receive credit MATH 3361 and MATH 3360 (or the ancien MATH 4400). Prerequisite: one note minimale of C in MATH 2031 or MATH 2030 (or the ancien MATH 3400).

**MATH 3821 Introduction à la modélisation mathématique**  
Cr. Hrs. 3

Introduction to the principles and techniques in the design, development, the resolution, the experimentalization and the revision of models of mathematical phenomena of the "real world", to the aid of studies of cases. One cannot receive credit MATH 3821 and MATH 3820. Prerequisites: MATH 2600 or MATH 2601, plus MATH 2800 or MATH 2801 (C). Prerequisite or concomitant: STAT 1001 or STAT 1000.

**MATH 3911 Sujets choisis en mathématiques 1**  
Cr. Hrs. 3

Subject of interest in mathematics or in mathematics applied, according to the needs and interests of the students and students and of the professor or professor, including especially subjects specialized not ordered in the other courses offered by the sector. Prerequisite: the permission of the professor or professor.

**MATH 4921 Sujets choisis en mathématiques**  
Cr. Hrs. 3

Sujet of interest courant in mathematics or in mathematics applied, according to the needs and interests of the students and professors, including especially subjects specialized non available in the other courses offered by the sector. Prerequisite: authorization by the head of the sector of the sciences mathematics. The student(e) cannot receive credit for the MATH 4921 and the MATH 4920.

**Faculté des sciences-Microbiology**

**MBIO 1011 Microbiologie I**  
Cr. Hrs. 3

(Laboratory requirement) Definition and historical of microbiology, the concepts practical of microbiology, of the structure of the different prokaryotes, of the expression of genes specific to the prokaryotes, the transfer of the genetic information, the role of the microbes in the environment including the human body, as well as applications of microbiology in the production of food and in biotechnology. One cannot receive credit MBIO 1011 and MBIO 1010, MBIO 2101, MBIO 2100, MBIO 2111 or MBIO 2110. Prerequisite: one note minimale of C in BIOL 1021 or BIOL 1020.

**MBIO 2021 Microbiologie II**  
Cr. Hrs. 3

(Laboratory requirement) Study of bacterial growth, the duplication of the ADN, of the processes of transcription and of the deduction as well as their roles in the regulation of the genetic expression. Presentation of the families of bacteria and viruses, their modes of reproduction, of their methods of infection. Introduction to the mutations and the transfer of genetic bacteria. One cannot receive credit MBIO 2021 and MBIO 2020, MBIO 2111 or MBIO 2110. Prerequisites: one note minimale of C in MBIO 1011 or MBIO 1010 and in any of CHEM 1311, CHEM 1310 or CHEM 1320.

**MBIO 2361 Biochimie I : Les molécules biochimiques et une introduction à l’énergie métabolique**  
Cr. Hrs. 3

(Laboratory requirement) Introduction to different types of molecules encountered in biochemistry, as well as the concept of energy metabolism as product of catabolism necessary to the biosynthesis. Also offered by the Department of chemistry under the code CHEM 2361. One cannot receive credit MBIO 2361 and MBIO 2360, MBIO 2770, CHEM 2361, CHEM 2360, CHEM 2770 or CHEM 2860. Prerequisites: one note minimale of C in CHEM 1311 or CHEM 1310 and one note minimale of C in any of BIOL 1031 or BIOL 1030. N.B.: MBIO 2361 cannot receive credit for any of the 12 credits required for the students and the students inscribed to Université 1 from 2007-2008. For the people who follow the new regulations of the baccalauréat général (2008-2009), MBIO 2361 can receive credit of 18 credits of chemistry or of microbiology of level advanced.

**MBIO 2371 Biochimie II : Catabolisme, synthèse et les voies d’information**  
Cr. Hrs. 3

(Laboratory requirement) Introduction to the metabolic processes cellular of base including the production and utilization of energy metabolism, the degradation and synthesis of molecules biochimiques, the synthesis of the ADN, of the ARN and of the proteins and the regulation of these processes. Also offered by the Department of chemistry under the code CHEM 2371. One cannot receive credit MBIO 2371 and MBIO 2370, MBIO 2780, CHEM 2371, CHEM 2370, or CHEM 2780. Prerequisites: one note minimale of C in any of MBIO 2361, MBIO 2360, CHEM 2361 or CHEM 2360 and in any of CHEM 2211 or CHEM 2210. N.B.: MBIO 2371 cannot receive credit for any of the 12 credits required for the students and the students inscribed to Université 1 from 2007-2008. For the people who follow the new regulations of the baccalauréat général (2008-2009), MBIO 2371 can receive credit of 18 credits of chemistry or of microbiology of level advanced.

**MBIO 3011 Mécanismes des maladies microbiennes**  
Cr. Hrs. 3

Study of host-parasite relationships. Introduction to the immune response, to the pathogenesis of microbe, of the viral maladies, to the microbiology

**MBIO 3031 Microbiologie III**

(Laboratoire requis) Introduction à la croissance microbienne et aux approches génomiques utilisées pour l'analyse du métabolisme microbien. En utilisant ces outils, la physiologie de la paroi cellulaire microbienne, le transport, la mobilité ainsi que le métabolisme microbien en relation avec la production d’ATP, la respiration, la fermentation et la fixation du carbone seront discutés. On ne peut se faire créditer MBIO 3031 et MBIO 3030, MBIO 2101 ou MBIO 2100. Préalables : une note minimale de C dans MBIO 2021 ou MBIO 2020 ou l’autorisation de la professeure ou du professeur et une note minimale de C dans un de MBIO 2371, MBIO 2370, CHEM 2371 ou CHEM 2370.

**MBIO 3411 Biologie moléculaire**

Traitement rigoureux des bases de la biologie moléculaire moderne reliées à la maladie moléculaire, aux manipulations génétiques et cellulaires, ainsi qu’aux contrôles cellulaires. On ne peut se faire créditer MBIO 3411 et MBIO 3410. Préalables : une note minimale de C dans un de MBIO 2371, MBIO 2370, CHEM 2371, CHEM 2370, MBIO 2780 ou CHEM 2780 et un des cours suivants (avec une note minimale de C) : MBIO 2021, MBIO 2020 (MBIO 2111, MBIO 2110), BIOL 2521, BIOL 2520 (ZOOL 2281, ZOOL 2280), BIOL 2501 ou BIOL 2500 (BOTN 2461, BOTN 2460).

**MBIO 3451 Régulation des processus biochimiques**

Mécanismes de régulation de l’activité enzymatique, incluant l’allostérie, le contrôle de certaines routes biosynthétiques ou dégradatives sélectionnées, ainsi que la régulation de l’expression génétique. On ne peut se faire créditer MBIO 3451 et MBIO 3450. Préalables : une note minimale de C dans MBIO 2021 ou MBIO 2020 (MBIO 2111, MBIO 2110) ou l’autorisation écrite de la professeure ou du professeur. MBIO 3031 ou MBIO 3030 est recommandé.

**MBIO 3461 Biochimie membranaire et cellulaire**

(Laboratoire requis) Isolement, fractionnement, structure et fonction des membranes cellulaires et des composés subcellulaires. Mise en évidence du rôle central joué par ces éléments dans la biochimie des processus cellulaires. On ne peut se faire créditer MBIO 3461 et MBIO 3460. Préalable : une note minimale de C dans un de MBIO 2371, MBIO 2370, CHEM 2371 ou ChEM 2370.

**MBIO 3981 Stage professionnel 1**

Stage professionnel dans une entreprise, une industrie ou une agence gouvernementale pour les étudiantes et étudiants inscrits au programme coopératif de la majeure conjointe en microbiologie et en biochimie. La rédaction d’un rapport final, résumant le travail accompli durant le stage de quatre mois, est exigée. Note : réussite ou échec. Préalable : une note minimale de C dans MBIO 2370, MBIO 2371, CHEM 2370 ou CHEM 2371.

**MBIO 3991 Stage professionnel 2**

Stage professionnel dans une entreprise, une industrie ou une agence gouvernementale pour les étudiantes et étudiants inscrits au programme coopératif de la majeure conjointe en microbiologie et en biochimie. La rédaction d’un rapport final, résumant le travail accompli durant le stage de quatre mois, est exigée. Note : réussite ou échec.

**MBIO 4011 Immunologie**

**MBIO 4411 Virologie**

Analyse détaillée des propriétés fondamentales des virus, de la taxonomie virale ainsi que des façons dont les virus se reproduisent. Examen des méthodes expérimentales utilisées en virologie et des façons dont les virus provoquent des maladies. On ne peut se faire créditer MBIO 4411 et MBIO 4410 ou MMIC 7010. Préalables : une note minimale de C dans MBIO 3011 ou MBIO 3010 et dans MBIO 3411 ou MBIO 3410.

**MBIO 4531 Projet de recherche en microbiologie**

Projet de recherche choisi en consultation avec l’administrateur du cours ou un superviseur approprié de la Faculté. Un rapport écrit à mi-parcours et un rapport oral et écrit à la fin du projet sont exigés. Cours offert uniquement aux étudiantes et étudiants dans leur dernière année du programme de majeure conjointe en biochimie-microbiologie, d’un programme spécialisé en microbiologie, ou d’un programme en génétique. On ne peut se faire créditer MBIO 4531 et MBIO 4530, CHEM 4711 ou CHEM 4710.

**MBIO 4541 Transduction de l’énergie biologique**

**MBIO 4581 Technologie de l’ADN recombinant**

Techniques d’isolement de plasmides, la digestion de l’ADN par les enzymes (endonucléases) de restriction, le clonage, la détermination de la séquence des nucléotides dans l’ADN, la transformation de l’ADN, le transfert de gènes. On ne peut se faire créditer MBIO 4581 et MBIO 4570. Préalable : une note minimale de C dans MBIO 3411 ou MBIO 3410.

