COURSE OBJECTIVES AND DESCRIPTION:

This course is designed to provide students with an understanding of careers in three specific types of crime: conventional or street crime, 'white collar' crime, and organized crime. An objective of this course is to critically analyze the underlying conditions that lead to careers in these types of crimes. Wherever possible, the perspective of the offenders is taken into account through accounts provided by the offenders themselves who discuss their motives and life experiences.

The first section of the course examines the decision-making process of offenders in several traditional or street crimes. The second section, 'white collar crime', examines fraud, cybercrime, crimes in the professions and corporate crime. The third section, 'organized crime', examines both traditional forms of organized crime and current issues in transnational organized crime.

The instructor should be notified in writing of a student's intended absence in advance, and at least three weeks notice should normally be given where special arrangements are sought.
