Course Objectives:

This course is intended to provide an introduction to the field of Criminology. The first section of the course involves learning about the origins and background of the field; examining sources of law in society, defining 'crime' and 'criminals', describing sources of information about crime, and examining the individual and social variables that are related to criminal behaviour. The second section, which constitutes the bulk of the material to be covered, includes a critical introduction to the major theories that have been developed in an attempt to explain crime. Students will also develop an understanding of the 'real life' policy implications that attach to particular criminological theories and orientations. The third section will involve discussion of specific patterns and types of crime in Canada. At all stages of the course, students will be encouraged to take an active role through class participation.
