

Title	1.04B Conflicts of Interest – Researcher
Version	1.0
Effective Date	June 1, 2025

Purpose

This standard operating procedure (SOP) describes potential Conflicts of Interest (COI) for Researchers and research staff engaged in human participant research, and the requirements and procedures for disclosure and managing COI.

Scope

This SOP pertains to Research Ethics Boards (REBs) that review human participant research in compliance with applicable policies and guidelines.

Responsibilities

All REB members, Office of Human Research Ethics (OHRE) Personnel and Researchers are responsible for ensuring that the requirements of this SOP are met.

Researchers are responsible for disclosing any real, potential or perceived COI to the REB.

The REB is responsible for determining whether the disclosed COI is likely to affect or appear to affect the design, conduct, or reporting of the research.

Procedures

- A COI (real, potential or perceived) arises when an individual in a position of trust has competing professional or personal interests. Such competing interests may influence their professional judgment, objectivity and independence and can potentially influence the outcome of a decision, for personal benefit. A COI may exist even if no unethical or improper act results from the conflict.
- Researchers and research team members should identify and manage COI to maintain the public confidence and trust and to maintain the independence and integrity of the research process. If a COI cannot be avoided, procedures should be in place to manage and/or to mitigate the conflict.
- The standard that guides decisions about determining COI is whether an independent observer could reasonably question whether the individual's actions or decisions are based on factors other than the rights, welfare and safety of the participants.

Researcher Disclosure of Conflicts of Interest

- Researchers submitting research applications to the REB are required to declare any COI including those of their co-investigators(s), research staff, and their immediate families (which includes spouse, common-law partners and dependent child), and close relationships.

- Such disclosures shall be in writing and sufficiently detailed to allow accurate and objective evaluation of conflict.
- The Researcher shall disclose any conflicts to the REB at the following times:
 - With the initial REB application,
 - At each continuing review of the project,
 - Whenever a COI arises, such as changes in responsibilities or financial circumstances.
- The Researcher shall cooperate with the REB and with other University representatives involved in the review of the pertinent facts and circumstances regarding any COI disclosed and shall comply with all the requirements of the REB and with the University's COI policies to eliminate and/or to manage the conflict.
- The Researcher shall ensure that all requirements from any COI reviews are appropriately incorporated into the corresponding informed consent documents and research, as applicable.

REB Review of Researcher Conflict of Interest

- The REB will review each application for disclosure of COI.
- If the Researcher indicates on the REB application that a conflict exists, the REB will determine whether the disclosed COI is likely to affect or appear to affect the design, conduct, or reporting of the research.
- The REB review shall focus on those aspects of the COI that may reasonably affect human participant protection and the steps taken should be context-based and commensurate with the risks.
- In determining the appropriate action, the REB may take into consideration information presented by the Researcher such as:
 - The nature of the research,
 - The magnitude of the interest or the degree to which the conflict is related to the research,
 - The extent to which the interest could affect the research,
 - Whether a specific individual is unique in their qualifications to conduct the research,
 - The degree of risk to the human participants involved in the research that is inherent in the research, and/or
 - The management plan for the COI already developed by the Researcher.
- The REB may approve the research and may require a management plan to, which may include changes at the Researcher's or sponsor's/funder's expense, to eliminate or to mitigate the conflict. Required actions may include, but are not limited to:
 - Divestiture or termination of relevant economic interests,
 - Mandating Researcher recusal from research,
 - Modifying or limiting the participation of the Researcher in all or in a portion of the research,
 - Monitoring research (i.e., independent review of data and other retrospective review for bias, objectivity, comprehensiveness of reporting (versus withholding data)),

- Monitoring the consent process, and/or
 - Disclosure of the conflict to organizational committees, research participants, journals.
- The REB has the final authority to determine whether a COI has been eliminated or managed appropriately.
- Any COI management plan will be documented in the final project files. Any discussions at the REB meeting regarding the COI and the management plan will be documented in the REB meeting minutes.
- After review by the REB and input by the Director, Human Research Ethics and Compliance and/or Associate Vice-President (Research), if applicable, the REB may reject research that involves a COI that cannot be appropriately managed.