**MBIO 4601 Génétique moléculaire des procaryotes**

(Laboratoire requis) Étude détaillée de la réplication, de l’expression, de la mutagénèse et de la réparation de l’ADN ainsi que des éléments génétiques transposables des bactéries et des virus. On ne peut se faire créditer MBIO 4601 et MBIO 4602. Préalables : une note minimale de C dans MBIO 2021 ou MBIO 2020 (MBIO 2111, MBIO 2110) et une note minimale de C dans un de MBIO 2371, MBIO 2370, CHEM 2371 ou CHEM 2370. BIOL 2501 ou BIOL 2500 (BOTN 2461, BOTN 2460) est recommandé.

**MBIO 4981 Stage professionnel 3**

Stage professionnel dans une entreprise, une industrie ou une agence gouvernementale pour les étudiantes et étudiants inscrits au programme coopératif de la majeure conjointe en microbiologie et en biochimie. La rédaction d’un rapport final, résumant le travail accompli durant le stage de quatre mois, est exigée. Note : réussite ou échec.

**MBIO 4991 Stage professionnel 4**

Stage professionnel dans une entreprise, une industrie ou une agence gouvernementale pour les étudiantes et étudiants inscrits au programme coopératif de la majeure conjointe en microbiologie et en biochimie. La rédaction d’un rapport final, résumant le travail accompli durant le stage de quatre mois, est exigée. Note : réussite ou échec.

**Faculté des sciences-Physics**
** PHYS 1021 Physique générale I **  
(Laboratoire requis) Initiation à la physique ne requiert pas de calcul et traitant de certains thèmes tirés de la mécanique et de la thermodynamique avec des exemples tirés des sciences biologiques et physiques. Ce cours, de même que le PHYS 1031, est particulièrement conseillé aux étudiants désireux d’avoir une vue d’ensemble de la physique ou qui ont l’intention d’entreprendre des études dans les sciences de la santé. Il peut aussi servir comme cours de base pour un programme de spécialisation en physique ("B+" ou mieux) ou de majeure en physique ("B" ou mieux). On ne peut se faire créditer PHYS 1021 et PHYS 1020, PHYS 1050, PHYS 1051, PHYS 1410, ou PHYS 1420. Préalables: Physique 40S, PHYS 0900 ou l’équivalent, et Mathématiques précalculus 40S, Mathématiques appliquées 40S (70%) ou l’équivalent. Il est fortement recommandé aux étudiants d’obtenir une note de 70% dans les cours de pré-calculus 40S et de PHYS 40S.  

** PHYS 1031 Physique générale II **  
(Laboratoire requis) Découvrez comment la physique est à la base de toute la haute technologie du monde dans lequel on vit et comment on y vit. Apprenez à utiliser des concepts physiques simples et intuitifs, qu’on peut décrire avec peu de mathématiques et sans calcul différentiel et intégral, pour comprendre divers sujets tels que la production d’électricité, les causes de l’effet de serre, ce qui fait briller un diamant, les lasers, la chirurgie LASIK pour les yeux et le fonctionnement de l’œil humain. Comme PHYS 1021, ce cours particulièrement conseillé pour avoir une vue d’ensemble de la physique ou avant d’entreprendre des études en sciences de la santé. On ne peut se faire créditer PHYS 1031 et PHYS 1030, l’ancien PHYS 1410 ou l’ancien PHYS 1420. Préalable: une note minimale de C dans un de PHYS 1021, PHYS 1020, PHYS 1051 ou PHYS 1050.  

** PHYS 1051 Physique I : La mécanique **  
(Laboratoire requis) La mécanique est la science des fusées! Elle permet de décrire la trajectoire des objets en mouvement (cinématique) et de les expliquer (dynamique). Les concepts de base du calcul ainsi que les lois de la conservation du moment et de l’énergie sont utilisés pour développer les outils nécessaires à la description, à l’analyse et à la prédiction des mouvements linéaires ou en rotation dans les systèmes mécaniques simples. Une brève introduction à la théorie de la relativité restreinte d’Einstein offre un avant-goût des approches modernes. Ce cours est destiné particulièrement aux étudiants qui voudraient poursuivre leur programme d’études dans les sciences physiques ou en ingénierie. On ne peut se faire créditer PHYS 1051 et PHYS 1050, PHYS 1021, PHYS 1020, l’ancien PHYS 1410 ou l’ancien PHYS 1420. Préalables: un de Physique 40S (avec une note minimale de 60%) ou PHYS 0900 (réussite), PSRL 0100 ou l’équivalent. Préalables ou concomitants: un de MATH 1230, MATH 1501, MATH 1500, MATH 1510, MATH 1520, l’ancien MATHN 1530 ou MATH 1690.  

** PHYS 1071 Physique II : La physique des ondes et la physique moderne **  
(Laboratoire requis) Au cœur des communications modernes, les ondes et les oscillations sont la clé de la compréhension du monde qui nous entoure, des échelles subatomiques jusqu’au cosmos lui-même en passant par la biologie, le débit de la circulation, la bourse et les changements climatiques. Découvrez le mystérieux monde quantique, les bases de la dernière nanotechnologie et dans quelles circonstances les particules sont des ondes et les ondes, des particules. Explorez le modèle de l’atome de Bohr et découvrez le principe d’incertitude de Heisenberg. Ce cours fait appel au calcul différentiel et intégral pour traiter les concepts sous-jacents de l’ingénierie et de la physique moderne. Destiné, comme PHYS 1051, à ceux et celles qui veulent suivre un programme d’études en sciences physiques. On ne peut se faire créditer PHYS 1071 et PHYS 1070, l’ancien PHYS 1410 ou l’ancien PHYS 1420 ou PHYS 2152. Préalables: [une note minimale de C dans PHYS 1051 ou PHYS 1050] ou [une note minimale de B dans PHYS 1021 ou PHYS 1020] et [une note minimale de C dans un de MATH 1230, MATH 1501, MATH 1500, MATH 1510 ou MATH 1520 ou l’ancien MATH 1530]; Préalable ou concomitant: un de MATH 1232, MATH 1501, MATH 1700 ou l’ancien MATH 1710. Récommandé pour entrer dans les programmes spécialisés (avec une note minimale de B).  

** PHYS 1301 Énergie et environnement **  
Présentation des particularités physiques générales de notre environnement. Étude de certains problèmes d’actualité, à savoir l’atmosphère, le cosmos, la structure de la matière et de l’énergie, les sources d’énergie, l’application des principes de la physique à la technologie moderne, etc. Projections de films et démonstrations. La participation aux discussions et au choix des sujets à traiter est encouragée. Conçu pour les étudiantes et étudiants de toutes les facultés, ce cours n’exige aucune connaissance des mathématiques ou de la physique. Il ne peut être reconnu aux fins des programmes de mineure ou de majeure en physique. On ne peut se faire créditer PHYS 1301 et PHYS 1300.  

** PHYS 2261 Optique **  
(Laboratoire requis) Étude de la réfraction, de la réflexion, des systèmes de lentilles simples et des systèmes optiques, de la dispersion, de l’achromatisme. Vue élémentaire de la diffraction, de l’interférence et de la polarisation. On ne peut se faire créditer PHYS 2261 et PHYS 2260. Préalables: [une note minimale de C dans PHYS 1051 ou PHYS 1050] ou [une note minimale de C dans PHYS 1021 ou PHYS 1020] et [une note minimale de C dans un de MATH 1230, MATH 1501, MATH 1500, MATH 1510, MATH 1520, ou MATH 1690]. Prérequis ou concomitants: une note minimale de B dans PHYS 1031, PHYS 1030, PHYS 1071, PHYS 1070 ou PHYS 2152 et un de MATH 1220, MATH 1301, MATH 1300 ou MATH 1310 et un de MATH 1232, MATH 1690, MATH 1701, MATH 1700 ou MATH 1710.  

** Faculté des sciences-Statistics **  
** STAT 1001 Analyse statistique de base I **  
(Laboratoire requis) Introduction aux principes fondamentaux de la statistique et aux procédures utilisées en analyse de données. Étude de la cueillette de données, de l’affichage et de l’élagage de données, des relations entre variables, des distributions échantillonnales, de l’estimation, des tests de signification et de l’inférence pour les moyennes. Ce cours n’est pas recommandé pour les étudiantes et les étudiants qui veulent poursuivre dans un programme de statistique ou dans une autre discipline qui requiert de bonnes habiletés en méthodes statistiques (voir la description de STAT 1150). On ne peut se faire créditer STAT 1001 et STAT 1000, STAT 1150 ou STAT 2220. Préalable: N’importe quel cours de mathématiques de 12e année ou de niveau 40S, ou l’équivalent.  

** STAT 2001 Analyse statistique de base II **  
(Laboratoire requis) Étude des procédures d’estimation et de tests d’hypothèses pour les moyennes et les proportions dans les contextes d’échantillonnage à une, deux ou plusieurs variables. Introduction à l’analyse de variance, à la régression et à la corrélation. Les méthodes non paramétriques, la conception d’expériences, les modèles probabilistes. Ce cours n’est pas recommandé pour les étudiantes et les étudiants qui veulent poursuivre dans un programme de statistique ou dans une autre discipline qui requiert de bonnes habiletés en méthodes statistiques (voir la description de STAT 2150). On ne peut se faire créditer STAT 2001 et STAT 2000 ou STAT 1150. Préalable: une note minimale de C dans STAT 1001 ou STAT 1000.  

** École de travail social **  
** SWRK 1313 Émergence de l’état providence Canadien de bien-être social **  
Cr. Hrs. 3  
L’étude des transformations au fil du temps dans les politiques pour assurer le bien-être social au Canada. Le cours me l’accent sur les sociétés
autochtones, l'époque coloniale, l'émergence, le développement et l'effritement de l'État-providence canadien, et les défis actuels et les futures tendances dans les politiques de bien-être social. On ne peut se faire créditer SWRK 1313 et SWRK 2110 ou l'ancien SWRK 2111.

SWRK 2033 Travail social et santé mentale Cr. Hrs. 3
Exploration du champ de la santé mentale des questions de pratique et de politiques sociales dans le domaine de la santé mentale. Accent est mis sur les outils nécessaires pour faire une analyse critique de différentes approches en santé mentale, une compréhension générale des politiques et programmes dans le domaine, connaissance en prévention de la maladie mentale, ainsi que sur la manière d'intervenir efficacement une fois qu'une maladie mentale a été diagnostiquée. Préalables: [SWRK 2081 ou SWRK 2080], [SWRK 2093 ou SWRK 2090 ou l'ancien SWRK 2091] et [SWRK 3141 ou SWRK 3140].

SWRK 2043 Travail social auprès des individus et des familles Cr. Hrs. 3
Exploration des axes théoriques et d'application pratique du service social individuel et familial qui visent l'évaluation des problèmes personnels et interpersonnels, mais aussi du développement d'habiletés et de méthodes d'intervention appropriées auprès des individus et des familles. Préalables: [SWRK 2081 ou SWRK 2080], [SWRK 2093 ou SWRK 2090 ou l'ancien SWRK 2091] et [SWRK 3141 ou SWRK 3140].

SWRK 2053 Travail social auprès des communautés Cr. Hrs. 3
Acquisition de connaissances théoriques et d'habiletés permettant d'analyser les structures organisationnelles et de comprendre les questions liées à la pratique du travail social auprès des communautés. Application de ces concepts à la dynamique en vigueur au sein des communautés et des organisations et entre celles-ci. On ne peut se faire créditer SWRK 2053 et SWRK 2050 ou l'ancien SWRK 2051. Préalables: [SWRK 2081 ou SWRK 2080], [SWRK 2093 ou SWRK 2090 ou l'ancien SWRK 2091], [SWRK 3141 ou SWRK 3140] et [SWRK 2073 ou SWRK 2070 ou l'ancien SWRK 2071].

SWRK 2073 Travail social auprès des petits groupes Cr. Hrs. 3
Explication des normes de groupe, des valeurs et des buts qui influencent la prise de décision et les modèles de communication dans les groupes. Influence du rôle des membres et des styles de leadership sur le développement et le fonctionnement du groupe. On ne peut se faire créditer SWRK 2073 et SWRK 2070 ou l'ancien SWRK 2071. Préalables: [SWRK 2081 ou SWRK 2080], [SWRK 2093 ou SWRK 2090 ou l'ancien SWRK 2091] et [SWRK 3141 ou SWRK 3140].

SWRK 2081 Habiletés en communication interpersonnelle Cr. Hrs. 3
Acquisition d'une gamme essentielle d'habiletés interpersonnelles pour communiquer efficacement et pour établir et maintenir des relations tant dans des situations individuelles que de groupe. Accent sur l'apprentissage expérientiel utilisant une variété de techniques. On peut se faire créditer SWRK 2081 et SWRK 2080.

SWRK 2093 Travail social et comportement humain Cr. Hrs. 3
Application d'une théorie générale des systèmes à l'étude de la situation de la personne dans sa famille et dans son environnement avec examen subéquent des implications pour la pratique du travail social. Critique de modèles de développement. Sessions sur les dimensions du comportement qui s'avère critiques par rapport à la pratique du travail social. On ne peut se faire créditer SWRK 2093 et SWRK 2090 ou l'ancien SWRK 2091.

SWRK 2101 Perspectives sur les transitions de la vie et de l'individu Cr. Hrs. 3

SWRK 2113 L'analyse des politiques de bien-être social Cr. Hrs. 3
Étude de la politique de bien-être social en tant que produit fini d'idéologies. Introduction à quelques éléments de l'idéologie et comparaison des systèmes idéologiques concurrents. Analyse de l'interaction des visions économiques, politiques et ethniques de la société et de leurs manifestations en tant que réponses sociétales aux besoins humains et aux services sociaux. On ne peut se faire créditer SWRK 2113 et SWRK 1310 ou l'ancien SWRK 1311. Préalable: SWRK 1313 ou SWRK 2110 ou l'ancien SWRK 2111.

SWRK 2651 Aspects sociaux du vieillissement Cr. Hrs. 3
Examen des aspects sociaux du vieillissement. Accent sur la compréhension du processus de vieillissement dans toute transition de vie impliquant une adaptation à l'interaction entre l'environnement social et l'environnement physique. On ne peut se faire créditer le SWRK 2651 et le REC 2650 ou IDES 2650 ou HMEC 2650 ou REC 2650.

SWRK 3103 Méthodologie de la recherche en travail social Cr. Hrs. 3
Lien entre les méthodes systématiques de recherche scientifique et la pratique du travail social, la construction théorique pour la pratique, la collecte d'information et de données descriptives pour le processus décisionnel pour la compréhension des matériaux techniques de la recherche et introduction aux enjeux et aux défis des de vis recherche. On ne peut se faire créditer SWRK 3103 et SWRK 3100 ou l'ancien SWRK 3101.

SWRK 3111 Perspectives sur la déviance Cr. Hrs. 3
Étude des problèmes humains d'aide de plusieurs modèles analytiques communément appliqués dans la pratique du travail social. On se peut se faire créditer SWRK 3111, SWRK 3110. Préalable : première moitié de SWRK 2091.

SWRK 3131 L'État canadien contemporain du bien-être social Cr. Hrs. 3
Étude du bien-être social dans la société canadienne menant à une évaluation des approches actuelles à la lumière des transformations économiques des conditions sociales et des besoins mouvants. On ne peut se faire créditer le SWRK 3131 et SWRK 3130. Préalables: [SWRK 1313 ou SWRK 1310 ou l’ancien SWRK 1311] et [SWRK 2113 ou SWRK 2110 ou l'ancien SWRK 2111].

SWRK 3141 Introduction à la pratique du travail social Cr. Hrs. 3
Introduction aux cadres opératoires de la pratique du travail social et le rôle des travailleurs sociales et travailleurs sociaux professionnels. Accent mis sur les valeurs et les connaissances incluant ainsi la définition même du problème, la consultation, le contrat, l'intervention et l'évaluation. Acquisition d'une formation de base en intervention sociale et de saisir la réalité sociale des individus selon différents contextes et diverses problématiques. On ne peut se faire créditer SWRK 3141 et SWRK 3140.

SWRK 3151 Formation à la pratique du terrain 1 Cr. Hrs. 12
Première expérience de formation pratique sur le terrain au cours de laquelle l'étudiant ou l'étudiante aura l'occasion d'assumer une responsabilité dans son engagement pour le travail social, la consultation, la planification, l'intervention, l'évaluation et l'application concrète de la théorie apprise en classe. Le premier stage comprend 459 heures, dont 420 heures de stages sur le terrain et 39 heures pour le séminaire d'intégration aux stages. Les heures requises sur le terrain sont calculées sur une base de 28 semaines, 2 jours par semaine, 7,5 heures par jour, pour un total de 420
hours. Ces heures comprennent la participation aux activités de stage et l'évaluation de la performance. Ces heures incluent aussi les réunions et les entrevues formatives avec la personne qui supervise le stage sur une base individuelle ou en groupe. Le séminaire d'intégration aux stages comprend 13 sessions obligatoires d'ateliers d'application d'habiletés de 3 heures chacune aux deux semaines pendant les deux semestres pour un total de 39 heures. On ne peut se faire créditer SWRK 4121 et SWRK 4120. Préalables: [SWRK 3151 ou SWRK 3150], [SWRK 2053 ou SWRK 2050 ou l'ancien SWRK 2051] et [SWRK 2073 ou SWRK 2070 ou l'ancien SWRK 2071]. Concomitants: SWRK 4303.

SWRK 4131 Habilités en communication interpersonnelle avancée
Cr. Hrs. 3

Cours expérientiel pour la compréhension de soi et la vigilance à soi pour produire une utilisation consciente et disciplinée de soi dans la communication et les relations professionnelles. Préalables : SWRK 2081 (SWRK 2080) et l'autorisation écrite de la professeure ou du professeur.

SWRK 4213 Les perspectives féministes de la pratique du travail social
Cr. Hrs. 3

Analyse de la pratique du travail social et de la politique de bien-être social selon la perspective féministe. Accent mis sur l'imbrication synergique de l'intervention sociale avec les politiques dans le contexte du bien-être social et avec des concepts superposés tels que: potentialisation, pratique écologique, oppression et pratique en contexte de diversité culturelle. Il doit être admis que les femmes ne sont pas un groupe homogène et qu'en tenant compte des caractéristiques comme la classe, l'âge, l'orientation sexuelle, on contribue à une diversité d'expériences, de besoins et d'intérêts pour les femmes. On ne peut se faire créditer SWRK 4213 et SWRK 4210 ou l'ancien SWRK 4211. Préalables: [SWRK 2113 ou SWRK 1310 ou l'ancien SWRK 1311], SWRK 2043, [SWRK 2081 ou SWRK 2080], [SWRK 2093 ou SWRK 2090 ou l'ancien SWRK 2091] et [SWRK 3141 ou SWRK 3140].

SWRK 4221 Peuples autochtones et pratique du travail social
Cr. Hrs. 6

Analyse de la pratique du travail social et de la politique de bien-être social à partir d'une perspective autochtone. Étude des thèmes historiques et contemporains qui ont influencé le rapport entre les peuples autochtones et l'État Canadien. L'exploration de diverses approches et pratiques de changements (système client et système services) qui permettront la survie, l'autodétermination, le bien-être socioculturel et la résilience de la collectivité autochtone. On ne peut se faire créditer SWRK 4221 et SWRK 4220. Préalables: [SWRK 1313 ou SWRK 1310 ou l'ancien SWRK 1311], SWRK 2043, [SWRK 2081 ou SWRK 2080], [SWRK 2093 ou SWRK 2090 ou l'ancien SWRK 2091] et [SWRK 3141 ou SWRK 3140].

SWRK 4303 Champs d'intervention et de pratique du travail social
Cr. Hrs. 3

Séminaire d'enseignement des habiletés requises dans la pratique du travail social soit en contexte de stage ou d'intervention pratique. Insistance sur la pratique en termes de planification des changements (le système client), les politiques et les réseaux d'interrelations (le système service). Les séminaires peuvent varier d'une année à l'autre et sont organisés pour couvrir une variété de domaines ou de cadres d'intervention pratiques. On ne peut se faire créditer SWRK 4303 et SWRK 4300 ou l'ancien SWRK 4301. Préalables: SWRK 1313 ou SWRK 1310 ou l'ancien SWRK 1311, SWRK 2043, [SWRK 2081 ou SWRK 2080], [SWRK 2053 ou SWRK 2050 ou l'ancien SWRK 2051], [SWRK 2073 ou SWRK 2070 ou l'ancien SWRK 2071], [SWRK 2093 ou SWRK 2090 ou l'ancien SWRK 2091], [SWRK 3141 ou SWRK 3140] et [SWRK 3151 ou SWRK 3150]. Concomitants: SWRK 4121 ou SWRK 4120.

Faculté d'éducation-éducation(EDSB)

EDSB 5011 L'éducation bilingue, l'immersion et l'acquisition précoce d'une langue seconde
Cr. Hrs. 3

Étude du développement linguistique de l'enfant tout en considérant un grand nombre de facteurs socioaffectifs et cognitifs qui influencent le
développement linguistique, facteurs permettant de réfléchir à toute la question de l’immersion et d’appliquer ces connaissances à la situation qui existe au Manitoba.

EDSB 5031 Histoire de l’éducation française au Manitoba Cr. Hrs. 3
Les fondements de l’éducation française au Manitoba. Examen, dans une perspective historique, des événements majeurs, de nature sociologique et politique, qui ont marqué le développement de l’éducation française au Manitoba. On ne peut se faire créditer le EDSB 5031.

EDSB 5041 Théories d’Apprentissage en Situation d’Immersion Cr. Hrs. 3

EDSB 5051 L’Intégration des Matières en Situation d’Immersion Cr. Hrs. 3

EDSB 5061 Théories d’Apprentissage en Milieu Minoritaire Cr. Hrs. 3
Familiarisation avec les recherches en éducation compensatoire et bilingue et dégagement des implications en regard de l’apprentissage en milieu minoritaire.

EDSB 5071 Difficultés dans l’Enseignement du Langage Écrit Cr. Hrs. 3
Familiarisation avec les principes et les méthodes de prévention des difficultés d’apprentissage du langage écrit en tenant compte du contexte franco-manitobain.

EDSB 5081 Stage et Séminaires de Recherche-Action Cr. Hrs. 6
Utilisation du processus et des méthodes de recherche-action en vue de la résolution de problèmes éducatifs pratiques. Cours qui exige un minimum de 150 heures consacrées au stage de recherche. Pour s’inscrire à ce cours, il faut être en fonction dans le milieu éducatif.

Faculté d’éducation-1000 and 2000 Level(EDUB)

EDUB 1011 Stages et séminaires I Cr. Hrs. 3
Initiation pratique et théorique à l’enseignement au moyen de stages d’observation suivis de discussions en petits groupes.

EDUB 1061 Langue et Littératie Cr. Hrs. 3
Initiation au monde de la littératie : comment comprendre et se produire dans différentes situations à l’aide de stratégies propres à son style et au contexte.

EDUB 1411 L’Enseignement des Sciences de la Nature au Secondaire Cr. Hrs. 3
Principes généraux sous-tendant l’enseignement des sciences, le développement conceptuel, les théories d’apprentissage, la culture scientifique, le caractère de la science, les interactions entre les sciences, la technologie, la société et l’environnement. Accent mis sur les modèles pédagogiques qui tiennent compte du développement conceptuel chez les apprenants et apprenantes afin de soutenir l’enseignement de divers thèmes scientifiques. Cours obligatoire pour ceux et celles qui veulent enseigner les programmes de sciences de la nature au niveau secondaire.

EDUB 1501 Éducation au Secondaire Cr. Hrs. 3
Étude des prémises qui sous-tendent les objectifs de l’éducation au secondaire, le rôle de l’enseignant ou de l’enseignante au secondaire et les programmes d’études dans les écoles.

EDUB 2011 Stages et Séminaires II Cr. Hrs. 3
Poursuite plus poussée de la pratique de l’enseignement dans les écoles, soutenue par des discussions en petits groupes portant sur le matériel de simulation et sur les pratiques observées dans les écoles.

EDUB 2021 Communication Cr. Hrs. 3
Activités dont le but est de développer l’adresse en communication sous toutes ses formes. Étude de la dynamique de dons de communication oraux et écrits qui s’appliquent plus à l’enseignant et à l’enseignante dans son interaction avec les individus et les groupes. Étude de la communication tant verbale que non verbale.

EDUB 2041 Littérature pour adolescents Cr. Hrs. 3
Aperçu de la littérature enfantine créatrice disponible dans les divers moyens de communication; établissement de critères pour l’évaluation de livres et de matériaux connexes; problèmes du lecteur en difficulté et du non-lecteur. Étude des normes en vue de porter un jugement d’appréciation sur la littérature enfantine en mettant l’accent sur l’analyse critique et l’interprétation de la littérature replacée dans son contexte historique, sociologique et psychologique.

EDUB 2081 Perfectionnement de l’Expression Orale I Cr. Hrs. 3
Comparaison de son expression orale en français à la norme internationale (au plan de la structure de la phrase, de la phonétique et du vocabulaire). Suite à ce diagnostic, perfectionnement de la langue parlée.

EDUB 2121 Littérature Pour Enfants Cr. Hrs. 3

EDUB 2171 Atelier en Art (dessin) à l’Élémentaire Cr. Hrs. 3
Cours pratique. Étude des techniques et du matériel appropriés permettant d’acquérir des notions de l’enseignement créatif à l’élémentaire et au primaire.

EDUB 2181 La Bibliothèque, Source de Référence Cr. Hrs. 3
Utilisation des livres et des bibliothèques comme sources de références et de recherche au niveau universitaire.

EDUB 2191 Perfectionnement de l’Expression Orale II Cr. Hrs. 3
Comparaison de son expression orale en français à la norme internationale (au plan de la structure de la phrase, de la phonétique et du vocabulaire). Suite à ce diagnostic, perfectionnement de la langue parlée.

EDUB 2201 Enseignement de l’Anglais au Primaire d’Immersion Cr. Hrs. 3

EDUB 2211 Perfectionnement du français oral et écrit Cr. Hrs. 3
(Laboratoire requis) Ce cours permettra aux étudiantes et aux étudiants d’améliorer leurs compétences langagières en français, tant à l’oral qu’à l’écrit, dans le but d’enseigner en français à tous les niveaux. Ce cours est accompagné de séances de travaux dirigés d’une durée d’une heure et demie par semaine. Ces séances obligatoires permettront de mettre en
pratique les notions théoriques présentées dans le cadre du cours. *Ce cours de perfectionnement ne compte pas pour le baccalauréat en éducation. Les cours additionnels pour le perfectionnement linguistique sont au-delà des 60 crédits du baccalauréat en éducation.

**EDUB 2501 Sujets Particuliers en Éducation au Secondaire**  
Cr. Hrs. 3  
Étude de thèmes et de questions reliés à l'enseignement au secondaire et au développement de l'identité professionnelle de l'enseignante ou de l'enseignant débutant. Coordination des activités qui varieront d'année en année avec des expériences en milieu scolaire.

**EDUB 2511 L'intégration de la langue dans toutes les matières**  
Cr. Hrs. 3  
Initiation à la langue comme outil d'enseignement et d'apprentissage et aux moyens offerts aux enseignants et aux enseignantes pour intégrer la langue dans toutes les matières et enrichir la compréhension du contenu.

**Faculté d'éducation-3000 Level(EDUB)**

**EDUB 3011 Pratique du Microenseignement**  
Cr. Hrs. 3  
Étude du comportement de l'enseignante ou de l'enseignant. Utilisation de vidéos fournissant le décor pour la pratique contrôlée de quelques-uns des éléments de l'enseignement, en particulier de l'analyse et de l'application des techniques suivantes : l'exposition, l'interrogation, la discussion et la démonstration. On ne peut se faire créditer le EDUB 3011 et le EDUB 3161.

**EDUB 3013 Microenseignement et pratiques pédagogiques**  
Cr. Hrs. 3  
Réflexions sur la mise en pratique d'habiletés d'enseignement par l'analyse de leçons, d'activités ou de cours.

**EDUB 3021 Sujets Particuliers en Sciences Humaines**  
Cr. Hrs. 3  
Étude de sujets choisis dans le domaine de l'enseignement des sciences humaines.

**EDUB 3031 La Lecture au Secondaire**  
Cr. Hrs. 3  
Étude des habiletés de base en lecture et des relations de celles-ci avec les divers contenus disciplinaires du niveau secondaire. Examen de divers outils susceptibles de contribuer au développement des habiletés en lecture ainsi que diverses techniques d'évaluation.

**EDUB 3101 Méthodologie de la lecture à l'élémentaire I**  
Cr. Hrs. 3  

**EDUB 3161 Stages et séminaires III**  
Cr. Hrs. 3  
Choix d'expérience initiale ou d'enrichissement dans un des domaines suivants : niveau scolaire primaire ou intermédiaire, situation en éducation spécialisée ou expérience dans un service communautaire relé de façon ponctuelle à l'éducation totale. Aspects théoriques et pratiques traités en ateliers d'initiation et en discussions de groupes. Une note de réussite ou d'échec sera attribuée pour ce cours. On ne peut se faire créditer le EDUB 3161 et le EDUB 3011.

**EDUB 3171 Stages Et Séminaires III**  
Cr. Hrs. 3  
Cours qui fournira de multiples occasions de rédiger différents genres de textes en français. Composition, transcription et révision de textes. Familiarisation avec le processus de l'écrit qui peut être adapté et appliqué aux niveaux primaire, élémentaire et secondaire.

**EDUB 3111 Enseignement du Français au Primaire d'Immersion**  
Cr. Hrs. 3  
Enseignement du français langue seconde au primaire. Étude des principes de la communication orale et écrite dans la salle de classe, de la nouvelle pédagogie dans l'enseignement de la lecture et de l'écrit et de l'intégration des savoirs et des matières. Concomitant : EDUB 2201.

**EDUB 3251 Sujets Particuliers - Curriculum et Pédagogie**  
Cr. Hrs. 3  
Étude de sujets choisis en enseignement et apprentissage en immersion.

**EDUB 3261 L'Acquisition et l'Apprentissage du Français en Contexte d'Immersion**  
Cr. Hrs. 3  
Cours théorique. Familiarisation avec les théories explicatives de l'acquisition et l'apprentissage d'une langue seconde et les approches pédagogiques qui en découlent. On ne peut se faire créditer le EDUB 3261.

**EDUB 3271 Développement Langagière en Immersion Française à l'Élémentaire**  
Cr. Hrs. 3  

**EDUB 3281 Développement Langagière en Immersion Française**  
Cr. Hrs. 3  

**EDUB 3291 Principes et pratiques de l'évaluation des apprentissages**  
Cr. Hrs. 3  
Ce cours permettra aux étudiantes et aux étudiants de comprendre les approches et les principes permettant d'évaluer la progression des apprentissages et le degré d'acquisition des compétences des élèves.

**EDUB 3311 Perfectionnement du français**  
Cr. Hrs. 3  

**EDUB 3313 Perspectives Autochtones en Contexte Scolaire**  
Cr. Hrs. 3  
Introduction aux perspectives culturelles autochtones et metisses en contexte scolaire dimensions historique, anthropologique, ethique et pédagogique. Développement de compétences professionnelles relatives à l'enseignement dans un environnement autochtone et métis.

**EDUB 3321 Analyse grammaticale et rédaction**  
Cr. Hrs. 3  
Revision des notions grammaticales. Apprentissage des diverses techniques de rédaction. Étude contrastive de l'anglais et du français. Maîtrise de la revision linguistique.

**EDUB 3991 Étude Individuelle**  
Cr. Hrs. 3  
Étude individuelle et recherche dirigées vers un sujet d'intérêt.

**EDUB 3993 Étude Individuelle**  
Cr. Hrs. 3  
Étude individuelle et recherche dirigées vers un sujet d'intérêt

Étude des programmes et des méthodes d'enseignement en sciences générales au niveau secondaire.

Étude des programmes et des méthodes d'enseignement en art au niveau secondaire.

Étude des programmes et des méthodes d'enseignement en sciences de l'écologie humaine au niveau secondaire.

Étude des programmes et des méthodes d'enseignement en éducation physique au niveau secondaire.

Étude des programmes et des méthodes d'enseignement en physique au niveau secondaire.

Étude des programmes et des méthodes d'enseignement en mathématiques au niveau secondaire.

Étude des programmes et des méthodes d'enseignement en mathématiques au niveau secondaire.

Cours axé sur des questions didactiques soulevées par les programmes d'études de français langue première et ceux de français langue seconde - immersion établis, pour les niveaux 7e années à Secondaire 4, par la Division du Bureau de l'éducation française, du ministère d'Education, Citoyenneté et Jeunesse Manitoba.

Étude d'une approche par projet ou l'élève est acteur, s'implique et devient responsable. On ne peut se faire créditer l'ancien EDUB 4203 et EDUB 4205.

Étude des fondements du programme d'enseignement de la lecture; objectifs du programme, conditions d'apprentissage, démarches et matériel pédagogiques et évaluation des apprentissages. On ne peut se faire créditer le EDUB 5271.

Séminaire de recherche et de lecture, qui comprend une analyse approfondie des fondements théoriques de l'étude et de l'enseignement des arts langagiers à l'élémentaire et de la recherche qui sous-tend ces fondements. Réflexion sur la portée pratique de ces théories dans l'enseignement en ce qui a trait à la communication orale, à l'écoute et à la création dramatique. On ne peut se faire créditer le EDUB 5321.

Étude de la façon dont on aborde la littératie dans les diverses matières (sciences, mathématiques, sciences humaines, etc.). Examen attentif des stratégies concernant la lecture, l'écriture et l'étude, des ressources et de l'évaluation de ces ressources, des procédures, des recherches à l'appui. On ne peut se faire créditer le EDUB 5331.
EDUB 5341 Fondements de la littératie Cr. Hrs. 3
Étude de la nature de la littératie par rapport aux dimensions du développement humain et de l'enseignement telles que le langage, la vision, l'audition, la cognition, la motivation et l'objectif de l'enseignement. On ne peut se faire créditer EDUB 5341 et EDUB 5261.

EDUB 5351 Théorie et pratique de l'enseignement du français langue seconde Cr. Hrs. 3
Étude de la théorie actuelle et des nouvelles pratiques de l'enseignement du français langue seconde. Examen de la théorie de l'enseignement et de l'appréciation des théories de l'enseignement de français langue seconde, et qui veulent se perfectionner en français grâce à l'approche communicative.

EDUB 5371 Littérature pour Adolescents et Adolescentes Cr. Hrs. 3
Étude de la nature et de la psychologie de la littérature destinée aux élèves de la 7e à la 12e année. Aperçu du matériel existant, établissement de critères d'évaluation de ce matériel et résultats des recherches portant sur l'élaboration, le niveau d'intérêt et l'utilisation du matériel. On ne peut se faire créditer le EDUB 5361.

EDUB 5431 Développements Récents en Curriculum: Humanités Cr. Hrs. 3
Examen des courants théoriques et des applications pratiques récents ou en émergence dans ce domaine.

EDUB 5437 Théorie et Pratique des Arts Visuels et l'Enseignement du Français de Base Cr. Hrs. 3
Étude de la théorie actuelle et des nouvelles pratiques de l'enseignement du français de base. Ce cours favorisera l'expression artistique individuelle.

EDUB 5539 L'enseignement du français de base et les TIC Cr. Hrs. 3

EDUB 5541 Enseignement du français Cr. Hrs. 6
Exploration de l'art dramatique comme approche dans la classe de français langue seconde. Familiarisation avec le langage du domaine et la documentation récente. Ateliers pratiques reliés à divers aspects de l'art dramatique pertinents à l'enseignement des compétences langagières.

EDUB 5561 Courants Actuels en Enseignement des Mathématiques Cr. Hrs. 3
Examen des approches et des méthodes récentes dans l'enseignement des mathématiques à l'élémentaire. Aperçu avec le langage plastique et développement d'un esprit critique face aux diverses disciplines en arts visuels dans la classe de français de base. Ce cours favorisera l'expression artistique individuelle.

EDUB 5771 Diagnostic et intervention en enseignement des mathématiques à l'élémentaire Cr. Hrs. 3
Méthodes diagnostiques et ressources orthopédagogiques en enseignement des mathématiques à l'élémentaire. On ne peut se faire créditer le EDUB 5771.
EDUB 5773 Identification des besoins et intervention pédagogique inclusive en numération
Cr. Hrs. 3
Méthodes d'évaluation des besoins particuliers des élèves dans le domaine de la numération, stratégies et ressources pour différencier, adapter, modifier ou individualiser l'enseignement et l'apprentissage des mathématiques. On ne peut se faire créditer EDUB 5773 et EDUB 5771.

Faculté d'éducation -7000 Level (EDUB)

EDUB 7071 Ouvrages marquants de recherche en lecture
Cr. Hrs. 3
Examen, analyse et synthèse critiques des ouvrages marquants de recherche en lecture dans les domaines de la psychologie, de la psycholinguistique, de la sociologie et de la pédagogie de la lecture. On ne peut se faire créditer le EDUB 7071, EDUB 7070.

EDUB 7111 Recherche sur l'acquisition de la langue et la littératie
Cr. Hrs. 3
Exploration des problématiques propres à l'acquisition de la langue et de la littératie susceptibles d'intéresser les enseignantes et enseignants sur le plan professionnel. Les participantes et participants feront une analyse critique des théories qui sous-tendent l'acquisition de la langue et de la littératie, de la recherche publiée et d'observations en salle de classe. Ils auront l'occasion d'effectuer leur propre recherche sur l'acquisition de la langue et de la littératie dans un milieu éducatif. On ne peut se faire créditer le EDUB 7111.

EDUB 7161 L'enseignante et l'enseignant de langue en tant que chercheurs
Cr. Hrs. 3
Examen de paramètres caractéristiques des enseignantes et des enseignants en tant que chercheurs dans le contexte de leur propre salle de classe. Trois principes fondamentaux guident les participant et participantes: voix, conversation et communauté. Sous cet angle particulier, les enseignantes et enseignants de langue effectuent une recherche en salle de classe dans le but de comprendre la langue et l'enseignement par l'entremise des élèves interrogés dans le domaine du curriculum. On ne peut se faire créditer le EDUB 7161 (EDUB 7160).

EDUB 7181 La recherche en rédaction
Cr. Hrs. 3
Analyse critique de la recherche et des méthodes de recherche en rédaction et en pédagogie. Regard particulier sur les études classiques, l'histoire, les courants actuels et la recherche ainsi que les méthodes d'évaluation en rapport avec l'étude et l'enseignement de la rédaction. On ne peut se faire créditer le EDUB 7181 ou EDUB 7180.

EDUB 7191 Recherches sur le rôle de la langue dans l'apprentissage
Cr. Hrs. 3
Analyse critique des résultats de la recherche afin de comprendre la façon dont la langue peut faciliter l'apprentissage dans tous les domaines scolaires. Regard sur le rôle que joue la langue pour faciliter l'apprentissage des matières. Examen particulier de la recherche portant sur l'expression orale, la lecture et l'écriture en tant qu'outils servant à l'apprentissage. On ne peut se faire créditer EDUB 7191.

EDUB 7201 La littératie et l’élaboration de politiques
Cr. Hrs. 3
Un séminaire portant sur l'élaboration de politiques en littératie et leurs effets sur notre conceptualisation d'un curriculum littéraire et nos définitions de la littératie. Regard particulier sur le concept de fonctionnalité en littératie et les politiques sur l'enseignement de la littératie. On ne peut se faire créditer le EDUB 7201.

EDUB 7241 La sociolinguistique et la pédagogie du Français langue seconde
Cr. Hrs. 3
favoriser l’équité et la qualité des apprentissages des élèves, peu importe leurs antécédents, leurs particularités ou leurs circonstances.

EDUA 3303 Intégration et identité professionnelles  Cr. Hrs. 3
Développement de l’habileté à faire le lien entre la pratique et la théorie et à mettre en œuvre une gestion efficace de sa pratique pédagogique.

EDUA 3313 Perspectives autochtones en contexte scolaire  Cr. Hrs. 3

EDUA 3323 La pratique réflexive dans la formation professionnelle  Cr. Hrs. 3
Analyse d’expériences vécues lors du stage pratique menant à une prise de conscience de son propre style d’enseignement.

EDUA 3993 Éducation française en contextes minoritaire et d’immersion  Cr. Hrs. 3
Étude des aspects historique, démographique, culturel, linguistique, identitaire et des approches pédagogiques qui encadrent le phénomène de l’éducation française en milieu minoritaire au Manitoba (écoles d’immersion et écoles françaises).

Faculté d’éducation-5000 level (EDUA)

EDUA 5011 Introduction à L’Administration Scolaire  Cr. Hrs. 3
Étude des concepts, des tâches et des processus de l’administration tels qu’ils s’appliquent à l’éducation. On ne peut se faire créditer le EDUA 5011.

EDUA 5021 Principes d’Élaboration de Curriculum  Cr. Hrs. 3

EDUA 5031 Gestion des établissements scolaires  Cr. Hrs. 3
Étude des modes fondamentaux d’organisation et du rôle de l’administration au sein d’un établissement scolaire. Attention particulière accordée à la prise de décision, à la communication, à la planification et à l’évaluation. On ne peut se faire créditer le EDUA 5031.

EDUA 5041 Administration du personnel scolaire  Cr. Hrs. 3

EDUA 5061 Principes de la supervision en enseignement  Cr. Hrs. 3
Étude des modèles théoriques d’enseignement et de supervision et de leur application dans la pratique. On ne peut se faire créditer le EDUA 5061, EDUA 5060.

EDUA 5071 Comportement organisationnel en éducation  Cr. Hrs. 3
Étude des théories et des recherches en sciences du comportement et en sciences sociales qui ont trait au comportement des individus et des groupes dans une structure organisationnelle. Analyse de la portée de ces théories et recherches par rapport à l’administration des établissements scolaires. On ne peut se faire créditer le EDUA 5071.

EDUA 5081 Courants Actuels en Administration Scolaire 1  Cr. Hrs. 3
Étude des fondements théoriques et de l’application pratique des développements récents et des nouveaux courants en administration scolaire.

EDUA 5091 Courants Actuels en Administration Scolaire 2  Cr. Hrs. 3
Prolongement de l’étude de certains sujets abordés dans le EDUA 5081 en vue d’approfondir les études entreprises dans ces domaines.

EDUA 5101 Questions importantes en administration scolaire  Cr. Hrs. 3
Étude de sujets d’importance en administration scolaire. Le contenu variera d’année en année, il sera donc possible de se faire créditer ce cours plus d’une fois. On ne peut se faire créditer le EDUA 5101 (EDUA 5100).

EDUA 5241 Problèmes en rapport avec l’éducation interculturelle  Cr. Hrs. 3
Étude de problèmes particuliers auxquels les minorités culturelles font face dans le milieu scolaire. On ne peut se faire créditer le EDUA 5241.

EDUA 5251 Regards sur l’éducation des minorités au Canada  Cr. Hrs. 3
Un examen de la nature du développement socioal au Canada dans le cadre d’un société multiraciale. Étude des questions de relations intergroupes, de politiques en matière d’immigration, de cohésion ethnique, et de tensions découlant de l’intégration versus l’assimilation en rapport avec l’histoire de l’éducation au Canada. On ne peut se faire créditer EDUA 5251.

EDUA 5481 Techniques de counselling  Cr. Hrs. 3
Acquisition de techniques de counselling telles que l’attention et l’écoute, le reflet du contenu et des émotions, la rétroaction et la révélation de soi, la focalisation et le résumé. On ne peut se faire créditer le EDUA 5481. Préalable ou concomitant: EDUA 5501. Une note de réussite ou échec sera attribuée pour ce cours.

EDUA 5491 Stage en counselling  Cr. Hrs. 3
Situation réelle de counselling où les étudiantes et les étudiants auront l’occasion, sous la supervision de professionnels compétents et avec l’appui de leur professeur ou de leur professeure, de mettre en pratique les techniques de counselling qu’ils ont apprises. On ne peut se faire créditer le EDUA 5491. Préalable ou concomitant: EDUA 5501 et EDUA 5481. Une note de réussite ou échec sera attribuée pour ce cours.

EDUA 5501 Théories de counselling scolaire  Cr. Hrs. 3
Étude de la philosophie et des théories du counselling. Sujets importants en orientation et en counselling scolaires. On ne peut se faire créditer le EDUA 5501.

EDUA 5511 Counselling à l’élémentaire  Cr. Hrs. 3
Examen du rôle et des fonctions de la conseillère ou du conseiller dans une école élémentaire. Préalable ou concomitant: EDUA 5501. On ne peut se faire créditer EDUA 5511.

EDUA 5521 Counselling et éthique  Cr. Hrs. 3
Introduction au code de déontologie des conseillères et des conseillers. Discussion des problématiques morales en lien avec les sujets suivants: consentement libre et éclairé, confidentialité, tenue des dossiers, respect des limites, formation et compétence, supervision clinique, multiculturalisme et diversité. Possibilité de mettre en pratique des modèles de prise de décision. On ne peut se faire créditer le EDUA 5521 (EDUA 5520).
EDUA 5531 Counselling au secondaire  Cr. Hrs. 3

EDUA 5541 Counselling des Groupes  Cr. Hrs. 3
Étude des groupes, de l’animation de groupe et de l’acquisition des compétences connexes, particulièrement en ce qui a trait à la fonction de la conseillère ou du conseiller en milieu scolaire. On ne peut se faire créditer le EDUA 5541. Préalable ou concomitant: le EDUA 5501.

EDUA 5551 Psychologie des Relations Humaines  Cr. Hrs. 3
Étude des relations interpersonnelles. Approche de type laboratoire visant à augmenter la sensibilité personnelle des étudiantes et des étudiants aux autres personnes. Cours qui s’adresse particulièrement au personnel enseignant, administratif et professionnel en milieu scolaire. On ne peut se faire créditer le EDUA 5551.

EDUA 5601 Introduction à l’éducation inclusive  Cr. Hrs. 6
Survol des préoccupations dans le domaine de l’éducation inclusive. Étude des barrières à l’inclusion en ce qui concerne les lois, la pédagogie, les attitudes et les organisations, de même que les modalités d’inclusion exemplaires. On ne peut se faire créditer EDUA 5590.

EDUA 5631 Évaluation et programmation en éducation inclusive  Cr. Hrs. 6
Étude des modalités d’évaluation basées sur le curriculum et sur le fonctionnement de la classe en vue de guider l’instruction des élèves éprouvant des difficultés d’apprentissage et de comportement en contexte d’inclusion. On ne peut se faire créditer le EDUA 5631. Préalable ou concomitant: le EDUA 5601 ou l’équivalent.

EDUA 5661 Gestion des programmes d’orthopédagogie et de soutien  Cr. Hrs. 3
Étude des modalités d’évaluation basées sur le curriculum et sur le fonctionnement de la classe en vue de guider l’instruction des élèves éprouvant des difficultés d’apprentissage et de comportement en contexte d’inclusion. On ne peut se faire créditer le EDUA 5631. Préalable ou concomitant: le EDUA 5601 ou l’équivalent.

EDUA 5671 Stratégies pour l’organisation de classes et d’écoles inclusives  Cr. Hrs. 3
Étude de l’organisation et de la mise en œuvre à l’échelle de l’école de mécanismes de soutien visant à favoriser l’accès à ces écoles;

l’apprentissage, la socialisation, le comportement, les rapports avec la famille, la participation de professionnels de la santé et les services communautaires. Analyse des stratégies d’organisation visant à améliorer la consultation, la coopération, la collaboration et le perfectionnement professionnel. On ne peut se faire créditer le EDUA 5671. Préalable ou concomitant : le EDUA 5601 ou l’équivalent et le EDUA 5631 ou l’équivalent.

EDUA 5681 Promotion d’un comportement responsable en milieu scolaire  Cr. Hrs. 3

EDUA 5701 Psychologie sociale de l’éducation  Cr. Hrs. 3

EDUA 5731 Courants Actuels en Psychologie de l’Éducation 1  Cr. Hrs. 3
Examen des courants théoriques et des applications pratiques récents ou en émergence dans ce domaine. Le contenu variera d’année en année, il sera donc possible de se faire créditer ce cours plus d’une fois. On ne peut se faire créditer EDUA 5731 (EDUA 5730).

EDUA 5741 Courants actuels en psychologie de l’éducation 2  Cr. Hrs. 3
Étude des fondements théoriques et des applications pratiques de développements récents et de nouveaux courants dans ce domaine.

EDUA 5751 Psychologie de l’Enseignement en Contexte Scolaire  Cr. Hrs. 3

EDUA 5761 Psychologie de l’Enseignement en Contexte Scolaire  Cr. Hrs. 3
Conçu principalement, mais non exclusivement, à l’intention des enseignantes, des enseignants et du personnel scolaire. Étude critique des fondements théoriques et des modèles d’enseignement principaux. Intégration et application d’approches et de stratégies d’enseignement existantes ou nouvelles. On ne peut se faire créditer le EDUA 5761. Préalable: le EDUA 1801 ou le PSYC 1201 ou l’équivalent.

EDUA 5801 Introduction à la recherche en éducation  Cr. Hrs. 3
Étude de l’investigation scientifique dans le domaine de l’éducation. Examen des méthodes de recherche et d’analyse statistique dans le contexte éducatif. Cours particulièrement recommandé aux étudiantes et aux étudiants qui s’intéressent à l’évaluation et à la mise en application des résultats de la recherche. On ne peut se faire créditer le EDUA 5801.

EDUA 5811 Théories de Construction de Tests  Cr. Hrs. 3
Étude des problèmes reliés à l’analyse d’items, à la validité, à la fidélité et à l’utilisation des tests dans le processus d’évaluation en milieu scolaire.
Considération des tests normatifs et critériés. On ne peut se faire créditer le 
EDUA 5811.

EDUA 5851 Application de l'Informatique en Éducation 2  Cr. Hrs. 3
Cours avancé sur l'utilisation de logiciels d'apprentissage dans les classes 
oradores et dans l'enseignement aux élèves ayant des difficultés 
d'apprentissage. On ne peut se faire créditer le EDUA 5851. Préalable: le 
EDUB 5761 ou l'ancien EDUB 5281 ou l'autorisation du titulaire du cours.

EDUA 5901 Éducation et Processus du Développement 1  Cr. Hrs. 3
Survol du processus du développement de la conception à la puberté. 
Importance accordée aux fondements biologiques, au développement 
cognitif et aux aspects sociaux du comportement dans leurs rapports avec 
le processus éducatif. On ne peut se faire créditer le EDUA 5901.

EDUA 5911 Éducation et Processus de Développement 2  Cr. Hrs. 3
Étude de la croissance et du développement à l'âge postérieur à la puberté. 
Attention particulière accordée à leurs effets sur l'apprentissage au niveau 
secondaire. On ne peut se faire créditer le EDUA 5911.

EDUA 5921 Le Jeu Chez l'Enfant  Cr. Hrs. 3
Examen du rôle du jeu dans l'apprentissage chez l'enfant, en incluant la 
perspective historique. Discussion du jeu en tant que partie intégrante du 
développement de l'enfant. Distinction entre les activités ludiques et non 
ludiques, considération des attributs conceptuels, perceptuels, 
linguistiques et physiques du jeu. On ne peut se faire créditer le EDUA 5921.

EDUA 5931 Observation du Comportement de l'Enfant  Cr. Hrs. 3
Étude des techniques d'observation qualitatives qui peuvent être utilisées 
en milieu scolaire pour mieux comprendre le comportement de l'enfant, ses 
modes de penser et ses motivations. On ne peut se faire créditer le EDUA 5931.

EDUA 5951 Perspectives théoriques de l'administration scolaire  Cr. Hrs. 3
Étude des tendances en matière de théorie organisationnelle et de pensée 
administrative ainsi que de la portée de celles-ci sur l'étude et 
administratif d'organisations scolaires. On ne peut se faire créditer le 
EDUA 5951.

EDUA 5953 L'inclusion et l'approche écologique  Cr. Hrs. 3
Étude et analyse de l'inclusion scolaire, en lien avec le paradigme de la 
dénormisation ainsi que du Processus de production du handicap (PPH), 
des stratégies visant à éliminer les barrières à l'inclusion et d'une 
renégociation du rôle des intervenants, dont celui de l'orthopédagogue.

Faculté d'éducation - 7000 Level (EDUA)

EDUA 7011 Administration scolaire en tant que champ d'étude et 
d'application  Cr. Hrs. 3
Aperçu de l'administration scolaire. Importance particulière accordée à 
quelques-unes des grandes traditions intellectuelles du domaine de 
l'administration scolaire et analyse de certaines forces qui influencent la 
pratique de l'administration. On ne peut se faire créditer le EDUA 7011.

EDUA 7021 La politique en éducation  Cr. Hrs. 3
Étude des caractéristiques politiques des organismes scolaires: répartition 
des pouvoirs dans la communauté, gouvernement local, changements 
politiques et rôle des divers systèmes de valeurs en éducation. On ne peut 
se faire créditer le EDUA 7021.

EDUA 7031 Le financement scolaire  Cr. Hrs. 3
Étude des dimensions économiques et financières de l'éducation. Analyse 
des coûts et des dépenses, des sources et des types de revenus, de la 
productivité et de l'efficacité, de la planification et du budget. On ne peut 
se faire créditer le EDUA 7031.

EDUA 7041 Aspects légaux en éducation  Cr. Hrs. 3
Étude des questions légales dans le monde de l'éducation. On ne peut se 
faire créditer le EDUA 7041 (EDUA 7040).

EDUA 7051 Perspectives théoriques de l'administration scolaire  Cr. Hrs. 3
Étude des tendances en matière de théorie organisationnelle et de pensée 
administrative ainsi que de la portée de celles-ci sur l'étude et 
administratif d'organisations scolaires. On ne peut se faire créditer le 
EDUA 7051.

EDUA 7061 Planification organisationnelle et développement 
educationnel  Cr. Hrs. 3
Revue des diverses approches à la planification et au développement 
educationnel. Importance particulière accordée au développement 
systématique des organismes d'enseignement. On ne peut se faire créditer 
les EDUA 7061.

EDUA 7071 Analyse des Organismes D'Enseignement  Cr. Hrs. 3
Application de méthodes d'analyse organisationnelle aux établissements 
enseignement. On ne peut se faire créditer le EDUA 7071.

EDUA 7081 Principes d'organisation et de mise en application du 
curriculum  Cr. Hrs. 3
Revue des approches de modification et d'application du curriculum. 
Importance particulière accordée aux approches systématiques de 
modification des programmes en éducation. On ne peut se faire créditer le 
EDUA 7081.

EDUA 7091 Séminaire - Problèmes administratifs en éducation  Cr. Hrs. 3
Application de concepts théoriques à des situations concrètes. On ne peut 
se faire créditer le EDUA 7091.

EDUA 7101 Sujets particuliers en administration scolaire 1  Cr. Hrs. 3
Lecture sur des sujets d'importance en administration scolaire.

EDUA 7111 Sujets particuliers en administration scolaire 2  Cr. Hrs. 3
Recherche-action sur des sujets d'importances en administration scolaire. 
Le contenu de ce cours variera d'année en année, il sera donc possible de se 
faire créditer ce cours plus d'une fois. On ne peut se faire créditer EDUA 
7111 (EDUA 7100).

EDUA 7113 Éducation pour un avenir viable  Cr. Hrs. 3
Exploitation en profondeur de la pédagogie et de l'apprentissage dans le 
domaine de l'éducation pour un avenir viable. Étude de la théorie et des 
pratiques reliées à ce domaine. Expérimentation de stratégies innovatrices 
qui ont pour but d'intégrer l'éducation à l'environnement dans les 
contextes éducatifs et communautaires.

EDUA 7211 Éducation et société  Cr. Hrs. 3
Étude du rapport qui existe entre l'éducation et la société. Regard 
particulier sur l'apprentissage ethique, la famille, le statut socioéconomique 
et le rôle que joue l'école en tant qu'agent de socialisation dans un 
contexte canadien. On ne peut se faire créditer l'EDUAU 7211.

EDUA 7231 Critique sociale en éducation  Cr. Hrs. 3
Examen critique de l'éducation. Regard particulier sur les diverses 
perspectives qui remettent en question une interprétation traditionnelle de
l’éducation et de la scolarisation. On ne peut se faire créditer EDUA 7231 et EDUA 7230.

**EDUA 7241 Valeurs en éducation**  Cr. Hrs. 3
Étude de la place occupée par les valeurs en éducation. Approfondissement de la notion de valeur et de son omniprésence dans le domaine de l’éducation, ainsi que des approches, des tendances et des questions relatives aux valeurs en éducation. On ne peut se faire créditer EDUA 7241.

**EDUA 7281 Séminaire sur l’éducation interculturelle 2**  Cr. Hrs. 3
Analyse critique des approches et de la recherche en éducation interculturelle. On ne peut faire créditer EDUA 7281 (EDUA 7280).

**EDUA 7511 Séminaire sur des sujets d'actualité en counselling**  Cr. Hrs. 3

**EDUA 7521 Séminaire - Stage en counselling**  Cr. Hrs. 6

**EDUA 7531 Groupes en counselling: théorie et pratique**  Cr. Hrs. 6
Étude de théories, de fondements logiques, d'objectifs et de recherches. Acquisition d'une compréhension expérimentale du travail en groupe par la participation aux activités en salle de classe. Acquisition de techniques d'animation de counselling de groupe au moyen d'expériences de counselling de groupe au moyen d'expériences de counselling de groupes sous supervision. On ne peut se faire créditer EDUA 7531. Préalables: EDUA 5541 et EDUA 5481.

**EDUA 7541 Programmes d'orientation de carrières**  Cr. Hrs. 3
Cours destiné aux conseillers et aux conseillères qui souhaitent approfondir leurs connaissances des programmes d’orientation de carrières. Examen et évaluation de programmes et de diverses techniques de counselling. Élaboration de programmes innovateurs qui répondent aux besoins de ceux et celles qui ont recours aux services de counselling. On ne peut se faire créditer le EDUA 7541.

**EDUA 7551 Théories de counselling**  Cr. Hrs. 3
Objectifs du counselling, évaluation des résultats du counselling, théories de la personnalité et du counselling. On ne peut se faire créditer le EDUA 7551 (EDUA 7550).

**EDUA 7561 Counselling et diversité en milieu scolaire**  Cr. Hrs. 3
Étude des enjeux de la diversité pour la pratique en counselling en contexte scolaire. Analyse des considérations éthiques, théoriques et pratiques de la diversité qui influencent la nature et l’efficacité du counselling auprès d'une clientèle issue de divers milieux. On ne peut pas se faire créditer EDUA 7561 et EDUA 7560.

**EDUA 7601 Séminaire en éducation inclusive**  Cr. Hrs. 6
Forum de discussions sur des sujets reliés à divers handicaps. Étude en profondeur de problèmes reliés aux besoins professionnels particuliers des étudiants et des étudiantes. On ne peut se faire créditer le EDUA 7601.

**EDUA 7611 Séminaire sur l'éducation des enfants aux prises avec des troubles de comportement**  Cr. Hrs. 3
Cours à l'intention des enseignants et des enseignantes, et des conseillers et des conseillères scolaires. Études des connaissances théoriques et des outils nécessaires à l’élaboration et à la mise en oeuvre des programmes éducatifs pour les élèves aux prises avec des troubles de comportement. On ne peut se faire créditer le EDUA 7611. Préalable ou concomitant: EDUA 5601 ou EDUA 5681.

**EDUA 7621 Séminaire sur la déficience intellectuelle**  Cr. Hrs. 3
Examen des résultats de la recherche portant sur les problèmes liés à l’enseignement aux personnes ayant une déficience intellectuelle et à leur apprentissage.

**EDUA 7651 Stage en éducation inclusive**  Cr. Hrs. 6
Un minimum de 200 heures de stage supervisées s’inscrivant dans un contexte d’éducation inclusive. Des séminaires sont prévus afin de créer un cadre qui facilite l’étude dirigée et la discussion. Préalables: 18 crédits au niveau 5000 en éducation inclusive ou l’équivalent. On ne peut se faire créditer EDUA 7651. Une note réussite ou échec sera attribuée pour ce cours.

**EDUA 7721 Psychologie de l'apprentissage en salle de classe**  Cr. Hrs. 3
Lecture et recherche sur des sujets d'importance en psychologie de l'éducation. Le contenu variera d'année en année, il sera donc possible de se faire créditer ce cours plus d'une fois. On ne peut se faire créditer EDUA 7741 (EDUA 7740).

**EDUA 7741 Sujets particuliers en psychologie de l'éducation 1**  Cr. Hrs. 3
Lecture et recherche sur des sujets d'importance en psychologie de l'éducation. Le contenu variera d'année en année, il sera donc possible de se faire créditer ce cours plus d'une fois. On ne peut se faire créditer EDUA 7741 (EDUA 7740).

**EDUA 7751 Sujets particuliers en psychologie de l'éducation 2**  Cr. Hrs. 3
Lecture et recherche sur des sujets d'importance en psychologie de l'éducation.

**EDUA 7761 Techniques d’entrevue avec les enfants et les adolescents et adolescents**  Cr. Hrs. 3
Étude des principes et des méthodes d'entrevue et de counselling auprès d'enfants, d'adolescents et d'adolescentes, de parents, d'enseignants et d'enseignantes, ou de toute autre personne intervenant auprès de l'enfant. Intégration de la théorie et de la pratique relatives au processus de communication et d'observation diagnostique et thérapeutique en situation naturelle auprès de l'enfant. On ne peut se faire créditer le EDUA 7761. Préalables: le EDUA 5821, le EDUA 5551, ou le EDUA 5481 et le EDUA 5491.

**EDUA 7771 Informatique avancée en psychologie de l'éducation**  Cr. Hrs. 3
Recours aux innovations récentes de la technologie de l’enseignement assisté par ordinateur, en tenant compte des besoins de la clientèle étudiante de cycle supérieur de la Faculté d'éducation. Préalable : un de EDUA 5851, EDUB 4121 ou EDUB 5761.

**EDUA 7801 Méthodes de recherche en éducation**  Cr. Hrs. 3
Étude des devis expérimentaux et des techniques de collecte de données dans la recherche éducative dans le milieu: devis quasi expérimentaux, enquête et techniques d’observation, simulation, analyse du contenu et sociométrie. On ne peut se faire créditer le EDUA 7800 et EDUA 7801.
Préalable: le EDUA 5801 ou l’ancien EDUA 6801 ou l’autorisation écrite de la professeure ou du professeur.

EDUA 7841 Methodes de recherche qualitative en éducation
Cr. Hrs. 3
Introduction aux méthodes de recherche qualitative. Discussion de l’éthique de la recherche et des théories qui sous-tendent la recherche qualitative. Cours axé sur les démarches à suivre pour effectuer une recherche, y compris la méthodologie et la collecte et l’analyse de données. On ne peut se faire créditer EDUA 7841 et EDUA 7840. Préalable : EDUA 5801 ou l’équivalent.

Maîtrise en Études canadiennes

CDSB 7011 Le Canada: Peuple et Territoire Cr. Hrs. 6
Le Canada se définit par son vaste territoire et son extraordinaire diversité sociale et économique. Étude de la présence millénaire des divers groupes autochtones; le dualisme canadien; l’immigration massive menant à la création d’une société multiculturelle et multilingue; les régionalismes; la situation de la femme canadienne; l’évolution du fédéralisme canadien; l’état de la famille canadienne et ses variantes régionales et de certains autres thèmes pertinents.

CDSB 7021 Le Canada : Identités, mythes, images Cr. Hrs. 6
Exploration en profondeur des diverses identités canadiennes en tenant de suivre l’évolution des images que les Canadiennes et les Canadiens se sont faites d’eux-mêmes au cours des siècles. Examen des mythes qui se sont développés chez les divers peuples canadiens depuis les débuts en retraçant leurs racines dans un passé plus ou moins lointain. Examen de l’historiographie nationale comme élément qui façonne l’identité canadienne.

CDSB 7031 Problèmes méthodologiques en études canadiennes Cr. Hrs. 3
Cours qui aide à définir et à mener à terme un mémoire de maîtrise ou tout autre travail de recherche majeur en études canadiennes. Accent sur les approches interdisciplinaires appliquées aux problèmes canadiens et l’élaboration d’une recherche concrète dans ce domaine. Cette recherche peut être le mémoire de maîtrise.

CDSB 7041 Textes canadiens de base Cr. Hrs. 3
Un certain nombre d’œuvres sont indispensables à une connaissance approfondie du Canada. Familiarisation avec le plus grand nombre d’œuvres possibles tirées de ce “canon”; évaluation de ces œuvres de façon critique. On aura à présenter virtuellement une analyse critique d’une demi-douzaine d’œuvres canadiennes, choisies en consultation avec la personne responsable du cours.

CDSB 7051 Francophonies canadiennes et internationales Cr. Hrs. 3
Ce cours en ligne explore l’émergence de la francophonie institutionnelle et le rôle du Canada dans ce processus. Il traite des enjeux sociaux, culturels, économiques et politiques de la francophonie à l’échelle régionale, nationale et internationale ainsi que des défis contemporains de la francophonie dans le contexte de la mondialisation, des enjeux identitaires et socioéconomiques chez les francophones en situation minoritaire.

CDSB 7061 Peuples autochtones du Canada : Amérindiens, Inuit et Métis Cr. Hrs. 3
Ce cours en ligne permettra de saisir la diversité des peuples autochtones du Canada, de comprendre les défis auxquels ils font face et d’analyser les rapports qu’ils entretiennent avec les autres composantes de la société canadienne et le reste du monde. L’accent sera mis sur leurs aspirations, leurs perspectives, leurs revendications, leurs réussites et leur contribution à la formation de l’identité canadienne.

CDSB 7071 L’état canadien : mondialisation et flux migratoires Cr. Hrs. 3
Ce cours en ligne propose une approche interdisciplinaire pour étudier les enjeux multiples qui entourent le sujet des flux migratoires au Canada dans le contexte de la mondialisation de l’économie et des communications. Il s’agira également de saisir l’histoire des phénomènes migratoires en tenant compte des facteurs politiques, économiques et sociaux et d’explorer les effets de l’immigration sur les expressions culturelles (arts et littérature).

CDSB 7081 Droits de la personne et histoire sociale au Canada Cr. Hrs. 3
Ce cours en ligne propose une approche interdisciplinaire qui permettra de saisir les enjeux sociaux, culturels, économiques et politiques qui jalonnent l’histoire de la reconnaissance et de l’exercice des droits de la personne dans la société canadienne. La reconnaissance et l’exercice des droits de la personne, plus particulièrement au Canada, seront abordés dans la perspective de leur impact social tout au long de cette évolution.
